---

Dear Pasha,

On Wednesday, November 16, the Natural and Mathematical Sciences Panel of the ASC Curriculum Committee reconsidered the requests to change some of the course content of Animal Science 2200.01 & 2300H (two existing courses with GE Natural Science-Biological Science).

I am happy to report that the two course change requests were unanimously approved with one recommendation: update GE goals and expected learning outcomes on the syllabi. Current syllabi use quarter language.

The version of the GE goals and expected learning outcomes used since conversion to semesters is:

Goals:

Students understand the principles, theories, and methods of modern science, the relationship between science and technology, the implications of scientific discoveries and the potential of science and technology to address problems of the contemporary world.

Expected Learning Outcomes:

1. Students understand the basic facts, principles, theories and methods of modern science.
2. Students understand key events in the development of science and recognize that science is an evolving body of knowledge.
3. Students describe the inter-dependence of scientific and technological developments.
4. Students recognize social and philosophical implications of scientific discoveries and understand the potential of science and technology to address problems of the contemporary world.

Animal Science 2200.01 & 2300H will now continue through the approval process.

Should you have any questions about this feedback, do not hesitate to contact Chuck Daniels (faculty Chair of the NMS Panel; cc'd here), or me.

My best,  
Bernadette

Dear Professor Lyvers Peffer,

On Wednesday, October 5<sup>th</sup>, the ASCC NMS Panel reviewed the proposals for Animal Science 2200.01 and 2300H. No vote was taken as the Panel would like the following items to be addressed.

*Animal Science 2200.01:* submit a GE assessment plan.

*Animal Science 2300H:*

- Submit a GE assessment plan.
- Explicitly state in the proposal that the lab is a separate course.
- Clarify the relationship between the courses (2100, 2200.01, and 2300H)

I will send back the courses via [curriculum.osu.edu](http://curriculum.osu.edu) in a moment. Should you have any questions about the feedback, I would recommend contacting Professor Daniels (Chair of the ASCC NMS Panel; cc'd on this email).

Best,  
Danielle
