Dear Professor Wallace,

On Tuesday, February 28, the NMS Panel of the ASC Curriculum Committee reconsidered a proposal for your new first-year seminar.

I am happy to report that the Panel unanimously approved the course with one recommendation (for when the course is taught): P. 2 "Hands-on experiments": Recommendation to remove this language since there are no hands-on experiments. Suggestion to refer to "analysis of experiments" (or similar language).

Should you have any questions, feel free to contact either Chuck Daniels or me.

Todd Bitters will be in touch with you for all the practical arrangements related to teaching the course.

Congratulations on your new first-year seminar.

My best,
Bernadette

Subject: New First-Year Seminar "MythBusters: An Introduction to Applied Interdisciplinary Research Methods"

Dear Professor Wallace,

On Tuesday, January 31, the Natural and Mathematical Sciences Panel of the ASC Curriculum Committee reviewed your proposal for a new First-Year Seminar, "MythBusters: An Introduction to Applied Interdisciplinary Research Methods."

The Panel did not vote on the proposed new course but would like the following points/questions addressed first:

- In the schedule, what are the topics for MythBuster clips # 1-10? Panel would welcome more specificity.
- Assignments: What are the hands-on experiments/projects? What types of grant proposals are meant?

Should you have any questions about this feedback, do not hesitate to contact Chuck Daniels (faculty Chair of the NMS Panel, cc'd here), or me.

Please feel free to send a revised syllabus to me, and the NMS panel will then review it.

Best regards,
Bernadette
