Physics Minor Physics Minor PHYSICS-MN

Credit Hour Explanation

Program credit hour requirements		A) Number of credit hours in current program (Quarter credit hours)	B) Calculated result for 2/3rds of current (Semester credit hours)	C) Number of credit hours required for proposed program (Semester credit hours)	D) Change in credit hours
Total minimum credit hours required for completion of program		21	14.0	14	0.0
Required credit hours offered by the unit Minimum		21	14.0	14	0.0
	Maximum	21	14.0	16	2.0
Required credit hours offered outside of the unit Minimum		0	0.0	0	0.0
	Maximum	0	0.0	0	0.0
Required prerequisite credit hours not included above		34	22.7	20	2.7
	Maximum	41	27.3	29	1.7

Program Learning Goals

Note: these are required for all undergraduate degree programs and majors now, and will be required for all graduate and professional degree programs in 2012. Nonetheless, all programs are encouraged to complete these now.

Program Learning Goals

- Undergraduate Physics minors acquire training in fundamental areas of physics, from classical mechanics, through electricity and magnetism, and finally to modern physics including quantum mechanics and relativity.
- Undergraduate Physics minors acquire analytical and problem solving skills in areas involving both physics and mathematics.
- Undergraduate Physics minors acquire a basic mastery of experimental physics at the intermediate level.
- Undergraduate Physics minors acquire training in at least one area of physics at the intermediate level or beyond.

Assessment

Assessment plan includes student learning goals, how those goals are evaluated, and how the information collected is used to improve student learning. An assessment plan is required for undergraduate majors and degrees. Graduate and professional degree programs are encouraged to complete this now, but will not be required to do so until 2012.

Is this a degree program (undergraduate, graduate, or professional) or major proposal? No

Program Specializations/Sub-Plans

If you do not specify a program specialization/sub-plan it will be assumed you are submitting this program for all program specializations/sub-plans.

Pre-Major

Does this Program have a Pre-Major? No

February 15, 2011

Larry Krissek Chair, Arts and Sciences CCI

Dear Larry:

It is a pleasure to forward to you the proposal for the minor in Physics under semesters. The minor has been minimally modified from its present quarter version mainly by the splitting of upper division courses in quantum mechanics and electromagnetic field theory into honors and non-honors versions to better meet the needs of the students. It is a solid proposal, well conceived.

Beyond my own review of the documents, the proposal has been discussed by colleagues from other NMS units at a meeting on October 20, 2010. Feedback from these discussions and from the Science Subcommittee of CCI, as well as from CCI itself, has been incorporated in the proposal.

If you have any questions, I would be happy to address them.

David Chrolin

Sincerely,

David Andereck Professor of Physics

Associate Dean of Natural and Mathematical Sciences, College of Arts and Sciences

186 University Hall 230 North Oval Mall Columbus, OH 43210

Phone (614) 292-1667 Fax (614) 292-8666 Web <u>artsandsciences.osu.edu</u>

November 16, 2010

Professor Larry Krissek Chair, Arts and Sciences CCI Re: Physics Minor

Dear Professor Krissek:

At the CCI's Sciences Subcommittee meeting of November 10, 2010 the semester conversion plan for the Physics minor was reviewed. The subcommittee thought the conversion plan was straightforward and well done. The plan was unanimously approved and it is being submitted for the next step in the approval process.

Sincerely,

Gene E. Mumy

Acting Subcommittee Chair for Nov. 10

Love E. Muny

Associate Dean of Arts and Sciences/Social and Behavioral Sciences

Office of the Chait 191 West Woodruff Avenue Columbus, OH 43210-1117

> Phone (614) 292-2653 Fax (614) 292-7557

To: Office of Academic Affairs

From: James J. Beatty, Chair, Department of Physics

Date: October 12, 2010

Re: Semester Program Proposal for Undergraduate Physics Minor

The Physics department has the following programs which will be converted from quarters to semesters:

- 1) The Undergraduate Engineering Physics Major
- 2) The Undergraduate Physics Major
- 3) The Undergraduate Physics Minor
- 4) The Combined Physics BS/MS
- 5) The Graduate Physics PhD

The subject of this proposal is the Undergraduate Physics Minor; the other programs will be addressed in separate proposals.

The Undergraduate Studies Committee of the Department of Physics has worked hard to produce this proposal, describing the conversion of our current Undergraduate Minor in Physics from the quarter system to the semester system.

The contents of this proposal were discussed at length in a variety of Undergraduate Studies Committee meeting as well as faculty meetings through the 2009-2010 academic year. A preliminary version of the proposal was presented and discussed in a "Town Meeting" with undergraduate Physics and Engineering Physics majors on April 15, 2010. Based on their comments, a revised proposal was unanimously approved in a meeting of the Undergraduate Studies Committee on April 20, 2010. This version was then circulated for faculty review and comments, with a vote on the proposal completed on April 30. The outcome of the vote was 44 in favor, 0 opposed.

Rationale for Changes to the Undergraduate Physics Minor Program

There are no significant changes to the Physics Minor program.

The date of the last significant revision to the Physics Minor program was in 1998.

Transition policy for the Physics Minor

Students who began their degree under quarters will not be penalized as we move to semesters, either in terms of progress towards their degree or their expected date of graduation. Transition plans are currently being developed for students who will be at a variety of different stages (one year towards degree, two years, etc.). We do not at present see a need for bridge courses in Physics for any students who are beyond the introductory (i.e. first year) Physics classes. However, bridge courses (1-2 credit semester hours) in Mathematical Methods in Physics are being considered for Physics majors who may be somewhat behind in math preparation due to the transition. Bridge courses will be available for students who have completed part of the 3-quarter introductory sequence in either of our service courses in Physics (i.e Physics 111-2-3 or 131-2-3). The bridge courses will be offered during the summer prior and first year after the transition. They may be offered the 2nd year after the transition.

To address the details of how students who have credits under both semesters and quarters will graduate, we have implemented a "Quarters to Semesters Transition Advising Worksheet", which will be filled out for any physics major who will graduate with physics courses accumulated under both quarters and semesters.. The basic strategy is to combine credit hours accumulated under quarters, semesters, or both, in broad categories. The credit hours under quarters are weighted by 0.67, summed with semester hours for that same category, and compared to a minimum for that category. In addition, minima are defined for overall hours summed among groups of categories. The minima are chosen so that students are not penalized for course sequences taken partially under quarters and completed under semesters, while ensuring that the requirements of the program are still met. This worksheet will be filled out for every Physics Minor as part of the requirements for Physics 295 (or Physics 2095 under semesters), a course all Physics minors take. Students who are in Physics 295 in Autumn 2010 are the first group of students expected to graduate under semesters.
