6226 - Status: PENDING

Last Updated: Vankeerbergen, Bernadette Chantal 01/25/2022

#### Term Information

**Effective Term** Spring 2023 **Previous Value** Autumn 2015

#### Course Change Information

What change is being proposed? (If more than one, what changes are being proposed?)

We request to change the course number from 5226 to 6226.

What is the rationale for the proposed change(s)?

We would like to use this as an advanced course in the curriculum of a new professional masters program, which will be proposed soon in Autumn 2021. This course in its current form contains advanced topics that is suitable to professional masters students.

What are the programmatic implications of the proposed change(s)?

(e.g. program requirements to be added or removed, changes to be made in available resources, effect on other programs that use the course)?

In the attached explanation document entitled Geography Curriculum Mapping: Summary of Changes, we explain that such a change will not affect the coverage of the proficiencies of our undergraduate program.

Is approval of the requrest contingent upon the approval of other course or curricular program request? No

Is this a request to withdraw the course? No

#### Comments

- Responses to the six contingencies:
- The ASC template is now adopted for all three syllabi (in-person, online, and hybrid).
- The schedule now accounts for all 14 weeks.
- Pages numbers are now included in the course schedule.
- The most up-to-date version of the University's disability services statement is now used in the syllabi.
- The DL course does not have an in-person component, and students can complete the assignments using their own computer. This is now clarified in the "Descriptions of major course assignments" section.
- The software tools required for this course have received ASC Tech's review of Accessibility and Usability (please see the attached AST Tech reviews). NetLogo is a well-tested open-source package that has been widely used, with a huge world wide user community.

Updated syllabi are labelled as -v2 in their file names. (by Xiao, Ningchuan on 01/25/2022 12:46 AM)

- Please see Panel feedback e-mail sent 12/03/21. (by Cody, Emily Kathryn on 12/03/2021 02:29 PM)
- The course number has not been changed in curriculum.osu.edu (by Vankeerbergen, Bernadette Chantal on 11/12/2021 09:38 AM)

# **SYLLABUS GEOG** 6226

Spatial Simulation and Modeling in GIS Autumn 2023 (full term) 3 credit hours Online

# **COURSE OVERVIEW**

#### Instructor

Instructor: Dr. Yang Song

Email address: (song.630@osu.edu)

Phone number: 614-292-2514

Office hours: TBD

#### **Prerequisites**

GEOG 5210 or consent of instructor

# Course description

This course is about the use of computational techniques to simulate the evolution of complex spatial systems such as ecosystems, transportation, weather/climate, cities, economies, societies and landscapes. These and other complex systems have a multitude of relatively simple parts interacting over space and time to create surprising, emergent behaviors. Powerful computational techniques, often linked with GIS software, allow the simulation of realistically large systems at a fine-level of granularity, providing new insights that were unavailable through traditional modeling techniques.

This class meets twice a week for two 80-minute sessions.

We will explore three major types of "building-blocks" at the core of many dynamic spatial models: i) spatial aggregation and segregation processes, ii) random walks and mobile entities, and iii) percolation and growth processes. We will also discuss issues such as the role of spatial simulation in geographic information science, representation of space and time, how to build more complete models of human,

physical and linked human-physical dynamic spatial processes, and how to evaluate model performance and uncertainty.

# **Course learning outcomes**

By the end of this course, students should successfully be able to:

- Understand the nature of complexity and complexity in nature
- Understand the nature of computational techniques
- Understand computational science as a tool for scientific investigation
- Understand and use spatial simulation techniques

#### General education course information

This is not a GE course.

#### **HOW THIS ONLINE COURSE WORKS**

**Mode of delivery:** This course is 100% online. There are no required sessions when you must be logged in to Carmen at a scheduled time.

**Pace of online activities:** This course is divided into **weekly modules** that are released one week ahead of time. Students are expected to keep pace with weekly deadlines but may schedule their efforts freely within that time frame.

Credit hours and work expectations: This is a 3-credit-hour course. According to Ohio State policy (go.osu.edu/credithours), students should expect around 3 hours per week of time spent on direct instruction (instructor content and Carmen activities, for example) in addition to 6 hours of homework (reading and assignment preparation, for example) to receive a grade of (C) average.

**Attendance and participation requirements:** Because this is an online course, your attendance is based on your online activity and participation. The following is a summary of students' expected participation:

- Participating in online activities for attendance: AT LEAST ONCE PER WEEK
  You are expected to log in to the course in Carmen every week. (During most weeks
  you will probably log in many times.) If you have a situation that might cause you to
  miss an entire week of class, discuss it with me as soon as possible.
- Office hours and live sessions: OPTIONAL
  All live, scheduled events for the course, including my office hours, are optional.
- Participating in discussion forums: ONE OR MORE TIMES PER WEEK
   Each week, we will post at least one question that will require students to respond on a
   Carmen discussion board. Each student must respond at least once to the question in a

meaning way by, for example, providing materials to support the statements or arguments raised in the posted question, or discussing real-world applications that may support or counter the statements in the question. We will also encourage students to raise their own questions and respond to posts from others.

#### **COURSE MATERIALS AND TECHNOLOGIES**

#### **Textbooks**

#### Required

- O'Sullivan, D. and Perry, G. (2013) Spatial Simulation: Exploring Pattern and Process, Wiley. Available at university bookstore; also available in e-book format from Amazon.
- Additional readings and webpages will be posted at the Canvas course website. These
  resources will provide additional background material as well as deeper dives into the
  science behind the models discussed in class.

# Other fees or requirements

N/A

# Course technology

#### **Technology support**

For help with your password, university email, Carmen, or any other technology issues, questions, or requests, contact the Ohio State IT Service Desk. Standard support hours are available at ocio.osu.edu/help/hours, and support for urgent issues is available 24/7.

