 New Program/Plan

 Proposed Program/Plan Name
 Physics BS/MS

Type of Program/Plan Combined program (e.g. BS/MS, Ph.D./MD)

Program/Plan Code AbbreviationPHYSICSProposed Degree TitlePhysics BS/MS

Credit Hour Explanation

Program credit hour requirements		A) Number of credit hours in current program (Quarter credit hours)	B) Calculated result for 2/3rds of current (Semester credit hours)	C) Number of credit hours required for proposed program (Semester credit hours)	D) Change in credit hours
Total minimum credit hours completion of programmers				33	
Required credit hours offered by the unit Minimum				27	
	Maximum			33	
Required credit hours offered outside of the unit	Minimum			0	
	Maximum			0	
Required prerequisite credit hours not included above	Minimum			0	
	Maximum			0	

Program Learning Goals

Note: these are required for all undergraduate degree programs and majors now, and will be required for all graduate and professional degree programs in 2012. Nonetheless, all programs are encouraged to complete these now.

Program Learning Goals

Assessment

Assessment plan includes student learning goals, how those goals are evaluated, and how the information collected is used to improve student learning. An assessment plan is required for undergraduate majors and degrees. Graduate and professional degree programs are encouraged to complete this now, but will not be required to do so until 2012.

Is this a degree program (undergraduate, graduate, or professional) or major proposal? Yes

Does the degree program or major have an assessment plan on file with the university Office of Academic Affairs? No

A full assessment plan has been submitting using the survey form

Program Specializations/Sub-Plans

If you do not specify a program specialization/sub-plan it will be assumed you are submitting this program for all program specializations/sub-plans.

Pre-Major

Does this Program have a Pre-Major? No

Re:

Semester Program Proposal for Combined BS/MS Program

The Physics department has the following programs which will be converted from quarters to semesters:

- 1) The Undergraduate Engineering Physics Major
- 2) The Undergraduate Physics Major
- 3) The Undergraduate Physics Minor
- 4) The Combined Physics BS/MS
- 5) The Graduate Physics PhD

The subject of this proposal is the Physics combined BS/MS program; the other programs are addressed in separate proposals.

The Undergraduate and Graduate Studies Committees of the Department of Physics have worked hard to produce this proposal, describing the conversion of our current combined BS/MS program from the quarter system to the semester system.

The contents of this proposal have been discussed at length in a variety of Undergraduate and Graduate Studies Committee meetings as well as faculty meetings through the 2009-2010 academic year.

A vote on this proposal was taken on February 11, 2011. The outcome of the vote was 37 in favor, 0 opposed. As Chair of this department, I strongly endorse this proposal.

The Physics BS/MS Program Under Semesters

Rationale for Changes to the Combined BS/MS Physics Program from quarters to semesters

There are no significant changes to the Physics BS/MS Program under semesters, compared to the present program under quarters.

BS/MS in Physics program under semesters

i) General information

The masters portion for the BS/MS degree is not fixed, but is planned by the student and a member of the Graduate Faculty who acts as an advisor to meet the student's individual needs and interests. (BS/MS Students must have an identified faculty advisor prior to acceptance into the BS/MS program.) Each candidate for the master's degree must fulfill all Graduate School requirements for that degree. The student should become familiar with the current requirements and the order in which they must be fulfilled.

ii) Summary and comparison to the program under quarters

a) Program under quarters

- 1) Minimum GPA of 3.0 (B average) in all required courses. The required courses include:
 - a) 2 physics courses at the 800-level
 - b) 3 Physics courses at the 600-level or above
 - c) 2 other courses at the graduate level (not necessarily in Physics, but approved by the program advisors)

The total hours in the above required courses ranges from 26-28 quarter-hours.

- b) Up to 20 quarter-credit hours may be double counted for both the BS and MS degrees.
- 3) A minimum of 14 quarter-credit hours of research.
- 4) A minimum of 50 quarter-credit hours total.
- 5) A written report and final oral examination.

b) Program under semesters

- 1) Minimum GPA of 3.0 (B average) in all required courses. The required courses include:
 - a) 1 physics course at the 7000-level or above
 - b) 2 Physics courses at the 5000-level or above
 - c) 2 other courses at the graduate level (not necessarily in Physics, but approved by the program advisors)

The total hours in the above required courses ranges from 15-19 semester-credit hours.

- 2) Up to 12 credit hours may be double counted for both the BS and MS degrees.
- 3) A minimum of 10 semester-credit hours of research.
- 4) A minimum of 33 semester-credit hours total.

