18 April 2024

Vice Provost W. Randy Smith Council on Academic Affairs Office of Academic Affairs 203 Bricker Hall 190 North Oval Mall Columbus, OH 43210

Dear Dr. Smith,

The Center for Life Sciences Education respectfully submits the attached proposal to update the core course requirements for the Biology Major and Minor. All students in our Program are currently required to complete Biology 3401 (*Integrated Biology*), an intermediate-level course that demonstrates the integrated nature of the life sciences and teaches fundamental scientific skills, including those of the three *Embedded Literacies*. We feel that 3401 is currently tasked with too much for a single course and are proposing an update to the Program that will require students to take two courses: Biology 3501, a course focused on the core skills necessary for Biology students to be successful in upper-level coursework, and Biology 4901, a capstone course that will focus on the integration of topics across the discipline. We feel that students will be better prepared to synthesize content from the life sciences once they have progressed further in the Program, making a capstone experience an ideal addition. This new structure will also significantly improve our ability to assess student performance toward the Biology Program Outcomes.

In addition to the creation of these two courses, the Proposal outlines the necessary changes to the Major and Minor. We look forward to the Committees' review and welcome any questions or concerns.

Sincerely,

Adam Andrews

Assistant Director for Curriculum & Instruction

Introduction

The structure of the Biology Major is such that after taking the two Introductory Biology courses offered by the Center for Life Sciences Education (CLSE), Biology 1113/H and 1114/H, students take the remainder of their upper-level coursework across the four core life sciences Departments (Molecular Genetics, Microbiology, EEOB, and Chemistry & Biochemistry), along with a small number of preapproved courses from other units. Given the highly flexible structure and the wide range of content options, it is possible that a student in the Major could lose sight of the connection between the various subdisciplines of the life sciences. To address this concern, the CLSE created in 2009 a two-quarter sequence of Core Courses for the Major, Biology 401 and 402. In the move to semesters, these courses were consolidated to a single course, Biology 3401. The aim was to provide students a case-study approach that allowed students to integrate content from across the life sciences with mathematics, chemistry, and physics. This Core Course is required of all students in the Biology Major Programs and Minor and represents the only course we can guarantee all our students will take.

As most courses do for better or worse, Biology 3401 has evolved over time. In addition to the natural 'course creep', Biology 3401 was tasked in autumn 2023 with the responsibility for delivery of the new *Embedded Literacies (Technology, Data Analysis, and Advanced Writing)* introduced with the new General Education. In reviewing the course, we came to two significant conclusions: 1) we are asking too much of a single course, and 2) *some* of the integrative nature of the current course content is too advanced for a sophomore level course.

To that end, we are proposing to replace the Biology Core Course, Biology 3401, with a new two-course sequence. The first, Biology 3501 – *Integrative Skills in Biology*, will be a three-credit hour sophomore-level course aimed at developing skills necessary to be successful in upper-level coursework. Those skills, such as literature searches, scientific writing, the role of statistics in Biology, among others, align in part with the expected learning outcomes in the Embedded Literacies and will naturally overlap. The course will feature a single topic, chosen because of the topic's inherent integrative nature, to be used as a theme from which instructors can help

students develop skills. We propose a decimalized system (3501.xx) in which we can have multiple integrative topics from which students may choose.

The second course being proposed, Biology 4901 – *Biological Capstone*, will serve as a two-credit hour capstone experience for Biology Majors and will focus on deep integration of content from across the life sciences subdisciplines. The specific topical theme would be at the discretion of the instructor so long as they are able to integrate all of the course learning outcomes. The offering of a capstone course experience required for all Biology Majors will significantly improve our ability to assess the efficacy of the Program.

The proposal that follows will address the creation of both courses, Biology 3501.xx and 4901, as well as the programmatic changes necessary for the Biology Major and Minor. While functionally multiple proposals, the core courses are considered so integral to the Program that the proposals are presented together for clarity.

Three Regional Campuses – Lima, Marion, and Mansfield (proposed) – offer the full Biology Major. Each of these campuses has a faculty voting member appointed to the CLSE Curriculum Committee, which is charged with curricular oversight of the Biology Program and Courses. The representatives, plus those from the Newark and Columbus campuses, were engaged in the development and discussion of this proposal, which ultimately passed unanimously through the Committee.

Proposal for the Creation of Biology 3501.xx

Biology 3501 will be first and foremost a course aimed at developing student skills in the areas most critical both in future upper-level coursework and careers. These skills include the process and norms of scientific writing and communication, literature searching and analysis, the role of statistics and probability, the nature and intersection of theoretical and applied sciences, how the life sciences interact with society, and an exploration of careers in the life sciences. Each decimalized version of the course will have a singular topical theme that will aim to integrate content from across the life sciences and serve as a focal point for course activities.

Credit Hours and Course Structure

3 credit hours

- Lectures will meet for 2 hours weekly (2 x 55 minutes or 1 x 110 minutes)
- Workshops will meet for 80 minutes weekly

The course will have an expectation of instructors that the lectures be active and heavily include instruction on skills development, not just biological content delivery. The workshop sessions will also be focused on active learning, targeting those activities necessitating smaller instructor-student ratios and opportunities for wider student participation, such as oral presentations and student peer review.

Target Population and Enrollment

This course in combination with the proposed Biology 4901, would fulfill a required core course option of all students in the Biology Major BS & BA Programs as well as the Biology Minor.

The course enrollment will be comparable to that of the current Biology 3401 offering at approximately 600 students per year on the Columbus campus, with two lecture sections averaging 150 student each expected to be offered in each autumn and spring semester. Summer offerings will be as enrollment dictates. Lectures will be subdivided into Workshop sections of 24 students each. The course may also be offered on the regional campuses offering the Biology Major, Lima, Mansfield, and Marion, at a frequency dictated by enrollment, or individual Regional Campuses may opt to continue offering Biology 3401 instead if the single course better meets the campus' instructional capabilities and enrollment.

Course Description

3501.01: Integrative Skills in Biology – Biological Development

A Biological Development themed integrative approach to fundamental skills enhancement in the life sciences.

Prereq: Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

3501.02: Integrative Skills in Biology – Disease Vectors

A vector-borne disease themed integrative approach to fundamental skills enhancement in the life sciences.

Prereq: Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

3501.03: Integrative Skills in Biology – Symbiosis

A symbiosis themed integrative approach to fundamental skills enhancement in the life sciences.

Prereq: Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

3501.04: Integrative Skills in Biology – Biotechnology

A biotechnology themed integrative approach to fundamental skills enhancement in the life sciences.

Prereq: Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

3501.05: Integrative Skills in Biology – Rise of Resistance

An evolution of resistance themed integrative approach to fundamental skills enhancement in the life sciences.

Prereq: Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

3501.06: Integrative Skills in Biology – Biology of Aging

A biology of aging themed integrative approach to fundamental skills enhancement in the life sciences.

Prereq: Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

3501.07: Integrative Skills in Biology – Adaptation and Evolutionary Response at Multiple Scales

An adaptation and evolutionary response themed integrative approach to fundamental skills enhancement in the life sciences.

Prereq: Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

Course Learning Outcomes

appreciation of the relationship between	and applied sciences.

science and technology and their effect on society.	4.2 recognize how technologies emerge and change.
,	4.3 critically describe the relationships
	between technology and society in historical
	and cultural contexts.
	4.4 evaluate the social and ethical
	implications of technological developments.
	4.5 demonstrate critical thinking and
	scientific logic in the analysis of natural
	phenomena and the ethics behind the
	human involvement in these phenomena.
	5.1 analyze the interconnectedness of the
	biological sciences through the lens of a
	single broad topic.
Goal 5: Students will understand the	5.2 reflect on the role of Biology in society,
integration among the biological science	business, industry, and health fields.
subdisciplines and the role of science in	5.3 become self-directed learners by which
their lives and across society.	they can independently study biological
	content and procedures.
	5.4 develop an awareness of the careers and
	professions that rely on knowledge of
	biological sciences.

Through these course outcomes, students will demonstrate mastery of the three University embedded literacies' expected learning outcomes in addition to the goals specifically aligned to the Biology Major Program.

Course Themes

For the initial offerings of the course, we have chosen seven themes that will easily span topics across the life sciences and Biology Major Program Content Outcomes. Given the secondary role of the theme in the course structure, we leave open the possibility of easily adding additional decimalized versions of the course in the future as appropriate and necessary.

Course Syllabi

Syllabi for each of the proposed courses can be found in this document's appendices.

- Appendix A: Biology 3501.01 Integrative Skills in Biology: Biological Development
- o Appendix B: Biology 3501.02 Integrative Skills in Biology: Disease Vectors
- o Appendix C: Biology 3501.03 Integrative Skills in Biology: Symbiosis
- Appendix D: Biology 3501.04 Integrative Skills in Biology: Biotechnology
- o Appendix E: Biology 3501.05 Integrative Skills in Biology: Rise of Resistance
- Appendix F: Biology 3501.06 Integrative Skills in Biology: Biology of Aging
- Appendix G: Biology 3501.07 Integrative Skills in Biology: Adaptation and Evolutionary Response at Multiple Scales

Proposal for the Creation of Biology 4901

Biology 4901 will serve as a capstone experience for students in the Biology Major BS and BA Programs. The focus of the course will be to provide opportunities for students to dive deeper into a singular life science theme of the instructor's choosing that will aim to integrate the Biology Major Program Content Outcomes. The expectations of the course will include significant use of the primary literature and demonstration of students' ability to evaluate and synthesize content from a range of sources.

Credit Hours and Course Structure

2 credit hours

• Lectures will meet for 2 hours weekly (2 x 55 minutes or 1 x 110 minutes)

The course will have an expectation of instructors that the lectures focus heavily on active learning with significant discussion and student engagement. There will be no separate recitation or workshop component.

Target Population and Enrollment

This course in combination with Biology 3501 would fulfill the required core course for all students in the Biology Major BS & BA Programs. Students in the Biology Minor will not be required to complete the course.

The course enrollment will be comparable to that of the current Biology 3401 offering at approximately 600 students per year on the Columbus campus. Owing to the discussion-heavy nature of the course, we would aim for class sizes capped at 50 students. Summer offerings will be as enrollment dictates. The course may also be offered on the regional campuses offering the Biology Major, Lima, Mansfield, and Marion, at a frequency dictated by enrollment. Regional campuses may individually choose to continue offering Biology 3401 instead of the new course pairing as enrollment needs and instructor availability dictate.

Course Description

4901: Biological Capstone

A topical case study approach to integrating and synthesizing content across the life sciences.

Prereq: Biology 3501.xx or permission of instructor, and Rank 3 or 4 standing. Not open to students with credit for 3401.

Course Learning Outcomes

Biology 4901 – Biological Capstone	
Goals	Expected Learning Outcomes
Goal 1: Students will integrate concepts	Successful students are able to
related to the following overarching themes	
to analyze biological phenomena:	1.1 integrate facts and concepts from each of
 Interaction and complexity of 	the themes to analyze biological phenomena.
biological systems	1.2 analyze the fundamental

integral part of society and their everyday	society and how that role may be promoted.
life.	Society and now that role may be promoted.

Course Syllabus

See Appendix H of this document.

Proposal to amend the Requirements of the Biology Major (BS & BA)

For the past fourteen years, the core course(s) of the Biology Major have served as both an intermediate bridge for student content understanding as well as a key tool in the assessment of the Program itself. First as Biology 401 and 402, then as Biology 3401 under semesters, the courses have evolved over time. Most recently, the core took on the added responsibility for addressing the required *Embedded Literacies* for the Major. We feel the course may be overtaxed and not adequately achieving the goals necessary for this important part of the Program. To remedy this, we have proposed replacing Biology 3401 with a two-course sequence – Biology 3501.xx and 4901, which will allow both the expansion of skills content and address the integrative content at the most appropriate level.

