COURSE DESCRIPTION

Catalog Description: Sports communication is a growing area of study within the communication discipline, as scholars recognize the increasingly important role media play in conveying and shaping sports and society. This course will examine the intersection of sports, society, and the media, by exploring historical and current issues in sports that shape our ideas, perspectives, and assumptions about the U.S.

The course will use an empirical social-scientific perspective to better understand sports' impact on society, as well as the role media coverage of sports plays as a vehicle to report on and communicate about important societal issues. The course will place special emphasis on how audiences psychologically respond to, and are affected by, strategic communication messages embedded in sports media. This course will be delivered entirely online through Carmen.

4. Identify potential inequities in sports journalism reporting and coverage of marginalized groups
5. Explain how mediated intergroup interaction through sports media impacts attitudes and perceptions of outgroup members
6. Understand how strategic communication message elements are used for branding and promotion of athletes, teams, and businesses

COURSE EXPECTATIONS & GUIDELINES

Faculty Feedback and Response:

The instructor and/or TA will respond to all emails and the Course Q&A discussion board within 24 hours on weekdays. Assignments should be graded and returned within 7-10 days of submission.

Late Assignments:

A 2 hour grace period is given for each assignment to ease any technology or personal issues that may arise. Late submissions for assignments will not incur a penalty during the grace period, but will incur a 30% penalty each day the submission is late. The first day begins one minute after the grace period has ended, with an automatic loss of 30% of the points. Please do not email your paper to the professor or to the TA. We will open the assignment window for you so that you can upload it for the plagiarism check. It will not be counted as submitted until you have submitted it to Carmen.

You must have a medical excuse or a note from Carmen/Canvas staff documenting an actual Carmen/Canvas problem that would have affected your submission to have a paper or post accepted with no penalty after the assignment period closes.

Academic integrity policy

Policies for this online course

- **Written assignments:** Your written assignments, including discussion posts, should be your own original work. In formal assignments, you should follow **APA** style to cite the ideas and words of your research sources. You are encouraged to ask a trusted person to proofread your assignments before you turn them in—but no one else should revise or rewrite your work.
- **Reusing past work:** In general, you are prohibited in university courses from turning in work from a past class to your current class, even if you modify it. If you want to build on past research or revisit a topic you've explored in previous courses, please discuss the situation with me.

Academic Misconduct

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term “academic misconduct” includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct <http://studentlife.osu.edu/csc/>

STUDENT PARTICIPATION REQUIREMENTS

Because this is a distance-education course, your attendance is based on your online activity and participation. The following is a summary of everyone's expected participation:

- **Viewing lectures: TWO TIMES PER WEEK**
Recorded lectures and supplemental lecture materials will be posted to the module one to two times per week. The complete listing for the week will be found in the weekly overview. More than one lecture may appear in the upload. The videos are short to provide the most optimal viewing experience and to increase attention and engagement. Discussion and communication guidelines

The following are my expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- **Tone and civility:** Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online. The instructor and TA both work very hard to provide a positive learning experience. Please keep this in mind and remain civilized and respectful in your email and discussion board communications.
- **Citing your sources:** When we have academic discussions, please cite your sources to back up what you say. (For the textbook or other course materials, list at least the title and page numbers. For online sources, include a link.)
- **Discussion Guidelines:** A document outlining guidelines for successful participation in blog posts can be found in the Welcome Module for this course.

REQUIRED READINGS

Required readings are available on Carmen. Assigned materials should be read before each class meeting. The class lectures will generally interpret, demonstrate, and extend the information and ideas in the readings.

COURSE DESCRIPTION

Sports communication is a growing area of study within the communication discipline, as scholars recognize the increasingly important role media play in conveying and shaping sports and society. This course will examine the intersection of sports, society, and the media, by exploring historical and current issues in sports that shape our ideas, perspectives, and assumptions about the U.S. The course will use an empirical social-scientific perspective to better understand sports' impact on society, as well as the role media coverage of sports plays as a vehicle to report on and communicate about important societal issues. The course will place special emphasis on how audiences psychologically respond to, and are affected by, strategic communication messages embedded in sports media.

