Dear Julia,

On Wednesday, September 21st, the ASCC NMS Panel reviewed the proposal for Linguistics 2001. The proposal was approved with the following contingencies:

Edit the grading scale that currently includes percentage discrepancies.

Update the format of the GE language in the syllabus.

Mathematical or Logical Analysis

1. Students comprehend mathematical concepts and methods adequate to construct valid arguments.
2. Students comprehend mathematical concepts and methods adequate to understand inductive and deductive reasoning
3. Students comprehend mathematical concepts and methods adequate to increase their general problem solving skills.

Remove references to Carmen.

Clarify how the ODHE formal instruction (contact hours) requirement is met. For example, a three credit hour course should “meet” for 80 minutes, two times per week or “meet” for 55 minutes, three times per week, or some other combination.

I will send back the course via curriculum.osu.edu in a moment. Should you have any questions about the feedback, I would recommend contacting Professor Charles Daniels (Chair of the ASCC NMS Panel; cc'd on this email).

Best,
Danielle
