
Term Information

Effective Term Autumn 2024

General Information

Course Bulletin Listing/Subject Area Anthropology
Fiscal Unit/Academic Org Anthropology - D0711
College/Academic Group Arts and Sciences
Level/Career Undergraduate
Course Number/Catalog 3360
Course Title Anthropology of Animals
Transcript Abbreviation Anthro of Animals
Course Description This course introduces multispecies studies – a field of research and writing that examines nonhuman life forms as objects of analysis and as beings with relevant social, biological, and political lives. We will explore how multispecies scholars engage with nonhumans across multiple dynamic worlds utilizing a range of classic and emerging theoretical frameworks.
Semester Credit Hours/Units Fixed: 3

Offering Information

Length Of Course 14 Week
Flexibly Scheduled Course Never
Does any section of this course have a distance education component? No
Grading Basis Letter Grade
Repeatable No
Course Components Lecture
Grade Roster Component Lecture
Credit Available by Exam No
Admission Condition Course No
Off Campus Never
Campus of Offering Columbus, Lima, Mansfield, Marion, Newark, Wooster

Prerequisites and Exclusions

Prerequisites/Corequisites
Exclusions
Electronically Enforced No

Cross-Listings

Cross-Listings

Subject/CIP Code

Subject/CIP Code 45.0201
Subsidy Level Baccalaureate Course
Intended Rank Freshman, Sophomore, Junior, Senior

Requirement/Elective Designation

Lived Environments

Course Details

Course goals or learning objectives/outcomes

- Understand the historical approaches to studying human-animal relationships. Key foundational texts will establish the theoretical frameworks that informed early anthropological perspectives.
- Recognize the novel contribution of anthropological multispecies studies.
- Develop an original research project exploring a part of the human-other animal interface that is salient to you.
- Develop oral presentation and discussion skills through participation in classroom discussion and presenting their research to the class.
- Demonstrate knowledge of the complex interface between humans and other animals, across cultures, contexts, and time.

Content Topic List

- Animal behavior
- Animal sacrifice
- Animal kinship
- Politics of nature
- Domestication
- Pest species
- Love and attachment
- Anthropocene

Sought Concurrence

Yes

Comments

- See updated syllabus and accompanying letter. *(by Palazzo, Sarah Rose on 03/05/2024 08:52 AM)*
- See feedback email sent to department 03-01-2024 *(by Steele, Rachel Lea on 03/01/2024 04:17 PM)*
- - Per OAA policy, please check off all the campuses for courses in the new GE.
 - It is extremely unusual to have a repeatable GE course. Please consider making the course non-repeatable.
 - Please request a concurrence from the Dept of Animal Sciences in CFAES. *(by Vankeerbergen, Bernadette Chantal on 01/11/2024 02:15 PM)*

Fax (614) 292-4155
<http://anthropology.ohio-state.edu>

Dear Social and Behavioral Sciences Subcommittee,

Thank you for your approval of my proposed course: ANTHROP 3360 – The Anthropology of Animals. I have taken your contingencies into account and made the following changes:

- **Contingency:** The Subcommittee requests that the department offer insight on whether this course will be able to count toward the Medical Anthropology BA/BS. If so, the Subcommittee requests a curriculum map for those degrees as well.
 - This course is **not** an option to fulfill requirements of the medical anthropology majors (BA or BS)
- **Contingency:** The Subcommittee requests that the department include the course number alongside the course title at the top of the first page of the syllabus.
 - Course number (ANTHROP 3360) has been added to the top of the first page of the syllabus, alongside the course title
- **Contingency:** The Subcommittee requests that the syllabus include the format of instruction and the number of contact hours per week in the syllabus, as noted in the required syllabus elements on the [Arts and Sciences Curriculum and Assessment Services website](#).
 - Format of instruction and contact hours have been added to the first page of the syllabus, above the image and alongside course information such as room location and number, etc.
- **Contingency:** The Subcommittee requests that the department remove the reference to the OSU standard scheme, as the university does not have a standard grading scale. [Syllabus p. 4]
 - Reference to OSU standard scheme has been removed. The passage now states: “Final grades are based on the following grading scale:...”
- **Contingency:** The Subcommittee requests that the department remove the academic misconduct statement that appears on page 6 of the syllabus. The statement on page 8 is the correct version and should remain in the syllabus.
 - The incorrect misconduct statement has been removed.

