

Fiscal Unit/Academic Org	School Of Communication - D0744
Administering College/Academic Group	Arts and Sciences
Co-administering College/Academic Group	
Semester Conversion Designation	New Program/Plan
Proposed Program/Plan Name	Health, Environment, Risk, & Science Communication
Type of Program/Plan	Undergraduate minor
Program/Plan Code Abbreviation	HERSCOM
Proposed Degree Title	Health, Environment, Risk, & Science Communication

Credit Hour Explanation

Program credit hour requirements		A) Number of credit hours in current program (Quarter credit hours)	B) Calculated result for 2/3rds of current (Semester credit hours)	C) Number of credit hours required for proposed program (Semester credit hours)	D) Change in credit hours
Total minimum credit hours required for completion of program				12	
Required credit hours offered by the unit	Minimum			12	
	Maximum			12	
Required credit hours offered outside of the unit	Minimum			0	
	Maximum			0	
Required prerequisite credit hours not included above	Minimum			0	
	Maximum			0	

Program Learning Goals

Note: these are required for all undergraduate degree programs and majors now, and will be required for all graduate and professional degree programs in 2012. Nonetheless, all programs are encouraged to complete these now.

- Program Learning Goals**
- Students will understand the role of communication in the contexts of health care, environmental issues, science, and the communication of risk.
 - Students will understand how to communicate complex information involving uncertainty in both interpersonal and mediated contexts.
 - Students will understand how to create media campaigns involving people's well-being and safety.

Assessment

Assessment plan includes student learning goals, how those goals are evaluated, and how the information collected is used to improve student learning. An assessment plan is required for undergraduate majors and degrees. Graduate and professional degree programs are encouraged to complete this now, but will not be required to do so until 2012.

Is this a degree program (undergraduate, graduate, or professional) or major proposal? No

Program Specializations/Sub-Plans

If you do not specify a program specialization/sub-plan it will be assumed you are submitting this program for all program specializations/sub-plans.

Pre-Major

Does this Program have a Pre-Major? No

Dear Reader:

Re: Health, Environment, Risk, & Science Communication Minor

The School of Communication would like to propose the following minor to begin in Spring 2015. The faculty of the School has provided overwhelming support for the creation of this new undergraduate minor program. Faculty discussions of the future of the communication program served as the impetus for this proposal. New faculty hires in the areas of health and environmental communication enabled the department to determine the feasibility of development the minor. In addition, the popularity of the new course on Science Communication suggests that the demand is there among students to study health, environment, risk and science communication. In addition, discussions with faculty in the School of Environment and Natural Resources suggest that they perceive a need among their students for such a minor. Likewise, faculty in the College of Public Health, College of Veterinary Medicine, and College of Food, Agricultural, and Environmental Sciences were queried and they suggested there would be a demand for the minor among their students as well.

Rational/purpose of the minor. The minor in Health, Environment, Risk, and Science Communication provides students with an understanding of the role of communication in health and health care, science, and the communication of risk. All of these areas deal with the communication of complex information that has implications for people's well-being and safety.

The transmission of complex information to the public is becoming increasingly important as recent debates about climate change, SARS, or the HPV vaccine highlight. The Ohio State University is in a unique position to propose this minor. Traditionally, science, environmental, and health communication are considered separate programs and universities tend to develop programs in one of these areas. There are a few universities that have an emphasis in both science and environmental communication, but these programs are traditionally housed in Agriculture Colleges (e.g., Cornell, University of Wisconsin). Ohio State is unique in that we have a strong faculty across these related domains.

The proposed minor will provide an opportunity for students across the university to learn more about how complex communication is effectively communicated via media campaigns, new communication technologies, and interpersonal communication. Given the increased importance of communicating complex information, this background will place OSU students in a unique position in a competitive marketplace. The Minor should help create linkages between academic units that traditionally have not had much contact here at Ohio State. Hopefully, this will lead to fruitful collaborations with faculty across these different programs. Based on reactions from a number of departments as we sought concurrence, we anticipate 50-75 students enrolled in this minor once it is up and running.

