Yes, we will add language to say that it could be offered as a reading course....

Yes, sorry, my bad. In my haste, I misquoted. So, what happens if only a few students need to take 5299?

I am a little confused. The transition is:

528, then 5299, and then 5302.

Is your question, "what happens if only a few students need to take 5299?"

Thank you for the clarification,  
Peter.

Sorry, Peter, one other thing on the Stat minor—in the transition policy, could you

add a sentence or phrase that describes what you would do if there are only a handful of students who would need a bridge course between 528 and 5299? Would they take a readings course?