- *Recommendation:* The Subcommittee recommends that the department provide the length of all of the readings in the course schedule so that the workload per class session is clear to students.
 - I will provide the length for all required readings before this course is next taught.

- *Recommendation:* The Subcommittee recommends that the department include more detail in the syllabus regarding the research project including the approximate length of the paper.
 - I will add details regarding paper length and research project expectations before this course is next taught.

Thank you for your consideration, and your support of this proposed course.

Sincerely,

Jeffrey V. Peterson

Lecturer
Department of Anthropology
Ohio State University

The Anthropology of Animals (ANTHROP 3360)

Autumn 2024

Instructor: Dr. Jeffrey Peterson

Email: peterson.807@osu.edu

Office Hours: TBD

Office Location: 4100A Smith Lab

Location: TBD

Format: Lecture, 3 contact hours/week

Long-tailed macaques (*Macaca fascicularis*) at the Ubud Monkey Forest in Bali consuming offerings left for them during the Tumpek Kandang ceremony, June 2017.

Course Description

How do humans relate to nonhumans across cultures and ecologies, as beings to think with, live with, love, kill, and consume? This course introduces multispecies studies – a field of research and writing that examines nonhuman life forms as objects of analysis and as beings with relevant social, biological, and political lives. We will explore how multispecies scholars engage with nonhumans across multiple dynamic worlds utilizing a range of classic and emerging theoretical frameworks. Assigned readings will highlight wide-ranging geographic and sociocultural contexts, and attend to the myriad ways humans interact with and perceive other animals. Students will engage with topics both familiar and unfamiliar, and some that seem in contrast to conventional wisdom. At the end of the semester, students will develop a more critical lens through which they understand human-animal relationship in general, as well as in their own lives.

Required Texts

Baynes-Rock, Marcus (2020) *Crocodile Undone: The Domestication of Australia's Fauna*. Pennsylvania State University Press.

Govindrajan, Radhika (2018) *Animal Intimacies: Interspecies Relatedness in India's Central Himalayas*. The University of Chicago Press.

Ogden, Laura (2011) *Swamplife: People, Gators, and Mangroves Entangled in the Everglades*. University of Minnesota Press.

Course Objectives

- Introduce the concepts, theories, and methods within the field of multispecies studies.
- Foster an appreciation for and understanding of human cultural diversity with respect to human-animal relationships.
- Understand the changes in how scientists study and understand human-animal relationship over time.
- Encourage students to use an anthropological perspective to evaluate and gain insight into their own relationships with other animals.

Learning Outcomes

1. Understand the historical approaches to studying human-animal relationships. Key foundational texts will establish the theoretical frameworks that informed early anthropological perspectives.
2. Recognize the novel contribution of anthropological multispecies studies.
3. Develop an original research project exploring a part of the human-other animal interface that is salient to you.
4. Develop oral presentation and discussion skills through participation in classroom discussion and presenting their research to the class.
5. Demonstrate knowledge of the complex interface between humans and other animals, across cultures, contexts, and time.

General Education Goals meet by this course

The Anthropology of Animals is associated with the following GE categories:

Themes

Lived Environments:

Context:

The Lived Environments theme is intended to enable students to explore issues related to humans and their lived environments through both objective and subjective lenses inclusive of physical, biological, cultural and aesthetic space that individuals and groups occupy, and the relationship between humans and these environments.

Goals:

1. Successful students will analyze “Lived Environments” at a more advanced and in-depth level than in the Foundations component.
2. Successful students will integrate approaches to understanding lived environments by making connections to out-of-classroom experiences with academic knowledge or across disciplines and/or to work they have done in previous classes and that they anticipate doing in future.
3. Successful students will explore a range of perspectives on the interactions and impacts between humans and one or more types of environment (e.g., agricultural, built, cultural, economic, intellectual, natural) in which humans live.
4. Successful students will analyze a variety of perceptions, representations and/or discourses about environments and humans within them

Expected Learning Outcomes:

Successful students are able to:

- 1.1 Engage in critical and logical thinking about the topic or idea of lived environments.
- 1.2 Engage in an advanced, in-depth, scholarly exploration of the topic or idea of lived environments.
- 2.1 Identify, describe, and synthesize approaches or experiences as they apply to lived environments.
- 2.2 Demonstrate a developing sense of self as a learner through reflection, self-assessment and creative work, building on prior experiences to respond to new and challenging contexts.
- 3.1 Engage with the complexity and uncertainty of human-environment interactions.
- 3.2 Describe examples of human interaction with and impact on environmental change and transformation over time and across space.
- 4.1 Analyze how humans’ interactions with their environments shape or have shaped attitudes, beliefs, values and behaviors.
- 4.2 Describe how humans perceive and represent the environments with which they interact.
- 4.3 Analyze and critique conventions, theories and ideologies that influence discourses around environments.