Self-Service and Chat support: <u>ocio.osu.edu/help</u>

Phone: 614-688-4357(HELP)Email: <a href="mailto:servicedesk@osu.edu">servicedesk@osu.edu</a>

• **TDD**: 614-688-8743

#### Technology skills needed for this course

- · Basic computer and web-browsing skills
- Navigating Carmen (go.osu.edu/canvasstudent)
- CarmenZoom virtual meetings (go.osu.edu/zoom-meetings)

- Recording a slide presentation with audio narration (<u>go.osu.edu/video-assignment-guide</u>)
- Recording, editing, and uploading video (<u>go.osu.edu/video-assignment-guide</u>)

#### Required equipment

- Computer: current Mac (MacOs) or PC (Windows 10) with high-speed internet connection
- Webcam: built-in or external webcam, fully installed and tested
- Microphone: built-in laptop or tablet mic or external microphone
- Other: a mobile device (smartphone or tablet) to use for BuckeyePass authentication

#### Required software

Please keep in mind that you are NOT required to purchase any software for this class. The following list should help you access the software that is either open-source (NetLogo and its models) and free-of-cost to you as a student in this class.

#### NetLogo

- o It will be available on the computers in our lab. However, since it is free and open source, you can download and install NetLogo on your personal machines: <a href="https://ccl.northwestern.edu/netlogo/">https://ccl.northwestern.edu/netlogo/</a> However, note that you are on your own with installations on personal machines; we cannot provide technical support.
- The basic NetLogo install is simple, but some of the programs we will look at this semester will use the *gradient* extension. Installing the gradient extension is easy: go to this <u>link</u>, download and unzip the folder called *gradient* containing a single file called *gradient.jar*. Copy <u>the entire folder</u> to the same folder as your NetLogo models, or to the NetLogo *extensions* folder. (Some NetLogo models also require an R extension for data analysis and reporting, but we will not be using these models.) For more details on these extensions, see the textbook authors' website: <a href="http://patternandprocess.org/">http://patternandprocess.org/</a>. You can also follow NetLogo on Twitter: <a href="https://twitter.com/NetLogo">https://twitter.com/NetLogo</a>.
- System requirements of Netlogo can be found <u>here</u>. There are no official privacy policies from developers of QGIS.

#### NetLogo models

- Since it is open source, NetLogo comes with a wealth of freely available models (programs) across a wide range of applications. Models sources include:
  - Models Library available in the NetLogo software itself; look under "Files" → "Models Library"
  - User community: https://ccl.northwestern.edu/netlogo/models/community/
- Models discussed in the textbook
  - The O'Sullivan and Perry text references and discusses a large number of NetLogo models. You should experiment with these models as part of your study prior to class. We will also work with some of these models in class.

- Windows versions of the NetLogo models are available at the Canvas site: unzip the archive and copy the entire directory (including the gradient subdirectory) to your laptop or to a portable storage device for use during class.
- o Other sources for the NetLogo models, including Mac versions, include:
  - The authors' website, Pattern and Process: http://patternandprocess.org/.
  - O'Sullivan also maintains the most up-to-date versions of these models at a github repository: <a href="https://github.com/DOSull/model-zoo">https://github.com/DOSull/model-zoo</a>. (Note that the github repository may be incomplete: some models from the textbook may be missing.)
- Proctorio: A software to monitor online exams. More details can be found <u>here</u>.
- Microsoft Office 365: All Ohio State students are now eligible for free Microsoft Office 365. Full instructions for downloading and installation can be found at go.osu.edu/office365help.

#### Carmen access

You will need to use BuckeyePass (<u>buckeyepass.osu.edu</u>) multi-factor authentication to access your courses in Carmen. To ensure that you are able to connect to Carmen at all times, it is recommended that you take the following steps:

- Register multiple devices in case something happens to your primary device. Visit the BuckeyePass - Adding a Device help article for step-by-step instructions (go.osu.edu/add-device).
- Request passcodes to keep as a backup authentication option. When you see the Duo
  login screen on your computer, click Enter a Passcode and then click the Text me new
  codes button that appears. This will text you ten passcodes good for 365 days that can
  each be used once.
- Download the Duo Mobile application (<u>go.osu.edu/install-duo</u>) to all of your registered devices for the ability to generate one-time codes in the event that you lose cell, data, or Wi-Fi service

If none of these options will meet the needs of your situation, you can contact the IT Service Desk at 614-688-4357(HELP) and IT support staff will work out a solution with you.

# **GRADING AND FACULTY RESPONSE**

## How your grade is calculated

ASSIGNMENT CATEGORY	POINTS
Lab assignments	50
Exams	50

Total	100
-------	-----

See course schedule below for due dates.

# Descriptions of major course assignments

#### Lab assignments

There will be a series of NetLogo-based lab assignments throughout the semester. All lab assignments will be submitted via the course website and count toward your final grade of the course. Most lab assignments are due one week after each lab session (at 6:00pm of the due day). Lab 4 will be given two weeks to finish. All materials required for the lab assignments (NetLogo software, lecture notes, and other models) are available online or on Carmen. The lab assignments can be completed using students' own computers.

Students must finish their lab assignments individually. The course includes many opportunities for formal collaboration with your classmates. While study groups and peer-review of lab assignments is encouraged, remember that comparing answers on an assignment is not permitted. If you're unsure about a particular situation, please ask ahead of time.

#### **Exams**

There will be 4 short examinations (20 -25 questions) during the semester. Exam questions will be drawn from the lectures, the textbook, and labs. Exams will be online using Carmen during the scheduled time, unless you have informed your instructor before the exam with proper reasons and documents, and have received permission from the instructor prior to the exam. You are expected to finish all exams on time. At the end of the scheduled class time, you are to stop working and turn in your exam. You may not continue working on your exam after the scheduled class time.

Students must complete these exams yourself, without any external help or communication. Weekly quizzes are included as self-checks without points attached but are still expected to be completed on your own.

# Late assignments

Lab assignments will be penalized 10% for each day late. Please refer to Carmen for due dates. Extensions will not be granted due to lost work. Be sure you back up and keep all your work.

# **Grading scale**

A	93-100%	В-	80-82%	D+	67-69%
<b>A-</b>	90-92%	C+	77-79%	D	60-66%
B+	97-89%	$\mathbf{C}$	73-76%	E	0-59%
В	83-86%	C-	70-72%		

Your final grade as seen on the course website will be rounded to the nearest whole number (e.g. an 89.49 is a B+ while an 89.50 is an A) before being submitted to the University Registrar at the end of the semester.

