Dear Allison,

As you may already have heard from Christina Roup, the Social and Behavioral Sciences Panel of the ASC Curriculum Committee reviewed Speech and Hearing Science 6850 during an e-vote session this week and unanimously approved the course. There was one question/recommendation that it was not clear whether the whole calibration project was due at the time of the calibration presentations.

Also, please know that our office has made a change to the form in curriculum.osu.edu. The stated prereq was "Graduate student status, or permission of the instructor." That is not quite correct as this should read, "Graduate standing, or permission of instructor and approved petition to the Graduate School." Indeed, the Graduate School needs to approve a petition—permission of instructor is not sufficient. So this change has already been made.

The course is being advanced to the Graduate School and OAA.

Please let us know if you have any questions.

Best,
Bernadette
