---

Dear Professor Lyvers Peffer,

Animal Science 2200.01 was reviewed by the ASCC Natural and Mathematical Sciences Panel. The Panel did not vote on the course change proposal as they would like the following components addressed:

- Work closely with ODEE (<https://odee.osu.edu/course-development>). ODEE will help make sure that the course adheres to the necessary standards (e.g., syllabus includes all the necessary information). Some of the concerns of the Panel include the points below:
  - Syllabus should provide IT support for students.
  - Make sure that the distance learning version of the course is ODS-compliant.
  - How is the on-line advising handled?
  - How does one monitor an on-line exam when students can use their notes?
  - How is integrity of exams managed?
- Provide the syllabus used for the in-classroom version of the course as well as clarification if there are any differences between the in-classroom syllabus and the distance learning syllabus.
- Are students who take the online course eligible to take the lab?
- Clarify the extent to which the quizzes contribute to the final grade. Should the quizzes be included in the “evaluation” section of the syllabus?
- How has the material been adapted for online offering and how is it different?
- Make the distinction between 50% and 100% at a distance. What will be the difference?
- Provide clarification as to why Animal Science majors are not able to take this course. If it is not identical to the in-class course then it should have a different course number.

I will send back the course via [curriculum.osu.edu](http://curriculum.osu.edu) in a moment. Should you have any questions regarding this feedback please contact the Chair of the ASCC NMS Panel, Harald Vaessin (cc'd on this email).

Best,  
Danielle