Faculty involved in the proposed minor include:

David Ewoldsen, professor, health communication

Shelly Hovick, assistant professor, health communication

Emily Moyer-Guse, associate professor, entertainment & health communication

Erik Nisbet, assistant professor, science & environmental communication

Janice Raup-Krieger, assistant professor, health communication

Nancy Rhodes, assistant professor, health communication

Michael Slater, full professor, health communication

We appreciate your consideration of this new undergraduate minor program.

Sincerely,

David R. Ewoldsen Professor,

School of Communication

Health, Environment, Risk, & Science Communication Minor (HERSCOM-MN)

School of Communication
3033 Derby Hall, 154 North Oval Mall
Columbus, OH 43210-1339
614-292-8444; <http://www.comm.ohio-state.edu>

The minor in Health, Environment, Risk, and Science Communication provides students with an understanding of the role of communication in health and health care, science, and the communication of risk. All of these areas deal with the communication of complex information that has implications for people's well-being and safety.

The Health, Environment, Risk, & Science Communication minor requires the completion of at least four courses for 12 credits, including one foundational course. To declare the minor, students should meet with their assigned academic advisor or any advisor in the School of Communication. Any variation from the program described below needs the approval of the Director of Undergraduate Studies. Students may request approval of a minor variation by filing a petition through the School of Communication Advising Office.

Required foundational course (3 credit hours)

2596 – An Introduction to Health, Environment, Risk, & Science Communication (3)

Choose at least three from these electives (9 credit hours)

3340 – Environmental Communication (3)
4240(H) – Science Communication (3)
3332 – Risk Communication (3)
3333 – Crisis Communication (3)
4736 – Health Communication in Interpersonal Contexts (3)
4737 – Health Communication in Mass Mediated Contexts (3)
4738 – Health Communication and New Media (3)

Electives can include one of the following:

*4998 – Undergraduate Research (1-15) (no more than 3 hours can count toward the minor)

OR

*4999H – Honors Thesis Research (1-12) (no more than 3 hours can count toward the minor)

*the Honors (H) version of any of the above courses can be used to meet the requirements for the minor

Health, Environment, Risk and Science Communication minor program guidelines

The following guidelines govern minors:

Required for graduation No

Credit hours required A minimum of 12

Transfer credit hours allowed At least half of the credits counting toward the minor must be earned in regular OSU coursework

Overlap with the GE Permitted, no more than 6 credit hours

Overlap with the major and additional minor(s)

- The minor must be in a different subject than the major.
- The minor must contain a minimum of 12 hours distinct from the major and/or additional minor(s).

Grades required

- Minimum C- for a course to be listed on the minor.
- Minimum 2.00 cumulative point-hour ratio required for the minor.
- Course work graded Pass/Non-Pass cannot count on the minor.
- No more than 3 credit hours of course graded Satisfactory/Unsatisfactory may count toward the minor.

Minor Approval The minor may be approved by the student's assigned academic advisor via the Degree Audit Report (DAR). If the minor is not complete on the DAR, the student must consult with a School of Communication advisor.

Filing the minor program form The minor program form must be filed at least by the time the graduation application is submitted to a college/school counselor.

Changing the minor Once the minor program is filed in the college office, any changes must be approved by:

- the School of Communication Advising Office

Concurrence was requested from the following unitsⁱ

Astronomy
Biological sciences
Business
Chemistry & Biochemistry
College of Food, Agriculture, & Environmental Sciences
College of Nursing
College of Public Health
Earth Sciences
Engineering
Evolution, Ecology, and Organismal Biology
Health & Rehabilitation Sciences
Law School
Mathematics
Microbiology
Molecular Genetics
Physics
Psychology
SENR (School of Environment & Natural Resources)
Statistics
Social & Behavioral Sciences
Sociology
Veterinary Medicine

