## Term Information

Effective Term Autumn 2022  
*Previous Value* Autumn 2019

## Course Change Information

### What change is being proposed? (If more than one, what changes are being proposed?)

Title change of course  
To edit the course learning objectives and topics  
Submission of course for new GE - Theme: Health and Well-Being  
One of the two offerings is a 100% distance learning option

### What is the rationale for the proposed change(s)?

The new title is more reflective of the course learning objectives and topics  
To submit the course for a GE Theme  
To offer students another mode of delivery

### What are the programmatic implications of the proposed change(s)?

(e.g. program requirements to be added or removed, changes to be made in available resources, effect on other programs that use the course)?  
none

Is approval of the request contingent upon the approval of other course or curricular program request? No

Is this a request to withdraw the course? No

## General Information

Course Bulletin Listing/Subject Area Public Health  
Fiscal Unit/Academic Org College of Public Health - D2505  
College/Academic Group Public Health  
Level/Career Undergraduate  
Course Number/Catalog 2010  
Course Title Critical Issues in Global Public Health  
*Previous Value* Introduction to Global Public Health  
Transcript Abbreviation Global Pub Hlth  
Course Description Public health concepts examining the philosophy, purpose, history, organization, functions, and results of public health practices domestically and internationally. Presents the pressing global public health concerns of the 21st century.  
Semester Credit Hours/Units Fixed: 3

## Offering Information

Length Of Course 14 Week, 12 Week  
Flexibly Scheduled Course Never  
Does any section of this course have a distance education component? Yes  
Is any section of the course offered 100% at a distance  
Less than 50% at a distance  
*Previous Value* Yes, Less than 50% at a distance  
Grading Basis Letter Grade

---

Repeatable	No
Course Components	Lecture
Grade Roster Component	Lecture
Credit Available by Exam	No
Admission Condition Course	No
Off Campus	Never
Campus of Offering	Columbus, Lima, Mansfield, Marion, Newark, Wooster
<i>Previous Value</i>	<i>Columbus, Marion, Newark</i>

## Prerequisites and Exclusions

Prerequisites/Corequisites

Exclusions

Electronically Enforced No

## Cross-Listings

Cross-Listings

## Subject/CIP Code

Subject/CIP Code	51.2201
Subsidy Level	Baccalaureate Course
Intended Rank	Freshman, Sophomore, Junior, Senior

## Requirement/Elective Designation

Required for this unit's degrees, majors, and/or minors

General Education course:

Individual and Groups; Global Studies (International Issues successors); Health and Well-being

The course is an elective (for this or other units) or is a service course for other units

*Previous Value*

*Required for this unit's degrees, majors, and/or minors*

*General Education course:*

*Individual and Groups; Global Studies (International Issues successors)*

*The course is an elective (for this or other units) or is a service course for other units*

## Course Details

Course goals or learning objectives/outcomes

- Describe key public health concepts related to global health including: the demographic and epidemiological transitions, measures of health status, and the burden of disease.
- Discuss how social and cultural factors can affect a society's vulnerability to morbidity and mortality and its approaches to prevention and control.
- Discuss the determinants of health and risk factors for important global health conditions.  
Identify key organizations and institutions, their role in global health, and the manner in which they can cooperate to address key global health issues.

**Previous Value**

- *Achieve familiarity with the various components of the public health system.*
- *Summarize interrelationships among the system's components.*
  
- *Acquire an awareness of the importance of independent reading and study for the global (i.e. US; International) citizen of the 21st century.*
- *Utilize multiple media for accessing the latest public health information and communicating with peers worldwide.*
- *Appreciate the unique characteristics of public health practice as a social enterprise that affects lives everywhere.*
- *Summarize the governmental organization and function of public health in the US and specific international areas.*
- *Acquire the ability to apply this knowledge and understanding to important health issues and problems*

**Content Topic List**

- Overview of Global Public Health
- Global Burden of Disease
- Culture & Health, Public Health Ethics
- Social Determinants of Health & Racism as a Public Health Crisis
- Reproductive Health & Infectious Diseases
- Nutrition
- Chronic Disease & Mental Health
- Public Health and the Arts

**Previous Value**

- *History and Milestones of Public Health*
- *Health Equity*
- *Epidemiology*
- *What is Health? An Ecological Perspective*
- *Making Sense of Uncertainty - Biostatistics*
- *Social and Behavioral Health - Health Behavior Health Promotion*
- *Public Health and the Health Care Systems*
- *Prevention Strategies in Public Health*
- *Public Health Future Challenges*
- *Public Health Practice*

