Hi Bernadette,

Yes – please add MG 5650 to the sheet.

Many thanks,
Scott

Elizabeth,

Would you like me to add MG 5650 “Analysis and Interpretation of Biological Data” (3 credits) to the advising sheet? Please confirm.

Once I advance everything to the Office of Academic Affairs, further communication about the progress of the revision will come directly from OAA.

Best,
Bernadette

Bernadette,

Scott and I have looked over this situation and we think Mol Gen 5650 is more appropriate to replace 5640. Please let me know if you have any questions.

Best,
Elizabeth

Subject: Revision Forensic Science Minor

Dear Scott,

On Friday, Oct. 23, the ASC Curriculum Committee reviewed a proposal to revise the Forensic Science Minor.

The Committee unanimously approved the proposal with one question/recommendation:

- The SBS Panel had previously noticed that a course listed on the minor sheet, Molecular Genetics 5640, did not exist in the course catalog and asked the Department of Anthropology if this course should be deleted from the advising sheet. The Dept indicated that the course should be removed. One faculty member in the Molecular Genetics Department who was present at the ASC Curriculum Committee meeting wondered whether that course was actually supposed to be Molecular Genetics 5645 “Quantitative, Population, and Evolutionary Genetics” (2 credits). Please let us know if that is the case and we can then add MG 5645 on the advising sheet before advancing the proposal to the Office of Academic Affairs. We will await your response.

Should you have any questions about the vote of the Committee, please feel free to contact Meg Daly (faculty Chair of the ASC Curriculum Committee, cc'd here), or me.

Best regards,
Bernadette
