Paula,

On Tuesday, May 5, the Natural and Mathematical Sciences (NMS) Panel of the ASC Curriculum Committee reconsidered a proposal to add GE Data Analysis to History 5900.

I am happy to report that the request was unanimously approved.

The course request will next be presented to the full ASCC and, provided there are no concerns, will then be advanced to the Office of Academic Affairs. The new GE status will become effective Spring 2016.

I am including the usual reminder that the GE assessment plan will need to be implemented each time the course is offered and GE data gathered. After the second offering of the course, the Assessment Panel will ask the Department to submit an initial report summarizing GE assessment results of those first two offerings (following the format of sections I and II of the Assessment Report Requirement in Appendix 7 of the ASC Curriculum and Assessment Operations Manual [p. 88] http://asccas.osu.edu/files/ASC_CurrAssess_Operations_Manual.pdf). As always, our program assistant Danielle Hogle (hogle.12) can help the Department with any aspect of the GE assessment requirement. She will also make sure to contact the Department before the course is offered and provide any assistance that the faculty member may need. Could you please communicate this information to the faculty member (Randy Roth and anyone else who might teach the course)?

If you have any questions about the feedback above, please feel free to contact Harald Vaessin (Faculty Chair of the NMS Panel), or me.

My best,
Bernadette
