

Term Information

Effective Term Summer 2017
Previous Value Summer 2014

Course Change Information

What change is being proposed? (If more than one, what changes are being proposed?)

We are proposing to add this course to the General Education course offerings list, in the area of Open Options: Education Abroad

What is the rationale for the proposed change(s)?

The course meets the GE learning objectives for the proposed category. Additionally, students would get exposed to global public health through their general education curriculum.

What are the programmatic implications of the proposed change(s)?

(e.g. program requirements to be added or removed, changes to be made in available resources, effect on other programs that use the course)?

No real implications in terms of resources

Is approval of the request contingent upon the approval of other course or curricular program request? No

Is this a request to withdraw the course? No

General Information

Course Bulletin Listing/Subject Area Public Health
Fiscal Unit/Academic Org College of Public Health - D2505
College/Academic Group Public Health
Level/Career Undergraduate
Course Number/Catalog 3189.03
Course Title Field Experience in Global Public Health: Japan
Transcript Abbreviation Exp Pub Hlth Japan
Course Description Global public health concepts and associated metrics; role of cultural, social, economic, and environmental factors on public health in Japan; instructions in a classroom setting on an Indian campus and through field trips.
Semester Credit Hours/Units Fixed: 3

Offering Information

Length Of Course 14 Week, 12 Week, 8 Week, 7 Week, 6 Week, 4 Week
Flexibly Scheduled Course Never
Does any section of this course have a distance education component? No
Grading Basis Letter Grade
Repeatable No
Course Components Field Experience
Previous Value Field Experience, Lecture
Grade Roster Component Field Experience
Credit Available by Exam No
Admission Condition Course No
Off Campus Always
Campus of Offering Columbus

Prerequisites and Exclusions

Prerequisites/Corequisites

Previous Value

Prereq: Minimum GPA of 2.5 or higher; English 1110

Prereq: English 1110 (110), and good academic standing, and completion of minimum 4 semesters (2 academic years) of undergraduate education.

Exclusions

Cross-Listings

Cross-Listings

Subject/CIP Code

Subject/CIP Code

51.2201

Subsidy Level

Baccalaureate Course

Intended Rank

Sophomore, Junior, Senior

Requirement/Elective Designation

General Education course:

Education Abroad (new)

The course is an elective (for this or other units) or is a service course for other units

Previous Value

The course is an elective (for this or other units) or is a service course for other units

Course Details

Course goals or learning objectives/outcomes

- Explain the determinants of health and risk factors for conditions of importance to international health.
- Compare and discuss the burden of disease in various regions of the world, how it varies both within and across countries.
- Identify applicable examples addressing issue of health and equity.
- Discuss contemporary Japanese society, culture, and public health issues in Japan.
- Establish links between public health and social, cultural, political, and economic factors with special emphasis on Japan.

Content Topic List

- Radiation problems in Fukushima and in Hiroshima
- Malaria eradication program in Okinawa and its history
- Maternal and child health in Japan
- Aging population-related health in Japan
- Urbanization, water supply issues, and sewage treatment system in Japan

**College of Public Health
PUBHLTH 3189.03
Field Experience in Global Public Health: Japan
3 credit hours – Summer 2017 (4W1)**

Instructor: Motomu Ibaraki, PhD

Office location and phone number: 125 S. Oval Mall, 229 Mendenhall Laboratory, 614-292-7528

E-mail: ibaraki.1@osu.edu

Instructor's Office Hours: By appointment

Class Time and Location: May session; Japan (various locations)

Host Institution Director: Chiho Watanabe, PhD, Department of Human Ecology/School of International Health/Graduate School of Medicine, University of Tokyo, Japan

Host Institution Co-Director: Satoshi Takizawa, PhD, Department of Urban Engineering, Graduate School of Engineering, University of Tokyo, Japan

Course Description:

PUBHLTH 3189.03 provides a basic introduction to global public health concepts and practice, and discusses links between public health and social and economic development with special emphasis on Japanese society. Students will get an overview of the determinants of health and metrics of health status. They will critically examine the role of culture, economy, and environment on public health in a class room setting and through several field trips.

Pre-Requisite: Minimum GPA of 2.5 or higher; English 1110; good academic standing; completion of 4 semesters (2 academic years) of undergraduate education.

GE Course: Education Abroad

Goals:

By living and studying outside the U.S., students acquire and develop a breadth of knowledge, skills, and perspectives across national boundaries that will help them become more globally aware.

Expected Learning Outcomes:

1. Students recognize and describe similarities, differences, and interconnections between their host country/countries and the U.S.
2. Students function effectively within their host country/countries.
3. Students articulate how their time abroad has enriched their academic experience.

