Term Information

Effective Term Autumn 2020 **Previous Value** Autumn 2015

Course Change Information

What change is being proposed? (If more than one, what changes are being proposed?)

Change in the structure of the course from lecture/recitation to lecture only and changing from 1000-level to 2000-level.

What is the rationale for the proposed change(s)?

The new structure will allow for a more coherent and unified class experience and one that can be better monitored by the faculty instructor. Moreover, by raising the course number, the course will be able to count as an elective for psychology majors. Given that the topics are focused on how to apply psychology concepts in a range of domains, it is desirable to have students interested in psychology take the course.

What are the programmatic implications of the proposed change(s)?

(e.g. program requirements to be added or removed, changes to be made in available resources, effect on other programs that use the course)?

The course will now be eligible to count as an elective in the psychology major.

Is approval of the requrest contingent upon the approval of other course or curricular program request? No

Is this a request to withdraw the course? No

Course Title Applied Psychology: Human Behavior in the Wild

Transcript Abbreviation Applied Psychology

Course Description Examines how psychological concepts & phenomena are applied in real world contexts, such as law,

medicine, social communities, education, sports, business & engineering. It will introduce constructs & research in applied psychology with a focus on domains not covered in traditional intro psych courses.

Practicum sessions will be used for student discussion & interactive activities.

Semester Credit Hours/Units Fixed: 3

Psychology 1200 Applied Psychology: Human Behavior in the Wild Spring 2017

3 Credits Course #27215

This course fulfills the GE Categories of Diversity and Social Science-Individuals & Groups

Lecture Sessions:

Room # Mendenhall 115 **Time** Mondays, 4 – 5:50pm

Instructor Laura Wagner TA Erin Altenburger

All students in the class will attend the lecture sessions together.

Recitation/Lab Sections: Tuesday 4:30 – 5:25 Journalism 221

Wednesday 4:30-5:25 Journalism 221 Friday 4:30-5:25 Journalism 221

Contact Information:

|------------------|----------|------------------------|----------------|
| Laura Wagner | PS 241 | wagner.602@osu.edu | By appointment |
| Erin Altenburger | PS 181 | altenburger.20@osu.edu | By appointment |

Course Description: In this class, we will examine how psychological concepts and phenomena are applied in real world contexts, such as the domains of law, medicine, education, sports, business and engineering.

Pre-Requisites: There are no pre-requisite course requirements for this class: All students are welcome to take it. Students who have previously taken Psych 1100 are allowed, and even encouraged, to take this course as well.

Course Materials: All readings will be made available on the course Canvas Site. Students are required to read all papers listed as "Required" (1 to 2 per class) and are encouraged to read the papers listed as "Optional" as interest dictates.

Attendance Policy:

All students are expected to attend all lectures and recitation sessions. Students are responsible for all material covered in these classes and if you cannot attend for any reason, it is your responsibility to get the material from other students in the class. Some portions of the lectures may be made available through the Canvas website, but these are not intended to be a complete record of the contents of class.

Course Requirements:

(1) Exams (60% of the final grade)

There will be two in-class exams. These exams will be non-cumulative and consist of a combination of multiple choice and short-answer questions. Questions may be drawn from material covered in the lectures, material in the assigned readings, and material in the recitation class. Each exam will be worth 30% of the final grade. Please see the syllabus for exact dates of the exams.

(2) Activities (24% of the final grade)

During recitation sections, there will be a variety of activities and guided discussions. Students are expected to PREPARE for these sections ahead of time! Instructions for planned recitation activities will be posted approximately one week in advance and students are responsible for downloading the instructions and coming to recitation prepared. Note that there is also a written component to these activities which must be turned in after each section. There are nine planned activities but we will drop the three lowest grades for each student (each of the remaining 6 activity write-ups is worth 4% of the final grade). Deadlines for the written components are specified in the instructions. Late write-ups will not be accepted.

(3) In class quizzes (9% of the final grade)

Periodically over the semester, there will be short quizzes about the readings. These quizzes will only be available in class – if you are not present when they are administered, you will not receive credit. The exact dates and times of these quizzes will be at the discretion of the instructor.

(4) REP (7% of the final grade)

Students will participate in the department's Research Experience Program to learn first hand how experimental practices are conducted and contribute to psychological understanding. Details can be found in the additional REP packet, but in short, students are required to participate in a total of 7 hours of research participation (or they may opt to write short papers instead). Each hour of REP participation is worth 2 points.

Extra Credit Opportunities: Students may earn up to an additional 2% towards their grade by doing two additional hours of Research Experience Program participation.

