Dear Terry and Laura,

On Monday, November 6, the NMS Panel of the ASC Curriculum Committee reviewed a proposal to revise the BA-Biochemistry.

I am happy to report that the Panel unanimously approved the revision. There were three comments:

- P. 2: Typos: "Affects outside the proposing unit: There should not be any significant affects outside. . ." This should read "effects."
- P. 3: "The proposed change has strong support from the Department staff Undergraduate Advisors who learn directly from students the desirability of majoring in biochemistry but the concern over the mathematics, physics, and physical biochemistry requirements of the B.S. degree." Statement seems to be lacking some words. Also, did you mean to say "B.S." in this sentence or was the intention to refer to the "B.A."?
- The Council on Academic Affairs does not want any changes to be posted until these are fully approved by that body. Request to not yet post the proposed changes on the departmental website <https://chemistry.osu.edu/undergrad/biochem/requirements>

The proposal will likely be reviewed at the full ASC Curriculum Committee (ASCC) meeting on Friday of next week (Nov. 17). (The agenda for that meeting will be set tomorrow so I will know tomorrow for sure.)

Meanwhile, a revision that addresses the first two bullet points above can be e-mailed to me & that version will be the one considered by the ASCC (and then forwarded to CAA).

Should you have any questions about the feedback of the Panel, please feel free to contact Chuck Daniels (faculty Chair of the NMS Panel; cc'd on this e-mail), or me.

My best,
Bernadette