This course is a GE Education Abroad Course with the following learning outcomes associated with this GE.

Course Objectives

Upon successful completion of the course, students will be able to:

1. Summarize key global public health concepts, including the demographic and epidemiological transitions, the burden of disease, the impact of key health conditions on individuals and on communities, and critical issues in the organization and delivery of health services.

2. Explain the determinants of health/disease and risk factors for conditions of importance to international health.
3. Compare and discuss the burden of diseases in various regions of the world, how it varies both within and across countries.
4. Identify applicable examples addressing issues of health, disease, and equity.
5. Discuss and recognize the similarities, differences, and interconnections between Japan and the US in contemporary Japanese society, culture, public health issues, and regional imbalances.
6. Establish links between public health and social, cultural, political, and economic factors with special emphasis on Japan.
7. Function effectively within Japan and articulate how their time in Japan has enriched their academic experience with global perspective.

College of Public Health (CPH) Core Competencies:

All students completing this course will be prepared to:

- Summarize the historic milestones in public health.
- Compare and contrast examples of major domestic and international public health issues.
- Discuss various approaches/strategies for identification, response and intervention to address and attempt to resolve common public health issues.
- Identify political, cultural, behavioral and socioeconomic factors related to global public health issues.
- Apply the fundamental principles of the five core disciplines of public health (biostatistics; environmental health; epidemiology; health administration; health behavior/promotion) to domestic and international population issues.
- Develop quantitative awareness of the multiple-scale, and multiple interactions that characterize public health problems.

A complete list of College of Public Health BSPH competencies can be found at:
<http://cph.osu.edu/students/undergraduate#core>.

Student Responsibilities:

Students are expected to attend each lecture and participate in class discussions on a regular and consistent basis. They must be responsive and respectful to team members.

Required Textbook and Major Readings

- **Text:** Skolnik, Richard. Global Health 101, 2nd Ed., published by Jones and Bartlett Learning, 2012; ISBN 978-0-7637-9751-5.
- Supplementary readings as assigned
- Additional contents in Carmen including public health and environmental science resources

Grades

Grading is based on the performance of the students in the following:

- **Background Research Paper:** 5 page report, 30%
- **Group Presentation:** 25%
- **Reflection Essay on the Study Abroad Experience (GEC requirement):**15%
- **Final Paper:** 30%

The students will write a 5-page background research report (typed, line spacing: 1.5 lines) before leaving for Japan. One page should be dedicated to each of the following topics: (1) Itai-itai disease

(cadmium poisoning), (2) Atomic bombing of Hiroshima, (3) Minamata disease (mercury poisoning), (4) the 2011 Tohoku earthquake and tsunami, and (5) public health preparedness and response in Ohio.

Group presentation will focus on public health issues in Japan. Topics include: (1) Health issues in farming villages (marginal villages) in Japan, (2) Suicide in Japan, (3) Waste disposal methods in Japan, (4) The national health insurance system in Japan and its problems, (5) Why are Japanese people so skinny?

For the reflection essay, the students should write a thoughtful three-page (double spaced, typed) paper covering the following three topics: (1) similarities, differences, and interconnections between India and the U.S. in terms of society and public health issues with concrete examples. (2) how the course has allowed you to function more effectively in India, and (3) how your field experience enriched your academic experience at Ohio State with concrete examples.

In the final paper, the students address the following two questions: (1) Describe the major similarities, differences, and interconnections in public health between the US and Japan, and (2) Describe what you learned to improve your academic experience and future career development. The final paper is directly related to the major goals of this course.

The final grades will be based on the following anticipated score distribution:

- A 100-94** Outstanding work that reflects mastery of the material and the ability to apply it critically and creatively
- A- 93-90** Excellent work that reflects mastery of the material
- B+ 89-87** Good work that reflects mastery of most of the material
- B 86-83** Good work that reflects mastery of some of the material
- B- 82-80** Good work that reflects mastery of a few aspects of the material
- C+ 79-77** Mediocre work that reflects familiarity with, but not mastery of the material
- C 76-73** Mediocre work that reflects familiarity with most of the material
- C- 72-70** Mediocre work that reflects some familiarity with the material
- D: 60-69** Mediocre work that reflects little familiarity with the material
- E: Under 60**

Student Support

A recent American College Health Survey found stress, sleep problems, anxiety, depression, interpersonal concerns, death of a significant other and alcohol use among the top ten health impediments to academic performance. Students experiencing personal problems or situational crises during the semester are encouraged to contact OSU Counseling and Consultation Services (292-5766; <http://www.ccs.ohio-state.edu>) for assistance, support and advocacy. This service is free to students and is confidential. CCS is located at the Younkin Success Center.

