Comments

- - Please fix repeatability issue. If course can indeed be taken 6 times (?), then max credit would be 18. This seems unlikely, however. (by Vankeerbergen, Bernadette Chantal on 04/20/2015 09:12 AM)
- Part of a package of Art Film/Video curricular updates and changes. (by Harvey, Rebecca Clare on 03/19/2015 04:55 PM)

Film/Video curriculum overhaul proposal Department of Art

In the Department of Art, since the switch to semesters, our film and video curriculum has been contained primarily in two classes: Video Art 1 (ART 5501) and Video Art 2 (ART 5551). These were courses designed as electives for the Art + Technology program and are shared as electives by a number of additional areas as well.

With the addition of filmmaker Roger Beebe to our faculty in January 2014 and video artist Dani Leventhal in August 2013, there is an opportunity to offer a more robust slate of courses within the department. Further, revisiting these courses gives us an occasion to clarify the learning outcomes and course objectives for these classes, hopefully creating a series or classes that build a cumulative set of skills and one that also is more transparent to undergraduates both inside the department and outside.

In the interest of achieving these goals, we propose first to change the name of this series of courses from "Video Art" (1, 2) to "Film/Video" (1, 2, 3, 4). There are a number of reasons for this change. First, since Roger Beebe's course offerings often include celluloid filmmaking (16mm, super 8mm), the designation "video" does not adequately describe the range of technologies used in these classes. Second, "video art" is a term usually used to designate a specific and fairly recent tradition that traces its origins to a gallery/museum practice initiated in the 1970s. There is a longer moving---image history that's usually designated by the terms "avant---garde film" or "experimental cinema" that goes back at least to the European avant---garde of the 1920s, and that longer history is often important in these classes. Changing the designation of these classes to Film/Video allows both a broader range of technologies and a broader survey of the history of the moving image to be adequately covered by the name used to advertise these courses.

Further, we propose to clarify and bolster the curriculum in the following ways:

Film/Video 1 will exist at the 3000 level—we're proposing 3009 in keeping with naming Conventions within the department—and will be an introduction to shooting and editing video. The class will essentially be an initiation into the technology and terminology that students will need for meaningful work in video. We hope the move to this level will make clear to students in the department that this course offers foundational skills that will be useful in upper---division seminars (and not just in the Film/Video sequence); we further hope that a course at this level will attract more students from outside the Department and outside the College, since it will offer a more explicitly introductory rubric. (At the current 5000---level offering, Video Art 1 seems to be lost among many other upper---division offerings and is not clearly advertised as an introduction.)

Film/Video 2, which will exist at the 4000 level (proposed as 4009, in keeping with the designation of F/V 1) furthers the development of shooting and editing skills, but in the narrowed context of a survey of experimental strategies. The course is structured to explore fundamental issues in experimental film and video, including duration (often marked by the use of the long take), sequence (patternings of shots outside of the logic of narrative), abstraction, and experimental audio. This class will have as a pre--requisite Film/Video 1, so that all students arrive with a certain baseline of technical knowledge about shooting and editing. (Multiple sections of F/V1 will be offered each semester to avoid a bottleneck; F/V2 will also be offered each semester to avoid a bottleneck for F/V3 and F/V4.)

Film/Video 3, which will exist at the 5000 level (proposed 5009, again in keeping with the designation of F/V 1 and 2), is a variable---topics course that focuses in on one set of strategies or technologies touched upon in Film/Video 2, offering a much deeper engagement with that particular set of strategies. Examples of classes that might be offered under this rubric include 16 mm filmmaking, video performance, confessional/autobiographical cinema, alternative camera systems, installation art (work designed specifically to be encountered in a looping format in a gallery or museum), cameraless filmmaking (working directly on the film material), "slow cinema" (a course focused on durational works), and expanded cinema (work made to be seen outside of the black box of the theater or white cube of the gallery/museum).

Film/Video 4 (proposed 5019) is also a variable-topics course, but the focus of this course is more conceptual than technical. Examples of classes that might be offered under this rubric would be the two sample syllabi included with this proposal (for Experimental Documentary as well as Found Footage and the Culture of the Copyright) among numerous other potential offerings with a theoretical focus that allows for a number of different strategic or technological approaches. This course is also designed to allow faculty members in other areas of the department who use video as part of their practice to contribute to the Film/Video curriculum by offering classes exploring those intersections (between film/video and sculpture, drawing, painting, screen-printing, photography, etc.).

