Hello Bernadette and William,

I just approved the course yesterday afternoon. Overall, the reviews were incredibly positive. This course has been well designed. In fact, one reviewer mentioned the idea of working with the Math Coordinators and local libraries at the regional campuses to bring this course to those students as well. We would love to see more service-learning at the regional campuses, particularly since the literature shows that service-learning is most impactful for students similar in profile to our regional campus students. If the course goes well in its initial offerings, I'd love to help move forward this idea if there is departmental and instructor interest as well.

Thanks,
Claire