**Sought Concurrence**

No

**PUBHLTH 2010 –Critical Issues in Global Public Health: Distance Learning Option  
Summer Term 2021  
3 Credit Hours**

**Instructors:** Amy Ferketich (Primary Instructor)  
Professor, College of Public Health  
310 Cunz Hall  
614-292-7326  
[Ferketich.1@osu.edu](mailto:Ferketich.1@osu.edu)

Class Time and Location: Online

Online Office Hours via Zoom (through Carmen): **Monday through Friday, 1:00 – 2:00 PM**

**TA responsibilities**

The TAs assigned to the course will hold virtual office hours, assist with teaching, assist with grading, and meet with any students who need help with class material. Final grades will be assigned by the professor. Any questions regarding grading should be directed to the professor and not the TA.

**Courses Description**

*Critical Issues in Global Public Health* presents global public health practice and research, examining the philosophy, purpose, history, organization, functions, tools, activities, and results of public health practice at the global, national, state, and local levels. This course demonstrates the role that public health plays in our lives, reflects upon the monumental strides in health and well-being, and presents the pressing global concerns of today.

**Prerequisite:** No prerequisites

**Class Format**

This class is an asynchronous offering of *Critical Issues in Global Public Health*. Topics are divided into modules and each module will last either 1 or 2 weeks. *During most weeks*, the format will be: 1) two recorded lectures that are 20 minutes each, with one focused on the global aspects of the issue and one focused on the US and local aspects of the issue; 2) other videos that supplement the recorded lectures; 3) short quizzes and assignments; 4) readings from an online text book, the peer-reviewed literature, or government reports; and 5) small-group discussions of current public health news.

**Course Learning Objectives**

1. Describe key public health concepts related to global health including: the demographic and epidemiological transitions, measures of health status, and the burden of disease.
2. Discuss how social and cultural factors can affect a society's vulnerability to morbidity and mortality and its approaches to prevention and control.
3. Discuss the determinants of health and risk factors for important global health conditions.
4. Identify key organizations and institutions, their roles in global health, and the manner in which they can cooperate to address key global health issues.

**Time Management**

University rules stipulate that a student can expect to spend a minimum of 3 hours per week on a course for each credit hour, thus for this 3-credit hour course you should expect to devote roughly 9 hours per week. Workload will vary from week to week. This is intended as a rough guide to help you plan your time accordingly. In a typical week, you can expect your time to be spent as follows:

- 2 hours – viewing lectures and TED talks/other videos
- 1 hour – interacting with small groups on discussion boards and peer review

- 0.5 hour - completing online quizzes
- 3 hours – assigned readings
- 2.5 hours – completing assignments

### **BSPH Foundational (Core) Competencies**

*All students completing Introduction to Global Public Health will be prepared to:*

1. Summarize the historic milestones in public health.
2. Compare and contrast types of major domestic and international public health issues.
3. Discuss various approaches/strategies for identification, response and intervention to address and attempt to resolve common public health issues.
4. Identify genetic, social, political, cultural, behavioral, and socioeconomic factors related to global public health issues.
5. Apply the fundamental principles of the five core disciplines of public health (biostatistics; environmental health; epidemiology; health administration/policy; health behavior/promotion) to domestic and international population health issues.
6. Communicate public health information, in both oral and written forms, through a variety of media and to diverse audiences.
7. Locate, use, evaluate and synthesize public health information.

### **Specialization Competencies for BSPH Majors**

*Public Health Sociology students will be prepared to:*

1. Employ specific sociological theories, both classical and contemporary, to explain the unequal distribution of health among different subpopulations in the United States and throughout the world. Identify how these theories can extend our knowledge of disease processes and prevention and intervention opportunities beyond typical public health perspectives.
3. Illustrate how sociological perspectives of stratification - particularly along the lines of race, class, and gender – expand typical public health perceptions and approaches
4. Identify social and public policies that differentially affect the unequal distribution of health in society as well as the social process that led to their creation and keep them in place.

*Environmental Public Health students will be prepared to:*

1. Apply principles of math, chemistry, biology to applied science of environmental public health.
2. Use the Environmental Science Health model to explain environmentally-related exposures and human diseases.