## Instructor feedback and response time

You are responsible for all course related emails, so be sure to check your inbox on a daily basis. When emailing your instructor or TA, please always begin the subject of the email with the course number (GEOG6226) and your name (first name followed by last name). This is important as your instructor and TA teach multiple classes and need to know to which class you are referring. A proper email subject should be like this: GEOG6226\_John Smith\_Schedule a make-up exam.

I am providing the following list to give you an idea of my intended availability throughout the course. Remember that you can call **614-688-4357(HELP)** at any time if you have a technical problem.

- Grading and feedback: For large weekly assignments, you can generally expect feedback within 7 days.
- Email: I will reply to emails within 24 hours on days when class is in session at the university.
- Discussion board: I will check and reply to messages in the discussion boards every 24 hours on school days.

# OTHER COURSE POLICIES

# Discussion and communication guidelines

The following are my expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- **Writing style**: While there is no need to participate in class discussions as if you were writing a research paper, you should remember to write using good grammar, spelling, and punctuation. A more conversational tone is fine for non-academic topics.
- Tone and civility: Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online.
- Citing your sources: When we have academic discussions, please cite your sources
  to back up what you say. For the textbook or other course materials, list at least the title
  and page numbers. For online sources, include a link.
- **Backing up your work**: Consider composing your academic posts in a word processor, where you can save your work, and then copying into the Carmen discussion.

# **Academic integrity policy**

See **Descriptions of major course assignments**, above, for my specific guidelines about collaboration and academic integrity in the context of this online class.

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct <a href="http://studentlife.osu.edu/csc/">http://studentlife.osu.edu/csc/</a>.

If I suspect that a student has committed academic misconduct in this course, I am obligated by university rules to report my suspicions to the Committee on Academic Misconduct. If COAM determines that you have violated the university's *Code of Student Conduct* (i.e., committed academic misconduct), the sanctions for the misconduct could include a failing grade in this course and suspension or dismissal from the university.

If you have any questions about the above policy or what constitutes academic misconduct in this course, please contact me.

Other sources of information on academic misconduct (integrity) to which you can refer include:

- Committee on Academic Misconduct web page (go.osu.edu/coam)
- Ten Suggestions for Preserving Academic Integrity (<u>go.osu.edu/ten-suggestions</u>)

# **Student Services and Advising**

University Student Services can be accessed through BuckeyeLink. More information is available here: https://contactbuckeyelink.osu.edu/

FOR UNDERGRAD COURSES: Advising resources for students are available here: <a href="http://advising.osu.edu">http://advising.osu.edu</a>

FOR GRADUATE COURSES: Please contact your graduate program coordinator for advising assistance.

# **Copyright for instructional materials**

The materials used in connection with this course may be subject to copyright protection and are only for the use of students officially enrolled in the course for the educational purposes associated with the course. Copyright law must be considered before copying, retaining, or disseminating materials outside of the course.

#### Statement on Title IX

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at <a href="http://titleix.osu.edu">http://titleix.osu.edu</a> or by contacting the Ohio State Title IX Coordinator at <a href="mailto:titleix@osu.edu">titleix@osu.edu</a>

# Commitment to a diverse and inclusive learning environment

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

# **Land Acknowledgement**

We would like to acknowledge the land that The Ohio State University occupies is the ancestral and contemporary territory of the Shawnee, Potawatomi, Delaware, Miami, Peoria, Seneca, Wyandotte, Ojibwe and Cherokee peoples. Specifically, the university resides on land ceded in the 1795 Treaty of Greeneville and the forced removal of tribes through the Indian Removal Act of 1830. I/We want to honor the resiliency of these tribal nations and recognize the historical contexts that has and continues to affect the Indigenous peoples of this land.

More information on OSU's land acknowledgement can be found here:

https://mcc.osu.edu/about-us/land-acknowledgement

#### Your mental health

As a student you may experience a range of issues that can cause barriers to learn, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. No matter where you are engaged in distance learning, The Ohio State University's Student Life Counseling and Consultation Service (CCS) is here to support you. If you find yourself feeling isolated, anxious or overwhelmed, on-demand resources are available at go.osu.edu/ccsondemand. You can reach an on-call counselor when CCS is closed at 614- 292-5766, and 24-hour emergency help is also available through the 24/7 National Prevention Hotline at 1-

800-273-TALK or at <u>suicidepreventionlifeline.org</u>. The Ohio State Wellness app is also a great resource available at <u>go.osu.edu/wellnessapp</u>.

# ACCESSIBILITY ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES

# Requesting accommodations

The university strives to make all learning experiences as accessible as possible. If you anticipate or experience academic barriers based on your disability including mental health, chronic or temporary medical conditions, please let me know immediately so that we can privately discuss options. To establish reasonable accommodations, I may request that you register with Student Life Disability Services. After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. **SLDS contact information:** <a href="mailto:slds@osu.edu">slds@osu.edu</a>; 614-292-3307; 098 Baker Hall, 113 W. 12th Avenue.

# Accessibility of course technology

This online course requires use of CarmenCanvas (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.

- Canvas accessibility (<u>go.osu.edu/canvas-accessibility</u>)
- Streaming audio and video
- CarmenZoom accessibility (go.osu.edu/zoom-accessibility)
- Collaborative course tools

#### **COURSE SCHEDULE**

# Course description

This course is about the use of computational techniques to simulate the evolution of complex spatial systems such as ecosystems, transportation, weather/climate, cities, economies, societies and landscapes. These and other complex systems have a multitude of relatively simple parts interacting over space and time to create surprising, emergent behaviors. Powerful computational techniques, often linked with GIS software, allow the simulation of realistically large systems at a fine-level of granularity, providing new insights that were unavailable through traditional modeling techniques.

This class meets twice a week for two 80-minute sessions.

We will explore three major types of "building-blocks" at the core of many dynamic spatial models: i) spatial aggregation and segregation processes, ii) random walks and mobile entities, and iii) percolation and growth processes. We will also discuss issues such as the role of spatial simulation in geographic information science, representation of space and time, how to build more complete models of human,

physical and linked human-physical dynamic spatial processes, and how to evaluate model performance and uncertainty.

# **Course learning outcomes**

By the end of this course, students should successfully be able to:

- Understand the nature of complexity and complexity in nature
- Understand the nature of computational techniques
- Understand computational science as a tool for scientific investigation
- Understand and use spatial simulation techniques

#### General education course information

This is not a GE course.