Students will achieve the above Expected Learning Outcomes by engaging with course material across multiple domains, reading across disciplines, time periods, geographic contexts, cultural worldviews, and animal species. Students will read advanced material independently, such as the recent and provocative anthropological works 'Animals Intimacies' by Radhika Govindraján and 'Crocodile Undone' by Marcus Baynes-Rock. Students will discuss their thoughts, perceptions, and reactions to the material as a class, enhancing their understanding of key themes such as human-environment interactions and how they shape and are shaped by our perceptions of those ecologies. This developing knowledge of the issues, approaches, and tensions in multispecies studies receives direct application in a small-scale research project on human-animal relations that the students will carry out themselves over the course of the semester, with input from their instructor and peers. Students will build this project in stages corresponding to course topics, allowing them to reflect on their own intellectual development and even apply their emerging knowledge directly to a topic of their own interest. The semester culminates with each student giving a presentation of their research project in the style of a talk at a scientific conference, where they will synthesize the myriad scholarly approaches to human-animal relations and articulate them with their own practical engagement with the field of multispecies studies.

Course Expectations & Requirements

1) Participation (10%): Students will be graded on their ability to collaboratively discuss the reading material and broader concepts during classroom meetings.

Be collegial in your participation. We will be covering sensitive topics and students may have varying opinions. Remember to treat each other with respect and empathy.

2) Checkpoints (40%): Weekly "checkpoints" utilizing a mix of subjective and objective responses covering the material will give students the opportunity to think deeply and independently about the readings and group discussion.

3) Research project (40%): Students will complete assignments throughout the semester ensuring their research project is on pace. The final submission will summarize their research in paper format.

4) Final presentation (10%): At the end of the semester students will give a small presentation on their research project.

Evaluation

Final grades are based on the following grading scale: A 93; A- 90-92; B+ 87-89; B 83-86; B- 80-82; C+ 77-79; C 73-76; C- 70-72; D+ 67-69; D 60-66; E < 60.

Course Schedule

This is the schedule of topics covered during the semester. All readings can be found in the required books or on Carmen. Readings for this class are not optional and should be completed each week.

Week	Topic	Reading	Due
1	Introduction to The Anthropology of Animals		Checkpoint 1
2	Thinking about Animals Interpreting Animal Behavior	1) Aristotle, 350 BC: selections from 'History of Animals' (Book 1: Parts 1-8; Book 9: Parts 1-11) 1) Descartes: From the Letters of 1646 and 1649 2) Despret 2016: H for Hierarchy	Checkpoint 2
3	What Do Animals Know? Affinity with Animals	1) Lamarck 1809, selections from 'Zoological Philosophy' (pp. 401-405) 2) Bateson 1969, "Metalogue: What is an Instinct?" 1) Darwin 1871, Introduction to 'Descent of Man' 2) Malik et al. 2017, "An Untold Story in Biology"	Project proposal Checkpoint 3
4	Beyond Biology Common Resources	1) Lévi-Strauss 1966, selections from 'La Pensée Sauvage' (pp. 46-51) 2) Geertz 1973, "Deep Play: Notes on the Balinese Cockfight" 1) Hardin 1974, "Tragedy of the Commons"	Checkpoint 4
5	A Multispecies World Animal Sacrifices	1) Govindrajan 2018, Ch. 1: Introduction 2) Ingold 2000, selections from 'The Perception of the Environment' (pp. 13-15) 1) Govindrajan 2018, Ch. 2: The Goat Who Died for Family 2) Despret 2016: K for Killable	Peer-review due Checkpoint 5
6	Animal Kinship Animal Conflict	1) Govindrajan 2018, Ch. 3: The Cow Herself Has Changed 2) Harris 1966, selections from "The Cultural Ecology of India's Sacred Cow" (pp. 146-149) 1) Govindrajan 2018, Ch. 4: Outsider Monkey, Insider Monkey 2) Dore 2018, selections from "Ethnoprimateology without Conservation" (pp. 929-937)	Checkpoint 6
7	What are Wild Things? Animal Stories	1) Govindrajan 2018, Ch. 5: Pig Gone Wild 2) Cronon 1991, selections from 'Nature's Metropolis' (pp. 15-19) 1) Govindrajan 2018, Ch. 6: The Bear Who Loved a Woman 2) Hartigan 2014, Ch. 10: The Fable as Form	Annotated bibliography Checkpoint 7
8	Landscapes and Politics Time, Place, and Being	1) Ogden 2011, Ch. 1: The Florida Everglades 2) Ogden 2011, Ch. 2: Landscape Ethnography and the Politics of Nature 1) Ogden 2011, Ch. 3: Earth, Fire, and Flesh 2) Ogden 2011, Ch. 4: The Travels of Snakes, Mangroves, and Men	Checkpoint 8

