Rob,

My name is Don Sylvan, and I chair the Social Science GEC Panel of the A&S Curriculum Committee. Our panel met today and considered the two GEC proposals from your department. We have recommended that 430 be approved, but have asked that 250 not be considered until you have answered some of our panel's questions. First, help us understand why this course should count for the Social Science GEC rather than the Biological Sciences GEC. Second, and relatedly, please directly address the attached guidelines in explaining why this course should meet a Social Science GEC requirement.

Thanks in advance for your cooperation.

Don Sylvan