#### **HOW THIS ONLINE COURSE WORKS**

**Mode of delivery:** This course is a hybrid course that is approximately 67% online. You are required to attend all the lab sections (see the schedule for the dates of these sections).

Pace of online activities: This course is divided into weekly modules that are released at least one week ahead of time. Students are expected to keep pace with weekly deadlines but may schedule their efforts freely within that time frame. All course materials, lectures, labs, exams, and participation opportunities can be found on the course website, under Modules, organized according to the week that they are assigned.

Credit hours and work expectations: This is a 3-credit-hour course. According to Ohio State policy (go.osu.edu/credithours), students should expect around 3 hours per week of time spent on direct instruction (instructor content and Carmen activities, for example) in addition to 6 hours of homework (reading and assignment preparation, for example) to receive a grade of (C) average.

**Attendance and participation requirements:** Because this is a hybrid course, part of your attendance is based on your online activity and participation. The following is a summary of students' expected participation:

- Participating in online activities for attendance: AT LEAST ONCE PER WEEK
  You are expected to log in to the course in Carmen every week. (During most weeks
  you will probably log in many times.) If you have a situation that might cause you to
  miss an entire week of class, discuss it with me as soon as possible.
- Office hours and live sessions: OPTIONAL
  All live, scheduled events for the course, including my office hours, are optional.

Participating in discussion forums: ONE OR MORE TIMES PER WEEK
 Each week, we will post at least one question that will require students to respond on a
 Carmen discussion board. Each student must respond at least once to the question in a
 meaning way by, for example, providing materials to support the statements or
 arguments raised in the posted question, or discussing real-world applications that may
 support or counter the statements in the question. We will also encourage students to
 raise their own questions and respond to posts from others.

#### **COURSE MATERIALS AND TECHNOLOGIES**

#### **Textbooks**

#### Required

- O'Sullivan, D. and Perry, G. (2013) Spatial Simulation: Exploring Pattern and Process,
   Wiley. Available at university bookstore; also available in e-book format from Amazon.
- Additional readings and webpages will be posted at the Canvas course website. These
  resources will provide additional background material as well as deeper dives into the
  science behind the models discussed in class.

## Other fees or requirements

N/A

## Course technology

#### **Technology support**

For help with your password, university email, Carmen, or any other technology issues, questions, or requests, contact the Ohio State IT Service Desk. Standard support hours are available at ocio.osu.edu/help/hours, and support for urgent issues is available 24/7.

• Self-Service and Chat support: ocio.osu.edu/help

Phone: 614-688-4357(HELP)Email: <a href="mailto:servicedesk@osu.edu">servicedesk@osu.edu</a>

• **TDD**: 614-688-8743

#### Technology skills needed for this course

Basic computer and web-browsing skills

- Navigating Carmen (go.osu.edu/canvasstudent)
- CarmenZoom virtual meetings (go.osu.edu/zoom-meetings)
- Recording a slide presentation with audio narration (<u>go.osu.edu/video-assignment-guide</u>)
- Recording, editing, and uploading video (<u>go.osu.edu/video-assignment-guide</u>)

#### Required equipment

- Computer: current Mac (MacOs) or PC (Windows 10) with high-speed internet connection
- Webcam: built-in or external webcam, fully installed and tested
- Microphone: built-in laptop or tablet mic or external microphone
- Other: a mobile device (smartphone or tablet) to use for BuckeyePass authentication

#### Required software

Please keep in mind that you are NOT required to purchase any software for this class. The following list should help you access the software that is either open-source (NetLogo and its models) and free-of-cost to you as a student in this class.

#### NetLogo

- o It will be available on the computers in our lab. However, since it is free and open source, you can download and install NetLogo on your personal machines: <a href="https://ccl.northwestern.edu/netlogo/">https://ccl.northwestern.edu/netlogo/</a> However, note that you are on your own with installations on personal machines; we cannot provide technical support.
- The basic NetLogo install is simple, but some of the programs we will look at this semester will use the *gradient* extension. Installing the gradient extension is easy: go to this <u>link</u>, download and unzip the folder called *gradient* containing a single file called *gradient.jar*. Copy <u>the entire folder</u> to the same folder as your NetLogo models, or to the NetLogo extensions folder. (Some NetLogo models also require an R extension for data analysis and reporting, but we will not be using these models.) For more details on these extensions, see the textbook authors' website: <a href="http://patternandprocess.org/">http://patternandprocess.org/</a>. You can also follow NetLogo on Twitter: <a href="https://twitter.com/NetLogo">https://twitter.com/NetLogo</a>.
- System requirements of Netlogo can be found <u>here</u>. There are no official privacy policies from developers of QGIS.

#### NetLogo models

- Since it is open source, NetLogo comes with a wealth of freely available models (programs) across a wide range of applications. Models sources include:
  - Models Library available in the NetLogo software itself; look under "Files" → "Models Library"
  - User community: https://ccl.northwestern.edu/netlogo/models/community/
- Models discussed in the textbook

- The O'Sullivan and Perry text references and discusses a large number of NetLogo models. You should experiment with these models as part of your study prior to class. We will also work with some of these models in class.
- Windows versions of the NetLogo models are available at the Canvas site: unzip the archive and copy the entire directory (including the gradient subdirectory) to your laptop or to a portable storage device for use during class.
- Other sources for the NetLogo models, including Mac versions, include:
  - The authors' website, Pattern and Process: http://patternandprocess.org/.
  - O'Sullivan also maintains the most up-to-date versions of these models at a github repository: <a href="https://github.com/DOSull/model-zoo">https://github.com/DOSull/model-zoo</a>. (Note that the github repository may be incomplete: some models from the textbook may be missing.)
- Proctorio: A software to monitor online exams. More details can be found <u>here</u>.
- Microsoft Office 365: All Ohio State students are now eligible for free Microsoft Office 365. Full instructions for downloading and installation can be found at go.osu.edu/office365help.

