Term Information

Effective Term Autumn 2015 **Previous Value** Autumn 2013

Course Change Information

What change is being proposed? (If more than one, what changes are being proposed?)

Changing the course so that it fits a second General Education Elective (Diversity).

What is the rationale for the proposed change(s)?

To make this course available to more students.

What are the programmatic implications of the proposed change(s)?

(e.g. program requirements to be added or removed, changes to be made in available resources, effect on other programs that use the course)?

None

Is approval of the requrest contingent upon the approval of other course or curricular program request? No

Is this a request to withdraw the course? No

Requirement/Elective Designation

General Education course:

Individual and Groups; Social Diversity in the United States

The course is an elective (for this or other units) or is a service course for other units

Previous Value

General Education course:

Individual and Groups

The course is an elective (for this or other units) or is a service course for other units

Course Details

Course goals or learning objectives/outcomes

- To understand the normal development of language, hearing, and communication in all stages of the life span.
- To explore the influences of culture, gender, language, and disabilities on successful communication.
- To examine possible causes for disruptions in normal communication at different periods of an individual's life.
- Develop the perspective of age-related communication change as a normal process throughout the human lifespan
- Be able to identify salient cultural differences affecting lifespan-related communication development
- Be able to identify factors which have potentially adverse effects on lifespan-related communication development

Content Topic List

Previous Value

- Normal development of language, hearing, and communication in all stages of the life span
- Influences of culture, gender, language, and disabilities on successful communication
- Events that may cause disruptions in normal communication at different periods of language development and use
- The intricate biological and social systems that are necessary for successful communication
- How personal beliefs, attitudes, and expectations might influence communication with different individuals through the life span
- The impact of communication disorders on future career or life events with respect to parenting, care giving, or decisions as an active, informed citizen

Textbook

Hegde, M.N. (2010). <u>Introduction to Communicative Disorders</u>, 4th <u>Edition</u>. Austin, Texas: Pro-Ed Publishing.

Course Description

The goal of this course is to explore the development of communication skills common to individuals throughout the lifespan and the consequences of communication disorders for individuals, their families, and their communities.

The course will encourage students to become involved in critical discussion of the factors that influence successful communication. Contemporary understandings of communication disorders in infants, children, and adults will be highlighted.

The course will discuss the impact impaired communication skills can have on individuals, families, and societies, and how informed citizens and caregivers can improve the communication abilities of individuals with speech, language, and/or hearing disorders.

Related dynamics of cultural diversity and effects of institutions, society, and culture in the United States on communication impairments will be examined. Students from all fields of study will gain a better understanding of the factors necessary to be a successful communicator and an effective leader in assuring that appropriate habilitation and rehabilitation programs are provided for those affected with various communication disorders.

Through interactive discussions, participatory learning projects that capitalize on an individual student's expertise and areas of personal interest, and written and oral presentations on various topics, students will also learn to become better communicators, listeners, and leaders.

Course Objectives

- 1. To understand the normal development of language, hearing, and communication in all stages of the life span.
- 2. To explore the influences of culture, gender, language, and disabilities on successful communication.
- 3. To examine possible causes for disruptions in normal communication at different periods of an individual's life.
- 4. To examine the impact of communication disorders on individuals in our society, and to encourage the students to be informed citizens with respect to their own attitudes and values regarding appreciation, tolerance, and equality of others with these disorders.
- 5. To provide students with the foundations for decision making related to provision of appropriate services for individuals with communication disorders in a variety of fields.

Course Requirements and Grading

Participation

Class participation and attendance is mandatory. Students are allowed two unexcused absences.

Breakdown for points awarded is as follows:

0-2 absences = 25 points

3 absences = 15 points

4 or more absences = 0 points

Students will be expected to put cell phones in backpacks/pockets/etc. during all class sessions. The only exception to this will be for specific class related search functions, if these occur.