Effective Term

The changes to the Core Course will be effective for the Spring 2025 term such that we could run a pilot offering. We anticipate a full rollout beginning with a rollout in Autumn 2025 and ramping up as we phase out 3401 on the Columbus Campus over the span of a year, or longer as necessary to meet grandfathered student needs. We intend to direct students declaring a Biology Major or Minor on the Columbus campus toward the new courses beginning in Autumn 2025.

Credit Hours

Biology 3401 is a currently a four-credit hour course. We are proposing Biology 3501 as a three-credit hour offering and Biology 4901 as a two-credit hour course. While this proposal would add a credit hour to the mandated portion of the Major curriculum, students often find themselves one credit hour short of the 32 minimum hour requirement for the Major after selecting certain combinations of common electives. The extra credit would benefit a significant number of students as there are limited one-credit hour options within the life science offerings.

We are not proposing an increase to the minimum number of 32 credit hours required for the Major.

Offerings

Biology 3401 will not be immediately removed from the catalog but will remain a limited option available on the Major. While the Columbus campus will cease offering the course after a transition time, the Regional Campuses that offer the Major (Lima, Mansfield, and Marion) may continue to offer 3401 as staffing and enrollment dictate need. While students who take only 3401 will not get the capstone course, the small 3401 class sizes on the Regional Campus already allow for a capstone-like experience. By leaving 3401 as an option, we aim to build maximum flexibility for both students and each respective campus' faculty.

The Center for Life Sciences Education (CLSE) will continue to offer Biology 3401 for *at least* another year (AU24-AU25) on the Columbus Campus while previously declared students

complete their requirements. At the point in the future where enrollment no longer justifies the course offering, grandfathered students will be allowed to substitute 3501 in place of 3401 without the additional requirement of 4901, though we anticipate this may be necessary for only a very small number of students.

Curricular Structure

The Biology Major BS and BA Programs each offer students four *Specializations* from which they must choose. These include Pre-Health Professions, Life Sciences Education, Forensic Biology, and Integrated General Biology. The Core Course is a common requirement from all eight configurations of degree and specialization.

The advising sheets for the BS are provided in <u>Appendix I</u>. The advising sheets for the BA are provided in <u>Appendix J</u>. Both indicate changes with yellow highlights.

A sample four-year plan is provided in Appendix K and a Curriculum Map in Appendix L.

Assessment

CLSE staff are responsible for assisting instructors with the collection of course assessment data, then compiling and reporting at both the Program and College levels. One of the assessment challenges the CLSE faces with regard to the Biology Major is that most of our students take only three classes with us: two at the introductory level (Biology 1113 and 1114) and one intermediate course (3401). The remainder of the classes are taken in other units, significantly complicating efforts to collect reliable assessment data on our students. Having a capstone course (4901) offered by the CLSE that all Biology Major students will take would significantly improve our ability to assess student performance across the Program Objectives.

Proposal to amend the Requirements of the Biology Minor

Like the Biology Major Programs, the Core Course (Biology 3401) is a requirement for the Biology Minor. We feel that the skills-based expectations proposed in Biology 3501 would be of great value to the Minor. However, given the Minor has less expectation of depth or breath of content across the life sciences, the capstone course (Biology 4901) would be of less value and will not be a requirement for the minor.

Effective Term

The changes to the Core Course will be effective for the spring 2025 term. Biology 3401 will not be immediately removed from the catalog but will remain a limited option available on the Minor. While the Columbus campus will cease offering the course after a transition time, the Regional Campuses that offer the Major or Minor may continue to offer 3401 as staffing and enrollment dictate need. By leaving 3401 as an option, we aim to build maximum flexibility for both students and each respective campus' faculty.

The Center for Life Sciences Education (CLSE) will continue to offer Biology 3401 for *at least* another year (AU24-AU25) on the Columbus Campus while previously declared students complete their requirements. At the point in the future where enrollment no longer justifies the course offering, grandfathered students will be allowed to substitute 3501 in place of 3401.

Curricular Structure

The advising sheet for the Biology Minor is provided in Appendix M.

Appendix A: Biology 3501.01 Syllabus

Biology 3501.01 Integrative Skills in Biology Biological Development Autumn 2025 – 3 Credit Hours

<u>Lecturer</u>: <u>Course Coordinator</u>:

Email: Center for Life Sciences Education

Office: Email: Student Hours: Office:

other times scheduled by appointment **Phone:**

Class Meeting Schedule:

Lecture: Twice Weekly for 55 minutes

Workshop: Once weekly for 80 minutes; consult your BuckeyeLink schedule for specific time and day

Prerequisites:

Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

Required Course Materials:

- Selected readings from provided sources (See Carmen)
- Writing Science in Plain English by Anne E. Greene, 2013, ISBN: 978-0-226-02637-4.

Credit Hours and Work Expectation:

This is a 3-credit-hour course. According to Ohio State policy, students should expect around 3 hours per week of time spent on direct instruction in addition to 6 hours of homework to receive a grade of C average. <u>ASC Honors</u> provides an excellent guide to scheduling and study expectations.

Course Description:

A Biological Development themed integrative approach to fundamental skills enhancement in the life sciences.

Course Learning Outcomes:

Biology 3501 – Integrative Skills in Biology	
Goals	Expected Learning Outcomes
	(highlights align to embedded literacies)
	Successful students are able to
Goal 1: Students will identify and evaluate appropriate primary literature in the life sciences and will compare that information with examples in the secondary literature and popular press.	 1.1 research a topic using a variety of databases and sources of credible and relevant information, including primary literature. 1.2 analyze the validity of the methods and results of a scientific study.

	4.2 avaluate alternative view sints and
	1.3 evaluate alternative viewpoints and
	assumptions to a scientific study.

quantitative analysis, statistics, and	3.3 apply methods needed to analyze and
probability in scientific research.	critically evaluate statistical arguments.
probability in scientific research	3.4 evaluate the social and ethical
	implications of data collection and analysis,
	especially in relation to human subjects.
	4.1 analyze the relationship of theoretical
	and applied sciences.
	4.2 recognize how technologies emerge and
	change.
	4.3 critically describe the relationships
Goal 4: Students will develop a critical	
appreciation of the relationship between	between technology and society in historical and cultural contexts.
science and technology and their effect on	
society.	4.4 evaluate the social and ethical
	implications of technological developments.
	4.5 demonstrate critical thinking and
	scientific logic in the analysis of natural
	phenomena and the ethics behind the
	human involvement in these phenomena.

Goal 5: Students will understand the integration among the biological science subdisciplines and the role of science in their lives and across society.	5.1 analyze the interconnectedness of the biological sciences through the lens of a single broad topic.
	5.2 reflect on the role of Biology in society, business, industry, and health fields.
	5.3 become self-directed learners by which they can independently study biological
	content and procedures.
	5.4 develop an awareness of the careers and
	professions that rely on knowledge of
	biological sciences.

Through these course outcomes, students will demonstrate mastery of the three University literacies expected learning outcomes in addition to the goals specifically aligned to the Biology Major Program.

Data Analysis Literacy	
Goal	Expected Learning Outcomes
Successful students will meet the goals for either a Quantitative Data Analysis (A) or Qualitative Data	Successful students are able to
Analysis (B) course.	1.1A explain basic concepts of statistics and probability.
	1.2A apply methods needed to analyze and critically evaluate statistical arguments.
Quantitative Data Analysis (A) Goal: Successful students develop skills in	1.3A recognize the importance of statistical ideas.
drawing conclusions and critically evaluating results based on data.	1.4A evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.
	1.1B explain the utility of different approaches to qualitative data analysis.
Qualitative Data Analysis (B) Goal: Successful students develop skills in	1.2B apply key methods and tools in qualitative data analysis.
drawing conclusions and critically evaluating results based on data.	1.3B interpret the results of qualitative data analysis to answer research question(s).
	1.4B evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.

Technology Literacy	
Goal	Expected Learning Outcomes
Goal: Successful students develop a critical appreciation of the relations between technologies	Successful students are able to
and their contexts (social, cultural, and historical), and of the range of effects and consequences (legal, ethical, political) produced or enabled by particular	1.1 Critically describe the relationships between technology and society in historical and cultural contexts.
technologies.	1.2 Recognize how technologies emerge and change.

1.3 Evaluate the social and ethical implications of
technology.

Advanced Writing	
Goal	Expected Learning Outcomes
Goal 1: Successful students develop advanced skills in inquiry, critical thinking, composing, and communicating for a specific purpose, context, and audience using an appropriate genre and modality.	Successful students are able to 1.1 Investigate and integrate knowledge of the subject, context, and audience with knowledge of genres, conventions and rhetorical choices to advance a particular writing objective.
	1.2 Use credible and relevant sources of information, evaluate assumptions, and consider alternative viewpoints or hypotheses to express ideas and develop arguments.
Goal 2: Successful students apply knowledge of writing and research to specific contexts.	2.1 Reflect on how they adapt rhetorical and research strategies they have learned to new contexts.
	2.2 Develop scholarly, creative, or professional products that are meaningful to them and their audience.
	2.3 Evaluate social and ethical implications of writing and information literacy practices.

Grading and Evaluation:

Graded assignments may come in three forms, and students should note the expectations for each in the descriptions of our class assignments below:

- Independent Work (†): Strictly non-collaborative, original-individual work. You may discuss this assignment only with your instructor. Discussions with other individuals, either in person or electronically, are strictly prohibited and constitute academic misconduct.
- Required Collaboration (†*): An explicit expectation for collaboration among students either in-class or outside (i.e., group work).
- **Optional Collaboration (**>>): Students are permitted, but not required, to discuss the assignment or ideas with each other. However, all submitted work must be one's original and individual creation.

Total Points Possible	770	

Exams (100 points each):

The exams will largely focus on the Biological Development content of the course. While the exams may include some multiple choice or similar question styles, the exams will largely be a short answer in format.

Research Paper (100 points total):

The research paper will focus on current literature in development research and be submitted individually in four parts and will address skills in researching literature, evaluating sources, and writing scientifically. Students will receive feedback on each portion and be expected to incorporate that feedback into a final paper.

- Annotated Bibliography (15 points)
- Introduction (15 points)
- Rough Draft (40 points)
- Final Draft (30 points)

Oral Presentation and Peer Review (70 points):

Oral presentations are a hallmark of life in the scientific community. Students will present a small portion (\sim 5-7 minutes) of the research comprising their ongoing research paper to their Workshop group (40 points) and provide feedback in the form of peer review to other students (30 points total – 3x10 points).

Scientific Poster and Peer Review (65 points):

Students will present a summary of their research paper in the form of a Scientific Poster, which will be presented to the class during the last lectures in a traditional scientific poster session style event (50 points). Students will be expected to visit multiple posters and provide written feedback in the form of a peer review (15 points).

Workshop Activities (160 points):

During eight of the weekly workshops, students will work both individually and as groups (as designated) to complete active learning activities related to the course content.

Lecture Activities (50 points):

Periodically during select lectures, students will be asked to complete case studies, worksheets, or other engagement both individually and in collaboration with other students. These activities are meant to reinforce lecture content.

Career Series Reflection (20 points):

Students will be expected to minimally attend one meeting of the *CLSE Career Series* outside of class time and provide a reflection on the speaker's presentation. The *Series* focuses on the range of skills and careers appropriate for life science majors.

SALG (5 points):

At the end of the course, 5 points will be assigned based on participation in a survey, the Student Assessment of Learning Gains (SALG). Grades on the SALG will be based solely on completion.

Your Final Grade:

Your final grade will be based on the percentage of the 770 points that you earn during the course of the semester as described above. Please note that we do not grade the course on a curve and Carmen does not round averages up to the next nearest percentage point, so 92.11% and 92.97% both earn the grade of A-. Final letter grades will be determined by the university-approved grade scale below:

Grade Scale:

Α	A-	B+	В	B-	C+	С	C-	D+	D	Е
100 -	92.9 –	89.9 –	86.9 –	82.9 –	79.9 –	76.9 –	72.9 –	69.9 –	66.9 –	59.9 –
93.0%	90.0%	87.0%	83.0%	80.0%	77.0%	73.0%	70.0%	67.0%	60.0%	0%

Posting of Grades:

All grades will be posted on Carmen. After grades are posted you have <u>10 working days</u> to challenge any grade or inquire regarding an unposted or missing grade. **After that time, grades are final.** To challenge or inquire about a missing grade, contact your laboratory instructor.