#### Carmen access

You will need to use BuckeyePass (<u>buckeyepass.osu.edu</u>) multi-factor authentication to access your courses in Carmen. To ensure that you are able to connect to Carmen at all times, it is recommended that you take the following steps:

- Register multiple devices in case something happens to your primary device. Visit the BuckeyePass - Adding a Device help article for step-by-step instructions (go.osu.edu/add-device).
- Request passcodes to keep as a backup authentication option. When you see the Duo login screen on your computer, click Enter a Passcode and then click the Text me new codes button that appears. This will text you ten passcodes good for 365 days that can each be used once.
- Download the Duo Mobile application (<u>go.osu.edu/install-duo</u>) to all of your registered devices for the ability to generate one-time codes in the event that you lose cell, data, or Wi-Fi service

If none of these options will meet the needs of your situation, you can contact the IT Service Desk at 614-688-4357(HELP) and IT support staff will work out a solution with you.

#### **GRADING AND FACULTY RESPONSE**

## How your grade is calculated

Lab assignments	50
Exams	50
Total	100

See course schedule below for due dates.

# Descriptions of major course assignments

#### Lab assignments

There will be a series of NetLogo-based lab assignments throughout the semester. All lab assignments will be submitted via the course website and count toward your final grade of the course. Most lab assignments are due one week after each lab session (at 6:00pm of the due day). Lab 4 will be given two weeks to finish. All materials required for the lab assignments (NetLogo software, lecture notes, and other models) are available online or on Carmen. The lab assignments can be completed using students' own computers.

Students must finish their lab assignments individually. The course includes many opportunities for formal collaboration with your classmates. While study groups and peer-review of lab assignments is encouraged, remember that comparing answers on an assignment is not permitted. If you're unsure about a particular situation, please ask ahead of time.

#### **Exams**

There will be 4 short examinations (20 -25 questions) during the semester. Exam questions will be drawn from the lectures, the textbook, and labs. Exams will be using Carmen during the scheduled time, unless you have informed your instructor before the exam with proper reasons and documents, and have received permission from the instructor prior to the exam. You are expected to finish all exams on time. At the end of the scheduled class time, you are to stop working and turn in your exam. You may not continue working on your exam after the scheduled class time.

Students must complete these exams yourself, without any external help or communication. Weekly quizzes are included as self-checks without points attached but are still expected to be completed on your own.

# Late assignments

Lab assignments will be penalized 10% for each day late. Please refer to Carmen for due dates. Extensions will not be granted due to lost work. Be sure you back up and keep all your work.

# **Grading scale**

A	93-100%	B-	80-82%	D+	67-69%
<b>A-</b>	90-92%	C+	77-79%	D	60-66%
B+	97-89%	$\mathbf{C}$	73-76%	E	0-59%
В	83-86%	C-	70-72%		

Your final grade as seen on the course website will be rounded to the nearest whole number (e.g. an 89.49 is a B+ while an 89.50 is an A) before being submitted to the University Registrar at the end of the semester.

# Instructor feedback and response time

You are responsible for all course related emails, so be sure to check your inbox on a daily basis. When emailing your instructor or TA, please always begin the subject of the email with the course number (GEOG6226) and your name (first name followed by last name). This is important as your instructor and TA teach multiple classes and need to know to which class you are referring. A proper email subject should be like this: GEOG6226 John Smith Schedule a make-up exam.

I am providing the following list to give you an idea of my intended availability throughout the course. Remember that you can call **614-688-4357(HELP)** at any time if you have a technical problem.

- **Grading and feedback:** For large weekly assignments, you can generally expect feedback within **7 days**.
- Email: I will reply to emails within 24 hours on days when class is in session at the university.
- Discussion board: I will check and reply to messages in the discussion boards every 24 hours on school days.

#### OTHER COURSE POLICIES

# Discussion and communication guidelines

The following are my expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- Writing style: While there is no need to participate in class discussions as if you were
  writing a research paper, you should remember to write using good grammar, spelling,
  and punctuation. A more conversational tone is fine for non-academic topics.
- Tone and civility: Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online.

- **Citing your sources**: When we have academic discussions, please cite your sources to back up what you say. For the textbook or other course materials, list at least the title and page numbers. For online sources, include a link.
- Backing up your work: Consider composing your academic posts in a word processor, where you can save your work, and then copying into the Carmen discussion.

# **Academic integrity policy**

See **Descriptions of major course assignments**, above, for my specific guidelines about collaboration and academic integrity in the context of this class.

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct <a href="http://studentlife.osu.edu/csc/">http://studentlife.osu.edu/csc/</a>.

If I suspect that a student has committed academic misconduct in this course, I am obligated by university rules to report my suspicions to the Committee on Academic Misconduct. If COAM determines that you have violated the university's *Code of Student Conduct* (i.e., committed academic misconduct), the sanctions for the misconduct could include a failing grade in this course and suspension or dismissal from the university.

If you have any questions about the above policy or what constitutes academic misconduct in this course, please contact me.

Other sources of information on academic misconduct (integrity) to which you can refer include:

- Committee on Academic Misconduct web page (go.osu.edu/coam)
- Ten Suggestions for Preserving Academic Integrity (go.osu.edu/ten-suggestions)

# **Student Services and Advising**

University Student Services can be accessed through BuckeyeLink. More information is available here: <a href="https://contactbuckeyelink.osu.edu/">https://contactbuckeyelink.osu.edu/</a>

FOR UNDERGRAD COURSES: Advising resources for students are available here: <a href="http://advising.osu.edu">http://advising.osu.edu</a>

FOR GRADUATE COURSES: Please contact your graduate program coordinator for advising assistance.

# **Copyright for instructional materials**

The materials used in connection with this course may be subject to copyright protection and are only for the use of students officially enrolled in the course for the educational purposes associated with the course. Copyright law must be considered before copying, retaining, or disseminating materials outside of the course.

#### Statement on Title IX

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at <a href="http://titleix.osu.edu">http://titleix.osu.edu</a> or by contacting the Ohio State Title IX Coordinator at <a href="mailto:titleix@osu.edu">titleix@osu.edu</a>

# Commitment to a diverse and inclusive learning environment

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

## Land Acknowledgement

We would like to acknowledge the land that The Ohio State University occupies is the ancestral and contemporary territory of the Shawnee, Potawatomi, Delaware, Miami, Peoria, Seneca, Wyandotte, Ojibwe and Cherokee peoples. Specifically, the university resides on land ceded in the 1795 Treaty of Greeneville and the forced removal of tribes through the Indian Removal Act of 1830. I/We want to honor the resiliency of these tribal nations and recognize the historical contexts that has and continues to affect the Indigenous peoples of this land.

