College of the Biological Sciences  
Curriculum Committee  
Wednesday, November 10, 2004  
3:15 – 4:30 p.m., 105 Biological Sciences Building

---

Present: Breitenbreger, Conroy, Seloni, Weinstein, Scholl, Gross

Biochemistry H200, new course request  
*Approved-*

Biochemistry H201, new course request  
*Approved-*

Biochemistry major requirement for MG 500 (or MG 605 & 606) - change to MG 500 (or MG 605 & 606 or Biochem 702)

*Tabled until next meeting*

Approval of changes to the PCMB minor

*The big change made is that instead of taking one course from each area, students will now take courses up to 20 credit hours. The members recommended that they should delete the part about 200 level and above courses or justify it. The committee approves the minor conditional on resolving the issue on 200 level courses.*

Assessment

*Each member will send Caroline a faculty member who they think could be interested in working on it (members can volunteer as well.) These faculty members will start thinking about creating a Matrix that will show which courses cover which desired objectives. It is also pointed out that if the department does not like their assessment year, they can always change it for the following years.*