Grading:

The following grade pattern will be used. All numbers represent percentages.

| | | Α | 93 – 100 | A- | 90 - 92 |
|----|---------|---|----------|----|---------|
| B+ | 87 – 89 | В | 83 – 86 | B- | 80 – 82 |
| C+ | 77 – 79 | C | 73 – 76 | C- | 70 – 72 |
| | | D | 60 - 69 | | |
| | | E | below 60 | | |
| | | | | | |

Disability Services: The University strives to make all learning experiences as accessible as possible. If you anticipate or experience academic barriers based on your disability (including mental health, chronic or temporary medical conditions), please let me know immediately so that we can privately discuss options. To establish reasonable accommodations, I may request that you register with Student Life Disability Services. After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. **SLDS contact information:** slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

Sexual misconduct/relationship violence: Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at http://titleix.osu.edu or by contacting the Ohio State Title IX Coordinator, Kellie Brennan, at titleix@osu.edu

Academic Misconduct: It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the **Code of Student Conduct** at http://studentconduct.osu.edu

Expected Learning Outcomes:

- 1. Attain knowledge and understanding about areas of Applied Psychology, in professional domains such as Educational Psychology, Forensic Psychology, Behavioral Medicine and Health Psychology, Psychology of Business, and Sports Psychology.
- 2. Assess and critically analyze applications of psychological phenomena within non-academic settings as they are discussed in textbooks, newspapers, periodicals, and the internet.
- 3. Become aware of how knowledge of Psychology is used within various professions and is useful for pursuing diverse career goals.

GE Expected Learning Outcomes (Diversity):

1. (Diversity, General) Students understand the pluralistic nature of institutions, society, and culture in the United States and across the world in order to become educated, productive, and principled citizens.

The course discusses how individuals operate within societal institutions (such as courts, teams, and hospitals) as well as within a general community context. A core theme of the course is understanding that these institutions and communities are products of individual people and considering how the different Psychological elements that shape individuals will help us better understand how these institutions work, and how they can sometimes work better. This theme will recur throughout the sections of the course, and it will also be addressed in detail in our classes on Community and Cultural Psychology.

2. (Diversity, Social Diversity in the United States) Students describe and evaluate the roles of such categories as race, gender and sexuality, disability, class, ethnicity, and religion in the pluralistic institutions and cultures of the United States.

This course will consider how differences among individuals (including a range of social categories) influence the ways that people interact with social institutions as well as the way that social institutions shape personal behaviors and vice versa. Moreover, we will especially consider how social and cultural differences among individuals can be leveraged to promote a greater range of leadership styles, improve human-technology interactions, and improve personal self-actualization.

3. (Diversity, Social Diversity in the United States) Students recognize the role of social diversity in shaping their own attitudes and values regarding appreciation, tolerance, and equality of others.

The course will highlight the Psychological ways that one's personal background influences social interactions and even information processing. Through the lectures – and more extensively through the lab/recitation activities – students will be asked to adopt multiple perspectives on societal institutions and practices, including perspectives different from their own. The value of having diverse perspectives readily available will be a recurring theme in the course and will also be discussed at length in the classes on Community and Cultural Psychology.

GE Expected Learning Outcomes (Social Sciences- Individuals & Groups):

1. (Social Sciences, General) Students will understand the systematic study of human behavior and cognition; the structure of human societies, cultures, and institutions; and the processes by which individuals, groups, and societies interact, communicate, and use human, natural, and economic resources.

The core phenomena of Psychology center on human behavior and cognition, as well as how humans interact with society in various ways. This course will cover a variety of these core items and

discuss them in particular for how they inform thinking and practice within a variety of societal institutions such as schools, courts, playing fields, hospitals, and the workplace.

2. (Social Sciences- Individuals and Groups) Students understand the theories and methods of social scientific inquiry as they apply to the study of individuals and groups.

Students will learn how Psychologists gain knowledge through scientific inquiry and will gain personal experience with this process through the "Research Experience Program" portion of the course and the lab/recitation activities.

3 (Social Sciences- Individuals and Groups) Students understand the behavior of individuals, differences and similarities in social and cultural contexts of human existence, and the processes by which groups function.

This course considers a variety of social contexts in which understanding of human behavior is critical. A recurring theme within the course concerns how individual differences (in gender, race, age, ability levels, etc.) influence how professional institutions and individuals react and interact with each other. Additionally, this course covers Cultural Psychology as a way to understand paths through which cultural differences impact individual behavior.

4. (Social Sciences- Individuals and Groups) Students comprehend and assess individual and group values and their importance in social problem solving and policy making.

Topics for this course include policy-relevant issues such as appropriate policing strategies and business practices. The course will discuss how Psychological theory is (and should be) used to inform our societal policies.