More information on OSU's land acknowledgement can be found here:

https://mcc.osu.edu/about-us/land-acknowledgement

#### Your mental health

As a student you may experience a range of issues that can cause barriers to learn, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. No matter where you are engaged in distance learning, The Ohio State University's Student Life Counseling and Consultation Service (CCS) is here to support you. If you find yourself feeling isolated, anxious or overwhelmed, on-demand resources are available at go.osu.edu/ccsondemand. You can reach an on-call counselor when CCS is closed at 614- 292-5766, and 24-hour emergency help is also available through the 24/7 National Prevention Hotline at 1-800-273-TALK or at suicidepreventionlifeline.org. The Ohio State Wellness app is also a great resource available at go.osu.edu/wellnessapp.

# ACCESSIBILITY ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES

# Requesting accommodations

The university strives to make all learning experiences as accessible as possible. If you anticipate or experience academic barriers based on your disability including mental health, chronic or temporary medical conditions, please let me know immediately so that we can privately discuss options. To establish reasonable accommodations, I may request that you register with Student Life Disability Services. After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. **SLDS contact information:** <a href="mailto:slds@osu.edu">slds@osu.edu</a>; 614-292-3307; 098 Baker Hall, 113 W. 12th Avenue.

# Accessibility of course technology

This online course requires use of CarmenCanvas (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.

- Canvas accessibility (go.osu.edu/canvas-accessibility)
- Streaming audio and video
- CarmenZoom accessibility (go.osu.edu/zoom-accessibility)
- Collaborative course tools

#### **COURSE SCHEDULE**

Refer to the Carmen course for up-to-date assignment due dates.

Students must complete these exams yourself, without any external help or communication. Weekly quizzes are included as self-checks without points attached but are still expected to be completed on your own.

## Late assignments

Lab assignments will be penalized 10% for each day late. Please refer to Carmen for due dates. Extensions will not be granted due to lost work. Be sure you back up and keep all your work.

## **Grading scale**

A	93-100%	B-	80-82%	D+	67-69%
A-	90-92%	C+	77-79%	D	60-66%
B+	97-89%	$\mathbf{C}$	73-76%	E	0-59%
В	83-86%	C-	70-72%		

Your final grade as seen on the course website will be rounded to the nearest whole number (e.g. an 89.49 is a B+ while an 89.50 is an A) before being submitted to the University Registrar at the end of the semester.

## Instructor feedback and response time

You are responsible for all course related emails, so be sure to check your inbox on a daily basis. When emailing your instructor or TA, please always begin the subject of the email with the course number (GEOG6226) and your name (first name followed by last name). This is important as your instructor and TA teach multiple classes and need to know to which class you are referring. A proper email subject should be like this: GEOG6226\_John Smith\_Schedule a make-up exam.

I am providing the following list to give you an idea of my intended availability throughout the course. Remember that you can call **614-688-4357(HELP)** at any time if you have a technical problem.

- **Grading and feedback:** For large weekly assignments, you can generally expect feedback within **7 days**.
- Email: I will reply to emails within 24 hours on days when class is in session at the university.
- **Discussion board:** I will check and reply to messages in the discussion boards every **24 hours on school days**.

#### OTHER COURSE POLICIES

## Discussion and communication guidelines

The following are my expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- **Writing style**: While there is no need to participate in class discussions as if you were writing a research paper, you should remember to write using good grammar, spelling, and punctuation. A more conversational tone is fine for non-academic topics.
- Tone and civility: Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online.

- **Citing your sources**: When we have academic discussions, please cite your sources to back up what you say. For the textbook or other course materials, list at least the title and page numbers. For online sources, include a link.
- **Backing up your work**: Consider composing your academic posts in a word processor, where you can save your work, and then copying into the Carmen discussion.

# **Academic integrity policy**

See **Descriptions of major course assignments**, above, for my specific guidelines about collaboration and academic integrity in the context of this class.

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct <a href="http://studentlife.osu.edu/csc/">http://studentlife.osu.edu/csc/</a>.

If I suspect that a student has committed academic misconduct in this course, I am obligated by university rules to report my suspicions to the Committee on Academic Misconduct. If COAM determines that you have violated the university's *Code of Student Conduct* (i.e., committed academic misconduct), the sanctions for the misconduct could include a failing grade in this course and suspension or dismissal from the university.

If you have any questions about the above policy or what constitutes academic misconduct in this course, please contact me.

Other sources of information on academic misconduct (integrity) to which you can refer include:

- Committee on Academic Misconduct web page (go.osu.edu/coam)
- Ten Suggestions for Preserving Academic Integrity (go.osu.edu/ten-suggestions)

# **Student Services and Advising**

University Student Services can be accessed through BuckeyeLink. More information is available here: <a href="https://contactbuckeyelink.osu.edu/">https://contactbuckeyelink.osu.edu/</a>

FOR UNDERGRAD COURSES: Advising resources for students are available here: <a href="http://advising.osu.edu">http://advising.osu.edu</a>

FOR GRADUATE COURSES: Please contact your graduate program coordinator for advising assistance.

# **Copyright for instructional materials**

The materials used in connection with this course may be subject to copyright protection and are only for the use of students officially enrolled in the course for the educational purposes associated with the course. Copyright law must be considered before copying, retaining, or disseminating materials outside of the course.

#### Statement on Title IX

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at <a href="http://titleix.osu.edu">http://titleix.osu.edu</a> or by contacting the Ohio State Title IX Coordinator at <a href="mailto:titleix@osu.edu">titleix@osu.edu</a>

# Commitment to a diverse and inclusive learning environment

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

# **Land Acknowledgement**

We would like to acknowledge the land that The Ohio State University occupies is the ancestral and contemporary territory of the Shawnee, Potawatomi, Delaware, Miami, Peoria, Seneca, Wyandotte, Ojibwe and Cherokee peoples. Specifically, the university resides on land ceded in the 1795 Treaty of Greeneville and the forced removal of tribes through the Indian Removal Act of 1830. I/We want to honor the resiliency of these tribal nations and recognize the historical contexts that has and continues to affect the Indigenous peoples of this land.

