Professor Gordon:

On August 26, the Natural and Mathematical Sciences Panel of the ASC Curriculum Committee reviewed the proposal for a new Computational Science Minor.

The Panel did not take a vote but would like the following points to be addressed first:

- Form in curriculum.osu.edu:
 - Specify numbers for Credit Hour Explanation chart.
 - Provide program goals.
- p. 1: 5th paragraph: "A faculty committee represented by several of the participating departments will oversee the minor program." Request to provide more specifics.
- Add information on expected enrollment
- Courses from Earth Sciences should be added.
- P. 3 of proposal (table): ** applies to all individualized research courses. Not specify which discipline (Math 4998, Chem 4998) but leave more open-ended.
- P. 4: ASC minor advising sheet:
 - They need to decide whether overlap with GE is permitted or not.
 - For Core Courses—Simulation and Modeling: only CSE 2021 is listed. Replace with generic statement "a simulation and modeling course (Math 1157, CSE 2021, ISE 5100, ME 5372, or MATSCEN 4321)."
 - For Core Courses—Numerical Methods: AERO 3581 and Math 5401 were left out.

Should you have any questions about this feedback, don't hesitate to contact Harald Vaessin (Chair of the NMS Panel), Christopher Hadad, or me.

I am attaching to this e-mail the latest version of the proposal that was reviewed by the committee. If you could make the requested changes using this version (perhaps using the track change option in Word), that would be excellent.

Best regards,
Bernadette Vankeerbergen