The following units granted concurrence

Astronomy
College of Food, Agriculture, & Environmental Sciences
College of Nursing
College of Public Health
Earth Sciences
Evolution, Ecology, and Organismal Biology
Law School
Mathematics
Molecular Genetics
SENR (School of Environment & Natural Resources)
Sociology
Social & Behavioral Sciences
Veterinary Medicine

The following units did not respond within the two week period

Biological sciences
Business
Chemistry & Biochemistry
Engineering
Health & Rehabilitation Sciences
Microbiology
Physics
Psychology
Statistics

ⁱ The OAA guidelines require that Math & Physical Sciences be asked to grant concurrence for any proposal involving the environment. However, Math & Physical Sciences has not existed for several years because of the restructuring of Arts & Sciences. Consequently, the departments that made up this entity were asked to grant concurrence: Astronomy, Chemistry & Biochemistry, Earth Sciences, Mathematics, Physics, Statistics, Evolution, Ecology & Organismal Biology, Microbiology, and Molecular Genetics.

Dear Dr. Ewoldsen,

Please see attached for concurrence emails (as PDF files) from Astronomy (2); Earth Sciences; Evolution, Ecology and Organismal Biology (EEOB); Mathematics; and Molecular Genetics. No others contacted me by the deadline in my email below, so their responses are de facto concurrence.

Best regards,

Christopher

The School of Communication is proposing a new Minor entitled Health, Environment, Risk, and Science Communication. The ASC Curriculum Committee has requested that we seek concurrence from your department prior to their approval of the course. The concurrence form and the minor form are attached. If you are not the appropriate person to contact for this request, please let me know ASAP. If you are the correct person, could you please make a determination on concurrence by Dec. 20 (2 weeks) by either returning this attached form or sending me an email indicating that concurrence has or has not be granted.

Thank you

Re: Fwd: Concurrence for Health, Environment, Risk, & Science Communication Minor

Hi Christopher,

On behalf of the School of Earth Sciences, I am writing to indicate our concurrence with, and support of, the proposed new minor in Health, Environment, Risk, and Science Communication. My only concern with the proposal is to ensure that Honors sections of all courses listed in the Minor program requirements are acceptable, even though only 4999H is listed explicitly.

Please contact me with any additional questions about this.
Best,
Larry

RE: Concurrence for Health, Environment, Risk, & Science Communication Minor

Chris,

As far as EEOB goes, we have no objection to this minor in the form that it is presented. Seems like it would be a useful minor. On a personal level, I'd be interested in seeing what their Risk Communication course comprises. Perhaps in my spare time!

Have a good holiday and safe travels if you're going anywhere.

The School of Communication is proposing a new Minor entitled Health, Environment, Risk, and Science Communication. The ASC Curriculum Committee has requested that we seek concurrence from your department prior to their approval of the course. The concurrence form and the minor form are attached. If you are not the appropriate person to contact for this request, please let me know ASAP. If you are the correct person, could you please make a determination on concurrence by Dec. 20 (2 weeks) by either returning this attached form or sending me an email indicating that concurrence has or has not be granted.

Thank you

David R. Ewoldsen

To: David Ewoldsen <ewoldsen.osu@gmail.com>

Dear Dr. Ewoldsen,

I looked over the minor and the request for concurrence. It is unclear to me which departments need to provide concurrence. "Math and Physical Sciences" does not exist anymore as a unit. Do you think that you need concurrences from each of the legacy departments from the old College of Mathematical and Physical Sciences:

Astronomy

Chemistry (now Chemistry & Biochemistry)

Earth Sciences

Mathematics

Physics
Statistics

or just a subset of these departments. The current NMS division includes the departments above as well as the departments of:

Evolution, Ecology and Organismal Biology
Microbiology
Molecular Genetics

Some of the biological departments might be relevant for the "health" component of your minor.

If you can tell me which departments are required for concurrence, I can forward your request to the specific vice chairs.

Please advise.

