Good morning,

On Wednesday, October 27th, the Natural and Mathematical Sciences Panel of the ASC Curriculum Committee reviewed a new course proposal for Earth Sciences 5656.

The Panel did not vote on the proposal as they would like the following points addressed:

- The Panel requests that the Earth Sciences department obtain concurrences from the department of Horticulture and Crop Science and the department of Molecular Genetics for this course.
- The Panel asks that the department provide more information on the syllabus regarding the group project so that students better understand what will be expected of them. Relevant details could include (but are not limited to) the expected length of the presentation, length/word count requirements for any written component, clarification on expectations for visual aids (poster, Power Point etc.,) and/or a mention of how the project will be evaluated (rubric, peer or self-evaluations, etc.)
- The Panel requests that the department amend the syllabus (pg. 1) to eliminate the cross-listing of the course in SENR

I will return Earth Sciences 5656 to the department queue via curriculum.osu.edu in order to address the Panel's requests.

Should you have any questions about the feedback of the Panel, please feel free to contact Wendy Panero (faculty Chair of the NMS Panel; cc'd on this e-mail), or me.

Best,
Rachel

I acknowledge that the land that The Ohio State University occupies is the ancestral and contemporary territory of the Shawnee, Potawatomi, Delaware, Miami, Peoria, Seneca, Wyandotte, Ojibwe and Cherokee peoples. Specifically, the university resides on land ceded in the 1795 Treaty of Greenville and the forced removal of tribes through the Indian Removal Act of 1830. I honor the resiliency of these tribal nations and recognize the historical contexts that has and continues to affect the Indigenous peoples of this land.