The Younkin Success Center also provides additional personal, social and academic wellness services for OSU students. Please connect to <http://younkinsuccess.osu.edu/wellness-services/> for details regarding counseling services as well as tutoring and learning services to assist with developing improved study/course skills and time management. The Younkin Center also offers career testing, help with resumes and personal statements, and mock interviews.

Office of Student Life: Disability Services

Any student who feels s/he may need an accommodation based on the impact of a disability should contact me privately to discuss your specific needs. Students with disabilities that have been certified by

the Office for Disability Services will be appropriately accommodated and should inform the instructor as soon as possible of their needs. The Office for Disability Services is located in 098 Baker Hall, 113 W. 12th Avenue; telephone 614-292-3307, TDD 614-292-0901; <http://www.ods.ohio-state.edu/>.

Academic Integrity

Academic integrity is essential to maintaining an environment that fosters excellence in teaching, research, and other educational and scholarly activities. Thus, The Ohio State University, the College of Public Health, and the Committee on Academic Misconduct (COAM) expect that all students have read and understood the University’s Code of Student Conduct and the School’s Student Handbook, and that all students will complete all academic and scholarly assignments with fairness and honesty. The Code of Student Conduct and other information on academic integrity and academic misconduct can be found at the COAM web pages (<http://oaa.osu.edu/coam/home.html>). Students must recognize that failure to follow the rules and guidelines established in the University’s Code of Student Conduct, the Student Handbook, and in the syllabi for their courses may constitute “Academic Misconduct.”

The Ohio State University’s Code of Student Conduct (Section 3335-23-04) defines academic misconduct as: “Any activity that tends to compromise the academic integrity of the University, or subvert the educational process.” Examples of academic misconduct include (but are not limited to) plagiarism, collusion (unauthorized collaboration), copying the work of another student, and possession of unauthorized materials during an examination. Please note that the use of material from the Internet without appropriate acknowledgement and complete citation is plagiarism just as it would be if the source were printed material. Further examples are found in the Student Handbook. Ignorance of the Code of Student Conduct and the Student Handbook is never considered an “excuse” for academic misconduct.

If I suspect a student of academic misconduct in a course, I am obligated by University Rules to report these suspicions to the University’s Committee on Academic Misconduct. If COAM determines that the student has violated the University’s Code of Student Conduct (i.e., committed academic misconduct), the sanctions for the misconduct could include a failing grade in the course and suspension or dismissal from the University. If you have any questions about the above policy or what constitutes academic misconduct in this course, please contact me.

Carmen

There will be a Carmen site for the course. It will contain the syllabus, the readings, and lecture notes.

Course Instruction Details

Week	Activity
1	<ul style="list-style-type: none"> – Local area tour / campus walk – Orientation – Principles and Goals of Global Health – Social issues in Japan – General Discussion on Japanese Society – Japanese environmental issues
2	<ul style="list-style-type: none"> – Natural disasters – Excursion to a local school and nursing homes – Public health in Japan and its history <ul style="list-style-type: none"> – Environmental issues affecting human health – Radiation problems

	<ul style="list-style-type: none"> - in Fukushima – Risk Communication issues - in Hiroshima - Health issues in Japan <ul style="list-style-type: none"> - Maternal and child health - Higher medical levels - Day care services for elderly people - Social epidemiology - Health issues for people with disabilities - Industrial country - Japan <ul style="list-style-type: none"> - Demographic aging - Urbanization - Water supply issues - Sewage treatment system - Excursion to drinking water and sewage treatment facilities

Credit-Hour Rationale
PUBHLTH 3189.03/.03E
Field Experience in Global Public Health: Japan

Rationale and schedule: This course is hosted entirely in the host country that is scheduled primarily in May with the possibility in June and July each year. It contains 2 key categories of contents: formalized instruction and field trip. The formalized instruction is primarily planned in the mornings that is directed by the instructor and joined by the guest lectures from the host country. The field trips are primarily planned in the afternoon.

