**Program Learning Goals**

Note: these are required for all undergraduate degree programs and majors now, and will be required for all graduate and professional degree programs in 2012. Nonetheless, all programs are encouraged to complete these now.

**Program Learning Goals**      • Learning Goals, Assurance of Learning Plans, and pre-Major requirements are the same as those for the BSBA and individual BS degree programs, respectively.

**Assessment**

Assessment plan includes student learning goals, how those goals are evaluated, and how the information collected is used to improve student learning. An assessment plan is required for undergraduate majors and degrees. Graduate and professional degree programs are encouraged to complete this now, but will not be required to do so until 2012.

**Is this a degree program (undergraduate, graduate, or professional) or major proposal?** No

**Program Specializations/Sub-Plans**

If you do not specify a program specialization/sub-plan it will be assumed you are submitting this program for all program specializations/sub-plans.

**Pre-Major**

**Does this Program have a Pre-Major?** No

## Credit Hour Explanation for BSBA BS

Since the BSBA-BS dual degree program can be done with any combination of BSBA 13 specializations and over 20 BS majors, the credit hour table below is limited to total hour requirements for the two degrees.

Program Credit Hour Requirements	A Number of credit hours in current program (Quarter credit hours)				B Calculated Result for 2/3rds of current (Semester credit hours)	C Number of credit hours required for proposed program (Semester credit hours)				D Change in Credit Hours
	BSBA Requirements	BS Requirements	Overlap	Total		BSBA Requirements	BS Requirements	Overlap	Total	
Total minimum credit hours required for completion of program	186	181	156	216	144	121	121	101	141	3

**Explain any change in credit hours if the difference is more than 4 semester credit hours between the values listed in columns B and C for any row in the above table**

## **BSBA-BS Dual Degree Program Rationale**

The Fisher BSBA and Arts and Sciences BS dual degree program had its inception in the late 1970's with an articulated program leading to the BSBA in International Business and the BA in German. Over the next several years following, the program was expanded to include all languages, then further expanded to include all Arts and Sciences programs leading to the BA, BS, or BA in Journalism (but not tagged degrees other than Journalism).

The dual degree option permits students to combine a liberal arts degree with a major in a traditional arts and sciences discipline and a general business degree which includes depth in one or more business specializations. Usually these are complementary programs, such as Economics or mathematical sciences and Finance, or a pre-professional major with a business specialization. The disciplines can also be as disparate as a student's interests (a recent graduate completed degrees in Physics and Accounting, for example).

The dual degree program consists of several elements. General Education requirements (which have significant similarities for the BSBA and the BS) are articulated between the two programs, with both programs following the GE requirement for the program having the more extensive and/or more highly specified requirement. For example, while BS students are required to take Math 152 (1151 under semesters) to satisfy the Math and Logical Analysis requirement within the Quantitative and Logical Skills category, Business students are required to take Math 132 (1131) or 152 (1151 under semesters), so both degree programs specify Math 152 (1151 under semesters) for that requirement in the articulated GE. Similarly, Business students are not required to take foreign language (except for International Business), but Arts and Sciences BS students are, so a dual degree student takes a foreign language irrespective of the specialization in Business.

In addition to the articulated General Education requirements, dual degree students are required to complete all courses for the Arts and Sciences major not covered by General Education and all Business core and specialization courses for the BSBA not covered by General Education.

Under quarters, the total minimum number of hours required for the dual degree program is 216. This is 30 hours beyond the degree with the highest number of total hours required (Business requires 186;  $186+30=216$ ). This compares to the 45 minimum hours required for a second baccalaureate when completed after a first baccalaureate where no dual degree arrangement exists, so BSBA-BS students have at minimum one quarter of coursework economy as a result of the dual degree arrangement. With early identification and good academic planning, both degrees can currently be completed in a little over four years. Degrees are generally awarded concurrently, but can be awarded consecutively if preferred by the student.

Currently, over 200 students are enrolled in the Arts & Sciences/Business dual degree program (both BA & BS) with about 40 students graduating each year. The substantial majority of these are BA students, but there are a few students pursuing the BSBA and the BS.

Conversion to semesters is quite straightforward. Dual degree students will still complete the Arts and Sciences major requirements and the Business core and specialization requirements in addition to completing a revised set of General Education requirements that articulates the new GE requirements for the two degree programs. Total number of hours required for the dual degree will be 141 semester hours (121 +20). With early identification and good planning, students should still be able to complete both degrees with one additional semester or two summers.

##### One upper division Economics course:

Economics 501, 502, 520, 530, 570, 580 (Economics 520 required for finance; Business Administration: Management and Human Resources 651 required for human resources)

#### ASC Major, 40-80 hours

Your major program must consist of at least 40 hours of credit in courses numbered 200 or above as prescribed by your faculty adviser. Hours required vary with the major program selected. Students majoring in an ASC foreign language and in international business are not required to take the nine hours of major electives in the international business major. Courses used on the Business core requirements or the Business specialization cannot be counted on the ASC major.

#### Business Specialization, 20-31 hours

Hours vary depending on the specialization selected. The BSBA economics specialization requires Econ 501 and 502; finance also requires Acct&MIS 521 and 522. Students majoring in an ASC foreign language and in international business are not required to take the nine hours of major electives in the international business major.

#### D = Done for the GEC

You must earn at least a D in a course for it to meet a GEC requirement. Courses taken on a pass/non-pass basis cannot be used to meet GEC requirements.

**Exclusivity of GEC, Major, and Minor Courses**

With the exceptions noted below, courses may not be counted on both the GEC and the major. Courses taken to fulfill GEC requirements may count on the minor unless specifically disallowed by an individual minor program. Courses may not be counted on both the major and the minor.

Some GEC courses are listed in more than one category; with the exceptions noted below, however, GEC courses may not be used to meet more than one GEC requirement.

**Courses Used to Meet More than One Requirement**

Courses used to meet the Diversity Experiences category may also count in another GEC category or on the major. The course used to meet the Data Analysis requirement may also count on the major if the course is at the 200 level or above and approved by the major advisor.

**Minimum Total Hours Required, 216**

## **Transition Plan for BSBA BS**

Transition policies for the BSBA/BS essentially follow the underlying programs. Because there are so many possible plan combinations (13 Business Specializations and 18 Arts & Sciences Majors), historically, students have developed individualized program plans in consultation with Business and Arts & Sciences academic advisors and their major advisor. This process will continue under semesters. Transition students will need to work carefully with their advisors following the transition plans of the underlying individual degree programs.

For students who seek proper and timely advising, there should be no increased length to degrees or additional costs.