Thanks,

Christopher

David Ewoldsen <ewoldsen.osu@gmail.com>
To: "Vankeerbergen, Bernadette" <Vankeerbergen.1@osu.edu>

Tue, Dec 10, 2013 at 11:37 AM

Bernadette,

On the link you sent me regarding concurrences for courses involving the environment it lists "Math and Physical Sciences." But Dean Hadad raised the point in above email that such a unit no longer exists, so I am not sure what to do regarding the concurrences in this instance.

Thank you for your assistance

Dave

Hello David and Christopher,

The instructions provided by OAA are the following: <https://assist-erp.osu.edu/assistCurriculum/concurrence.html>

Neither Biological Sciences, MPS, or SBS exist any longer as colleges (but we can't change this document since it is not maintained by us). So I think that in order to comply the equivalent divisions should provide concurrence.

Christopher, could you provide concurrence for the division of NMS? (Deborah Hadad provided a concurrence for the division of SBS.) In case some departments are OK and some departments are not OK (or have suggestions, reservations etc), the concurrence document could specify that. Does that seem feasible?

Best,

Bernadette

All,

See below for a request for concurrence for a new minor from the School of Communications.

-- Please send me your concurrence, or your objection, by Wednesday, December 18 at noon. I will consider a lack of a response by that time to be concurrence.

An email message would be sufficient, and I will compile the responses to provide to Prof. Ewoldsen.

Thanks,

Christopher

Cc: "Hadad, Christopher" <hadad.1@osu.edu>, "Husen, William" <husen@math.ohio-state.edu>, "Carlson, Timothy" <carlson@math.ohio-state.edu>

Dear Professor Ewoldsen,

Thank you for the information about that minor.

One of the course ingredients is Comm 4240 whose syllabus I could not find. However, as far as I can ascertain, it is equivalent to 640H under the old quarter system. I would be grateful if you would send me the syllabus for this course.

Would it be correct to say that this syllabus would be the one that applies also to 4240? If yes, that would be all I need.

My interest in all this arises from my interest in how science, including physics, chemistry, mathematics, astronomy, geology, etc., is presented in our culture.

Again, thank you for taking out time to dig out that information and sending it to me.

Sincerely,

Ulrich

Dave and Ulrich,

Attached is the syllabus for 3240 - which is what it was taught as last time. 4240 is the new class, it was raised a level so graduate students outside of Communication could take the class. The syllabus has not be redesigned yet to reflect the upper level content, though the topics addressed would generally remain the same.

Best

Erik

**The Ohio State University
College of the Arts and Sciences Concurrence Form**

The purpose of this form is to provide a simple system of obtaining departmental reactions to course requests. An e-mail may be substituted for this form.

An academic unit initiating a request should complete Section A of this form and send a copy of the form, course request, and syllabus to each of the academic units that might have related interests in the course. Initiating units should be allowed two weeks to respond.

Academic units receiving this form should respond to Section B and return the form to the initiating unit. Overlap of course content and other problems should be resolved by the academic units before this form and all other accompanying documentation may be forwarded to the Office of Academic Affairs.

A. Proposal to review

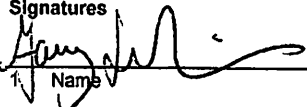

School of Communication, Health, Environment, Risk & Science Communication Minor

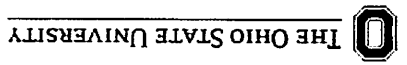

Initiating Academic Unit	Course Number	Course Title	
New			12/6/2013
Type of Proposal (New, Change, Withdrawal, or other)			Date request sent
Law School			12/20/2013
Academic Unit Asked to Review			Date response needed

B. Response from the Academic Unit reviewing

Response: include a reaction to the proposal, including a statement of support or non-support (continued on the back of this form or a separate sheet, if necessary).

The Moritz College of Law supports the proposal. We have reviewed the information and requirements and do not find the minor to conflict with the academic programming or endeavors of the College of Law.
