## Program Learning Goals

Note: these are required for all undergraduate degree programs and majors now, and will be required for all graduate and professional degree programs in 2012. Nonetheless, all programs are encouraged to complete these now.

### **Program Learning Goals**

- Students explore the lived experiences of disabled persons in a variety of cultural and historical contexts
- Students examine the social and political construction of disabilities in relationship to attitudes, language, cultural norms, and social practices
- Students explore the political intersections of disability identities with other cultural identities (e.g. gender, race, social class, religion, etc.)
- Students understand how to contribute to efforts (e.g. advocacy, personal support, public policy, education) to improve the life conditions of disabled persons

## Assessment

Assessment plan includes student learning goals, how those goals are evaluated, and how the information collected is used to improve student learning. An assessment plan is required for undergraduate majors and degrees. Graduate and professional degree programs are encouraged to complete this now, but will not be required to do so until 2012.

**Is this a degree program (undergraduate, graduate, or professional) or major proposal?** No

## Program Specializations/Sub-Plans

If you do not specify a program specialization/sub-plan it will be assumed you are submitting this program for all program specializations/sub-plans.

## Pre-Major

Does this Program have a Pre-Major? No

Professor Larry Krissek  
Chair, Arts and Sciences CCI  
Re: Disabilities Studies Minor

Dear Professor Krissek:

The CCI's Arts and Humanities 2 subcommittee met on April 27, 2011, and reviewed the semester conversion plans for the minor in Disabilities Studies, an interdisciplinary program that now resides in the Diversity and Identity Studies Collective at OSU (DISCO). The conversion follows the current Disabilities Studies minor closely with no substantive change. Our committee had reviewed this program at an earlier date and recommended several corrections and clarifications. At our April 27 meeting we again reviewed the proposal and voted unanimously to send it on to the full CCI, although a couple of concerns remain:

- Three courses in Social Work at the graduate/professional level (Social Work 750.04, 751.03: and 751.04) are listed as counting in the minor. These courses should be removed, or, if included (with the appropriate semester numbers) the proposal should state why they are appropriate for the minor, and that they will require (so we assume) advisor approval (which should also be noted on the semester advising sheet).
- In the program rationale statement, the word "person" in the last line should be replaced by "personal."

Sincerely,

A handwritten signature in black ink that reads "Mitch Masters".

Dear Larry,

The Oversight Committee for the Disability Studies Minor has completed and submitted its proposal for the semester version of its interdisciplinary minor: Minor in Disability Studies. A subgroup of the Arts and Humanities Disciplinary Advisory Panel for Curriculum within the College of Arts and Sciences reviewed and unanimously approved the undergraduate minor during Winter Quarter 2011, provided feedback to the oversight committee, and is now forwarding it for review at full CCI. Please note that since this program crosses multiple units, only the first line on the PACER chart has been completed.

Most specifically, I have highlighted the important change for the program below:

**Minor in Disability Studies:** The Minor in Disability Studies was last revised and approved by CAA previous to 2006 as there are no electronic ASC records after 2006 that indicate approval. The minor is changing with minimal conversion. There were five courses required on the quarter version for a total of 21-25 credit hours, and there are five courses required on the semester version for a total of 14 credit hours. The two core courses are the same: English 277, which is now 2277, and Speech and Hearing Science 510, which is now 4510. Additional course work is selected from the same course list, with a few additional courses.

We are sending this undergraduate minor program forward for review and approval in the next stage of curricular review at the Arts and Sciences Committee on Curriculum and Instruction.

The courses that are specific to all of the programs are listed under multiple Book 3 Listings across different colleges. If you have any questions or concerns, please do not hesitate to call or email me at 292-5727 or [williams.1415@osu.edu](mailto:williams.1415@osu.edu).

Thank you for your consideration of these proposals,

RE: Semester Conversion of the Interdisciplinary Minor in Disability Studies

I am writing in support of the semester conversion of the Disability Studies Minor prepared by Scot Danforth, coordinator of the program. Because there are no major changes being made to the Disability Studies Minor, this is a simple conversion of course numbers, credit hours, and basic requirements. In short, the minor is being converted without substantive change.

Disability Studies now resides under the Diversity and Identity Studies Collective at OSU (DISCO), which I direct. This unit is housed in the College of Arts and Sciences; we report to Arts and Humanities Divisional Dean Mark Shanda. Please let me know if you need additional information.

Sincerely,

## **Disability Studies Minor**

### **Program Rationale Statement**

The purpose of the Disability Studies Minor is to offer students studying in a variety of fields opportunities to examine the nature, meaning, and consequences of disability in many cultures from an integrated social, political, cultural model. It incorporates historical, phenomenological, political, cultural, medical, sociological, technological, educational, and legal perspectives in order to provide an enriched and coherent view of disability as part of universal human experience, by understanding and analyzing disability as a phenomenon that simultaneously manifests itself at the bodily, person, and societal levels.

### **Program Learning Goals**

1. Students explore the lived experiences of disabled persons in a variety of cultural and historical contexts
2. Students examine the social and political construction of disabilities in relationship to attitudes, language, cultural norms, and social practices
3. Students explore the political intersections of disability identities with other cultural identities (e.g. gender, race, social class, religion, etc.)
4. Students understand how to contribute to efforts (e.g. advocacy, personal support, public policy, education) to improve the life conditions of disabled persons

### **Transition Policy**

Any completed Quarter courses that met the requirements of the minor prior to program conversion will be accepted. Credits will be converted from Quarter to Semester hours. This policy will be maintained even if a student declares the minor after the University has switched to Semester system.

All other unforeseen issues that may arise will be resolved by the Coordinator of the Disability Studies Program in consultation with the Coordinator the Diversity and Identity Studies Collective.