COURSE OUTCOMES AND OBJECTIVES

1. Identify and understand how media coverage of sports shapes society and the importance and value people place on specific political/social issues, as well as public opinion and public conversation via social and traditional media
2. Understand and apply social-scientific communication theories including agenda-setting, framing, cultivation theory, communication accommodation theory, mediated intergroup contact theory, and cultural voyeurism - to predict and explain sports communication phenomena
3. Identify and understand societal issues present in sports, and evaluate how these issues impact the way we understand sports and the world around us
4. Identify potential inequities in sports journalism reporting and coverage of marginalized groups
5. Explain how mediated intergroup interaction through sports media impacts attitudes and perceptions of outgroup members
6. Understand how strategic communication message elements are used for branding and promotion of athletes, teams, and businesses
7. Engage in mediated interactions (via readings, videos, social media) with members of different cultural or social groups to better understand how to effectively communicate across groups

Therefore I am delighted to offer you our concurrence for the course and the best wishes of our faculty.

Will this email suffice for your purposes, or shall I draft a letter?

Subject: Discussion re concurrence

Dear Dr. Folden,

We are following up your earlier correspondence with Dr. Appiah re concurrence with the substantially revised syllabus for Sports, Mass Media, and Society, as it is now titled.

Professor Appiah has invested considerable time in addressing concerns you expressed in response to an earlier syllabus.

This course is of substantial importance to students and faculty in the School of Communication. In the field of communication there is increasing interest in, and a growing body of research on, media coverage about and reporting on sports. Media reporting on sports has been influential in magnifying and bringing attention to significant political and social issues.

Our School is unique in that we have the faculty and expertise to teach such a course that addresses content which include: communication theory; public opinion about sports; conversations about sports; reporting on and framing of sports; media coverage of sports; and the use of publicity, promotions, social media, and branding in sports. There is no other place on campus where a student can get an empirical, social-scientific perspective on the link between media and sports, the nature and reasons for media coverage and how it is reported and framed, and how strategic communications are used by the sports industry and athletes, and the associated impact on society.

In order to get concurrence from and address the concerns of Human Ecology (HE) we have revised our course, "Sports, Mass Media, and Society". A number of revisions were made which include:

- New course title
- Changed and/or renamed course topics

- Additional literature specific to communication theory, social science, and media coverage of sports
- Enhanced the syllabus to include a brief summary/overview for each content area of the course.

We believe these changes should adequately satisfy the concerns expressed by HE. We believe our course and the HE Sports and Popular Culture course are not overlapping courses but complementary courses. Unlike the HE course, our course:

1. Uses an empirical social-scientific approach to study media and sports
2. Examines how media coverage reshapes attitudes toward sports, sports figures, teams, and athletic institutions
3. Explores the role media play in increasing public attention to and discussion about specific social issues
4. Magnifies hot social and political sports topics, leading to increased public attention to and discussion about specific social issues
5. Describes the impact of traditional and social media in sports
6. Addresses publicity and promotions of sports through traditional and social media

Again, based on the aforementioned information it seems clear that the HE and COMM courses are not overlapping, indeed are complementary given the cultural studies perspective of the HE course, and can co-exist. Moreover, our proposed course is an appropriate one for us to offer given our expertise, is an excellent fit for our College's Sports and Society Initiative, as the letter from Executive Dean Box-Steffensmeier indicates, and would serve an important need for students at OSU.

I would also note that Dr. Appiah is superbly qualified to teach this course, with an extensive record of publication related to media, race, and strategic communication, experience in the advertising profession, and personal experience as a Division I athlete.

We trust that your concerns have been addressed. However, if you have continued questions or reservations, we need to meet and discuss them at the earliest opportunity. My assistant, Aaron Smith (copied here), would be glad to schedule a time for you, me, Dr. Appiah, and Dr. Nicole Kraft of the Sports and Society Initiative to meet and talk.

Let me know if you have any questions,

Sincerely,

Mike Slater