Group Project

The class will be divided into groups of 5-6 students. Each group will organize and present an in-class critical evaluation of a setting in which speech-language pathologists and audiologists provide services. They will give a sixty minute presentation including at a minimum basic definitions, background/description, economic/benefit from services, professional benefit/responsibilities, individual/team roles, and outreach. All presentations must include at least 5 references including at least one peer reviewed article from a scholarly journal. The other references will be taken from magazines, books, and websites produced by organizations and government agencies related to the general setting (Wikipedia and other similar publicly contributed sites can only be used in addition to the required resources). They should also include a critique of *at least* one useful internet resource on the topic. Additional support for the presentation will be provided by observing or otherwise interacting with service networks in the Columbus area related to topic.

In addition to the presentation the groups will be responsible for submitting three different reports.

- Handout: The handouts will be written in a summary fashion on the form provided on Carmen (following the style of the adult progress report examples/explanation). These will be written for the rest of the class with a summary of the information being presented.
- 2. Group paper: This report will involve a full discussion of the chosen topic, with detail about the individual and setting roles in improving communication difficulties in the community. The research will include reading any scholarly articles available related to professional issues, web-based (or other) research from specific providers, organizations, and government agencies, and interviews/ observations with professionals, if possible. The written paper will be a minimum of 5 double spaced pages, written jointly by all members of the group. It will be written in a clinical format (much like the pediatric progress report example provided on the Carmen site). The format will include headings as illustrated in the outline provided on Carmen, which are different than those found in the example pediatric report (which is provided as an example of the writing style).
- 3. Individual response paper: Also, each member of the group must contribute a personal response of at least one full page. The personal response will be written individually by all members of the group, and will focus on your opinion of the paper and topic: what you found interesting, what you liked and disliked, etc.

Handouts are due to the instructor by 5:00 pm the day before the class presentation via the Carmen dropbox. Group reports and individual papers are due to the instructor by 5:00 pm the day after the presentation, also via the Carmen dropbox.

Student groups will submit an outline for approval by the 7th week of the semester. Each group will meet with the instructor during the 8th week of the semester to discuss the project in progress.

Group projects will be selected from the following list:

- public and private schools
- hospitals
- rehabilitation centers
- short- and long-term nursing care facilities
- community clinics
- colleges and universities
- private practice offices

- state and local health departments
- state and federal government agencies
- home health agencies (home care)
- adult day care centers

- centers for persons with developmental disabilities
- research laboratories
- industries with hearing conservation programs

- community hearing and speech centers
- physicians' offices

Exams

This course will have two midterms and a final examination (please see note exact date and time for the <u>final</u>—**NOT THE SAME TIME AS THE CLASS SESSIONS**). The midterms will include coverage of the required readings, the information provided by lectures, and guest speakers to that date. The final will include all material covered in class subsequent to the second midterm, including group projects.

Grading

Midterms: 75 points each (total of 150 points)

Final: 100 points

Presentation: 100 points

Handouts: 25 points

Group report: 75 points

Individual response papers: 25 points

Class participation/attendance: 25 points

Total points: 500 points

Academic Misconduct

Academic misconduct is a violation of the code of student conduct and is required to be reported to the Committee on Academic Misconduct (faculty rule 3335-23-06). Academic misconduct refers to any activity that compromises the academic integrity of the university or undermines the educational process (section 3335-23-04(A)). Academic misconduct will not be tolerated. Instances believed to constitute misconduct will be reported to the committee on academic misconduct. Examples include but are not limited to: plagiarism, cheating on examinations, violation of course rules outlined in this syllabus. Additional examples of academic misconduct are outlined below. Further information can be found in your student handbook and at the office of student affairs http://studentaffairs.osu.edu/csc/

Alternative Format for Course Material

Students with disabilities are responsible for making their needs known to the instructor as soon as possible, and seeking available assistance in a timely manner. The Office for Disability Services is located in 150 Pomerene Hall, 1760 Neil Avenue; telephone 292 3307, TDD 292 0901; on the web at http://www.ods.ohio-state.edu.

