Curriculum Committee
Wednesday, January 12, 2005
3:30- 5:00 p.m., 105 Biological Sciences Building

Bioscience Course Prerequisites

Lists of course prerequisites were distributed to each department. All departments are asked to review the list and update and simplify as necessary.

EEOB H410, honors version of an existing course

The committee will review the proposal and e-mail comments to Caroline.

EEOB H415, honors version of an existing course

The committee will review the proposal and e-mail comments to Caroline.

EEOB 620, a new course request

Additional grading information and more weekly topic and reading information is needed in the syllabus before submitting to the CCI. Mitch will discuss these requests with Doug Nelson. Barbara will update the course request form with omissions and send to John Harder for signatures.

EEOB 654.01

Approved

PCMB H436

Approved contingent upon Caroline discussing the credit hours with the instructor. The number of credit hours seems low in relation to the class hours, but is consistent with the non-honors version.

Organic Chemistry Lab: Chem 245, 246

No objections.

Neuroscience Major

The initial discussion of a proposed Neuroscience Major was discussed. Potential members of the discussion panels were brainstormed including Brian Smith, Harold Vassein, and Mark Sager.