IMPORTANT

Make sure that all of your grades are properly posted on Carmen as you receive them. Challenges about grades, particularly after the end of the semester, will not be entertained after the 10-day grace period.

Late Assignments:

All assignments are due on the date and time prescribed in the course schedule. Late work will not be accepted except in rare (and documentable) circumstances.

Absences (COVID-19):

If you are too ill to take an exam or must miss for another legitimate unscheduled reason, you must contact the Course Coordinator within 24 hours of the exam. Make up exams will be given only to students who produce, at the make up or before, documentation of a legitimate reason (at the time of the absence) for missing the exam. Valid excuses are limited to problems that are beyond the student's control, such as military duty, intercollegiate athletic or academic activities, funerals, etc. Medical excuses will be considered only if you have been treated by a medical professional on the day of the exam (excuses from the student health center website will not be accepted). Lack of transportation, loss of electricity, travel plans, etc. are not considered valid excuses. If you anticipate having to miss an exam due to attendance at a university sanctioned event or other qualifying conflict, you must contact the Course Coordinator at least one week in advance of the exam.

If you have no documentation to support your absence, or your absence from the exam is not for an excused reason, you will still be offered the opportunity for a makeup exam, with a 25% overall deduction on your exam score if arrangements are made within 24 hours of the original exam.

The format of makeup exams is at the discretion of the instructors. <u>All makeup exams must be made up within one week of when the original exam was given.</u>

Note: Check the date and time of the final examination now and make sure that this time does not conflict with your future plans. No early final exams will be given. The only makeup exam will be held on Wednesday, December xx at 9:00 a.m. and is available only in emergency situations and with prior approval of the Course Coordinator.

Make-Up Workshops and Lecture Activities: Both the lecture and workshop are integral parts of this course. If you miss a class, you must contact your instructor (lecture or workshop, as appropriate) within 48 hours of their missed class in order to be eligible to complete a make-up assignment. All make-up work requires a valid written excuse from a doctor, therapist, athletic coach, or other person involved with the absence (preferably before the event occurs, if it's a planned absence). We will consider one absence for every student to be excused without documentation, however students must contact their instructor within 48 hours of their missed workshop to receive the make-up exercise. Therefore, it is essential that you contact your instructor immediately if you miss a workshop, or if you know in advance that you cannot attend class on a specific date. Make-up work must be completed and received within one week of the original assignment date (unless very unusual circumstances apply), or else you forfeit all points for that workshop.

Excused absences include, but are not limited to:

- 1. Illness and injury
- 2. Mental health
- 3. Disability-related concerns
- 4. Military service
- 5. Death in the immediate family
- 6. Religious observance
- 7. Academic field trips
- 8. Participation in university sanctioned concert or athletic event
- 9. Participation in university disciplinary hearings

If you have a reason to miss class that is not listed above, please reach out to the instructor to discuss your options. It is the intention of the Center for Life Sciences Education to remain supportive of the needs of each of our students. Students who do not contact their instructor within 48 hours of the missed class will not be eligible for make-up work.

If you are isolating while waiting for a COVID-19 test result, please let me know immediately. Those testing positive for COVID-19 should refer to the Safe and Healthy Buckeyes site for resources. Beyond five days of the required COVID-19 isolation period, I may rely on Student Life Disability Services to establish further reasonable accommodations. You can connect with them at slds@osu.edu; 614-292-3307; or slds.osu.edu.

Accommodation of Special Needs:

The university strives to maintain a healthy and accessible environment to support student learning in and out of the classroom. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let us know immediately so that we can privately discuss options. To establish reasonable accommodations, we may request that you register with Student Life Disability Services. After registration, make arrangements with the Course Coordinator as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. Only the course coordinator is authorized to complete SLDS accommodations. This will help us ensure that your individual needs will be met

appropriately and fairly. SLDS contact information: slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

Religious Accommodations:

Ohio State has had a longstanding practice of making reasonable academic accommodations for students' religious beliefs and practices in accordance with applicable law. In 2023, Ohio State updated its practice to align with new state legislation. Under this new provision, students must be in early communication with their instructors regarding any known accommodation requests for religious beliefs and practices, providing notice of specific dates for which they request alternative accommodations within 14 days after the first instructional day of the course. Instructors in turn shall not question the sincerity of a student's religious or spiritual belief system in reviewing such requests and shall keep requests for accommodations confidential.

With sufficient notice, instructors will provide students with reasonable alternative accommodations with regard to examinations and other academic requirements with respect to students' sincerely held religious beliefs and practices by allowing up to three absences each semester for the student to attend or participate in religious activities. Examples of religious accommodations can include, but are not limited to, rescheduling an exam, altering the time of a student's presentation, allowing make-up assignments to substitute for missed class work, or flexibility in due dates or research responsibilities. If concerns arise about a requested accommodation, instructors are to consult their tenure initiating unit head for assistance.

A student's request for time off shall be provided if the student's sincerely held religious belief or practice severely affects the student's ability to take an exam or meet an academic requirement and the student has notified their instructor, in writing during the first 14 days after the course begins, of the date of each absence. Although students are required to provide notice within the first 14 days after a course begins, instructors are strongly encouraged to work with the student to provide a reasonable accommodation if a request is made outside the notice period. A student may not be penalized for an absence approved under this policy.

If students have questions or disputes related to academic accommodations, they should contact their course instructor, and then their department or college office. For questions or to report discrimination or harassment based on religion, individuals should contact the Office of Institutional Equity.

Policy: Religious Holidays, Holy Days and Observances

Weather or Other Short-Term Closing:

Should in-person classes be canceled, students will be notified as to which alternative methods of teaching will be offered to ensure continuity of instruction for this class. Communication will be via Carmen announcements and course-wide email.

Section Changes:

All section changes and adds are completed by the course coordinator. Due to the need to keep up-to-minute availability of seats in each workshop, the lecturer and workshop instructors are unable to sign any permission forms.

Instructor Feedback and Response Expectations

- **Email response**: The CLSE's expectation of instructors is that emails will be responded to within one business day. If your email is sent during the evening or over the weekend, you may not receive a response until the next business day.
- Class announcements: I will send important class-wide messages through the Announcements tool in Carmen. Please check <u>your notification preferences</u> (go.osu.edu/canvas-notifications) to ensure you receive these messages.

• **Graded assignments:** Assignments will be graded and returned to you within one week after they were due. All scores are posted on Carmen no later than the day the graded assignment is returned.

Course Technology

For help with your password, university e-mail, Carmen, or any other technology issues, questions, or requests, contact the OSU IT Service Desk. Standard support hours are available at https://ocio.osu.edu/help/hours, and support for urgent issues is available 24x7.

• Self-Service and Chat support: http://ocio.osu.edu/selfservice

Phone: 614-688-HELP (4357)
 Email: 8help@osu.edu
 TDD: 614-688-8743

Carmen

- Carmen, Ohio State's Learning Management System, will be used to host materials and activities throughout this course. To access Carmen, visit Carmen.osu.edu. Log in to Carmen using your name.# and password, visit my.osu.edu.
- Help guides on the use of Carmen can be found at https://resourcecenter.odee.osu.edu/carmen
- This online course requires use of Carmen (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.
- Carmen accessibility

CarmenZoom

- Office hours will be held through Ohio State's conferencing platform, CarmenZoom. A separate guide to accessing CarmenZoom and our office hours is posted on the course Carmen page under Files.
- Students may use the audio and video functions if a webcam and microphone are available. If not, there is still a chat function within CarmenZoom for the student to live chat with the professor or TA in the virtual office hours room.
- <u>Carmen Zoom</u> help guide

Turnitin

- Students at The Ohio State University are accountable for the integrity of the work they submit. Therefore, you should be familiar with the guidelines provided by the <u>Committee on Academic Misconduct (COAM)</u> and <u>Section A of OSU's Code of Student Conduct</u> in order to meet the academic expectations concerning appropriate documentation of sources. In addition, OSU has made TurnItIn, a learning tool and plagiarism prevention system, available to instructors. For this class, you will submit your papers to TurnItIn from Carmen. When grading your work, I will interpret the originality report, following <u>Section A of OSU's Code of Student Conduct</u> as appropriate. For more information about TurnItIn, please see <u>the vendor's guide for students</u>. Note that submitted final papers become part of the OSU database.
- Please know that I view TurnItIn first and foremost as a teaching tool to make you a better writer. You will see in your individual originality reports exactly what the instructors see. We WANT you to look at this report as soon as you submit your assignments. If you see an issue, please correct it right away, before we start grading the assignment. You can resubmit without penalty as many times as you want prior to the established due date for any assignment. After the due date, the late policy is in effect.

TopHat

- TopHat is a web-based response system that allows students to use their own devices provide responses in the classroom. This course uses Top Hat to promote active engagement, allow for synchronous feedback, and monitor attendance.
- TopHat help guide

The following are expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- Tone and civility: Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online and is not always appreciated in-person. The instructional team work very hard to provide a positive learning experience. Please keep this in mind and remain civilized and respectful in your class communications.
- Citing your sources: When we have academic discussions, please cite your sources to back up what you say.

Issue Resolution:

The CLSE believes that student concerns are usually most effectively addressed by the staff closest to the situation. Therefore, students are ordinarily expected to address issues or concerns first with their instructors. If the issue cannot be resolved by your instructor, or for some reason you feel that you absolutely cannot address your concern with your instructor, please feel free to contact the Course Coordinator or Assistant Director Adam Andrews (andrews.171@osu.edu).

Building Emergency Action Plan:

Each building on campus has a Building Emergency Action Plan (BEAP) outlining that specific building's specific procedures to be followed in the event of a range of emergency situations, including fire, weather, terrorism, chemical spills, etc. It is the role of every Buckeye to help keep each other safe and to be aware of these procedures. You can find all of the campus BEAPs at https://dps.osu.edu/beap.

Lyft Ride Smart:

Lyft Ride Smart at Ohio State offers eligible students discounted rides, inside the university-designated <u>service</u> <u>area</u>, from 7 p.m. to 7 a.m. Prices may be impacted by distance, traffic, time of day, special events and prime time surcharges. To qualify for program discounts, users must select "shared ride" when booking in the Lyft app. For more information, visit: https://ttm.osu.edu/ride-smart.

Mental Health:

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Life's Counseling and Consultation Service (CCS) by visiting ccs.osu.edu or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at 614-292-5766 and 24 hour emergency help is also available 24/7 by dialing 988 to reach the Suicide and Crisis Lifeline.

Title IX:

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at http://titleix.osu.edu or by contacting the Ohio State Title IX Coordinator at titleix@osu.edu.

Diversity:

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students

to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

Academic Misconduct:

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed, illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct http://studentlife.osu.edu/csc/. We will adhere to this policy.

- Unless otherwise specified for a particular assignment, all submitted work should be a student's own unique effort. Collaborative efforts are not permitted unless expressly sanctioned for a particular assignment.
- Unless otherwise specified for a particular assignment, use of Al-generated materials for course submissions is not permitted.
- Reusing past work: In general, you are prohibited in university courses from turning in work from a past class to your current class, even if you modify it. If you want to build on past research or revisit a topic you've explored in previous courses, please discuss the situation with me.
- Using others' verbatim words without the use of quotation marks <u>and</u> citation is plagiarism. Paraphrased work requires citation to denote the use of others' ideas. Copying other's words without quotation while using citations is still considered plagiarism.
- Use of any technology during a quiz or exam (including but not limited to cell phones, smart watches, headphones, electronic dictionaries, etc.) is strictly prohibited.

Copyrighted Class Materials:

© The Instructor's lectures and all course materials, including power point presentations, tests, outlines, assignments, and similar materials, are protected by copyright. You may take notes and make copies of course materials for your own use. You may not and may not allow others to reproduce or distribute lecture notes and course materials publicly whether or not a fee is charged without the express written consent of the course instructor or course coordinator.

