Career Research Online is a one-credit, four week distance course offered during fall, winter and spring quarters. Students will explore career interests, learn online research skills, and apply them as they investigate an occupation in depth. Class begins on Monday of the fourth week of the quarter and runs through the seventh week.

For this course there are no class meetings. The Internet is our classroom and some *net.TUTOR* tutorials are used as an electronic textbook. We use a secure course Web site to communicate and distribute online assignments.

Please read this page carefully for important information about the course and the secure course Web site. You may wish to print it for future reference.

Course Goals

In this course, students will:

1. Complete a self-assessment, in order to relate interests and abilities to specific occupations.
2. Learn or review effective Web search techniques and key resources.
3. Use Web databases to locate background and factual information about occupations, educational, and employment opportunities.
4. Employ library databases and Web resources to find in-depth information about occupational experiences and trends.

Student Requirements

Because of the unique nature of this online course, students must have:

1. **Some prior experience using computers and the World Wide Web**, as well as a desire to improve these skills. Students should have mastered these basic computing/Web browsing skills before beginning the course:
 - how to use a mouse
 - [how to highlight, copy and paste text](#)
 - [how to use the scroll bar](#)

- [how to return to previous Web pages](#)
- [how to select items in pull-down lists](#)
- [how to toggle \(move\) between two Web browser windows](#)
- [how to close new Web browser windows](#)

If any of these tasks are unfamiliar, click on the links above and read more about them now.

2. **An activated OSU Internet account**, in order to connect to the secure course Web site and complete assignments.
3. **Regular access to an Internet-connected computer with a Web browser that is compatible with Carmen (OSU course management software)**, either at home or on campus. It is important to use one of the recommended Web browsers for this course AND to set it up correctly. *Failing to do so may cause errors in your assignments, lost points and a lower grade.* See [Carmen: Information for Students](#) for details.
4. **Ability to follow written directions.** You will be working independently to complete the course assignments and must rely on written instructions.
5. **A commitment to visit the course Web site and read your OSU e-mail regularly**, at least several times each week.

You may also want to look at [Are You Ready for Online Courses?](#). These characteristics will help you in online courses at Ohio State.

Course Materials

Your primary textbook (or "e-text") for this course is [net.TUTOR](#), a free program of interactive, Web-based tutorials designed by The Ohio State University Libraries.

The Web address of net.TUTOR is <http://liblearn.osu.edu/tutor/>

Although some net.TUTOR tutorials are also used in another online course (USAS 120D, Internet Tools and Research Techniques), there is **minimal overlap with USAS 120D** with regard to reading materials and assignments.

Assignments

All assignments are found within the secure course Web site. Each week, a group of new assignments will become available for completion. All are due at the end of the four week course.

Because we are compressing a ten week course into four weeks, students should expect to spend between 5 - 8 hours each week completing assignments.

Types of Assignments

- **Self-Assessments:**
During the first week, students will complete career-related self-assessments.
- **Required Readings and Tests:**
Specific *net.TUTOR* tutorials will be assigned during the first three weeks. Be sure to read every page of these tutorials and try suggested activities along the way.

Tutorials are accompanied by online tests, which will also be assigned on a weekly basis. These tests are scored automatically, so you will know your grade immediately. *You may take*

these tests only once.

- **Worksheets:**

Online worksheets, which provide practice for the skills learned in the tutorials, will be assigned during weeks 1-3. They are completed and submitted using the Web browser. The worksheets are also scored automatically, like the tests. *You can submit each worksheet once.*

- **Research Assignments:**

During the first three weeks, you will complete a research assignment each week that is related to that unit's topical focus. These assignments are open-ended (not multiple-choice) and are graded individually by course instructors.

- **Capstone Assignment:**

During the fourth week of class, you will complete this online assignment, requiring you to apply the skills you learned during previous weeks to a particular project. You will have a choice of several different projects. The capstone assignment will be graded by course instructors.

Topical Focus of Assignments

- **Week One:** Web search sources and techniques; self-assessments.
- **Week Two:** Background, data and news sources for occupational information
- **Week Three:** In-depth research (finding books and articles) on occupations.
- **Week Four:** Capstone assignment is a final research report. Several options are available for students.

Grading Scale

Points are awarded on the following basis:

13 Required Assignments = 200 points

1. 6 online tests associated with the net.TUTOR tutorials = 60 points maximum
2. 3 online worksheets, 10 points each = 30 points maximum
3. 3 research assignments, 20 points each = 60 points maximum
4. Capstone assignment = 50 points maximum

Students must complete all required assignments. A penalty of up to 20 points may be deducted from the final point total for failing to complete all required assignments.

Extra-Credit = 10 points

There is an opportunity to earn extra credit points, which are added to the total points earned and count toward your final course grade.

How Course Grade is Calculated

The course grade is based on the total point value accumulated for completing assignments. The chart below shows letter grades, associated point values and percentages.