### **CEPH Domains**

1. The history and philosophy of public health as well as its core values, concepts and functions across the globe and in society
2. The basic concepts, methods and tools of public health data collection, use and analysis and why evidence-based approaches are an essential part of public health practice
3. The concepts of population health, and the basic processes, approaches and interventions that identify and address the major health-related needs and concerns of populations
5. The socioeconomic, behavioral, biological, environmental and other factors that impact human health and contribute to health disparities
6. The fundamental concepts and features of project implementation, including planning, assessment and evaluation
7. The fundamental characteristics and organizational structures of the US health system as well as the differences between systems in other countries
9. Basic concepts of public health-specific communication, including technical and professional writing and the use of mass media and electronic technology

### **Aligned CEPH Cross-Cutting Concepts**

1. Advocacy for protection and promotion of the public's health at all levels of society
2. Community dynamics
3. Critical thinking and creativity
4. Cultural contexts in which public health professionals work
10. Research methods
12. Teamwork and leadership

### **GE Health and Wellbeing Theme**

***Goal 1: Successful students will analyze an important topic or idea at a more advanced and in-depth level than the foundations.***

- 1.1 Engage in critical and logical thinking about the topic or idea of health and wellbeing.
- 1.2 Engage in an advanced, in-depth, scholarly exploration of the topic or idea of health and wellbeing.

Activities to achieve goal: Through reflections on the content, the research paper, the creative endeavor, the module on PH and the Arts, and the weekly PH in the News discussions, students will analyze the selected critical issues at an advanced and in-depth level.

***Goal 2: Successful students will integrate approaches to the theme by making connections to out-of-classroom experiences with academic knowledge or across disciplines and/or to work they have done in previous classes and that they anticipate doing in future.***

- 2.1 Identify, describe, and synthesize approaches or experiences as they apply to health and wellbeing.
- 2.2 Demonstrate a developing sense of self as a learner through reflection, self-assessment, and creative work, building on prior experiences to respond to new and challenging contexts.

Activities to achieve goal: Through the research paper, the creative endeavor, the PH in a Day activities, and the PH in the News discussions, students will make connections to out-of-classroom experiences. These projects will allow them to draw from other courses they have taken in the GE.

***Goal 3: Students will explore and analyze health and wellbeing through attention to at least two dimensions of wellbeing. (Ex: physical, mental, emotional, career, environmental, spiritual, intellectual, creative, financial, etc.).***

- 3.1 Explore and analyze health and wellbeing from theoretical, socio-economic, scientific, historical, cultural, technological, policy, and/or personal perspectives.
- 3.2 Identify, reflect on, or apply strategies for promoting health and wellbeing.

Activities to achieve goal: The two dimensions that are the greatest focus in this class are physical and mental health. The two perspectives that are covered extensively are theoretical, socio-economic, historical, cultural, and policy. Through reflections that will follow three modules (social determinants of health, racism as a public health crisis, and mental health and addiction), students will identify factors that promote health and wellbeing in communities.

### **Course Readings**

1. **Online Textbook:** *Global Health* by Michael H. Merson, Robert E. Black, and Anne J. Mills (2020). Available online through the OSU library (6 licenses).
2. **Other Readings:** These readings will come from the peer-reviewed literature and reports.
3. **Book:** Halfway through the semester, students will participate in a virtual book club. You will choose **one** of the following books to read and “discuss” in a small group using FLIPGRID. See page 4 for book options.

## **Class Technology**

1. There is a Carmen site for the course, where students can find all readings and assignments. Assignments must be submitted through Carmen (carmen.osu.edu).
2. Flipgrid is a Microsoft tool that will be used to facilitate the book and movie discussions. Students can read about Flipgrid here: <https://info.flipgrid.com/>. Details on how to sign up and create videos will be included on Carmen, along with a short video example.

## **Security Policies**

OSU Information Technology's Security Policy can be found here: <https://ocio.osu.edu/sites/default/files/assets/Policies/ITSecurity.pdf>. Additional information about cyber security can be found here: <https://cybersecurity.osu.edu/about>. Proctorio's security policy is here: <https://proctorio.com/gdpr>.