Film/Video 2 serves as the pre---requisite for both Film/Video 3 and Film/Video 4; with the current limited number of faculty teaching in this sequence, we imagine one section of Film/Video 3 or 4 to be offered each semester.

With the concurrent development of the Moving---Image Production Program, it is important to note that Film/Video 2, 3, and 4 are designed to run parallel to the proposed "toolkit" courses in the experimental track of that program. All of the proposed F/V courses are designed to fit in the "studio elective" section of the current undergraduate major (see curricular map attached). The current Art courses Video Art 1 (ART 5501) and Video Art 2 (ART 5551) will be withdrawn. Concurrences have been

submitted to the Departments of Dance and Theatre, the Art Department is happy to ask for additional concurrences if the committee deems it appropriate. The current check sheets are included here, they will be updated to reflect the changes, I am happy to provide the updated versions if requested.

Please do not hesitate to contact me with further questions.

Best,

Rebecca Harvey

Interim Chair, Professor

Department of Art, College of Arts and Sciences
258 Hopkins Hall | 128 North Oval Mall Columbus, OH 43210---1319 614.292.5072 Office | 614.292.1674 Fax harvey.113@osu.edu art@osu.com

NOTE: ART 5601: Film/Video 3 is meant to be a variable-topics seminar that pushes deeper with one of the strategies surveyed in Film/Video 2. This syllabus is a second possible seminar that would work under the F/V 3 rubric.

ART 5009: Film/Video 3-16mm Filmmaking

professor: Roger Beebe

email:

beebe.77@osw.edu office: 376 Hopkins

meeting times: MW 3:55-6:40, 356

Hopkins office hours W 2-3:45 p.m.,

(or by request) description:

This course is designed as an ambitious introduction to film (as opposed to video) production.

Work will be exclusively in 16mm and will be working exclusively in experimental forms. We will explore all aspects of the process of image-making on celluloid from the most basic (e.g., how to load the camera) to relatively advanced approaches cinematography and editing. There will be no synchronous sound production in this course, so all films will be dialogue-free, although we will experiment with ways of adding sound (including double-system sound and video transfer).

texts and materials:

All short readings will be available online through Carmen. In addition, I strongly recommend that each of you consider purchasing a copy of The Filmmaker's Handbook (6th Edition) by Steven Asher and Edward Pincus. It's an <u>invaluable</u> resource, both for the course and if you pursue your interests in filmmaking after the end of this course. I would really recommend reading it from cover to cover (maybe even more than once), because, given the time constraint of the semester, it will go into much more depth than we'll be able to about almost all technical matters. In case you forget technical lessons, it would also be a great backup for you to refer to. Another useful guide for advanced filmmaking is The American Cinematographer's Manual—almost every practicing cinematographer carries with him or her at all times (and this is no exaggeration). It's pretty expensive, so you might hold off on purchasing this until later in the semester when you decide that you want to pursue filmmaking further.

Cameras and editing gear will be provided, but students are expected to pay for their own film and processing. While we will take a very economical approach to 16mm filmmaking, costs per student are likely to be in the range of \$250-\$350.

assignments.

A majority of the course will be spent on a series of practica and projects that seek to put the technical lessons to use. The practica will be done together during class time, whereas the projects will be done on your own. These projects are as follows:

PRACTICUM 1: 20-foot (33 second) color place study PRACTICUM 2: hand processing, tinting & toning practicum

PROJECT 1: 6-foot (10-second) B-wind Leader PROJECT 2: 33-foot (55 second) abstract study

PROJECT 3: 20-foot (33 second) optical printing exercise FINAL PROJECT: 3-5 minute film of your own devising

The exact contours of each of these projects will be explained as the assignments approach. All but the final project are very brief and are mostly designed just to make sure that you've understood the technical lessons at each stage, but I also expect to see you start experimenting with form (i.e. giving these things interesting and experimental structures). Each of these

exercises is to be accompanied by a short writing assignment (1-2 pages) wherein you explain the theory behind your practice. Those papers are due at the start of class on the day that the project is to be critiqued.

