Subject: Re-submission of General Business Minor
Date: Wednesday, March 09, 2011 1:17:27 PM

Dear Professor Fredal,

Thank you for the information you provided regarding our proposal for the General Business Minor under semesters. We are re-submitting the proposal with the following changes:

1. The required prerequisite hours have been changed to 8-12. The reason for the variance is that there are multiple courses in Mathematics and Computer Science that may satisfy those prerequisite requirements. Eligible Math courses range from 3-5 semester credits; eligible Computer Science courses range from 2-4 credits; eligible Economics prerequisites are always 3 credits. The minimum combined credit hour value of the three prerequisites is therefore 8 and the maximum value is therefore 12.
2. We have changed course numbers for four of the five courses from 2000 level to 3000 level. Indeed, the current versions of those courses are 400-level (upper division). Our original thought was to renumber these courses at the 2000 level to encourage students to begin taking them earlier in their programs under semesters. However, we have no difficulty in renumbering them to the 3000 level.

We believe these changes address the revision issues you raised in your message.