## **OSU Learning Accessibility Policies**

<https://keeplearning.osu.edu/> and <https://resourcecenter.odde.osu.edu>  
<https://www.instructure.com/canvas/accessibility>

## **Assessment Components**

1. Public Health in a Day and Photo Contest = 5%  
*This will consist of 2 short reflective one-page papers: one will be due at the beginning of the semester and one at the end of the semester. Each paper must be accompanied by a photo that represents public health; the photo will be submitted on the Discussion Board. More details on how to write the paper will be provided on Carmen.*
2. Quizzes, Essays and other Assignments Writings = 30%  
*Every week, students will complete quizzes and assignments after listening to the recorded lectures (and videos) and reading the assigned readings. Most assignments will be due on Sunday by 11:59 PM. There will be a few exceptions for specific reasons noted throughout the semester.*  
  
*NOTE: Students will have 30 minutes to complete the quiz and each quiz will have 5-10 questions. ALL QUIZZES ARE OPEN-BOOK. OPEN-NOTES. HOWEVER, STUDENTS CAN NOT SPEAK TO ANYONE ABOUT THE QUIZ QUESTIONS.*
3. Research Paper: Global to Local Analysis of Public Health Issue = 25%  
*You will select a global public health topic from the list you are given by the instructor. Each student will research how the issue is addressed in Columbus and in a low-to-middle-income country. The deliverable will be a paper that describes the problem in the selected country and in Columbus and the ways in which agencies are addressing the problem. More details are provided on Carmen.*
4. Creative Endeavor: Short Communication of Public Health Issue = 25%  
*Using the same topic as your research paper, you will create a short communication. You will need to summarize the burden of the problem in the U.S. or a low-to-middle-income country and report on at least one peer-reviewed article that presents an intervention or program to address the issue. For your final product (TED talk, infographic, or other creative artifact), you need to summarize the burden of the issue and critically assess the intervention to address it and use your communication artifact to increase awareness. READ THE PROJECT RUBRIC CAREFULLY to understand how you will be graded. More details are provided on Carmen.*

*Peer review of the creative artifact project will be performed in small groups.*

5. Public Health in the Arts = 10%

*Students will learn how public health is reflected in various art forms, including paintings, sculpture, books, and films. Students will sign up for a book and film and engage in a virtual discussion of the book and film using Flipgrid.*

*Book options:*

- *Scrambling for Africa* by Johana Tayloe Crane
- *What is the What* by David Eggers
- *Mountains Beyond Mountains: The Quest of Dr. Paul Farmer, A Man Who Would Cure The World* by Tracy Kidder

*Film options:*

- *And the Band Played On* (available on HBO Max)
- *Dallas Buyers Club* (Hulu, Apple TV, Amazon Prime)
- *Fire in the Blood* (available on Kanopy)
- *United in Anger: the History of ACT UP* (available on Kanopy)

*For the painting/sculpture, students will explore Google Arts and Culture (<https://artsandculture.google.com/>) and find a piece of art that represents a public health issue and then write a one-page description and reflection of the piece of art.*

6. Public Health in the News Discussion = 5%

*You will be placed into small groups for this assignment. The assignment will begin during module 2.*

*Each week, there will be a Discussion Leader who will find a short public health-related article in the news. The Discussion Leader will create a post on the DISCUSSION BOARD that includes the title of the selected article and the link to the article.*

*On Flipgrid, the Discussion Leader will create a short video (2 minutes max) that briefly summarizes the article and answers all of the following questions: 1) What did you know about the topic before you read the article? 2) What do you wonder, now that you have read the article? 3) What did you learn?*

*The other members of the group will respond to this post by crafting a short video response (2 minutes max) that includes at least two of the following elements: 1.) Comment – I agree with that, I disagree because...; 2.) Connection – I also thought...; 3.) Question – I wonder why...*

*Grading: 1 point will be given for assignments that are complete and thoughtful; 0 will be given to everything else.*

**Late assignments** will be reduced by one point/day.

**Grade Scale**

<b>A</b>	<b>100-93</b>	Outstanding work that reflects mastery of the material and the ability to apply it
<b>A-</b>	<b>92-90</b>	Excellent work that reflects mastery of the material
<b>B+</b>	<b>89-87</b>	Good work that reflects mastery of most of the material
<b>B</b>	<b>86-83</b>	Good work that reflects mastery of some of the material
<b>B-</b>	<b>82-80</b>	Good work that reflects mastery of a few aspects of the material
<b>C+</b>	<b>79-77</b>	Mediocre work that reflects familiarity with, but not mastery of the material
<b>C</b>	<b>76-73</b>	Mediocre work that reflects familiarity with most of the material
<b>C-</b>	<b>72-70</b>	Mediocre work that reflects little familiarity with the material

### **Office of Student Life: Disability Services**

Any student who feels s/he may need an accommodation based on the impact of a disability should contact me privately to discuss your specific needs. Please contact the Office of Student Life: Disability Services at 614-292-3307 in Room 098 Baker Hall 113 W. 12th Ave. to coordinate reasonable accommodations for students with documented disabilities ( <http://slds.osu.edu/>).

