Dear Karen and Deb,

On Monday, March 22nd, the Arts and Humanities 2 Panel of the ASC Curriculum Committee reviewed a new course proposal for English 2200.

The Panel unanimously approved the request with four comments:

- The Panel would like it mentioned that they are overall very pleased with this course.
- The Panel recommends increasing the font size for the disability statement, as found on 2 of the syllabus.
- The Panel recommends adding where to purchase the textbooks and/or required readings for the course.
- The two-column format of the syllabus can be tricky to read, and the Panel would like to suggest reformatting the syllabus to make it easier-to-read.

Additionally, on Monday, March 29th, the Natural and Mathematical Sciences Panel of the ASC Curriculum Committee reviewed a new course proposal for English 2200.

The Panel did not vote on the proposal as they would like the following points addressed:

- The Panel requests that a concurrence from Statistics be acquired, as under current OAA policy teaching statistics in a course requires a concurrence from the Department of Statistics. For more information, please see the following link: <https://admin.resources.osu.edu/student-information-system-sis/sis-curriculum-program-course-request/new-course-sought-occurrence>
- The Panel requests to see further information on the GE form submitted when explaining how the course will satisfy the ELOs. Please provide more specific information for each ELO, such as specific course assignments that will be used to satisfy each particular ELO. Additionally, please make sure that the faculty member who submitted/wrote the syllabus is also the person who fills out the GE form.
- The Panel would like a mathematics prerequisite added to the course, specifically that Math Placement Test level of R or above or completion of Math 1075. This is to ensure that students do not enroll into the course if they do not have the appropriate background to handle the coursework.
- The Panel would like the language around data analysis versus data analytics cleared up, and that since the GE Category is Data Analysis, that references of data analytics be removed.

I will return English 2200 to the department queue via curriculum.osu.edu in order to address the Panel's requests.

Should you have any questions about the feedback, please feel free to contact Luke Wilson regarding AH&2 or Wendy Panero regarding NMS (both cc'd here). You may also contact me for additional questions.

Best,
Michael