More information on OSU's land acknowledgement can be found here:

https://mcc.osu.edu/about-us/land-acknowledgement

#### Your mental health

As a student you may experience a range of issues that can cause barriers to learn, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. No matter where you are engaged in distance learning, The Ohio State University's Student Life Counseling and Consultation Service (CCS) is here to support you. If you find yourself feeling isolated, anxious or overwhelmed, on-demand resources are available at go.osu.edu/ccsondemand. You can reach an on-call counselor when CCS is closed at 614- 292-5766, and 24-hour emergency help is also available through the 24/7 National Prevention Hotline at 1-800-273-TALK or at suicidepreventionlifeline.org. The Ohio State Wellness app is also a great resource available at go.osu.edu/wellnessapp.

# ACCESSIBILITY ACCOMMODATIONS FOR STUDENTS WITH DISABILITIES

# Requesting accommodations

The university strives to make all learning experiences as accessible as possible. If you anticipate or experience academic barriers based on your disability including mental health, chronic or temporary medical conditions, please let me know immediately so that we can privately discuss options. To establish reasonable accommodations, I may request that you register with Student Life Disability Services. After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. **SLDS contact information:** <a href="mailto:slds@osu.edu">slds@osu.edu</a>; 614-292-3307; 098 Baker Hall, 113 W. 12th Avenue.

## Accessibility of course technology

This course requires use of CarmenCanvas (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.

Canvas accessibility (go.osu.edu/canvas-accessibility)

#### COURSE SCHEDULE

Refer to the Carmen course for up-to-date assignment due dates.

Week	Dates	Topics, Readings, Assignments, Deadlines						
1	M 8/23	Course overview						
_	IVI 6/23	Lab 1 – Experimenting with NetLogo						
2	M 8/28	Spatial Simulation Models - Part 1 (Ch 1.1, 1.2; pp. 1-14)						
2	W 8/30	Spatial Simulation Models – Part 2 (Ch 1.3, 1.4; pp. 14-28)						
3	M 9/4	Labor Day (No class)						
3	W 9/6	Lab 2 – NetLogo world and agents						
4	M 9/11	Pattern, Process and Scale – Part 1 (Ch 2.1, 2.2; pp. 30-45)						
4	W 9/13	Pattern, Process and Scale – Part 2 (Ch 2.2; pp. 46-56)						
Е	M 9/18	Exam 1						
5	W 9/20	Lab 3 - Programming with NetLogo						
6	M 9/25	Aggregation and Segregation – Part 1 (Ch 3.1, 3.2; pp. 58-63)						
0	W9/27	Aggregation and Segregation – Part 2 (Ch 3.3; pp.64-69)						
7	M 10/2	Aggregation and Segregation – Part 3 (Ch 3.4; pp. 70-82)						
7	W 10/4	Aggregation and Segregation – Part 4 (Ch 3.5-3.7; pp. 83-96)						
8	M 10/9	Exam 2						
0	W 10/11	Lab 4 - Variables and Breeds						
9	M 10/16	Random Walks and Mobile Entities – Part 1 (Ch 4.1, 4.2; pp. 97-110)						
9	W 10/18	Random Walks and Mobile Entities – Part 2 (Ch 4.3; pp. 111-119)						
10	M 10/23	Random Walks and Mobile Entities – Part 3 (Ch 4.4, 4.5; pp. 119-132)						
10	W 10/25	Exam 3						
11	M 10/30	Lab 5 - NetLogo and GIS data						
11	W 11/1	Percolation and Growth – Part 1 (Ch 5.1, 5.2; pp. 133-148)						
12	M 11/6	Percolation and Growth – Part 2 (Ch 5.3; pp. 148-158)						
12	W 11/8	Percolation and Growth – Part 3 (Ch 5.3, 5.4; pp.148-168)						
12	M 11/13	Lab 6 - Agent-based modeling						
13	W 11/15	Representing Time and Space (Ch 6; pp. 169-192)						
14	M 11/20	Lab 7 - Using BehaviorSpace to manage experiments						

Week	Dates	Topics, Readings, Assignments, Deadlines
	W 11/22	Thanksgiving (No class)
15	M 11/27	Model Uncertainty and Evaluation – Part 1 (Ch 7.1-7.3; pp. 193-211)
13	W 11/29	Model Uncertainty and Evaluation – Part 2 (Ch 7.4-7.7; pp.211-228)
16	M 12/4	Review session
16	W 12/6	Exam 4

#### **Geography Curriculum Mapping: Summary of Changes**

Ningchuan Xiao November 8, 2021

The Department of Geography is proposing to change our undergraduate Geographic Information Science (GIS) major and to create a new professional masters degree in Geographic Information Science and Technology. The department went through an undergraduate curriculum mapping process in 2019 and 2020. Throughout the process, the faculty have agreed upon a set of program goals, outcomes, and proficiencies, which are detailed in the left column in the attached PDF file (Curriculum\_map\_GEOG\_GIS\_ONLY.pdf). After the proficiencies were set, the faculty then mapped their courses to each of the proficiencies. The attached spreadsheet in PDF includes the mapping result for the courses of the Geographic Information Science (GIS) major, under the grouped column called GIS.

It became clear to the GIS faculty that proficiencies under Goals D and E are not sufficiently covered in the current curriculum by our required courses nor by the electives. This is one of the motivations we decided to revise our GIS major curriculum. The courses in the revised curriculum are listed in the attached PDF (under a grouped column called GIS 2).

There are a few main changes in the new curriculum. First, a new course GEOG 5101 (GIST Professionalism and Ethics) is added to provide sufficient coverage of proficiencies in Goals D and E. Second, the new curriculum has a set of 5 core courses that are required, a set of 6 intermediate courses from which students must take at least 3, and several options for students to focus on different substantive areas such as urban and sustainability (see the attached curriculum map for details). Third, two courses in the current curriculum, 5223 and 5226, become 6000 level courses that will be used in a new professional masters program, which will be proposed soon. The following table shows the coverages of the program proficiencies of the current and new curriculums (please note because the electives in the new curriculum have different options, only the core and immediate courses are summarized in the table). It clearly shows sufficient coverage for proficiencies in Goals D and E by the proposed curriculum. Also, the curriculum changes do not affect the proficiencies that are already covered, with the only exception in proficiencies A1c and A1d that are covered by the current electives but not by the core or intermediate courses in the proposed. However, these two proficiencies are covered by most electives (see the attached spreadsheet in PDF). One benefit of moving two 5000 level courses to 6000 level is that such change makes it possible for the department to develop a new professional masters degree in GIS with graduate level courses (the proposal for this program will be submitted soon in Autumn 2021).