The university strives to maintain a healthy and accessible environment to support student learning in and out of the classroom. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let me know immediately so that we can privately discuss options. To establish reasonable accommodations, I may request that you register with Student Life Disability Services. After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion.

If you are isolating while waiting for a COVID-19 test result, please let me know immediately. Those testing positive for COVID-19 should refer to the [Safe and Healthy Buckeyes site](#) for resources. Beyond five days of the required COVID-19 isolation period, I may rely on Student Life Disability Services to establish further reasonable accommodations. You can connect with them at [slds@osu.edu](mailto:slds@osu.edu); 614-292-3307; or [slds.osu.edu](http://slds.osu.edu).

### **Mental Health Services**

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Life's Counseling and Consultation Service (CCS) by visiting [ccs.osu.edu](http://ccs.osu.edu) or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at [614-292-5766](tel:614-292-5766) and 24 hour emergency help is also available 24/7 by dialing 988 to reach the **Suicide and Crisis Lifeline**

### **Academic integrity**

Academic integrity is essential to maintaining an environment that fosters excellence in teaching, research, and other educational and scholarly activities. Thus, The Ohio State University, the College of Public Health, and the Committee on Academic Misconduct (COAM) expect that all students have read and understood the University's Code of Student Conduct and the School's Student Handbook, and that

all students will complete all academic and scholarly assignments with fairness and honesty. The Code of Student Conduct and other information on academic integrity and academic misconduct can be found at the COAM web pages (<https://oaa.osu.edu/academic-integrity-and-misconduct>). Students must recognize that failure to follow the rules and guidelines established in the University's Code of Student Conduct, the Student Handbook, and in the syllabi for their courses may constitute "Academic Misconduct."

The Ohio State University's Code of Student Conduct (Section 3335-23-04) defines academic misconduct as: "Any activity that tends to compromise the academic integrity of the University, or subvert the educational process." Examples of academic misconduct include (but are not limited to) plagiarism, collusion (unauthorized collaboration), copying the work of another student, and possession of unauthorized materials during an examination. Please note that the use of material from the Internet without appropriate acknowledgement and complete citation is plagiarism just as it would be if the source were printed material. Further examples are found in the Student Handbook. Ignorance of the Code of Student Conduct and the Student Handbook is never considered an "excuse" for academic misconduct.

If I suspect a student of academic misconduct in a course, I am obligated by University Rules to report these suspicions to the University's Committee on Academic Misconduct. If COAM determines that the student has violated the University's Code of Student Conduct (i.e., committed academic misconduct), the sanctions for the misconduct could include a failing grade in the course and suspension or dismissal from the University. If you have any questions about the above policy or what constitutes academic misconduct in this course, please contact me.

### **Religious Accommodations**

Ohio State has had a longstanding practice of making reasonable academic accommodations for students' religious beliefs and practices in accordance with applicable law. In 2023, Ohio State updated its practice to align with new state legislation. Under this new provision, students must be in early communication with their instructors regarding any known accommodation requests for religious beliefs and practices, providing notice of specific dates for which they request alternative accommodations within 14 days after the first instructional day of the course. Instructors in turn shall not question the sincerity of a student's religious or spiritual belief system in reviewing such requests and shall keep requests for accommodations confidential.

With sufficient notice, instructors will provide students with reasonable alternative accommodations with regard to examinations and other academic requirements with respect to students' sincerely held religious beliefs and practices by allowing up to three absences each semester for the student to attend or participate in religious activities. Examples of religious accommodations can include, but are not limited to, rescheduling an exam, altering the time of a student's presentation, allowing make-up assignments to substitute for missed class work, or flexibility in due dates or research responsibilities. If concerns arise about a requested accommodation, instructors are to consult their tenure initiating unit head for assistance.

A student's request for time off shall be provided if the student's sincerely held religious belief or practice severely affects the student's ability to take an exam or meet an academic requirement and the student has notified their instructor, in writing during the first 14 days after the course begins, of the date of each absence. Although students are required to provide notice within the first 14 days after a course begins, instructors are strongly encouraged to work with the student to provide a reasonable accommodation if a request is made outside the notice period. A student may not be penalized for an absence approved under this policy.