Course Schedule: Autumn 2025 Schedule and assignments subject to change with as much advance notice as possible

Week	Lecture Topic	Workshop	Assignments Due
1	Introduction/ Defining the topic: Biological	Welcome to Workshops and Avoiding Plagiarism Activity	
	Development		
	Identifying Scientific	Activity: Science vs.	
2	Information: Fact from Fiction,	Pseudoscience	
_	From Databases to Google		
	Scholar		
	Form and Function:	The Norms of scientific writing	Research Paper Annotated
3	Understanding Primary		Bibliography
	Literature		
4	An organism's toolkit for	Writing Peer Review Activity	
T	development Part 1		
5	Primary Literature: A case study	Journal Article Discussion	Exam 1
3	in Evo Devo		

6	An organism's toolkit for development Part 2	Activity: Approaches to manipulating gene expression in emerging model organisms	Research Paper Introduction
7	Statistics in Scientific Endeavors	Autumn Break – No Workshops	
8	Statistical ethics and selective data	Statistics practice activity	Research Paper Rough Draft
9	Statistical ethics and selective data (cont'd)	Presentation Development	Exam 2
10	Employing Statistics: A case study	Oral Presentations and Peer Review	Oral Presentation Due during assigned Week
11	Generating and comparing genomic data	Oral Presentations and Peer Review	Peer Reviews due at the end of
12	Developing technology to control development	Oral Presentations and Peer Review	respective Workshops (x3)
13	Technological adaptations and ethics	Activity: Phylogenomics	Research Paper Final Draft
14	Technological adaptations and ethics (cont'd)	Thanksgiving Break – No Workshops	Poster Due
15	Poster Presentations	Exam Review	SALG Due
Finals		Final Exam	

Appendix B: Biology 3501.02 Syllabus

Biology 3501.02 Integrative Skills in Biology Disease Vectors Autumn 2025 – 3 Credit Hours

<u>Lecturer</u>: <u>Course Coordinator</u>:

Email: Center for Life Sciences Education

Office: Email: Student Hours: Office:

other times scheduled by appointment **Phone:**

Class Meeting Schedule:

Lecture: Twice Weekly for 55 minutes

Workshop: Once weekly for 80 minutes; consult your BuckeyeLink schedule for specific time and day

Prerequisites:

Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

Required Course Materials:

- Interconnections: A case study in Integrative Biology. Johnson, N.F. 2021. Great River Learning, Dubuque, Iowa. ISBN: 978164496759. Order online at https://www.greatriverlearning.com/product-details/2032
- Writing Science in Plain English by Anne E. Greene, 2013, ISBN: 978-0-226-02637-4.

Credit Hours and Work Expectation:

This is a 3-credit-hour course. According to Ohio State policy, students should expect around 3 hours per week of time spent on direct instruction in addition to 6 hours of homework to receive a grade of C average. <u>ASC Honors</u> provides an excellent guide to scheduling and study expectations.

Course Description:

A vector-borne disease themed integrative approach to fundamental skills enhancement in the life sciences.

Course Learning Outcomes:

Biology 3501 – Integrative Skills in Biology			
Goals	Expected Learning Outcomes (highlights align to embedded literacies)		
Goal 1: Students will identify and evaluate appropriate primary literature in the life sciences and will compare that information with examples in the secondary literature and popular press.	Successful students are able to 1.1 research a topic using a variety of databases and sources of credible and relevant information, including primary literature.		

	T
	1.2 analyze the validity of the methods and
	results of a scientific study.
	1.3 evaluate alternative viewpoints and
	assumptions to a scientific study.
	1.4 compare and contrast information in
	primary literature with corresponding
	information in the secondary literature and
	popular press.
	2.1 apply scientific writing styles in the
	creation of a written paper.
	2.2 apply scientific writing styles and norms
	in the creation of a scientific poster.
	2.3 demonstrate effective communication of
Goal 2: Students will understand and	scientific principles in an oral presentation.
demonstrate scientific communication	2.4 reflectively use scientific communication
norms in various modalities.	for a specific purpose, context, and audience
	using an appropriate genre and modality.
	2.5 reflect on how to adapt persuasive
	communication and research strategies to
	new contexts and evaluate the social and
	ethical implications of those strategies.
	3.1 explain basic concepts of statistics and
	probability.
	3.2 recognize the importance of statistical
Goal 3: Students will understand the role of	ideas.
quantitative analysis, statistics, and	3.3 apply methods needed to analyze and
probability in scientific research.	critically evaluate statistical arguments.
	3.4 evaluate the social and ethical
	implications of data collection and analysis,
	especially in relation to human subjects.
	4.1 analyze the relationship of theoretical
	and applied sciences.
	4.2 recognize how technologies emerge and
	4.2 recognize how technologies emerge and change.
Goal 4: Students will develop a critical	4.2 recognize how technologies emerge and
Goal 4: Students will develop a critical	4.2 recognize how technologies emerge and change.
appreciation of the relationship between	4.2 recognize how technologies emerge and change.4.3 critically describe the relationships
appreciation of the relationship between science and technology and their effect on	 4.2 recognize how technologies emerge and change. 4.3 critically describe the relationships between technology and society in historical
appreciation of the relationship between	 4.2 recognize how technologies emerge and change. 4.3 critically describe the relationships between technology and society in historical and cultural contexts.
appreciation of the relationship between science and technology and their effect on	 4.2 recognize how technologies emerge and change. 4.3 critically describe the relationships between technology and society in historical and cultural contexts. 4.4 evaluate the social and ethical
appreciation of the relationship between science and technology and their effect on	 4.2 recognize how technologies emerge and change. 4.3 critically describe the relationships between technology and society in historical and cultural contexts. 4.4 evaluate the social and ethical implications of technological developments.
appreciation of the relationship between science and technology and their effect on	 4.2 recognize how technologies emerge and change. 4.3 critically describe the relationships between technology and society in historical and cultural contexts. 4.4 evaluate the social and ethical implications of technological developments. 4.5 demonstrate critical thinking and

single broad topic.	tedness of the the lens of a
integration among the biological science subdisciplines and the role of science in their lives and across society. business, industry, and health 5.3 become self-directed learn they can independently study content and procedures. 5.4 develop an awareness of the professions that rely on know biological sciences.	th fields. arners by which dy biological f the careers and

Through these course outcomes, students will demonstrate mastery of the three University literacies expected learning outcomes in addition to the goals specifically aligned to the Biology Major Program.

Data Analysis Literacy				
Goal	Expected Learning Outcomes			
Successful students will meet the goals for either a Quantitative Data Analysis (A) or Qualitative Data	Successful students are able to			
Analysis (B) course.	1.1A explain basic concepts of statistics and probability.			
	1.2A apply methods needed to analyze and critically evaluate statistical arguments.			
Quantitative Data Analysis (A) Goal: Successful students develop skills in	1.3A recognize the importance of statistical ideas.			
drawing conclusions and critically evaluating results based on data.	1.4A evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.			
	1.1B explain the utility of different approaches to qualitative data analysis.			
Qualitative Data Analysis (B) Goal: Successful students develop skills in	1.2B apply key methods and tools in qualitative data analysis.			
drawing conclusions and critically evaluating results based on data.	1.3B interpret the results of qualitative data analysis to answer research question(s).			
	1.4B evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.			

Technology Literacy		
Goal	Expected Learning Outcomes	
Goal: Successful students develop a critical appreciation of the relations between technologies	Successful students are able to	
and their contexts (social, cultural, and historical), and of the range of effects and consequences (legal, ethical, political) produced or enabled by particular	1.1 Critically describe the relationships between technology and society in historical and cultural contexts.	
technologies.	1.2 Recognize how technologies emerge and change.	

1.3 Evaluate the social and ethical implications of
technology.

Advanced Writing				
Goal	Expected Learning Outcomes			
Goal 1: Successful students develop advanced skills in inquiry, critical thinking, composing, and communicating for a specific purpose, context, and audience using an appropriate genre and modality.	Successful students are able to 1.1 Investigate and integrate knowledge of the subject, context, and audience with knowledge of genres, conventions and rhetorical choices to advance a particular writing objective.			
	1.2 Use credible and relevant sources of information, evaluate assumptions, and consider alternative viewpoints or hypotheses to express ideas and develop arguments.			
Goal 2: Successful students apply knowledge of writing and research to specific contexts.	2.1 Reflect on how they adapt rhetorical and research strategies they have learned to new contexts.			
	2.2 Develop scholarly, creative, or professional products that are meaningful to them and their audience.			
	2.3 Evaluate social and ethical implications of writing and information literacy practices.			

Grading and Evaluation:

Graded assignments may come in three forms, and students should note the expectations for each in the descriptions of our class assignments below:

- Independent Work (†): Strictly non-collaborative, original-individual work. You may discuss this assignment only with your instructor. Discussions with other individuals, either in person or electronically, are strictly prohibited and constitute academic misconduct.
- Required Collaboration (†*): An explicit expectation for collaboration among students either in-class or outside (i.e., group work).
- **Optional Collaboration (**>>): Students are permitted, but not required, to discuss the assignment or ideas with each other. However, all submitted work must be one's original and individual creation.

Assignment	Points	Assignment Type
3 Exams (100 points each)	300	†
Research Paper	100	†
Oral Presentation	50	†
Oral Presentation Peer Review	20	•
Scientific Poster	50	†
Poster Peer Review	15	•
Workshop Activities (8 x 20 points)	160	•
Lecture Activities	50	🚅 itti
Career Series Reflection	20	†
SALG	5	Ť
Total Points Possible	770	

Exams (100 points each):

The exams will largely focus on the disease vector content of the course. While the exams may include some multiple choice or similar question styles, the exams will largely be a short answer in format.

Research Paper (100 points total):

The research paper will focus on current literature in disease vector research and be submitted individually in four parts and will address skills in researching literature, evaluating sources, and writing scientifically. Students will receive feedback on each portion and be expected to incorporate that feedback into a final paper.

- Annotated Bibliography (15 points)
- Introduction (15 points)
- Rough Draft (40 points)
- Final Draft (30 points)

Oral Presentation and Peer Review (70 points):

Oral presentations are a hallmark of life in the scientific community. Students will present a small portion (\sim 5-7 minutes) of the research comprising their ongoing research paper to their Workshop group (40 points) and provide feedback in the form of peer review to other students (30 points total – 3x10 points).

Scientific Poster and Peer Review (65 points):

Students will present a summary of their research paper in the form of a Scientific Poster, which will be presented to the class during the last lectures in a traditional scientific poster session style event (50 points). Students will be expected to visit multiple posters and provide written feedback in the form of a peer review (15 points).

Workshop Activities (160 points):

During eight of the weekly workshops, students will work both individually and as groups (as designated) to complete active learning activities related to the course content.

Lecture Activities (50 points):

Periodically during select lectures, students will be asked to complete case studies, worksheets, or other engagement both individually and in collaboration with other students. These activities are meant to reinforce lecture content.

Career Series Reflection (20 points):

Students will be expected to minimally attend one meeting of the *CLSE Career Series* outside of class time and provide a reflection on the speaker's presentation. The *Series* focuses on the range of skills and careers appropriate for life science majors.

SALG (5 points):

At the end of the course, 5 points will be assigned based on participation in a survey, the Student Assessment of Learning Gains (SALG). Grades on the SALG will be based solely on completion.

Your Final Grade:

Your final grade will be based on the percentage of the 770 points that you earn during the course of the semester as described above. Please note that we do not grade the course on a curve and Carmen does not round averages up to the next nearest percentage point, so 92.11% and 92.97% both earn the grade of A-. Final letter grades will be determined by the university-approved grade scale below:

Grade Scale:

Α	A-	B+	В	B-	C+	С	C-	D+	D	Е
100 -	92.9 -	89.9 –	86.9 -	82.9 –	79.9 –	76.9 –	72.9 –	69.9 –	66.9 -	59.9 –
93.0%	90.0%	87.0%	83.0%	80.0%	77.0%	73.0%	70.0%	67.0%	60.0%	0%

Posting of Grades:

All grades will be posted on Carmen. After grades are posted you have <u>10 working days</u> to challenge any grade or inquire regarding an unposted or missing grade. **After that time, grades are final.** To challenge or inquire about a missing grade, contact your laboratory instructor.