Class Schedule

| DATES (faculty | LECTURE | RECITATION |
|----------------|---|----------------------------|
| Lecture) | | |
| Jan 9 | Learning in the wild: | REP Overview |
| | Using Psychology to succeed in the classroom | |
| Jan 16 | NO Lecture or Recitations: Happy | MLK Day! |
| Jan 23 | Who are you? | Recitation Activity A |
| | Are any of us more than our buying habits? | |
| Jan 30 | What you don't know can help you: | Recitation Activity B |
| | The Placebo Effect | - |
| Feb 6 | Distractions | Recitation Activity C |
| | Among other things, turn off your phone NOW! | |
| Feb 13 | What you think you know can hurt people: | Optional Exam Review (Weds |
| | Profiling and false confessions | ONLY!) |
| Feb 20 | Exam 1 | Exams discussed |
| Feb 27 | How Food and Drugs Affect the Brain | Recitation Activity D |
| | Guest speaker: Dr. Gary Wenk | |
| Mar 6 | Statistics and Sports | Recitation Activity E |
| | Hot Hands and Money Ball | |
| Mar 13 | NO Lecture or Recitation: Happy S ₁ | |

Class Schedule

| DATES | LECTURE |
|---------|---|
| Week 1 | Learning in the wild: |
| | Using Psychology to succeed in the classroom |
| | (No Activity this week) |
| Week 2 | Habits: |
| | How they make us who we are and how we can transcend them |
| | Class Activity A: Assessing your Online Personality |
| Week 3 | What you don't know can help you: |
| | The Placebo Effect |
| | Class Activity B: Evaluating Drugs and Home Remedies |
| Week 4 | Distractions |
| | Among other things, turn off your phone NOW! |
| | Class Activity C: But I work better when the music is on |
| Week 5 | It's all fun and games: |
| | How play makes kids smarter |
| | Class Activity D: Evaluating Educational Toys |
| Week 6 | Statistics and Sports |
| | Hot Hands and Money Ball |
| | Class Activity E: Measuring Hot Hands |
| Week 7 | Catch-up, Re-cap, Exam Review |
| | Exam 1 |
| Week 8 | What you think you know can hurt people: |
| | Profiling and false confessions |
| | Activity F: Assessing your own stereotypes |
| Week 9 | What's that again? |
| | Communicating across cultures |
| | Activity G: How to be polite in other languages |
| Week 10 | This is your brain on Drugs, people. |
| | Activity H: But everybody else is using them! |
| Week 11 | Group-Think |
| | How we collectively track, and coordinate information |
| | Activity I: Testing the crowd – how tall are those buildings? |
| Week 12 | How to build things |
| | Engineering from small to large |
| | Activity J: Graceful Technology |
| Week 13 | Workplace Culture |
| | First Impressions and the No A**hole rule |
| | Activity K: Workplace Collaborations |
| Week 14 | Catch-up, Re-cap, Exam Review |
| | Exam 2 |

Psychology Major Learning Objectives

Program Objectives

Knowledge Base in Psychology

- K1. Describe key concepts, principles, & overarching themes in psychology
- K2. Develop working knowledge of psychology's content domains
- K3. Describe applications of psychology

Scientific Inquiry & Critical Thinking

- S1. Use scientific reasoning to interpret psychological phenomena
- S2. Demonstrate psychology information literacy
- S3. Engage in innovative & integrative thinking & problem solving
- S4. Interpret, design, & conduct basic psychological research
- S5. Incorporate sociocultural factors in scientific inquiry

Ethical & Social Responsibility in a Diverse World

- E1. Apply ethical standards to evaluate psychological science & practice
- E2. Build & enhance personal relationships
- E3. Adopt values that build community at local, national, & global levels

Communication

- C1. Demonstrate effective writing for different purposes
- C2. Exhibit effective presentation skills for different purposes
- C3. Interact effectively with others

Professional Development

- P1. Apply psychological content & skills to career goals
- P2. Exhibit self-efficacy & self-regulation
- P3. Refine project-management skills
- P4. Enhance teamwork capacity
- P5. Develop meaningful professional direction for life after graduation

Learning Goal Levels

- F Foundational
- A- Advanced

Psych 1200/2500 GE Assessment Plan

The course fulfills 2 GE requirements -- Diversity (specifically, Social diversity in the US) and Social Sciences (specifically with respect to Individuals and Groups). Each of these requirements lays out multiple learning outcomes, all of which are listed on the syllabus. For each learning outcome -- a total of 3 for Diversity and 4 for Social Sciences -- there is an embedded question on either the midterm exam or the final exam (and in a few cases, both). These questions will be used across offerings to track how well the course is fulfilling its GE mission with distinct groups of students.
