

CURRICULAR APPROVAL PROCESS For A&S non-honors courses and curricula Proposal

Curricular requests (GEC and non-GEC courses, major and minor program proposal) are assigned to subcommittee based on initiating unit/individual. Each subcommittee vets all aspects of assigned requests (i.e. all requested GEC categories regardless of GEC area.) Non-A&S course requests applying for GEC status are vetted by a disciplinary subcommittee based on workload. Major and minor proposals are vetted by the full CCI after subcommittee approval

Strengths of Proposed Model

- ✓ Removes at least one approval step for GEC and Major/Minor proposals, simplifying approval and feedback process
- ✓ Eliminates need for GEC proposals to move through multiple subcommittees, decreasing wait-time between subcommittee meetings
- ✓ Provides simplified pathway to approval for proposers
- ✓ Allows former CC representatives more ownership and voting power with reference to GEC proposals
- ✓ Allows broader education for committee members on GEC and assessment plans for GEC proposals
- ✓ Maintains disciplinary expertise
- ✓ Maintains (improves) forum for information sharing and discussion of specialized topics currently done in college curriculum committees
- ✓ Panel structure would maintain current workload/time commitment for faculty members and could be expanded if volume were to increase
- ✓ Could allow more flexibility to assign proposals based on subcommittee workload
- ✓ Provides trans-A&S perspectives on all subcommittees
- ✓ Provides divisional structure which mirrors current A&S divisional structure