IMPORTANT

Make sure that all of your grades are properly posted on Carmen as you receive them. Challenges about grades, particularly after the end of the semester, will not be entertained after the 10-day grace period.

Late Assignments:

All assignments are due on the date and time prescribed in the course schedule. Late work will not be accepted except in rare (and documentable) circumstances.

Absences (COVID-19):

If you are too ill to take an exam or must miss for another legitimate unscheduled reason, you must contact the Course Coordinator within 24 hours of the exam. Make up exams will be given only to students who produce, at the make up or before, documentation of a legitimate reason (at the time of the absence) for missing the exam. Valid excuses are limited to problems that are beyond the student's control, such as military duty, intercollegiate athletic or academic activities, funerals, etc. Medical excuses will be considered only if you have been treated by a medical professional on the day of the exam (excuses from the student health center website will not be accepted). Lack of transportation, loss of electricity, travel plans, etc. are not considered valid excuses. If you anticipate having to miss an exam due to attendance at a university sanctioned event or other qualifying conflict, you must contact the Course Coordinator at least one week in advance of the exam.

If you have no documentation to support your absence, or your absence from the exam is not for an excused reason, you will still be offered the opportunity for a makeup exam, with a 25% overall deduction on your exam score if arrangements are made within 24 hours of the original exam.

The format of makeup exams is at the discretion of the instructors. <u>All makeup exams must be made up within one week of when the original exam was given.</u>

Note: Check the date and time of the final examination now and make sure that this time does not conflict with your future plans. No early final exams will be given. The only makeup exam will be held on Wednesday,

December xx at 9:00 a.m. and is available only in emergency situations and with prior approval of the Course Coordinator.

Make-Up Workshops and Lecture Activities: Both the lecture and workshop are integral parts of this course. If you miss a class, you must contact your instructor (lecture or workshop, as appropriate) within 48 hours of their missed class in order to be eligible to complete a make-up assignment. All make-up work requires a valid written excuse from a doctor, therapist, athletic coach, or other person involved with the absence (preferably before the event occurs, if it's a planned absence). We will consider one absence for every student to be excused without documentation, however students must contact their instructor within 48 hours of their missed workshop to receive the make-up exercise. Therefore, it is essential that you contact your instructor immediately if you miss a workshop, or if you know in advance that you cannot attend class on a specific date. Make-up work must be completed and received within one week of the original assignment date (unless very unusual circumstances apply), or else you forfeit all points for that workshop.

Excused absences include, but are not limited to:

- 1. Illness and injury
- 2. Mental health
- 3. Disability-related concerns
- 4. Military service
- 5. Death in the immediate family
- 6. Religious observance
- 7. Academic field trips
- 8. Participation in university sanctioned concert or athletic event
- 9. Participation in university disciplinary hearings

If you have a reason to miss class that is not listed above, please reach out to the instructor to discuss your options. It is the intention of the Center for Life Sciences Education to remain supportive of the needs of each of our students. Students who do not contact their instructor within 48 <u>hours</u> of the missed class will not be eligible for make-up work.

If you are isolating while waiting for a COVID-19 test result, please let me know immediately. Those testing positive for COVID-19 should refer to the Safe and Healthy Buckeyes site for resources. Beyond five days of the required COVID-19 isolation period, I may rely on Student Life Disability Services to establish further reasonable accommodations. You can connect with them at slds@osu.edu; 614-292-3307; or slds.osu.edu.

Accommodation of Special Needs:

The university strives to maintain a healthy and accessible environment to support student learning in and out of the classroom. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let us know immediately so that we can privately discuss options. To establish reasonable accommodations, we may request that you register with Student Life Disability Services. After registration, make arrangements with the Course Coordinator as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. Only the course

coordinator is authorized to complete SLDS accommodations. This will help us ensure that your individual needs will be met appropriately and fairly. SLDS contact information: slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

Religious Accommodations:

Ohio State has had a longstanding practice of making reasonable academic accommodations for students' religious beliefs and practices in accordance with applicable law. In 2023, Ohio State updated its practice to align with new state legislation. Under this new provision, students must be in early communication with their instructors regarding any known accommodation requests for religious beliefs and practices, providing notice of specific dates for which they request alternative accommodations within 14 days after the first instructional day of the course. Instructors in turn shall not question the sincerity of a student's religious or spiritual belief system in reviewing such requests and shall keep requests for accommodations confidential.

With sufficient notice, instructors will provide students with reasonable alternative accommodations with regard to examinations and other academic requirements with respect to students' sincerely held religious beliefs and practices by allowing up to three absences each semester for the student to attend or participate in religious activities. Examples of religious accommodations can include, but are not limited to, rescheduling an exam, altering the time of a student's presentation, allowing make-up assignments to substitute for missed class work, or flexibility in due dates or research responsibilities. If concerns arise about a requested accommodation, instructors are to consult their tenure initiating unit head for assistance.

A student's request for time off shall be provided if the student's sincerely held religious belief or practice severely affects the student's ability to take an exam or meet an academic requirement and the student has notified their instructor, in writing during the first 14 days after the course begins, of the date of each absence. Although students are required to provide notice within the first 14 days after a course begins, instructors are strongly encouraged to work with the student to provide a reasonable accommodation if a request is made outside the notice period. A student may not be penalized for an absence approved under this policy.

If students have questions or disputes related to academic accommodations, they should contact their course instructor, and then their department or college office. For questions or to report discrimination or harassment based on religion, individuals should contact the Office of Institutional Equity.

Policy: Religious Holidays, Holy Days and Observances

Weather or Other Short-Term Closing:

Should in-person classes be canceled, students will be notified as to which alternative methods of teaching will be offered to ensure continuity of instruction for this class. Communication will be via Carmen announcements and course-wide email.

Section Changes:

All section changes and adds are completed by the course coordinator. Due to the need to keep up-to-minute availability of seats in each workshop, the lecturer and workshop instructors are unable to sign any permission forms.

Instructor Feedback and Response Expectations

Email response: The CLSE's expectation of instructors is that emails will be responded to within one business
day. If your email is sent during the evening or over the weekend, you may not receive a response until the
next business day.

- Class announcements: I will send important class-wide messages through the Announcements tool in Carmen. Please check <u>your notification preferences</u> (go.osu.edu/canvas-notifications) to ensure you receive these messages.
- **Graded assignments:** Assignments will be graded and returned to you within one week after they were due. All scores are posted on Carmen no later than the day the graded assignment is returned.

Course Technology

For help with your password, university e-mail, Carmen, or any other technology issues, questions, or requests, contact the OSU IT Service Desk. Standard support hours are available at https://ocio.osu.edu/help/hours, and support for urgent issues is available 24x7.

• Self-Service and Chat support: http://ocio.osu.edu/selfservice

Phone: 614-688-HELP (4357)
Email: 8help@osu.edu
TDD: 614-688-8743

Carmen

- Carmen, Ohio State's Learning Management System, will be used to host materials and activities
 throughout this course. To access Carmen, visit <u>Carmen.osu.edu</u>. Log in to Carmen using your name.# and
 password. If you have not setup a name.# and password, visit <u>my.osu.edu</u>.
- Help guides on the use of Carmen can be found at https://resourcecenter.odee.osu.edu/carmen
- This online course requires use of Carmen (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.
- Carmen accessibility

CarmenZoom

- Office hours will be held through Ohio State's conferencing platform, CarmenZoom. A separate guide to accessing CarmenZoom and our office hours is posted on the course Carmen page under Files.
- Students may use the audio and video functions if a webcam and microphone are available. If not, there is still a chat function within CarmenZoom for the student to live chat with the professor or TA in the virtual office hours room.
- Carmen Zoom help guide

Turnitin

- Students at The Ohio State University are accountable for the integrity of the work they submit. Therefore, you should be familiar with the guidelines provided by the <u>Committee on Academic Misconduct (COAM)</u> and <u>Section A of OSU's Code of Student Conduct</u> in order to meet the academic expectations concerning appropriate documentation of sources. In addition, OSU has made TurnItIn, a learning tool and plagiarism prevention system, available to instructors. For this class, you will submit your papers to TurnItIn from Carmen. When grading your work, I will interpret the originality report, following <u>Section A of OSU's Code of Student Conduct</u> as appropriate. For more information about TurnItIn, please see <u>the vendor's guide for students</u>. Note that submitted final papers become part of the OSU database.
- Please know that I view TurnItIn first and foremost as a teaching tool to make you a better writer. You will
 see in your individual originality reports exactly what the instructors see. We WANT you to look at this
 report as soon as you submit your assignments. If you see an issue, please correct it right away, before we
 start grading the assignment. You can resubmit without penalty as many times as you want prior to the
 established due date for any assignment. After the due date, the late policy is in effect.

TopHat

- TopHat is a web-based response system that allows students to use their own devices provide responses in the classroom. This course uses Top Hat to promote active engagement, allow for synchronous feedback, and monitor attendance.
- TopHat help guide

Discussion and Communication Guidelines

The following are expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- Tone and civility: Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online and is not always appreciated in-person. The instructional team work very hard to provide a positive learning experience. Please keep this in mind and remain civilized and respectful in your class communications.
- Citing your sources: When we have academic discussions, please cite your sources to back up what you
 say.

Issue Resolution:

The CLSE believes that student concerns are usually most effectively addressed by the staff closest to the situation. Therefore, students are ordinarily expected to address issues or concerns first with their instructors. If the issue cannot be resolved by your instructor, or for some reason you feel that you absolutely cannot address your concern with your instructor, please feel free to contact the Course Coordinator or Assistant Director Adam Andrews (andrews.171@osu.edu).

Building Emergency Action Plan:

Each building on campus has a Building Emergency Action Plan (BEAP) outlining that specific building's specific procedures to be followed in the event of a range of emergency situations, including fire, weather, terrorism, chemical spills, etc. It is the role of every Buckeye to help keep each other safe and to be aware of these procedures. You can find all of the campus BEAPs at https://dps.osu.edu/beap.

Lyft Ride Smart:

Lyft Ride Smart at Ohio State offers eligible students discounted rides, inside the university-designated <u>service</u> <u>area</u>, from 7 p.m. to 7 a.m. Prices may be impacted by distance, traffic, time of day, special events and prime time surcharges. To qualify for program discounts, users must select "shared ride" when booking in the Lyft app. For more information, visit: https://ttm.osu.edu/ride-smart.

Mental Health:

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Life's Counseling and Consultation Service (CCS) by visiting ccs.osu.edu or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at 614-292-5766 and 24 hour emergency help is also available 24/7 by dialing 988 to reach the Suicide and Crisis Lifeline.

Title IX:

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at http://titleix.osu.edu or by contacting the Ohio State Title IX Coordinator at titleix@osu.edu.

Diversity:

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

Academic Misconduct:

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed, illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct http://studentlife.osu.edu/csc/. We will adhere to this policy.

- Unless otherwise specified for a particular assignment, all submitted work should be a student's own
 unique effort. Collaborative efforts are not permitted unless expressly sanctioned for a particular
 assignment.
- Unless otherwise specified for a particular assignment, use of Al-generated materials for course submissions is not permitted.
- Reusing past work: In general, you are prohibited in university courses from turning in work from a past class to your current class, even if you modify it. If you want to build on past research or revisit a topic you've explored in previous courses, please discuss the situation with me.
- Using others' verbatim words without the use of quotation marks <u>and</u> citation is plagiarism. Paraphrased work requires citation to denote the use of others' ideas. Copying other's words without quotation while using citations is still considered plagiarism.
- Use of any technology during a quiz or exam (including but not limited to cell phones, smart watches, headphones, electronic dictionaries, etc.) is strictly prohibited.

