Chair, Arts and Sciences Curriculum Committee

Re: Approval of Revision to Mathematics Honors Program

Dear Meg,

The Curriculum and Assessment subcommittee of the ASC Honors Committee approved a revised Honors Program from the Department of Mathematics on January 22, 2019.

The Mathematics Honors Program revision includes new and revised honors pathways for undergraduate students in mathematics, offering additional choices for earning honors or distinction in Mathematics. The proposal includes the full Mathematics Ad Hoc Honors Committee Report, which outlines the curricular changes, rationale, history, and oversight for the Honors Program in Mathematics.

The subcommittee agrees that the proposed revision, as articulated, offers increased options for students and improvements to the oversight of the Mathematics Honors Program. The revised program was unanimously approved with no contingencies by our subcommittee. We now advance the proposal to the Arts and Sciences Curriculum Committee with a motion to approve.

Best,

Andrew W. Martin
Professor and Director of Undergraduate Studies