9	Entangled Past, Present, and Future Disestablished Natures	1) Ogden 2011, Ch. 5: Searching for Paradise in the Florida Everglades 2) Ogden 2011, Ch. 6: Alligator Conservation, Commodities, and Tactics of Subversion 1) Baynes-Rock 2020, Ch. 1: The Great Unmaking 2) Hartigan 2014, Ch. 14	Methods outline Checkpoint 9
10	Reverse Domestication Trajectories of Domestication	1) Baynes-Rock 2020, Ch. 2: Dingoes 2) Panko 2017, "What Does It Mean to Be a Species?" 1) Baynes-Rock 2020, Ch. 3: Stingless Bees 2) Laber-Warren 2020, "Can an 'Invasive Species' Earn the Right to Stay?"	Checkpoint 10
11	Domesticating Capital Good fences Make Good Domesticates	1) Baynes-Rock 2020, Ch. 4: Crocodiles 2) Tsing 2018, Ch. 10: Salvage Rhythms 1) Baynes-Rock 2020, Ch. 5: Emus 2) Parreñas 2018, selections from 'Decolonizing Extinction' (pp. 157-159)	Research update I Checkpoint 11
12	Pest Species An Ecosystems Approach	1) Baynes-Rock 2020, Ch. 6: Kangaroos 2) Cornwall 2014, "Why Killing Wolves Might Not Save Livestock" 1) Baynes-Rock 2020, Ch. 7: Borderlands 2) Mildenerger 2019, "The Tragedy of 'The Tragedy of the Commons'"	Checkpoint 12
13	Love and Attachment Webs of Agency	1) Candea 2010, "I Fell in Love with Carlos the Meerkat" 2) Govindrajana, 2018, Epilogue: Kukur aur bagh 1) Despret 2016, L for Laboratory 2) Peterson 2018, "Marauding Macaques at a Balinese Temple"	Research update II Checkpoint 13
14		Thanksgiving Break	
15	Animals in the Anthropocene Documentary Film	1) Fuentes 2020, Foreword: Undoing the World? 2) Crate 2008, "Gone the Bull of Winter?"	Final project in paper format Checkpoint 14
16	Student Presentations		

AI/ChatGPT Statement

Recent developments in generative artificial tools, including ChatGPT and others, hold great potential for learning in new ways; however, students should not use these tools in the completion of course assignments unless their instructor specifically authorizes the tools' use. Students are encouraged to review the guidelines outlined in the Code of Student Conduct about completing academic activities with fairness and honesty.

All students should be familiar with what constitutes academic misconduct, especially as it pertains to test taking and plagiarism. Ignorance of the rules governing academic misconduct or ignorance of what constitutes academic misconduct is not an acceptable defense. Cases of alleged academic misconduct will be referred to the appropriate university committees.

Disability Services

The university strives to maintain a healthy and accessible environment to support student learning in and out of the classroom. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let me know immediately so that we can privately discuss options. To establish reasonable accommodations, I may request that you register with Student Life Disability Services. After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion.

If you are isolating while waiting for a COVID-19 test result, please let me know immediately. Those testing positive for COVID-19 should refer to the Safe and Healthy Buckeyes site for resources. Beyond five days of the required COVID-19 isolation period, I may rely on Student Life Disability Services to establish further reasonable accommodations. You can connect with them at slds@osu.edu; 614-292-3307; or slds.osu.edu.