Grade	Points	Percent
A	185 - 200 points and above	93 percent and above
A-	179 - 184 points	90 - 92 percent
B+	173 - 178 points	87 - 89 percent
B	165 - 172 points	83 - 86 percent
B-	159 - 164 points	80 - 82 percent
C+	153 - 158 points	77 - 79 percent
C	145 - 152 points	73 - 76 percent
C-	139 - 144 points	70 - 72 percent
D+	133 - 138 points	67 - 69 percent
D	120 - 132 points	60 - 66 percent
E	119 points and below	59 percent and below

How to Succeed:

1. **Visit the course Web site regularly.** Be sure to read announcements posted on the site.
2. **Spend some time each week working on assignments.** Since this is a four week course (and the work of ten weeks is compressed into four), you really need to stay on track.
3. **Get in touch with the instructor** by e-mail, telephone or in person if you have any questions or concerns as you work through the course. Information on how to contact your instructor can be found in the "Get Help" section of the course Web site. We want to make this a good experience for you and will work with you to solve any problems.

Secure Course Web Site

This course uses software called **Carmen**, which is also used by many other courses at Ohio State. To connect to the USAS 194 secure course Web site, you must first connect to the computer running Carmen, then identify yourself (login) by supplying your OSU Internet username and password. If you are listed on the roster for a course, you will be permitted to view it.

Logging In to Carmen:

1. **Go to the Carmen Login page**
Type this address in the browser location space and press ENTER or RETURN:
<http://carmen.osu.edu>
2. **Type your OSU Internet user name:** lastname.#

3. Type your OSU Internet password (the one you use for OSU e-mail, Web registration, etc.).
4. View your personal Carmen home page. All of your OSU courses that use Carmen will be listed.
5. Course link
Click on the title, USAS 194D, Career Research Online, to view the course home page. You may need to click on the plus sign (+) next to the current quarter to expand the listing and see your courses.

Help with Carmen Log-in Problems

For help with login problems, contact the OSU Technology Support Center:

- Call 614-688-HELP (4357): Monday - Friday 7 AM to 10 PM; Sunday 4 - 10 PM
- Fill out the Carmen Help Form: <http://8help.osu.edu/forms/carmenhelp.php>

Course Web Site Organization

The secure course Web site includes the following major sections:

Course Home	This is the first page you will view after clicking on the course title in Carmen. It includes news and announcements as well as a course calendar.
Content	This major section of the course site includes general course information (including the course syllabus) and links to all course assignments. There is a separate section for each of the four weeks.
Discussions	This link provides access to the course discussion forums, which may be read by everyone enrolled in the class.
Dropbox	This is where you will put your completed final (capstone) assignment.
Grades	This is a complete list of your grades on all assignments.
Glossary	Here you can browse a dictionary of key technical terms used in the course readings and also search for particular words.
Classlist	You will go here to communicate with instructors and other students using e-mail or the paging (instant messaging) tool.

Academic Integrity

The instructors expect each student to act with integrity and honesty. Students are expected to submit their own work on all assignments in this course. Ohio State University has an established Code of Student Conduct, which all students are expected to be familiar with. Any violations will be dealt with in accordance with established procedures. This means that an offense will be reported to the University Committee on Academic Misconduct for investigation and disposal. Penalties may range from an "E" in the course to dismissal from the University.

More information:

- [Definition of Academic Misconduct](#)
 - [Code of Student Conduct](#)
-

Communication Policy

The course discussion forums are for course-related purposes only. Personal conversations not related to this course should be conducted privately. Failure to observe this policy may result in disciplinary action.

All electronic communications conducted in the course of this class are bound by the same principles of respect, professionalism, and concern as any other interactions in the University's classrooms or offices.

Derogatory or inappropriate comments regarding race, gender, age, religion or sexual orientation are unacceptable and subject to disciplinary action, as they would be if they occurred in the physical classroom.

If you feel that these principles have been compromised in some way, please discuss this privately with your instructor.

Getting Help

Frequently asked questions and answers (also called a FAQ) are available on the course Web site. Look here first if you don't understand something.

Effective communication is critical to success in an online class. You will be responsible for initiating contact and for being persistent when you need additional help.

If the FAQ doesn't provide the help you need, you may:

1. Send e-mail to the instructor.
2. Telephone the instructor.
3. Visit the instructor (or the teaching assistant working with your instructor). Drop in during office hours or make an appointment for one-to-one help with the course.

Specific information on how to contact the instructor for your section is available on the course Web site.

Students who feel they may need an accommodation based on the impact of a disability should contact the instructor as soon as possible. We rely on the Office for Disability Services for assistance in verifying the need for accommodations and developing accommodation strategies. If you have not previously contacted the Office for Disability Services, we encourage you to do so:

- Telephone: 614-292-3307
 - TDD: 614-292-0901
