Subject: Re: Concurrence Request: EEOB 5440, Plankton Ecology
Date: Monday, August 20, 2018 11:35:33 AM

Ian,

The School of Earth Sciences supports this new course as it will expand upon the educational opportunities for EEOB and SES students.

Dear Dr. Panero,

The Department of Evolution, Ecology and Organismal Biology is proposing a new course, EEOB 5440: Plankton Ecology, to be offered in May term starting 2019. The goals of this course are to (1) learn the essentials of plankton ecology, including natural history, ecology, and taxonomy; (2) use the study of plankton to explore limnology at an advanced level and understand limnological responses to the Anthropocene; and (3) hone various skills (e.g., reading, writing, quantitative) required to be an effective researcher or manager of inland waters. The prerequisites, course learning outcomes, and the topic list are in the attached syllabus.

Please review the attached syllabus and indicate (via the attached concurrence form or an email) your unit's position on the new course proposal by September 4, 2018. Please let me know if you have any questions whatsoever.

Thanks!
Ian