PUBHLTH 3189.03/.03E Credit-Hour Rationale

Date	Formalized Instruction		Structured Educational Experience	
	Time	Hours	Time	Hours
5/19 (Thu)	9:30-11:30; 13:30-16:30	5		
5/20 (Fri)	9:30-11:30; 13:30-16:30	5		
5/21 (Sat)				
5/22 (Sun)				
5/23 (Mon)	9:30-11:30; 13:30-16:30	5		
5/24 (Tue)	9:30-11:30; 13:30-16:30	5		
5/25 (Wed)	9:30-11:30; 13:30-16:30	5		
5/26 (Thu)	9:30-11:30; 13:30-16:30	5		
5/27 (Fri)			9:30-16:30	4
5/28 (Sat)			9:30-16:30	4
5/29 (Sun)			9:30-16:30	4
5/30 (Mon)			9:30-16:30	4
5/31 (Tue)			9:30-16:30	4
6/01 (Wed)			9:30-16:30	4
6/02 (Thu)			9:30-16:30	4
Totals		30		28

Total Formalized Instruction	Total Structured Educational Experience
30 hrs	28 hrs

Allocation: The proposed syllabus contains 30 hours of formalized instruction, in addition to 28 hours of structured educational and field trip experience. The OSU curriculum guidelines equate 12.5 hours of formalized instruction per credit hour and indicate, further, that 2 hours of structured educational experience may equate roughly to the value of 1 hour of formalized instruction, with 25

hours of structured educational experience per credit hour. In light of those guidelines specification that a course taught with a rough equivalent of 37.5 hours of formalized instruction be valued at 3 credit hours, this course is equivalent of 44 hours of formalized instruction ($30 + 28/2$) be valued at 3 total credit hours.

GE Rationale
PUBHLTH 3189.03/3189.03E
Field Experience in Global Public Health: Japan

1. How does this particular course promote recognition of and reflection on the similarities, differences, and interconnections between the students' host country/countries and the U.S.?

The course will promote recognition of and reflection on similarities/difference/interconnections through “parallel comparison”. For example, a key goal of this course is to compare and discuss the burden of diseases in various regions of the world and how it varies both within and across countries. This will be accomplished by making parallel comparisons primarily between the US and Japan (Nile Virus vs Malaria, for example), for those major public health challenges throughout the entire course activities, such as lectures, field trips, class debate and discussion, and final case report. Via “parallel comparison”, the advantages and disadvantages/strengths and weaknesses for each of the scenarios will be highlighted.

2. What aspects of this particular course insure that the students learn how to function effectively within their host country/countries?

To allow the students to function effectively in a global environment, the course takes the students to Japan where they immerse themselves with the help of guided instruction, local faculty and student partners. Travel within the host country will expose the students to multiple aspects of living in a country that is quite different from their own, the US. The academic material will support this goal through field trips, class debates, and discussion around how some major public health challenges have been managed with the consideration and balance of social, cultural, political, and economic factors in Japan.

3. In what ways will the students' time abroad enrich their academic experience?

The overarching goal of this course is to provide lessons and experiences that the students can bring back and, ideally, apply to their future studies and career development. To achieve this, all lectures and travels in the host country have been planned to draw students' attention to their surroundings and help them in understanding issues related to languages, genders, religions, etc., in the cultural context of Japan. The students will be required to incorporate the cases and situations learned from this course in Japan into the class discussion and their case reports so that their academic performance and outcomes are enriched with global perspective. Students learn about how Japan advances in economy while balancing public health and environmental impact with their first-hand experience with their own eyes, and discuss and debate public health topics with critical thinking. In addition, they will be forced to think critically about issues related to class, gender, sexuality, multilingualism, etc. The students are required to keep a journal and reflect on these topics as a requirement to pass this course.

GE Assessment Plan
PUBHLTH 3189.03
Field Experience in Global Public Health: Japan

An end-of-course reflection essay will assess the effectiveness of the course in achieving all three GE expected learning outcomes:

1. *Students recognize and describe similarities, difference, and interconnections between their host country/countries and the U.S.*
2. *Students function effectively within their host country/countries.*
3. *Students articulate how their time abroad has enriched their academic experience.*

For the reflection essay, the students should write a thoughtful three-page (double spaced, typed) paper covering the following three topics: (1) similarities, differences, and interconnections between Japan and the U.S. in terms of society and public health issues with concrete examples. (2) how the course has allowed you to function more effectively in Japan, and (3) how your field experience enriched your academic experience at Ohio State with concrete examples.

The evaluation of the reflection essay will use the Scoring Rubric provided on pages 84-85 of the ASC Curriculum and Assessment Operations Manual.

How will the data on student achievement be used to make course improvements?

After submitting final grades, the instructor will review the student achievement data in conjunction with the course SEIs. The comments from both student data sources will be used to revise the next year's planning and delivery of the course.

How will the information be archived and made available to future instructors?

Formal and informal student feedback will also be collected by the instructor. All information will be archived in the College of Public Health office so it can be made available to future instructors readily.
