Dr. Johnson,

We have reviewed the course syllabus for Parasites & Evolution: How Worms, Mosquitos, Etc. Manage Their/Our World. We have found minimal overlap and the majority of content proposed in the syllabus is unique. You have our concurrence.

Sincerely,

Pasha A Lyvers Peffer

Interim Associate Chair & Associate Professor

Subject: Course concurrence request: EEOB - Parasites and Evolution

Dear Dr. Weiss,

I'm writing to request concurrence from the Department of Animal Sciences for a new undergraduate course proposal entitled "Parasites and Evolution: How worms, mosquitoes, etc. manage their/our world." This proposal was developed by Dr. Hans Klompen and is targeted at mid-level undergraduate students, those who have at least an introductory-level knowledge of biology. I have attached a copy of the course syllabus, and either I or Dr. Klompen would be happy to discuss any aspects of the course for which you might need further clarification. The College of Arts & Sciences provides a concurrence form as a PDF, and I've attached that with this email. I've been told on occasion that it can be difficult to fill out and save this form; if so, a simple email would suffice. I would appreciate it if I could receive your department's response by 08 Mar 2017. Thanks very much for your consideration.

Norm Johnson