Copyrighted Class Materials:

© The Instructor's lectures and all course materials, including power point presentations, tests, outlines, assignments, and similar materials, are protected by copyright. You may take notes and make copies of course materials for your own use. You may not and may not allow others to reproduce or distribute lecture notes and course materials publicly whether or not a fee is charged without the express written consent of the course instructor or course coordinator.

Course Schedule: Autumn 2025

Schedule and assignments subject to change with as much advance notice as possible

Week	Lecture Topic	Workshop	Assignments Due
1	Introduction/	Welcome to Workshops and	
	Defining the topic: Disease	Avoiding Plagiarism Activity	
	Vectors		
2	Identifying Scientific	Activity: Science vs.	
	Information: Fact from Fiction,	Pseudoscience	
	From Databases to Google		
	Scholar		
3	Form and Function:	The Norms of scientific writing	Research Paper Annotated
	Understanding Primary		Bibliography

4	Plasmodium biology: the	Writing Peer Review Activity	
	molecular biology of		
	erythrocyte invasion		

5	Primary Literature: A case study in Disease Vectors	Activity: Biocides	Exam 1
6	Population genetics and Malaria	Activity: Hardy-Weinberg and the Evolution of Heterozygote Advantage	Research Paper Introduction
7	Statistics in Scientific Endeavors	Autumn Break – No Workshops	
8	Statistical ethics and selective data	Statistics practice activity	Research Paper Rough Draft
9	Statistical ethics and selective data (cont'd)	Presentation Development	Exam 2
10	Employing Statistics: A case study	Oral Presentations and Peer Review	Oral Presentation Due during assigned Week
11	Generating and comparing population genetic data	Oral Presentations and Peer Review	Peer Reviews due at the end of
12	Developing technology to control virulence	Oral Presentations and Peer Review	respective Workshops (x3)
13	Technological adaptations and ethics	Activity: The process and ethics of drug development	Research Paper Final Draft
14	Technological adaptations and ethics (cont'd)	Thanksgiving Break – No Workshops	Poster Due
15	Poster Presentations	Exam Review	SALG Due
Finals		Final Exam	

Biology 3501.03 Integrative Skills in Biology Symbiosis Autumn 2025 – 3 Credit Hours

<u>Lecturer</u>: <u>Course Coordinator</u>:

Email: Center for Life Sciences Education

Office: Email:
Student Hours: Office:

other times scheduled by appointment Phone:

Class Meeting Schedule:

Lecture: Twice Weekly for 55 minutes

Workshop: Once weekly for 80 minutes; consult your BuckeyeLink schedule for specific time and day

Prerequisites:

Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

Required Course Materials:

- Symbiosis: A Very Short Introduction, Nancy A. Moran, 2025: ISBN: 9780192863751.
- Writing Science in Plain English by Anne E. Greene, 2013, ISBN: 978-0-226-02637-4.
- Readings on carmen

Credit Hours and Work Expectation:

This is a 3-credit-hour course. According to Ohio State policy, students should expect around 3 hours per week of time spent on direct instruction in addition to 6 hours of homework to receive a grade of C average. <u>ASC Honors</u> provides an excellent guide to scheduling and study expectations.

Course Description:

A symbiosis themed integrative approach to fundamental skills enhancement in the life sciences.

Course Learning Outcomes:

Biology 3501 – Integrative Skills in Biology					
Goals	Expected Learning Outcomes (highlights align to embedded literacies)				
Goal 1: Students will identify and evaluate appropriate primary literature in the life sciences and will compare that information with examples in the secondary literature and popular press.	 Successful students are able to 1.1 research a topic using a variety of databases and sources of credible and relevant information, including primary literature. 				

	1.2 analyze the validity of the methods and
	1.2 analyze the validity of the methods and
	results of a scientific study.
	1.3 evaluate alternative viewpoints and
	assumptions to a scientific study.
	1.4 compare and contrast information in
	primary literature with corresponding
	information in the secondary literature and
	popular press.
	2.1 apply scientific writing styles in the creation
	of a written paper.
	2.2 apply scientific writing styles and norms in
	the creation of a scientific poster.
	2.3 demonstrate effective communication of
Goal 2: Students will understand and	scientific principles in an oral presentation.
demonstrate scientific communication norms	2.4 reflectively use scientific communication for
in various modalities.	a specific purpose, context, and audience using
	an appropriate genre and modality.
	2.5 reflect on how to adapt persuasive
	communication and research strategies to new
	contexts and evaluate the social and ethical
	implications of those strategies.
	3.1 explain basic concepts of statistics and
	probability.
Goal 3: Students will understand the role of	3.2 recognize the importance of statistical ideas.
	3.3 apply methods needed to analyze and
quantitative analysis, statistics, and	critically evaluate statistical arguments.
probability in scientific research.	3.4 evaluate the social and ethical implications
	of data collection and analysis, especially in
	relation to human subjects.
	relation to Haman Subjects.
	4.1 analyze the relationship of theoretical and
	<u> </u>
	4.1 analyze the relationship of theoretical and applied sciences.
	4.1 analyze the relationship of theoretical and applied sciences.4.2 recognize how technologies emerge and
	 4.1 analyze the relationship of theoretical and applied sciences. 4.2 recognize how technologies emerge and change.
Goal 4: Students will develop a critical	 4.1 analyze the relationship of theoretical and applied sciences. 4.2 recognize how technologies emerge and change. 4.3 critically describe the relationships between

	5.1 analyze the interconnectedness of the biological sciences through the lens of a single		
	broad topic.		
Goal 5: Students will understand the	5.2 reflect on the role of Biology in society,		
integration among the biological science	business, industry, and health fields.		
subdisciplines and the role of science in their	5.3 become self-directed learners by which they		
lives and across society.	can independently study biological content and		
lives and across society.	procedures.		
	5.4 develop an awareness of the careers and		
	professions that rely on knowledge of biological		
	sciences.		

Through these course outcomes, students will demonstrate mastery of the three University literacies expected learning outcomes in addition to the goals specifically aligned to the Biology Major Program.

Data Analysis Literacy					
Goal	Expected Learning Outcomes				
Successful students will meet the goals for either a	Successful students are able to				
Quantitative Data Analysis (A) or Qualitative Data					
Analysis (B) course.	1.1A explain basic concepts of statistics and probability.				
	1.2A apply methods needed to analyze and critically evaluate statistical arguments.				
Quantitative Data Analysis (A) Goal: Successful students develop skills in	1.3A recognize the importance of statistical ideas.				
drawing conclusions and critically evaluating results based on data.	1.4A evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.				
	1.1B explain the utility of different approaches to qualitative data analysis.				
Qualitative Data Analysis (B) Goal: Successful students develop skills in	1.2B apply key methods and tools in qualitative data analysis.				
drawing conclusions and critically evaluating results based on data.	1.3B interpret the results of qualitative data analysis to answer research question(s).				
	1.4B evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.				

Technology Literacy					
Goal	Expected Learning Outcomes				
Goal: Successful students develop a critical appreciation of the relations between technologies and their contexts	Successful students are able to				
(social, cultural, and historical), and of the range of effects and consequences (legal, ethical, political) produced or enabled by particular technologies.	1.1 Critically describe the relationships between technology and society in historical and cultural contexts.				
production of the state of the	1.2 Recognize how technologies emerge and change.				

1.3 Evaluate the social and ethical implications of
technology.

Advanced Writing						
Goal	Expected Learning Outcomes					
Goal 1: Successful students develop advanced skills in inquiry, critical thinking, composing, and communicating for a specific purpose, context, and	Successful students are able to 1.1 Investigate and integrate knowledge of the subject,					
audience using an appropriate genre and modality.	context, and audience with knowledge of genres, conventions and rhetorical choices to advance a particular writing objective.					
	1.2 Use credible and relevant sources of information, evaluate assumptions, and consider alternative viewpoints or hypotheses to express ideas and develop arguments.					
Goal 2: Successful students apply knowledge of writing and research to specific contexts.	2.1 Reflect on how they adapt rhetorical and research strategies they have learned to new contexts.					
	2.2 Develop scholarly, creative, or professional products that are meaningful to them and their audience.					
	2.3 Evaluate social and ethical implications of writing and information literacy practices.					

Grading and Evaluation:

Graded assignments may come in three forms, and students should note the expectations for each in the descriptions of our class assignments below:

- Independent Work (†): Strictly non-collaborative, original-individual work. You may discuss this assignment only with your instructor. Discussions with other individuals, either in person or electronically, are strictly prohibited and constitute academic misconduct.
- Required Collaboration (the): An explicit expectation for collaboration among students either in-class or outside (i.e., group work).
- **Optional Collaboration (**>>): Students are permitted, but not required, to discuss the assignment or ideas with each other. However, all submitted work must be one's original and individual creation.

Assignment	Points	Assignment Type
3 Exams (100 points each)	300	†
Research Paper	100	†
Oral Presentation	50	Ť
Oral Presentation Peer Review	20	•
Scientific Poster	50	Ť
Poster Peer Review	15	•

Workshop Activities (8 x 20 points)	160	•
Lecture Activities	50	≠11 11
Career Series Reflection	20	†
SALG	5	†
Total Points Possible	770	

Exams (100 points each):

The exams will largely focus on the symbioses content of the course. While the exams may include some multiple choice or similar question styles, the exams will largely be a short answer in format.

Research Paper (100 points total):

The research paper will focus on current literature in symbiosis research and be submitted individually in four parts and will address skills in researching literature, evaluating sources, and writing scientifically. Students will receive feedback on each portion and be expected to incorporate that feedback into a final paper.

- Annotated Bibliography (15 points)
- Introduction (15 points)
- Rough Draft (40 points)
- Final Draft (30 points)

Oral Presentation and Peer Review (70 points):

Oral presentations are a hallmark of life in the scientific community. Students will present a small portion (\sim 5-7 minutes) of the research comprising their ongoing research paper to their Workshop group (40 points) and provide feedback in the form of peer review to other students (30 points total – 3x10 points).

Scientific Poster and Peer Review (65 points):

Students will present a summary of their research paper in the form of a Scientific Poster, which will be presented to the class during the last lectures in a traditional scientific poster session style event (50 points). Students will be expected to visit multiple posters and provide written feedback in the form of a peer review (15 points).

Workshop Activities (160 points):

During eight of the weekly workshops, students will work both individually and as groups (as designated) to complete active learning activities related to the course content.

<u>Lecture Activities (50 points)</u>:

Periodically during select lectures, students will be asked to complete case studies, worksheets, or other engagement both individually and in collaboration with other students. These activities are meant to reinforce lecture content.

Career Series Reflection (20 points):

Students will be expected to minimally attend one meeting of the *CLSE Career Series* outside of class time and provide a reflection on the speaker's presentation. The *Series* focuses on the range of skills and careers appropriate for life science majors.

SALG (5 points):

At the end of the course, 5 points will be assigned based on participation in a survey, the Student Assessment of Learning Gains (SALG). Grades on the SALG will be based solely on completion.

Your Final Grade:

Your final grade will be based on the percentage of the 770 points that you earn during the course of the semester as described above. Please note that we do not grade the course on a curve and Carmen does not round averages up to the next nearest percentage point, so 92.11% and 92.97% both earn the grade of A-. Final letter grades will be determined by the university-approved grade scale below:

Grade Scale:

Α	A-	B+	В	B-	C+	С	C-	D+	D	E
100 -	92.9 -	89.9 –	86.9 -	82.9 –	79.9 –	76.9 –	72.9 –	69.9 –	66.9 -	59.9 –
93.0%	90.0%	87.0%	83.0%	80.0%	77.0%	73.0%	70.0%	67.0%	60.0%	0%

Posting of Grades:

All grades will be posted on Carmen. After grades are posted you have <u>10 working days</u> to challenge any grade or inquire regarding an unposted or missing grade. **After that time, grades are final.** To challenge or inquire about a missing grade, contact your laboratory instructor.

