Terry,

On Tuesday, January 31, the NMS Panel of the ASC Curriculum Committee reviewed a request for Chemistry 1612 (new course).

The Panel did not vote on the proposed new course but would like the following points/questions addressed first:

- How many students will the Dept be ready to accommodate? In AU16 there were 171 students enrolled in Chemistry 1610. Department might need to be ready to offer as many as 20 to 22 peer groups.
- The Dept of Chemistry should make sure that this opportunity is broadly available.
- How will students know about this course and understand that this will be valuable to them?
- How are peer-leaders trained, assessed, and perhaps compensated?
- Update disability services statement. The Office of Student Life Disability Services has moved and the College's preferred statement is now, "Students with disabilities (including mental health, chronic or temporary medical conditions) that have been certified by the Office of Student Life Disability Services will be appropriately accommodated and should inform the instructor as soon as possible of their needs. The Office of Student Life Disability Services is located in 098 Baker Hall, 113 W. 12th Avenue; telephone 614-292-3307, slds@osu.edu; slds.osu.edu."

I will return the course via curriculum.osu.edu in a minute to enable the department to address the points above.

Should you have any questions about this feedback, do not hesitate to contact Chuck Daniels (faculty Chair of the NMS Panel, cc'd here), or me.

My best,
Bernadette