If students have questions or disputes related to academic accommodations, they should contact their course instructor, and then their department or college office. For questions or to report discrimination or harassment based on religion, individuals should contact the [Office of Institutional Equity](#). (Policy: [Religious Holidays, Holy Days and Observances](#))

### **Child Care Access Means Parents in School Program**

The Office of Diversity and Inclusion provides holistic support for qualifying student parents enrolled at Ohio State. To learn more, contact the “Child Care Access Means Parents in School” (CCAMPIS) Program at 614-247-7092/ [lewis.40@osu](mailto:lewis.40@osu) or visit [odi.osu.edu/ccampis](http://odi.osu.edu/ccampis)

### **Health and Safety Requirements**

Health and safety requirements: All students, faculty and staff are required to comply with and stay up to date on all university safety and health guidance (<https://safeandhealthy.osu.edu>), which includes wearing a face mask in any indoor space and maintaining a safe physical distance at all times. Non-compliance will be warned first and disciplinary actions will be taken for repeated offenses

## Course Outline

Module/ Week(s)	Topics, Readings, Assignments	Learning Objectives
<b>Module 1</b>  <b>May 12 – 16</b>	<b>Overview of Global Public Health</b> <ul style="list-style-type: none"> <li>Lecture A: Global public health overview</li> <li>Lecture B: Essential functions of public health in U.S.</li> </ul> <b>Assignments:</b> Quiz Public Health in a Day write-up and photo contest Research paper & creative endeavor topic Book selection	1, 3
<b>Module 2</b>  <b>May 17 – 23</b>	<b>Global Burden of Disease Project</b> <ul style="list-style-type: none"> <li>Lecture A: Summary measures of health</li> <li>Lecture B: Main GBD findings: health outcomes and risk factors</li> </ul> <b>Assignments:</b> Quiz GBD writing assignment (research paper writing #1) Public Health in the News #1  <b>Readings</b> Chapter 1, “Summary Measures of Population Health” Local Burden of Disease Vaccine Coverage Collaborators, Mapping routine measles vaccination in low- and middle-income countries. <i>Nature</i> , 2020; Dec 16	1, 3

	Quizzes & Essays	Midterm project	Final project	Arts	Current events
<b>CPH GPH Core Competencies</b>					
1. Summarize the historic milestones in public health.	X		X	X	
2. Compare and contrast types of major domestic and international public health issues.	X		X		X
3. Discuss various approaches/strategies for identification, response and intervention to address and attempt to resolve common public health issues.		X	X		
4. Identify genetic, social, political, cultural, behavioral, socioeconomic, demographic and ethical factors and relations to domestic and international public health issues.	X			X	X
5. Apply the fundamental principles of the 5 core disciplines of public health (biostatistics, environmental health, epidemiology, health administration, and health behavior/promotion) to domestic and international health issues	X		X	X	
6. Communicate public health information, in both oral and written forms, through a variety of media and to diverse audiences.		X	X		X
7. Locate, use, evaluate and synthesize public health information.		X	X	X	X
<b>Public Health Sociology Specialization Competencies</b>					
1. Employ specific sociological theories, both classical and contemporary, to explain the unequal distribution of health among different subpopulations in the United States and throughout the world. Identify how these theories can extend our knowledge of disease processes and prevention and intervention opportunities beyond typical public health perspectives		X	X		
3. Illustrate how sociological perspectives of stratification - particularly along the lines of race, class, and gender – expand typical public health perceptions and approaches	X			X	
4. Identify social and public policies that differentially affect the unequal distribution of health in society as well as the social process that led to their creation and keep them in place	X			X	
<b>Environmental Public Health Specialization Competencies</b>					
1. Apply principles of math, chemistry, biology to applied science of environmental public health.	X			X	
2. Use the Environmental Science Health model to explain environmentally-related exposures and human diseases.	X			X	

# GE THEME COURSES

## Overview

Courses that are accepted into the General Education (GE) Themes must meet two sets of Expected Learning Outcomes (ELOs): those common for all GE Themes and one set specific to the content of the Theme. This form begins with the criteria common to all themes and has expandable sections relating to each specific theme.

A course may be accepted into more than one Theme if the ELOs for each theme are met. Courses seeing approval for multiple Themes will complete a submission document for each theme. Courses seeking approval as a 4-credit, Integrative Practices course need to complete a similar submission form for the chosen practice. It may be helpful to consult your Director of Undergraduate Studies or appropriate support staff person as you develop and submit your course.