Table 1. Coverage of the proficiencies by the courses of the current GIS curriculum (Required and Electives) and the proposed new GIS curriculum. Numbers are the number of times each proficiency is covered by the courses labeled in each column. The actual proficiency descriptions can be found in the attached curriculum map PDF. Electives for the proposed curriculum are not listed, but can be found in the attached spreadsheet in PDF.

Explain the real-world consequences of different positions regarding a problem (A) d. Develop a position based on an understanding of multiple sides of a problem (A) e. Identify linkages among apparently discrete problems (A)  2. Appraise ethical issues in research a. Explain how strategies and methods may be used constructively and destructively in real-world applications (B, I) [identical to b.2.b] b. Perceive that everyone, including researchers, implicitly have biases and partial knowledges that can have negative effects on subjects under study (B, I) c. Perceive that subjects under study and those encountered in the field, their values, and their privacy require respect (B, I) d. Analyze their positionality regarding, for example, class, race/ethnicity, gender, age, citizenship, occupation, and the like relative those under study or encountered in the field (I A) e. Integrate ethical considerations into formulation of questions and applications of their knowledges (S)  Goal E: Professional Development The successful student understands how to make use of the skills and knowledges developed in their undergraduate program towards securing a job and pursuing a career.  1. Make use of their values to guide their careers a. Identify their value systems relative to career opportunities (B) b. Describe tensions between their ideals and career realities (I) c. Appraise the variety of options and trade-offs in career paths relative to their value systems (A)  2. Deploy their skills relative to a changing job market a. Identify the strengths and limitations of their range of skills relative to various professional opport			C	C C	c	С у С С С С С У	C C C C C C C C C C C C C C C C C C C	0		C	y y y y y y y y y y y y y y y y y y y		с у у у у	C C	y c y c y c c y c c y c c y c c y c c y c c y c c y c c y c c c y c c c y c c c y c c c c y c	0 0 0 1 1 1 1 0 0 0 1 0 0	0 0 0 0 0 2 2 2 1 1 1 1 1 1 1 1 1 2	y c y c y c y c y c y c y c y c	y y y c c y c y c y c y y y y y y y y y	y 5 c 3 2 2 2 2 y 5 c 4 c 2 c 2 y 1	2 2 2 7 6 3 3 3	y y y y y y y c c c c	y y y y y y y y y y y y y y y y y y y	y y y y y y y c y y c y y c c y c c y	C 5 6 5 5 3 3 C 2 C 0 C 0 C 0 C 1 C 1	2 3

#### **Arts and Sciences Distance Learning Course Component Technical Review** Checklist

Course: Geog 6226 DL Instructor: Yang Song Summary: Spatial Simulation and Modeling in GIS

Standard - Course Technology	Yes	Yes with Revisions	No	Feedback/ Recomm.
6.1 The tools used in the course support the learning objectives and competencies.	X			<ul><li>Carmen</li><li>Office 365</li><li>NetLogo</li></ul>
6.2 Course tools promote learner engagement and active learning.	X			<ul><li>Carmen     Discussion Boards</li><li>Zoom</li><li>Proctorio</li></ul>
6.3 Technologies required in the course are readily obtainable.	X			All are available for free via OSU agreements.
6.4 The course technologies are current.	Х			All are updated regularly
6.5 Links are provided to privacy policies for all external tools required in the course.	X			No third party tools requiring an account are used.
Standard - Learner Support				
7.1 The course instructions articulate or link to a clear description of the technical support offered and how to access it.	X			Links to 8HELP are provided.
7.2 Course instructions articulate or link to the institution's accessibility policies and services.	X			а
7.3 Course instructions articulate or link to an explanation of how the institution's academic support services and resources can help learners succeed in the course and how learners can obtain them.		X		Add statement b
7.4 Course instructions articulate or link to an explanation of how the institution's student services and resources can help learners succeed and how learners can obtain them.	X			С
Standard – Accessibility and Usability				
8.1 Course navigation facilitates ease of use.	Х			Recommend using the Carmen Distance Learning "Master Course" template developed by ODEE and available in the Canvas Commons to provide student-users with a consistent user experience in terms of navigation and access to course content.
8.2 Information is provided about the accessibility of all technologies required in the course.	Х			All technologies are covered by OSU policies.
8.3 The course provides alternative means of access to course materials in formats that meet the needs of diverse learners.	Х			Instructions are present.
8.4 The course design facilitates readability	Х			

8.5 Course multimedia facilitate ease of use.	X		All assignments and activities that use the Carmen LMS with embedded multimedia facilitates ease of use. All other multimedia resources facilitate ease of use by being available through a standard web browser

#### **Reviewer Information**

Date reviewed: 10/5/20Reviewed by: Ian Anderson

Notes: Add dates to the weekly breakdown. Consider using the ASC DL Syllabus Template. Please specify method of office hours and online lectures (I presume both to be Zoom, but it should be stated).

<sup>a</sup>The following statement about disability services (recommended 16 point font): Students with disabilities (including mental health, chronic or temporary medical conditions) that have been certified by the Office of Student Life Disability Services will be appropriately accommodated and should inform the instructor as soon as possible of their needs. The Office of Student Life Disability Services is located in 098 Baker Hall, 113 W. 12th Avenue; telephone 614- 292-3307, slds@osu.edu; slds.osu.edu.

<sup>b</sup>Add to the syllabus this link with an overview and contact information for the student academic services offered on the OSU main campus. <a href="http://advising.osu.edu/welcome.shtml">http://advising.osu.edu/welcome.shtml</a>

<sup>c</sup>Add to the syllabus this link with an overview and contact information for student services offered on the OSU main campus. <a href="http://ssc.osu.edu">http://ssc.osu.edu</a>. Also, consider including this link in the "Other Course Policies" section of the syllabus.