IMPORTANT

Make sure that all of your grades are properly posted on Carmen as you receive them. Challenges about grades, particularly after the end of the semester, will not be entertained after the 10-day grace period.

Late Assignments:

All assignments are due on the date and time prescribed in the course schedule. Late work will not be accepted except in rare (and documentable) circumstances.

Absences (COVID-19):

If you are too ill to take an exam or must miss for another legitimate unscheduled reason, you must contact the Course Coordinator within 24 hours of the exam. Make up exams will be given only to students who produce, at the make up or before, documentation of a legitimate reason (at the time of the absence) for missing the exam. Valid excuses are limited to problems that are beyond the student's control, such as military duty, intercollegiate athletic or academic activities, funerals, etc. Medical excuses will be considered only if you have been treated by a medical professional on the day of the exam (excuses from the student health center website will not be accepted). Lack of transportation, loss of electricity, travel plans, etc. are not considered valid excuses. If you anticipate having to miss an exam due to attendance at a university sanctioned event or other qualifying conflict, you must contact the Course Coordinator at least one week in advance of the exam.

If you have no documentation to support your absence, or your absence from the exam is not for an excused reason, you will still be offered the opportunity for a makeup exam, with a 25% overall deduction on your exam score if arrangements are made within 24 hours of the original exam.

The format of makeup exams is at the discretion of the instructors. <u>All makeup exams must be made up within one week of when the original exam was given.</u>

Note: Check the date and time of the final examination now and make sure that this time does not conflict with your future plans. No early final exams will be given. The only makeup exam will be held on Wednesday, December xx at 9:00 a.m. and is available only in emergency situations and with prior approval of the Course Coordinator.

Make-Up Workshops and Lecture Activities: Both the lecture and workshop are integral parts of this course. If you miss a class, you must contact your instructor (lecture or workshop, as appropriate) within 48 hours of their missed class in order to be eligible to complete a make-up assignment. All make-up work requires a valid written excuse from a doctor, therapist, athletic coach, or other person involved with the absence (preferably before the event occurs, if it's a planned absence). We will consider one absence for every student to be excused without documentation, however students must contact their instructor within 48 hours of their missed workshop to receive the make-up exercise. Therefore, it is essential that you contact your instructor immediately if you miss a workshop, or if you know in advance that you cannot attend class on a specific date.

Make-up work must be completed and received within <u>one week</u> of the original assignment date (unless very unusual circumstances apply), or else you forfeit all points for that workshop.

Excused absences include, but are not limited to:

- 1. Illness and injury
- 2. Mental health
- 3. Disability-related concerns
- 4. Military service
- 5. Death in the immediate family
- 6. Religious observance
- 7. Academic field trips
- 8. Participation in university sanctioned concert or athletic event
- 9. Participation in university disciplinary hearings

If you have a reason to miss class that is not listed above, please reach out to the instructor to discuss your options. It is the intention of the Center for Life Sciences Education to remain supportive of the needs of each of our students. Students who do not contact their instructor within <u>48 hours</u> of the missed class will not be eligible for make-up work.

If you are isolating while waiting for a COVID-19 test result, please let me know immediately. Those testing positive for COVID-19 should refer to the Safe and Healthy Buckeyes site for resources. Beyond five days of the required COVID-19 isolation period, I may rely on Student Life Disability Services to establish further reasonable accommodations. You can connect with them at slds@osu.edu; 614-292-3307; or slds.osu.edu.

Accommodation of Special Needs:

The university strives to maintain a healthy and accessible environment to support student learning in and out of the classroom. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let us know immediately so that we can privately discuss options. To establish reasonable accommodations, we may request that you register with Student Life Disability Services. After registration, make arrangements with the Course Coordinator as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. Only the course coordinator is authorized to complete SLDS accommodations. This will help us ensure that your individual needs will be met appropriately and fairly. SLDS contact information: slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

Religious Accommodations:

Ohio State has had a longstanding practice of making reasonable academic accommodations for students' religious beliefs and practices in accordance with applicable law. In 2023, Ohio State updated its practice to align with new state legislation. Under this new provision, students must be in early communication with their

instructors regarding any known accommodation requests for religious beliefs and practices, providing notice of specific dates for which they request alternative accommodations within 14 days after the first instructional day of the course. Instructors in turn shall not question the sincerity of a student's religious or spiritual belief system in reviewing such requests and shall keep requests for accommodations confidential.

With sufficient notice, instructors will provide students with reasonable alternative accommodations with regard to examinations and other academic requirements with respect to students' sincerely held religious beliefs and practices by allowing up to three absences each semester for the student to attend or participate in religious activities. Examples of religious accommodations can include, but are not limited to, rescheduling an exam, altering the time of a student's presentation, allowing make-up assignments to substitute for missed class work, or flexibility in due dates or research responsibilities. If concerns arise about a requested accommodation, instructors are to consult their tenure initiating unit head for assistance.

A student's request for time off shall be provided if the student's sincerely held religious belief or practice severely affects the student's ability to take an exam or meet an academic requirement and the student has notified their instructor, in writing during the first 14 days after the course begins, of the date of each absence. Although students are required to provide notice within the first 14 days after a course begins, instructors are strongly encouraged to work with the student to provide a reasonable accommodation if a request is made outside the notice period. A student may not be penalized for an absence approved under this policy.

If students have questions or disputes related to academic accommodations, they should contact their course instructor, and then their department or college office. For questions or to report discrimination or harassment based on religion, individuals should contact the Office of Institutional Equity.

Policy: Religious Holidays, Holy Days and Observances

Weather or Other Short-Term Closing:

Should in-person classes be canceled, students will be notified as to which alternative methods of teaching will be offered to ensure continuity of instruction for this class. Communication will be via Carmen announcements and course-wide email.

Section Changes:

All section changes and adds are completed by the course coordinator. Due to the need to keep up-to-minute availability of seats in each workshop, the lecturer and workshop instructors are unable to sign any permission forms.

Instructor Feedback and Response Expectations

- **Email response**: The CLSE's expectation of instructors is that emails will be responded to within one business day. If your email is sent during the evening or over the weekend, you may not receive a response until the next business day.
- Class announcements: I will send important class-wide messages through the Announcements tool in Carmen. Please check <u>your notification preferences</u> (go.osu.edu/canvas-notifications) to ensure you receive these messages.
- **Graded assignments:** Assignments will be graded and returned to you within one week after they were due. All scores are posted on Carmen no later than the day the graded assignment is returned.

Course Technology

For help with your password, university e-mail, Carmen, or any other technology issues, questions, or requests, contact the OSU IT Service Desk. Standard support hours are available at https://ocio.osu.edu/help/hours, and support for urgent issues is available 24x7.

• Self-Service and Chat support: http://ocio.osu.edu/selfservice

Phone: 614-688-HELP (4357)
Email: 8help@osu.edu
TDD: 614-688-8743

Carmen

- Carmen, Ohio State's Learning Management System, will be used to host materials and activities throughout this course. To access Carmen, visit Carmen.osu.edu. Log in to Carmen using your name.# and password, visit my.osu.edu.
- Help guides on the use of Carmen can be found at https://resourcecenter.odee.osu.edu/carmen
- This online course requires use of Carmen (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.
- Carmen accessibility

CarmenZoom

- Office hours will be held through Ohio State's conferencing platform, CarmenZoom. A separate guide to accessing CarmenZoom and our office hours is posted on the course Carmen page under Files.
- Students may use the audio and video functions if a webcam and microphone are available. If not, there is still a chat function within CarmenZoom for the student to live chat with the professor or TA in the virtual office hours room.
- Carmen Zoom help guide

Turnitin

- Students at The Ohio State University are accountable for the integrity of the work they submit. Therefore, you should be familiar with the guidelines provided by the <u>Committee on Academic Misconduct (COAM)</u> and <u>Section A of OSU's Code of Student Conduct</u> in order to meet the academic expectations concerning appropriate documentation of sources. In addition, OSU has made TurnItIn, a learning tool and plagiarism prevention system, available to instructors. For this class, you will submit your papers to TurnItIn from Carmen. When grading your work, I will interpret the originality report, following <u>Section A of OSU's Code of Student Conduct</u> as appropriate. For more information about TurnItIn, please see <u>the vendor's guide for students</u>. Note that submitted final papers become part of the OSU database.
- Please know that I view TurnItIn first and foremost as a teaching tool to make you a better writer. You will
 see in your individual originality reports exactly what the instructors see. We WANT you to look at this
 report as soon as you submit your assignments. If you see an issue, please correct it right away, before we
 start grading the assignment. You can resubmit without penalty as many times as you want prior to the
 established due date for any assignment. After the due date, the late policy is in effect.

TopHat

- TopHat is a web-based response system that allows students to use their own devices provide responses in the classroom. This course uses Top Hat to promote active engagement, allow for synchronous feedback, and monitor attendance.
- <u>TopHat</u> help guide

Discussion and Communication Guidelines

The following are expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- Tone and civility: Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online and is not always appreciated in-person. The instructional team work very hard to provide a positive learning experience. Please keep this in mind and remain civilized and respectful in your class communications.
- **Citing your sources**: When we have academic discussions, please cite your sources to back up what you say.

Issue Resolution:

The CLSE believes that student concerns are usually most effectively addressed by the staff closest to the situation. Therefore, students are ordinarily expected to address issues or concerns first with their instructors. If the issue cannot be resolved by your instructor, or for some reason you feel that you absolutely cannot address your concern with your instructor, please feel free to contact the Course Coordinator or Assistant Director Adam Andrews (andrews.171@osu.edu).

Building Emergency Action Plan:

Each building on campus has a Building Emergency Action Plan (BEAP) outlining that specific building's specific procedures to be followed in the event of a range of emergency situations, including fire, weather, terrorism, chemical spills, etc. It is the role of every Buckeye to help keep each other safe and to be aware of these procedures. You can find all of the campus BEAPs at https://dps.osu.edu/beap.

Lyft Ride Smart:

Lyft Ride Smart at Ohio State offers eligible students discounted rides, inside the university-designated <u>service</u> <u>area</u>, from 7 p.m. to 7 a.m. Prices may be impacted by distance, traffic, time of day, special events and prime time surcharges. To qualify for program discounts, users must select "shared ride" when booking in the Lyft app. For more information, visit: https://ttm.osu.edu/ride-smart.

Mental Health:

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Life's Counseling and Consultation Service (CCS) by visiting ccs.osu.edu or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at 614-292-5766 and 24 hour emergency help is also available 24/7 by dialing 988 to reach the Suicide and Crisis Lifeline.

Title IX:

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at http://titleix.osu.edu or by contacting the Ohio State Title IX Coordinator at titleix@osu.edu.

Diversity:

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

Academic Misconduct:

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed, illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct http://studentlife.osu.edu/csc/. We will adhere to this policy.

- Unless otherwise specified for a particular assignment, all submitted work should be a student's own
 unique effort. Collaborative efforts are not permitted unless expressly sanctioned for a particular
 assignment.
- Unless otherwise specified for a particular assignment, use of AI-generated materials for course submissions is not permitted.
- Reusing past work: In general, you are prohibited in university courses from turning in work from a past class to your current class, even if you modify it. If you want to build on past research or revisit a topic you've explored in previous courses, please discuss the situation with me.
- Using others' verbatim words without the use of quotation marks <u>and</u> citation is plagiarism. Paraphrased work requires citation to denote the use of others' ideas. Copying other's words without quotation while using citations is still considered plagiarism.
- Use of any technology during a quiz or exam (including but not limited to cell phones, smart watches, headphones, electronic dictionaries, etc.) is strictly prohibited.

Copyrighted Class Materials:

© The Instructor's lectures and all course materials, including power point presentations, tests, outlines, assignments, and similar materials, are protected by copyright. You may take notes and make copies of course materials for your own use. You may not and may not allow others to reproduce or distribute lecture notes and course materials publicly whether or not a fee is charged without the express written consent of the course instructor or course coordinator.