Please enter text in the boxes to describe how your class will meet the ELOs of the Theme to which it applies. Please use language that is clear and concise and that colleagues outside of your discipline will be able to follow. You are encouraged to refer specifically to the syllabus submitted for the course, since the reviewers will also have that document. Because this document will be used in the course review and approval process, you should be *as specific as possible*, listing concrete activities, specific theories, names of scholars, titles of textbooks etc.

## Accessibility

If you have a disability and have trouble accessing this document or need to receive it in another format, please reach out to Meg Daly at [daly.66@osu.edu](mailto:daly.66@osu.edu) or call 614-247-8412.

Course subject & number

## General Expectations of All Themes

**GOAL 1: Successful students will analyze an important topic or idea at a more advanced and in-depth level than the foundations.**

**Please briefly identify the ways in which this course represents an advanced study of the focal theme.** In this context, “advanced” refers to courses that are e.g., synthetic, rely on research or cutting-edge findings, or deeply engage with the subject matter, among other possibilities. (50-500 words)

Students are required to read selections from an online textbook, articles from the peer-reviewed literature, and government reports. They are also asked to write reflections on the material, describing how what they learned has challenged their thinking and views of the world of global public health. Through recorded lectures, documentaries, and readings they are challenged to confront what “doing” global health work means from an ethical perspective. Finally, through two projects, students are required to research a public health issue globally and locally and communicate about that issue using written and creative forms (e.g., a TED style talk or an infographic). All of these activities represent advanced study of the selected critical issues in global public health.

**ELO 1.1 Engage in critical and logical thinking about the topic or idea of the theme.** Please link this ELO to the course goals and topics and indicate *specific* activities/assignments through which it will be met. (50-700 words)

There are several ways in which students engage in critical thinking in this class. First, students write several reflections on the material throughout the semester. Their ideas of what causes health and wellbeing will be challenged early on, when they learn about the social determinants of health and racism as a public health crisis. Students tend to also be challenged by the material that is focused on culture, community engagement, and health. Reflections on books, art, and film are also included in this course. These latter reflections challenge students to connect what they are reading and seeing to the material discussed in class.

Second, the two main projects in this class, a research paper and a creative endeavor, require students to conduct research on a global public health topic and how it impacts populations in a low- or middle-income country and locally in Columbus. The research paper requires students to make connections between global and local solutions to the same public health issue; this activity challenges them to critically evaluate what they have learned from the paper.

Third, students engage in Public Health and the News discussions nearly every week in the class. This activity requires students to select a current news story, summarize it, and describe what they learned and what questions they still have. Other students will respond to the post, answering the questions posed by the discussion leader and reflecting on their own ideas. Students typically connect what they are learning about in class to current events.

**ELO 1.2 Engage in an advanced, in-depth, scholarly exploration of the topic or idea of the theme.** Please link this ELO to the course goals and topics and indicate *specific* activities/assignments through which it will be met. (50-700 words)

There are four assessment components in class that require students to engage in advanced scholarly exploration. The first two are the research paper and creative endeavor. As noted above, these projects require students to examine a public health issue, as well as solutions, in a selected low-to-middle-income country and locally in Columbus. Students conduct literature searches, read papers in the peer-reviewed literature, read government reports, seek out statistics, communicate through a scholarly paper, and communicate through a short communication (TED style talk, infographic, or other creative way).

The third way in which students engage in advanced exploration is through the Public Health and the Arts module. This module requires students to read a book and reflect on it and engage in a virtual book discussion. Additionally, students must select a piece of art that represents public health and describe why and how it reflects public health on a group discussion board. Finally, students must choose one of the films focused on HIV/AIDS, watch it, and write a reflection on a group discussion board.

The final way in which students engage in advanced exploration is through the Public Health in the News activity, which, as noted above, requires students to select a current news event, summarize it, and connect it to class content. Other students listen to the post and respond to it using a set of prompts. Throughout the semester, each student is a discussion leader and responder several times. By the end, they are better consumers of current news.