5) A written report and final oral examination.

iii) Semester BS/MS Program Requirements - Details

- a) All students together with their advisor will be responsible for the development of a program of course work and research appropriate to her/his background, abilities, and goals. b) All students must take a minimum of 33 semester hours of graduate credit, including the following coursework and research.
 - (1) All students must complete at least 1 Physics course at the 7000-level or above, and two courses at the 5000-level or above. Students also are required to take a minimum of 2 additional graduate level courses. These additional courses do not need to be in the Physics department, but must be chosen in consultation with the students faculty advisor and must be approved by the BS/MS program advisor (typically the Vice Chair for Graduate studies or his/her designate). All students must maintain a GPA of 3.0 in these courses.
 - (2) A maximum of 12 semester credit hours may be double counted for both the BS and MS programs. The students are expected to work with advisors from both the Undergraduate and Graduate Physics programs to ensure that the courses chosen for double counting in fact satisfy the requirements for both programs. These could be 5000-level or above Physics courses.
 - (3) Students must complete a minimum of 10 semester-hours of research credit (normally satisfied by Physics 7998 or 8998).
- c) Students must present a written report which along with their above research hours demonstrates competence in individual research.
- d) All students must pass a Final Oral Examination. The oral portion of the Master's Examination is held after the submission for approval of the final written report and in the semester the student expects to graduate. An "Application to Graduate" form must be filed with the Graduate School by the appropriate deadline for that semester. The oral examination will be at least one hour in length. It will be conducted by a committee composed of the candidate's advisor (chairperson) and at least one other member of the graduate faculty. The chairperson of the examining committee is responsible for arranging the examination and for certifying its results to the Graduate School and to the departmental Graduate Studies Committee. (There is a form for the report to the Graduate School.) The report of a two-person committee must be unanimous in order to be considered satisfactory. The certification to the Graduate School of the successful completion of the requirements for the BS/MS program shall be made by the student's advisor and the Vice Chair for Graduate Studies and Research. A candidate who fails this examination must register in the Graduate School and continue work for an additional semester before an opportunity will be given for a second examination. No student will be permitted a third examination.

Transition Policy

Students who began their degree under quarters will not be penalized as we move to semesters, either in terms of progress towards their degree or their expected date of graduation.

Students enrolled in this program will need to separately satisfy both the BS requirements (listed elsewhere) and MS requirements (listed in this document). A detailed semester transition plan is available for the BS program.

Most BS/MS students should be able to finish this program with one additional year of study beyond that required to finish their BS program. The **overall** credit requirements of the MS part of the BS/MS program are the same under quarters or semesters (33 hours under semesters vs 50 hours under quarters). The requirements are slightly reduced for semesters relative to quarters in the two broad categories of course hours and research hours, and so it is slightly easier for students to graduate under semester requirements.

Students who begin the master portion of their study under quarters but finish under semesters will use the following guidelines:

- 1) Students will be allowed to graduate under fully quarter requirements or fully semester requirements, with the standard conversion of 1 quarter hour of credit being equal to (2/3) semester hour of credit.
- 2) 7000-level courses under semesters will count as 800-level courses under quarters and vice versa. Same for 6000-level semester courses and 700-level quarter courses, as well as 5000-level semester courses and 600-level quarter courses.
- 3) The minimum required coursework hours will be 26 quarter hours for graduating under quarter requirements, and 15 semester hours for graduating under semester requirements.
- 4) The minimum required research hours will be 14 quarter hours for graduating under quarter requirements, and 10 semester hours for graduating under semester requirements.

Students who begin the masters portion of their study under semesters can only graduate under fully semester requirements.

As this program is quite new (started in academic year 2010) with a very small expected number of students (less than 5 per year), we expect to provide substantial one-on-one advising help to any students enrolled in this program during the transition from semesters to quarters. In addition, as part of the admission requirements to the program, students are required to have identified a willing faculty advisor. This advisor, along with the Undergraduate and Graduate Vice Chairs, will ensure that students in this program receive appropriate guidance towards finishing both the BS and Masters programs.

The Master's Examination Oral Portion

The oral portion of the Master's Examination is held after the submission of the final written report (plan B) and in the quarter the student expects to graduate. An "Application to Graduate" form must be filed with the Graduate School by the appropriate deadline for that semester. The oral examination will be at least one hour in length. It will be conducted by a committee composed of the candidate's advisor (chairperson) and at least one other member of the graduate faculty. The chairperson of the examining committee is responsible for arranging the examination and for certifying its results to the Graduate School and to the departmental Graduate Studies Committee. (There is a form for the report to the Graduate School.) The report of a two-person committee must be unanimous in order to be considered satisfactory. The certification to the Graduate School of the successful completion of the requirements shall be made by the student's advisor and the Vice Chair for Graduate Studies and Research. A candidate who fails this examination must register in the Graduate School and continue work for an additional semester before an opportunity will be given for a second examination. No student will be permitted a third examination.

	The Maeter's Evamination	on Oral Porti		1				

The oral portion of the Master's Examination is held after the submission of the final written report (plan B) and in the quarter the student expects to graduate. An "Application to Graduate" form must be filed with the Graduate School no later than the second Friday of that quarter. The oral examination will be at least one hour in length. It will be conducted by a committee composed of the candidate's advisor (chairperson) and at least one other member of the graduate faculty. The chairperson of the examining committee is responsible for arranging the examination and for certifying its results to the Graduate School and to the departmental Graduate Studies Committee. (There is a form for the report to the Graduate School.) The report of a two-person committee must be unanimous in order to be considered satisfactory. The certification to the Graduate School of the successful completion of the requirements shall be made by the student's advisor and the Vice Chair for Graduate Studies and Research. A candidate who fails this examination must register in the Graduate School and continue work for an additional quarter before an opportunity will be given for a second examination. No student will be permitted a third examination.