Religious Accommodations

It is Ohio State's policy to reasonably accommodate the sincerely held religious beliefs and practices of all students. The policy permits a student to be absent for up to three days each academic semester for reasons of faith or religious or spiritual belief.

Students planning to use religious beliefs or practices accommodations for course requirements must inform the instructor in writing no later than 14 days after the course begins. The instructor is then responsible for scheduling an alternative time and date for the course requirement, which may be before or after the original time and date of the course requirement. These alternative accommodations will remain confidential. It is the student's responsibility to ensure that all course assignments are completed.

Academic Misconduct

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct <http://studentlife.osu.edu/csc/>.

PLEASE TAKE CARE OF YOURSELF (Mental Health Statement):

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic

performance or reduce a student's ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about

the broad range of confidential mental health services available on campus via the Office of Student Life's Counseling and Consultation Service (CCS) by visiting ccs.osu.edu or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at 614-292-5766 and 24 hour emergency help is also available 24/7 by dialing 988 to reach the Suicide and Crisis Lifeline.

Sexual Misconduct and Relationship Violence

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at <http://titleix.osu.edu> or by contacting the Ohio State Title IX Coordinator at titleix@osu.edu.

Diversity

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential.

Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

Please Note: In case of unexpected instructor absences information will be posted on the web site (below). This site should be consulted during inclement weather to check for class cancellations or delays. Do not call the department, check the web site: <https://anthropology.osu.edu/>

GE Theme course submission worksheet: Lived Environments

Overview

Courses in the GE Themes aim to provide students with opportunities to explore big picture ideas and problems within the specific practice and expertise of a discipline or department. Although many Theme courses serve within disciplinary majors or minors, by requesting inclusion in the General Education, programs are committing to the incorporation of the goals of the focal theme and the success and participation of students from outside of their program.

Each category of the GE has specific learning goals and Expected Learning Outcomes (ELOs) that connect to the big picture goals of the program. ELOs describe the knowledge or skills students should have by the end of the course. Courses in the GE Themes must meet the ELOs common for **all** GE Themes and those specific to the Theme, in addition to any ELOs the instructor has developed specific to that course. All courses in the GE must indicate that they are part of the GE and include the Goals and ELOs of their GE category on their syllabus.

The prompts in this form elicit information about how this course meets the expectations of the GE Themes. The form will be reviewed by a group of content experts (the Theme Advisory) and by a group of curriculum experts (the Theme Panel), with the latter having responsibility for the ELOs and Goals common to all themes (those things that make a course appropriate for the GE Themes) and the former having responsibility for the ELOs and Goals specific to the topic of **this** Theme.

Briefly describe how this course connects to or exemplifies the concept of this Theme (Lived Environments)

In a sentence or two, explain how this class “fits’ within the focal Theme. This will help reviewers understand the intended frame of reference for the course-specific activities described below.

(enter text here)

Connect this course to the Goals and ELOs shared by *all* Themes

Below are the Goals and ELOs common to all Themes. In the accompanying table, for each ELO, describe the activities (discussions, readings, lectures, assignments) that provide opportunities for students to achieve those outcomes. The answer should be concise and use language accessible to colleagues outside of the submitting department or discipline. The specifics of the activities matter—listing “readings” without a reference to the topic of those readings will not allow the reviewers to understand how the ELO will be met. However, the panel evaluating the fit of the course to the Theme will review this form in conjunction with the syllabus, so if readings, lecture/discussion topics, or other specifics are provided on the syllabus, it is not necessary to reiterate them within this form. The ELOs are expected to vary in their “coverage” in terms of number of activities or emphasis within the course. Examples from successful courses are shared on the next page.

Goal 1: Successful students will analyze an important topic or idea at a more advanced and in-depth level than the foundations. In this context, “advanced” refers to courses that are e.g., synthetic, rely on research or cutting-edge findings, or deeply engage with the subject matter, among other possibilities.

Goal 2: Successful students will integrate approaches to the theme by making connections to out-of-classroom experiences with academic knowledge or across disciplines and/or to work they have done in previous classes and that they anticipate doing in future.

