A General Elective

Indicate the nature of the program adjustments, new funding, and/or withdrawals that make possible the implementation of this new course. Evidence must be given of whether the budget support will come from reallocation of existing resources or from new program funds.

This change does not require new funding.

Is approval of this request contingent upon the approval of other course or curricular requests? Yes No

Describe any changes in library, equipment, or teaching aids needed

Purpose of the proposed change

The number of Actuarial Science majors has increased significantly in recent years. Math 618, 630, 631, 632 are core requirements for those students. Students outside of Math and Actuarial Science do not have as much need to enroll in those courses: space is not available for them. When suitable instructors are hired the course size will expand.

Proposed change impacts course contents?

Describe the method of funding if the proposed changes involves budgetary adjustments

Please complete and attach the form(s) on the following page before completing the package.