Because of the delays involved with shipping film to and from the lab, you may want to begin thinking about the final projects very early in the semester and should feel free bounce your ideas off of me as they develop. However, I would encourage you not to become too committed to ideas that you've had before the start of the class or at the start of the semester, because the hope is that your ideas will change as the semester progresses and as you see different working models. The only constraints that I put on this final project are that it be non-narrative and that it reflect some aspect of your experience of the class.

grading:

Grades will be calculated according to the following formula:

Project 1 5%
Project 2 15%
Project 3 15%
Final Project 40%
Participation 25%

There will be three general criteria that determine your grade:

- 1. Your technical mastery of the processes of filmmaking. I'll be able to judge this as we move along, but it should also be evident in your final projects. I don't like to overemphasize the technical or technological in my production classes, but 16mm filmmaking is at some basic level a tech-heavy enterprise. If you get to the end of the semester and are still having trouble with using a light meter or loading a camera, then you should expect to fare badly in this category. Some will surely have less trouble than others with these issues, so you may need to do a bit of extra work (e.g., re-reading The Filmmakers Handbook, for example) if the tech stuff scares you. If I sense problems with the technical component of the class, I may surprise you with a pop quiz to get an exact sense of what you know and what you don't, so be sure to keep up with this as we go along.
- 2. Your participation in the course. I expect regular participation in discussions and active involvement in the practica. This is a pretty standard criterion in my classes, and I'm hoping that because this is an advanced class, you'll all be prepared to contribute fully. I don't want you to be excessively garrulous, but you do need to talk in pretty much every discussion we have. (If that seems burdensome, imagine if I decided to not talk for an entire class—that's often how it feels on my end.) If you don't plan on participating regularly, consider yourself warned.
- 3. Your aesthetic achievement. This is obviously the hardest criterion to quantify. What I expect is to see your work engaging with the aesthetic and theoretical issues

we're exploring in the discussions and through the screenings. I expect this even in the practica (although the primary focus of those exercises will be primarily technological), but most of the weight of this part of your grade will be on the independent projects and, above all, the final project.

An A in the class means that you've excelled in all three areas. A B indicates success in two of the three but struggles in the third. A C indicates significant concerns in two of these areas.

Students with issues in all three areas will receive a D or F depending on the severity of those issues.

In the interest of letting you know where you stand, I will issue you midterm grades with evaluations of your performance in each of these categories. I expect, however, that, especially with regard to the aesthetics of your work, your final grade will be weighed more heavily toward

your performance on your final projects. In other words, the midterm grade is not 50% of your grade—it's just a checkup on how you're doing so far.

16mm is, of course, a largely unknown and treacherous and often difficult medium you'll all be dealing with, and I do expect some failures (mostly of the technological variety). The way I've redesigned the class is meant to encourage you to get these failures out of the way early on. Shifting the weight of your grade toward your performance later in the class should be extra protection against being damned by the tentative steps (and missteps) you'll be making at first.

absences:

Absences are not excused, Attendance is mandatory in all scheduled classes and labs as all absences in a studio environment impede student progress. A student who is absent a fifth time will be required to withdraw from the course if this absence occurs during the withdrawal period of the semester. If this absence occurs after the withdrawal period, the student will receive a failing (E) grade in the course.

academic misconduct:

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct http://studentlife.oswedu/csc/

Students with disabilities that have been certified by the Office for Disability Services will be appropriately accommodated and should inform the instructor as soon as possible of their needs. The Office for Disability Services is located in 150 Pomerene Hall, 1760 Neil Avenue; telephone 292-3307, TDD 292-0901; http://www.ods.ohio-state.edu/

Film/Video Assessment Plan

FV 1

Introduction to shooting and editing video, learning the basic technology and terminology that students will need for meaningful work in video.

Learning objectives:

familiarize students with the technologies of video production including

- --basics of shooting HD video
- --basics of editing in Adobe Premiere
- --exporting and disseminating video online

Develop a precise technical vocabulary to describe video tools and techniques.

Assessment assignment: Short reflection paper on final project — grading rubric

FV2

A continuation of the work of FV1, furthering the development of shooting and editing skills, but in the narrowed context of a survey of experimental strategies. The course is structured to explore fundamental issues in experimental film and video, including duration (often marked by the use of the long take), sequence (patterning's of shots outside of the logic of narrative), abstraction, and experimental audio. This class will have as a pre-requisite Film/Video 1, so that all students arrive with a certain baseline of technical knowledge about shooting and editing.

Learning objectives:

Develop an advanced level of competence with shooting and editing HD video.

Expose students to a broad range of strategies and issues unique to experimental approaches to the theory and practice of film and video. Make first video work explicitly engaging with those strategies and

issues.