	Course activities and assignments to meet these ELOs
ELO 1.1 Engage in critical and logical thinking.	
ELO 1.2 Engage in an advanced, in-depth, scholarly exploration of the topic or ideas within this theme.	
ELO 2.1 Identify, describe, and synthesize approaches or experiences.	
ELO 2.2 Demonstrate a developing sense of self as a learner through reflection, self-assessment, and creative work, building on prior experiences to respond to new and challenging contexts.	

Example responses for proposals within “Citizenship” (from Sociology 3200, Comm 2850, French 2803):

ELO 1.1 Engage in critical and logical thinking.	<i>This course will build skills needed to engage in critical and logical thinking about immigration and immigration related policy through: Weekly reading response papers which require the students to synthesize and critically evaluate cutting-edge scholarship on immigration; Engagement in class-based discussion and debates on immigration-related topics using evidence-based logical reasoning to evaluate policy positions; Completion of an assignment which build skills in analyzing empirical data on immigration (Assignment #1)</i>
---	---

	<p>Completion 3 assignments which build skills in connecting individual experiences with broader population-based patterns (Assignments #1, #2, #3)</p> <p>Completion of 3 quizzes in which students demonstrate comprehension of the course readings and materials.</p>
<p>ELO 2.1 Identify, describe, and synthesize approaches or experiences.</p>	<p>Students engage in advanced exploration of each module topic through a combination of lectures, readings, and discussions.</p> <p><u>Lecture</u> Course materials come from a variety of sources to help students engage in the relationship between media and citizenship at an advanced level. Each of the 12 modules has 3-4 lectures that contain information from both peer-reviewed and popular sources. Additionally, each module has at least one guest lecture from an expert in that topic to increase students' access to people with expertise in a variety of areas.</p> <p><u>Reading</u> The textbook for this course provides background information on each topic and corresponds to the lectures. Students also take some control over their own learning by choosing at least one peer-reviewed article and at least one newspaper article from outside the class materials to read and include in their weekly discussion posts.</p> <p><u>Discussions</u> Students do weekly discussions and are given flexibility in their topic choices in order to allow them to take some control over their education. They are also asked to provide information from sources they've found outside the lecture materials. In this way, they are able to explore areas of particular interest to them and practice the skills they will need to gather information about current events, analyze this information, and communicate it with others.</p> <p>Activity Example: Civility impacts citizenship behaviors in many ways. Students are asked to choose a TED talk from a provided list (or choose another speech of their interest) and summarize and evaluate what it says about the relationship between civility and citizenship. Examples of Ted Talks on the list include Steven Petrow on the difference between being polite and being civil, Chimamanda Ngozi Adichie's talk on how a single story can perpetuate stereotypes, and Claire Wardle's talk on how diversity can enhance citizenship.</p>
<p>ELO 2.2 Demonstrate a developing sense of self as a learner through reflection, self-assessment, and creative work, building on prior experiences to respond to new and challenging contexts.</p>	<p>Students will conduct research on a specific event or site in Paris not already discussed in depth in class. Students will submit a 300-word abstract of their topic and a bibliography of at least five reputable academic and mainstream sources. At the end of the semester they will submit a 5-page research paper and present their findings in a 10-minute oral and visual presentation in a small-group setting in Zoom.</p> <p>Some examples of events and sites: The Paris Commune, an 1871 socialist uprising violently squelched by conservative forces</p>

	<p><i>Jazz-Age Montmartre, where a small community of African-Americans—including actress and singer Josephine Baker, who was just inducted into the French Pantheon—settled and worked after World War I.</i></p> <p><i>The Vélodrome d’hiver Roundup, 16-17 July 1942, when 13,000 Jews were rounded up by Paris police before being sent to concentration camps</i></p> <p><i>The Marais, a vibrant Paris neighborhood inhabited over the centuries by aristocrats, then Jews, then the LGBTQ+ community, among other groups.</i></p>
--	--

Goals and ELOs unique to Lived Environments

Below are the Goals and ELOs specific to this Theme. As above, in the accompanying Table, for each ELO, describe the activities (discussions, readings, lectures, assignments) that provide opportunities for students to achieve those outcomes. The answer should be concise and use language accessible to colleagues outside of the submitting department or discipline. The ELOs are expected to vary in their “coverage” in terms of number of activities or emphasis within the course. Examples from successful courses are shared on the next page.

GOAL 3: Successful students will explore a range of perspectives on the interactions and impacts between humans and one or more types of environment (e.g. agricultural, built, cultural, economic, intellectual, natural) in which humans live.

