Dear Professor Pradel,

I am happy to let you know that Charles Daniels has reviewed and approved the biography you provided. Your first-year seminar can be offered in Autumn 2019. Todd Bitters, who administers the First-Year Seminar program, will be in touch with you for all the practical arrangements related to teaching the course in Autumn.

Congratulations on your new first-year seminar.

Best,
Shelby

Hi Shelby

Thanks! That looks fine. Can you go ahead and remove the contingency and move it along?

Cheers

Chuck

Good morning Chuck,

It looks like the documents didn't attach when I replied to the email, but I think they will if I forward it.

Best,
Shelby

Subject: New First-Year Seminar "Learning from Disasters: Extreme Events and Their Impact on Infrastructure, Engineering and Society"

Dear Professor Pradel,

On Monday, September, the Natural and Mathematical Sciences Panel of the ASC Curriculum Committee reviewed your proposal for a new first-year seminar, "Learning from Disasters: Extreme Events and Their Impact on Infrastructure, Engineering and Society."

The Panel unanimously approved the proposed seminar with one contingency and two recommendations:

- Contingency: Course proposal form indicates that instructors should "attach a brief biographical paragraph that includes the current research interests, teaching awards and honors, and undergraduate courses taught by the participating instructor(s)." Please submit a biographical paragraph.
- Recommendation: Correct typos in syllabus:
 - "Nepal earthquakes" in course description
 - Mention of lab sessions in course expectations
- Recommendation: Panel recommends putting the disability statement in 16-point font.

Should you have any questions about the feedback of the Panel, please feel free to contact Charles Daniels (faculty Chair of the NMS Panel; cc'd on this e-mail), or me.

Please feel free to send a revised syllabus to me, and I will then submit it for final approval.

Best,
Shelby