Class Schedule

1/13	course introduction, review of syllabus	
1/15	language and culture	Reading: Chapter 2
1/20	information on professions, services, associations & introduction to communicative disorders	Reading: Chapter 3, 15
1/22	classification of communication disorders and research, models of language, anatomy	Reading: Chapter 1, 4
1/27	language development	Reading: Chapter 6 Project groups selected
1/29	language development	Reading: Chapter 6, 11
2/3	guest speaker on autism (Paula Rabidoux)	Reading: Chapter 11
2/5	articulation and phonology	Reading: Chapter 5
2/10	Midterm #1	Project outlines due for approval
2/12	stroke and aphasia	Reading: Chapter 10
2/17	ТВІ	Reading: Chapter 10
2/19	ТВІ	Reading: Chapter 10
2/24	dementia (non-related to Alzheimers)	Reading: Chapter 10
2/26	dementia (emphasis on Alzheimers)	Reading: Chapter 10
3/3	in-class meeting with assigned groups/group organization	
3/5	hearing	Reading: Chapter 14
3/10	guest speaker on hearing disorders (Eric Bielefeld)	Reading: Chapter 14
3/12	Midterm #2	
3/17	Spring Break	

3/19	Spring Break	
3/24	dysphagia and motor speech disorders	Reading: Chapter 10
3/26	Resonance	Reading: Chapter 9
3/31	guest speaker on voice disorders (Lindsey Pauline)	Reading: Chapter 8
4/2	guest speaker on literacy and language (Kim Murphy)	Reading: Chapter 12
4/7	stuttering	Reading: Chapter 7
4/9	Presentation from group 1	
4/14	Presentation from group 2	
4/16	Presentation from group 3	
4/21	Presentation from group 4	
4/23	last day of classes; review	

Final exam – Monday, 5/4, 8:00-9:45 am in regular classroom

SHS 3350: Communication across the lifespan

Diversity

3. A GE rationale that answers specifically the following questions:

How do the course objectives address the GE category expected learning outcomes?

The course objectives address the learning outcomes by addressing the differences in both normal and disordered communication abilities and modes. Students will be expected to understand how to interact with individuals with differences in communication abilities in both their professional and personal lives.

How do the readings assigned address the GE category expected learning outcomes?

The assigned readings address the learning outcome by providing more in-depth knowledge of the specific characteristics of communication disorders to supplement course lectures related to their impact on interactions, and the assessment and treatment strategies used in speech-language pathology and audiology. This provides a deeper understanding of the differences encountered when interacting with individuals with communication disorders.

How do the topics address the GE category expected learning outcomes?

The topics covered in this course address a wide range of communication disorders that occur throughout the lifespan. In this way the learning outcomes are addressed by increasing the understanding of the wide range of challenges that individuals may face when interacting with the world using impaired communication skills, and thus increasing understanding of the individuals themselves.

How do the written assignments address the GE category expected learning outcomes?

The written assignments address the learning outcomes by requiring the students to be able to interpret information about the communication disorders and demonstrate understanding of the impact these have on daily interactions.

- 4. A GE assessment plan which explains how the faculty will assess the effectiveness of the course in achieving the GE expected learning outcomes over time, rather than how individual student grades will be assessed.
- a) The final exam for the course will include questions that address the impact of communication disorders on daily interactions. This will allow for direct assessment of the students' achievement for the expected learning outcomes. In addition, students are required to provide an individual summary of the major project for the course (a group research paper and presentation) in which they are expected to describe what they learned from the project, and by extension from the course, related to communication disorders.

- **b)** The level of student achievement that will be considered successful will be 80% of the class answering final exam questions correctly for the questions related to the GE outcomes. The students will be considered successful on the individual papers if they score 22 or greater out of 25 possible points.
- c) The data from the exams and papers will be maintained on Carmen. The information from these data will be used to further modify specifications related to the group project format, and lecture material will be adjusted as needed to maximize student learning related the specific GE outcomes for diversity.