GOAL 4: Successful students will analyze a variety of perceptions, representations and/or discourses about environments and humans within them.

	Course activities and assignments to meet these ELOs
ELO 3.1 Engage with the complexity and uncertainty of human-environment interactions.	
ELO 3.2 Describe examples of human interaction with and impact on environmental change and transformation over time and across space.	
ELO 4.1 Analyze how humans’ interactions with their environments shape or have shaped attitudes, beliefs, values and behaviors.	
ELO 4.2 Describe how humans perceive and represent the environments with which they interact.	
ELO 4.3 Analyze and critique conventions, theories, and ideologies that influence discourses around environments.	

Ohio State Department Course Review Concurrence Form

The purpose of this form is to provide a simple system of obtaining departmental reactions to proposed new courses, group studies, study tours, workshop requests, and course changes. A letter may be substituted for this form.

Academic units initiating a request which requires such a reaction should complete Section A of this form and send a copy of the form, course request, and syllabus to each of the academic units that might have related interests in the course. Initiating units should allow at least two weeks for responses.

Academic units receiving this form should respond to Section B and return the form to the initiating unit. Overlap of course content and other problems should be resolved by the academic units before forwarding this form and all other accompanying documentation to the Office of Academic Affairs.

A. Information from academic unit *initiating* the request:

Initiating Academic Unit: Department of Anthropology Date: 2/5/2024

Registrar's Listing: ANTHROP 3360

Course Number: _____ Level: U P G Credit Hours: ??

Course Title: The Anthropology of Animals

Type of Request: New Course Group Studies Workshop Study Tour Course Change

Academic Unit with related interests asked to review the request (use a separate form for each unit while requesting concurrences from multiple units): Department of Animal Sciences

Date responses are needed: _____

B. Information from academic units *reviewing* the request:

- The academic unit **supports** the proposal
 The academic unit **does not support** the proposal.

Please explain:

The academic unit suggests:

We already have an established course ANIMSCI 5000 Human Dimension in Animal Sciences. We support this proposal as long as this new course doing not prohibit us from offering ANIMSCI 5000.

ANTHROPOLOGY MAJOR (BA)

Program Learning Goals:

The general goals of our undergraduate program in Anthropology (BA) are threefold: (1) attract and train an increasingly diverse and competitive student body; (2) make graduates more competitive on the job market and in the applicant pool for graduate/professional school; (3) provide more rigorous and empirically oriented training within each anthropological subfield.

General goals # 2 and # 3 are met by a curriculum designed to achieve the following specific learning goals:

- (i) Students are introduced to the breadth of and acquire foundational knowledge in each of the three major sub-disciplines within the major (physical anthropology, cultural anthropology and archaeology).
- (ii) Students master core concepts in each of the three major sub-disciplines within the major (physical anthropology, cultural anthropology and archaeology).
- (iii) Students complete elective coursework in each of the three sub-disciplines within the major (physical anthropology, cultural anthropology and archaeology).
- (iv) Students gain in depth knowledge in one (or more) field by choosing at least two additional courses in any sub discipline (physical anthropology, cultural anthropology or archaeology) within the major.

ANTHROPOLOGICAL SCIENCES MAJOR (BS)

Program Learning Goals:

The general goals of our undergraduate program in Anthropological Sciences are to prepare students for (i) employment that combines critical thinking, communication, and analytical skills with an understanding of human diversity in both time and space and/or (ii) continued study in graduate/professional schools.

These general goals are met via the following specific learning outcomes:

- (i) Students will acquire foundational knowledge in each of the three major sub-disciplines within the major (physical anthropology, cultural anthropology and archaeology).
- (ii) Students will achieve mastery of core concepts in each of the three major sub-disciplines within the major (physical anthropology, cultural anthropology and archaeology). In so doing, they will acquire rigorous and empirically oriented skills in each sub discipline.
- (iii) Students will accumulate breadth of knowledge by completing elective coursework in each of the three sub-disciplines within the major (physical anthropology, cultural anthropology and archaeology).
- (iv) Students achieve in depth knowledge in one (or more) field by choosing at least two additional courses in any sub-discipline (physical anthropology, cultural anthropology or archaeology) within the major.
- (v) Students achieve competence in basic statistical methods and evolutionary theory.
