W. Randy Smith
Vice Provost for Academic Programs

Dear Randy,

The Department of Mathematics has undertaken a very serious review of its current honors program. This review began in Autumn 2017 and culminated in the revised program that is presented here. This program revision not only includes new and revised honors pathways for the various tracks of its undergraduate majors, it also puts forth departmental structures which are designed to provide more thorough faculty oversight of the honors program. This revised program was put to a vote of the full faculty of the Department of Mathematics in November 2018 and was approved by a greater than 3 to 1 margin by the same.

With this in mind, the Department of Mathematics would like to present this revised honors program to you for consideration and approval.

Sincerely,

William Husen
Director of Undergraduate Instruction
Department of Mathematics
