Prof. Dotson:

I apologize for the delay in getting back to you about our subcommittee meeting. In our meeting, we appreciated the more detailed rationale and explanation of student interest in the course; however we still had two issues that we wanted you to respond to. Committee members were still interested in seeing support letters from departments in the sciences or Engineering (or other units) demonstrating their interest in having such a course made available for their students. Also, some members felt that the amount of course work content required was light for a three credit course.

We would be happy to re-examine the proposal after you've had a chance to resubmit any additional or revised documentation. Thanks very much for your patience in all this.

Thank you.

Jim