**GOAL 2: Successful students will integrate approaches to the theme by making connections to out-of-classroom experiences with academic knowledge or across disciplines and/or to work they have done in previous classes and that they anticipate doing in future.**

**ELO 2.1 Identify, describe, and synthesize approaches or experiences as they apply to the theme.**

Please link this ELO to the course goals and topics and indicate *specific* activities/assignments through which it will be met. (50-700 words)

The research paper and creative endeavor are the two activities that require students to identify, describe and synthesize approaches to a public health issue. Students select a public health issue for these two assignments. For the paper, they report on the burden and solutions in Columbus and the global burden in a chosen country and solutions. This requires them to reach out to local organizations to learn about how the issue is examined and addressed in Columbus. Students describe common approaches to addressing the problem globally and locally, but also the ways in which the local culture impacts the approach to reducing the problem. For the creative endeavor, they must learn how to communicate a public health problem and solution in a brief format, using more figures and graphs than text. This particular assignment is important for their future careers, as one rarely has the ability to discuss an issue using a long-form of communication, such as a research paper.

Other assignments will also require students to identify, describe, and synthesize approaches to public health issues. For some of the modules (global burden of disease, nutrition, chronic diseases), students will complete assignments that require them to apply what they learned in the module to a real public health issue.

**ELO 2.2 Demonstrate a developing sense of self as a learner through reflection, self-assessment, and creative work, building on prior experiences to respond to new and challenging contexts.** Please link this ELO to the course goals and topics and indicate *specific* activities/assignments through which it will be met. (50-700 words)

At the start of the term and again at the end, students complete an activity called Public Health in a Day. It requires them to think about what they do on a daily basis and identify three ways in which they interact with public health (regulations, policies, etc.). They also have to submit a photo to illustrate one of the interactions. At the end of the semester, after students complete this activity they are asked to reflect on how their knowledge of public health has changed throughout the semester and how their entries have changed as a result of the greater knowledge of public health.

The Public Health in the News activity also requires students to reflect on prior knowledge. When they are a discussion leader, they need to state what they knew about the topic prior to reading the article and what they learned from the article. Through this assignment, students are able to make connections to the topics we discuss in class (e.g., culture and health, social determinants of health, public health ethics) and what is happening in the world around them. These conversations become deeper and more reflective as the semester progresses and students learn more about global public health.

## Specific Expectations of Courses in Health & Wellbeing

**GOAL Students will explore and analyze health and wellbeing through attention to at least two dimensions of wellbeing. (Ex: physical, mental, emotional, career, environmental, spiritual, intellectual, creative, financial, etc.).**

**ELO 1.1 Explore and analyze health and wellbeing from theoretical, socio-economic, scientific, historical, cultural, technological, policy, and/or personal perspectives.** Please link this ELO to the course goals and topics and indicate *specific* activities/assignments through which it will be met. (50-700 words)

The perspectives covered to the greatest extent in this course are the theoretical, socio-economic, historical, cultural, and policy.

Theories related to the social determinants of health and racism as a public health crisis are discussed in the modules. Socio-economic perspectives are a major focus in most themes, as most discuss the critical public health issue in low-to-middle-income countries. This course also emphasizes some historical aspects of public health, particularly during the first module but again later in the course when we discuss the HIV/AIDS epidemic through readings and a film. Cultural aspects of public health are also a focus, with the introduction to culture and health during one of the first modules in the course. This theme continues throughout the course in modules and through the research paper. Policy is also a major theme in this course. Much of what we do in public health is at the societal level and students learn about policy approaches to addressing public health issues in nearly every module.

Through readings, recorded lectures, documentaries, assignments, reflections, Public Health in the News posts, the research paper, and the creative endeavor, students will explore a variety of public health topics from many perspectives. These various assignments require them to write about issues, conduct research about an issue and how it is addressed in a low-to-middle-income country and in Columbus, communicate in oral and written forms about issues, and reflect on their learning.

**ELO 1.2 Identify, reflect on, and apply the skills needed for resiliency and wellbeing.** Please link this ELO to the course goals and topics and indicate *specific* activities/assignments through which it will be met. (50-700 words)

While this course is not about individual behaviors and an individual student's level of resiliency, through readings about how public health issues affect low-to-middle-income countries and marginalized communities in the United States, students gain an understanding of how resiliency is developed and how it can impact health and wellbeing at the community level. Through the research paper and creative endeavor activities, students describe how communities have identified and implemented solutions to the public health problems that they face. They write about the public health burden globally and locally, solutions globally and locally, and connections to the global and local approaches to the problem.

Three reflections in the course will require students to focus on wellbeing and resiliency. Following the modules on the social determinants of health, racism as a public health crisis, and mental health and addiction, students will be asked to reflect on how communities develop resiliency to address these issues. Then, students will be asked to reflect on how their own resiliency can be developed from what they have learned and also how they can contribute to community-level resiliency.
