Dear Peter,

As you know, on September 3, the NMS Panel reviewed new course Statistics 3440. The panel approved the course with two contingencies and one recommendation, which I here report:

- Contingencies:
 - P. 2 of syllabus: Course outcome C1 is not very apparent in the course. Include some information in syllabus on how designing experiments and observational studies will be present in the activities.
 - Pomerene Hall has not been used by the Student Life Disability Services in many years. Furthermore, SLDS has updated the whole language of the statement. Lastly, since this course will only be taught on regional campuses, the regional campus-specific location should be listed—not the one on the Columbus campus.
- Recommendation:
 - Recommend adding the other boilerplate statements found on many syllabi. See pp. 13-15 of ASC Curriculum and Assessment Operations Manual
https://ascas.osu.edu/sites/default/files/ASC_Curriculum_and_Assessment_Operations_Manual.pdf

In a minute, I will return the course via curriculum.osu.edu to enable the Department of Statistics to address the feedback of the Panel.

Let us know if you have any questions.

Best,
Bernadette