Assessment assignment: Short reflection paper on final project — grading rubric

FV3

A variable-topics course that focuses on one set of strategies or technologies touched upon in Film/Video 2, offering a much deeper engagement with that particular set of strategies.

Learning objectives:

Work in depth with a single technique or technology Develop an advanced skillset relevant to that technique or technology Understand the history and theory behind the specific practice at the core of the class.

Assessment assignment: Short reflection paper on final project — grading rubric

FV4

A variable-topics film or video production course focused on a conceptual issue or set of issues related to contemporary film and video practice. May focus specifically on film and video in the context of other arts or on issues with relevance outside of the narrowly defined fields of experimental film or video art.

Learning objectives:

Engage in depth with an issue or issues in contemporary film and video Understand the theoretical basis of film and video practice Develop sophisticated student work engaging with that issue or issues

Assessment assignment: Short reflection paper on final project --- grading rubric

Subject: Re: Concurrence Query: Art Film/Video revision

Friday, March 13, 2015 5:28:23 PM Eastern Daylight Time

From: Harvey, Rebecca To: Ferris, Lesley

From: <Ferris>, Lesley <ferris.36@osu.edu> Date: Monday, February 23, 2015 4:12 PM To: "Heysel, Garett" < heysel.1@osu.edu> Cc: Rebecca Harvey harvey.113@osu.edu

Subject: Concurrence Query: Art Film/Video revision

Hi Garett---

Here is an email that addresses the Art video proposal---I am not sure if you have seen the various emails from Maria Palazzi and others about concurrence. Here are ours--see below from Janet. As you will see we do not agree with the titles of the course both Maria and Janet are concerned. I will forward Maria's comments to you shortly. Perhaps Rebecca has already done so---

Please let us know what steps -- I think I need to do a formal letter of concurrence and I can do this, however, I think the title issue needs to be addressed. I am cc'ing Rebecca so she can see my comments and those of Janet below.

All best Lesley

Lesley Ferris, Interim Chair

Arts and Humanities Distinguished Professor of Theatre Department of Theatre The Ohio State University 1089 Drake Performance and Event Center 1849 Cannon Drive, Columbus, OH 43210 614-292-0829 Office

ferris.36@osu.edu osu.edu

theatre.osu.edu

From: Parrott, Janet

Sent: Tuesday, February 10, 2015 9:44 PM

To: Ferris, Lesley

Subject: RE: Art Film/Video revision

Hi Lesley,

I agree with Maria about clarifying the naming of the courses. 1, 2, 3, 4 implies a sequence with prerequisites and doesnt address the course content. It makes sense that the course name be more specific to the course content.

Additional information...

Film/Video 1 is very similar to our TH 5321 Video Production 1. I think the distinction was the word "Art" in the title. Video Art is a specific term. I don't know if the removal of that word makes it a more generic production course and less Video Art specific. Art and Theatre's Video 1 courses have co-existed fairly well sharing many

students.

TH Video Production I course enrollment could be negatively impacted by additional offerings of Film/Video I.

Film/Video 2 is more experimental specific then our Video Production 2.

I do support these changes and additions over all and think it is a good direction for moving-image curriculum at the university. I am glad both Roger Beebe and Dani Leventhal are here to teach the practical and conceptual aspects to experimental moving-image work.

Best, Janet

Subject: RE: Art Film/Video revision

Dear All---

I passed these curriculum proposals to Janet Parrott---and she and I have spoken about them. We are generally positive but do have some thoughts and questions and Janet and I will be sending them to you soon.

All best, Lesley

Subject: Art Film/Video revision

Hi Rebecca —

I've had a chance to look over the proposed changes to your Film/Video courses with an eye towards Concurrence from Dance's perspective. It looks like a solid and exciting line up of offerings.

I would agree with Maria's comments about naming. Titling the courses 1, 2, 3, 4 makes them appear to be in sequence. If you want to keep those numbers, I definitely feel it's better to append them with some text that brings specificity to the course names. It will certainly make it clearer to those outside your Department who are not immediately *in the know*.

As to any possible overlap with the Department of Dance's offerings, I don't think it's an issue. All of

our video classes are dance-specific. And while some of our classes might both deal with the rudiments of video camera use and non-linear editing for a few days, the similarity ends there. Those are merely the tools, but the art forms they forge are utterly different.

Congratulations on your refresh...

Mitchell
