---

Dear Julie,

The Honors Panel of the ASC Curriculum Committee reviewed the course request for Linguistics 2052H and I am happy to report that the request was *unanimously approved* with the following *recommendations/suggestions*.

- The "In Class Participation" category on the second page of the syllabus does not have any content. Perhaps there should be something added there.
- One of the Panel members has used the text, *A Philosopher looks at Science*, by John G. Kemeny (1959), Van Nostrand, New York, as a general introduction to the Scientific Method and scientific inquiry in his Anthropology courses and suggests that Professor Morley may be interested in adding it to her list of supplemental readings.

The course request will next be reviewed by the Natural and Mathematical Sciences Panel (for the requested GE Quantitative Reasoning—Mathematical or Logical Analysis status).

Should you have any questions about this feedback, please do not hesitate to contact me.

Best Wishes,  
Danielle