Course Schedule: Autumn 2025

Schedule and assignments subject to change with as much advance notice as possible

Week	Lecture Topic	Workshop	Assignments Due
1	Introduction/ Defining the topic: symbiosis	Welcome to Workshops and Avoiding Plagiarism Activity	
2	Identifying Scientific Information: Fact from Fiction, From Databases to Google Scholar	Activity: Science vs. Pseudoscience	
3	Form and Function: Understanding Primary Literature	The Norms of scientific writing	Research Paper Annotated Bibliography
4	Understanding the variety of symbiotic relationships	Writing Peer Review Activity	
5	Primary Literature: A case study in mutualism [benefits of the symbiosis]	Activity: DNA blasts [symbiosis literature search and symbiotic comparison]	Exam 1
6	Symbiosis; when not all benefit	Activity: Diversity calculations [conservation based on data]	Research Paper Introduction
7	Statistics in Scientific Endeavors	Autumn Break – No Workshops	
8	Statistical ethics and selective data	Statistics practice activity	Research Paper Rough Draft
9	Statistical ethics and selective data (cont'd)	Presentation Development	Exam 2
10	Employing Statistics: A case study	Oral Presentations and Peer Review	Oral Presentation Due during assigned Week
11	Facultative symbiosis	Oral Presentations and Peer Review	Peer Reviews due at the end of
12	Obligate symbiosis	Oral Presentations and Peer Review	respective Workshops (x3)
13	Technological adaptations and ethics	Activity: Queen of trees [many symbiosis, found with fig trees]	Research Paper Final Draft

14	Technological adaptations and ethics (cont'd)	Thanksgiving Break – No Workshops	Poster Due
15	Poster Presentations	Exam Review	SALG Due
Finals	Final Exam		

Appendix D: Biology 3501.04 Syllabus

Biology 3501.04 Integrative Skills in Biology Biotechnology Autumn 2025 – 3 Credit Hours

Lecturer: Course Coordinator:

Email: Center for Life Sciences Education

Office: Email: Student Hours: Office:

other times scheduled by appointment **Phone:**

Class Meeting Schedule:

Lecture: Twice Weekly for 55 minutes

Workshop: Once weekly for 80 minutes; consult your BuckeyeLink schedule for specific time and day

Prerequisites:

Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

Required Course Materials:

- Burke S, Mork M, Qualmann K, et al. 2021. Genetic counselor approaches to BRCA1/2 direct-to-consumer genetic testing results. J Genet Couns. 30: 803–812. doi:10.1002/jgc4.1380
- Katsanis SH. 2020. Pedigrees and perpetrators: Uses of DNA and genealogy in forensic investigations. Annu. Rev. Genom. Hum. Genet. 2020. 21:535–64. doi:10.1146/annurev-genom-111819-084213
- Dubé È, Ward JK, Verger P, MacDonald NE. 2021. Vaccine Hesitancy, Acceptance, and Anti-Vaccination: Trends and Future Prospects for Public Health. Ann. Rev. Public Health 42:175–191. doi:10.1146/annurev-publhealth-090419-102240
- Turnbull C, Lillemo M, Hvoslef-Eide TAK (2021) Global regulation of genetically modified crops amid the gene edited crop boom A review. Front. Plant Sci. 12:630396. doi:10.3389/fpls.2021.630396
- Writing Science in Plain English by Anne E. Greene, 2013, ISBN: 978-0-226-02637-4.

Credit Hours and Work Expectation:

This is a 3-credit-hour course. According to Ohio State policy, students should expect around 3 hours per week of time spent on direct instruction in addition to 6 hours of homework to receive a grade of C average. <u>ASC Honors</u> provides an excellent guide to scheduling and study expectations.

Course Description:

A Biotechnology themed integrative approach to fundamental skills enhancement in the life sciences.

Course Learning Outcomes:

Biology 3501 – Integrative Skills in Biology				
Goals	Expected Learning Outcomes			
	(highlights align to embedded literacies)			
	Successful students are able to			
	1.1 research a topic using a variety of			
	databases and sources of credible and			
Could Contact Without Contact of	relevant information, including primary			
Goal 1: Students will identify and evaluate	literature.			
appropriate primary literature in the life	1.2 analyze the validity of the methods and			
sciences and will compare that information	results of a scientific study.			
with examples in the secondary literature	1.3 evaluate alternative viewpoints and			
and popular press.	assumptions to a scientific study.			
	1.4 compare and contrast information in			
	primary literature with corresponding			
	information in the secondary literature and			
	popular press.			
	2.1 apply scientific writing styles in the			
	creation of a written paper.			
	2.2 apply scientific writing styles and norms in			
	the creation of a scientific poster.			
	2.3 demonstrate effective communication of			
Goal 2: Students will understand and	scientific principles in an oral presentation.			
demonstrate scientific communication	2.4 reflectively use scientific communication			
norms in various modalities.	for a specific purpose, context, and audience			
	using an appropriate genre and modality.			
	2.5 reflect on how to adapt persuasive			
	communication and research strategies to			
	new contexts and evaluate the social and			
	ethical implications of those strategies.			
	3.1 explain basic concepts of statistics and			
	probability.			
	3.2 recognize the importance of statistical			
Goal 3: Students will understand the role of	ideas.			
quantitative analysis, statistics, and	3.3 apply methods needed to analyze and			
probability in scientific research.	critically evaluate statistical arguments.			
	3.4 evaluate the social and ethical			
	implications of data collection and analysis,			
	especially in relation to human subjects.			
Goal 4: Students will develop a critical	4.1 analyze the relationship of theoretical and			
appreciation of the relationship between	applied sciences.			

science and technology and their effect on society.	4.2 recognize how technologies emerge and change.		
,	4.3 critically describe the relationships		
	between technology and society in historical		
	and cultural contexts.		
	4.4 evaluate the social and ethical		
	implications of technological developments.		
	4.5 demonstrate critical thinking and scientific		
	logic in the analysis of natural phenomena		
	and the ethics behind the human involvement		
	in these phenomena.		
	5.1 analyze the interconnectedness of the		
	biological sciences through the lens of a single		
	broad topic.		
Goal 5: Students will understand the	5.2 reflect on the role of Biology in society,		
	business, industry, and health fields.		
integration among the biological science subdisciplines and the role of science in	5.3 become self-directed learners by which		
their lives and across society.	they can independently study biological		
their lives and across society.	content and procedures.		
	5.4 develop an awareness of the careers and		
	professions that rely on knowledge of		
	biological sciences.		

Through these course outcomes, students will demonstrate mastery of the three University literacies expected learning outcomes in addition to the goals specifically aligned to the Biology Major Program.

Data Analysis Literacy				
Goal	Expected Learning Outcomes			
Successful students will meet the goals for either a	Successful students are able to			
Quantitative Data Analysis (A) or Qualitative Data				
Analysis (B) course.	1.1A explain basic concepts of statistics and probability.			
	1.2A apply methods needed to analyze and critically evaluate statistical arguments.			
Quantitative Data Analysis (A) Goal: Successful students develop skills in	1.3A recognize the importance of statistical ideas.			
drawing conclusions and critically evaluating results based on data.	1.4A evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.			
Qualitative Data Analysis (B) Goal:	1.1B explain the utility of different approaches to qualitative data analysis.			
Successful students develop skills in drawing conclusions and critically evaluating	1.2B apply key methods and tools in qualitative data analysis.			
results based on data.	1.3B interpret the results of qualitative data analysis to answer research question(s).			

1.4B evaluate the social and ethical implications of
data collection and analysis, especially in relation to
human subjects.

Technology Literacy				
Goal	Expected Learning Outcomes			
	Successful students are able to			
Goal: Successful students develop a critical appreciation of the relations between technologies and their contexts (social, cultural, and historical), and of the range of effects and consequences (legal, ethical, political) produced or enabled by particular technologies.	 1.1 Critically describe the relationships between technology and society in historical and cultural contexts. 1.2 Recognize how technologies emerge and change. 1.3 Evaluate the social and ethical implications of technology. 			

Advanced Writing			
Goal	Expected Learning Outcomes		
Goal 1: Successful students develop advanced skills in inquiry, critical thinking, composing, and	Successful students are able to		
communicating for a specific purpose, context, and audience using an appropriate genre and modality.	1.1 Investigate and integrate knowledge of the subject, context, and audience with knowledge of genres, conventions and rhetorical choices to advance a particular writing objective.		
	1.2 Use credible and relevant sources of information, evaluate assumptions, and consider alternative viewpoints or hypotheses to express ideas and develop arguments.		
Goal 2: Successful students apply knowledge of writing and research to specific contexts.	2.1 Reflect on how they adapt rhetorical and research strategies they have learned to new contexts.		
	2.2 Develop scholarly, creative, or professional products that are meaningful to them and their audience.		
	2.3 Evaluate social and ethical implications of writing and information literacy practices.		

Grading and Evaluation:

Graded assignments may come in three forms, and students should note the expectations for each in the descriptions of our class assignments below:

- Independent Work (†): Strictly non-collaborative, original-individual work. You may discuss this assignment only with your instructor. Discussions with other individuals, either in person or electronically, are strictly prohibited and constitute academic misconduct.
- Required Collaboration (the): An explicit expectation for collaboration among students either in-class or outside (i.e., group work).
- **Optional Collaboration (** Students are permitted, but not required, to discuss the assignment or ideas with each other. However, all submitted work must be one's original and individual creation.

Assignment	Points	Assignment Type
3 Exams (100 points each)	300	†
Research Paper	100	†
Oral Presentation	50	†
Oral Presentation Peer Review	20	•
Scientific Poster	50	†
Poster Peer Review	15	•
Workshop Activities (8 x 20 points)	160	•
Lecture Activities	50	🚅 titti
Career Series Reflection	20	Ť
SALG	5	†
Total Points Possible	770	

Exams (100 points each):

The exams will largely focus on the Biotechnology content of the course. While the exams may include some multiple choice or similar question styles, the exams will largely be a short answer in format.

Research Paper (100 points total):

The research paper will focus on current literature in Biotechnology research and be submitted individually in four parts and will address skills in researching literature, evaluating sources, and writing scientifically. Students will receive feedback on each portion and be expected to incorporate that feedback into a final paper.

- Annotated Bibliography (15 points)
- Introduction (15 points)
- Rough Draft (40 points)
- Final Draft (30 points)

Oral Presentation and Peer Review (70 points):

Oral presentations are a hallmark of life in the scientific community. Students will present a small portion (\sim 5-7 minutes) of the research comprising their ongoing research paper to their Workshop group (40 points) and provide feedback in the form of peer review to other students (30 points total – 3x10 points).

Scientific Poster and Peer Review (65 points):

Students will present a summary of their research paper in the form of a Scientific Poster, which will be presented to the class during the last lectures in a traditional scientific poster session style event (50 points). Students will be expected to visit multiple posters and provide written feedback in the form of a peer review (15 points).

Workshop Activities (160 points):

During eight of the weekly workshops, students will work both individually and as groups (as designated) to complete active learning activities related to the course content.

Lecture Activities (50 points):

Periodically during select lectures, students will be asked to complete case studies, worksheets, or other engagement both individually and in collaboration with other students. These activities are meant to reinforce lecture content.

Career Series Reflection (20 points):

Students will be expected to minimally attend one meeting of the *CLSE Career Series* outside of class time and provide a reflection on the speaker's presentation. The *Series* focuses on the range of skills and careers appropriate for life science majors.

SALG (5 points):

At the end of the course, 5 points will be assigned based on participation in a survey, the Student Assessment of Learning Gains (SALG). Grades on the SALG will be based solely on completion.

Your Final Grade:

Your final grade will be based on the percentage of the 770 points that you earn during the course of the semester as described above. Please note that we do not grade the course on a curve and Carmen does not round averages up to the next nearest percentage point, so 92.11% and 92.97% both earn the grade of A-. Final letter grades will be determined by the university-approved grade scale below:

Grade Scale:

Α	A-	B+	В	B-	C+	С	C-	D+	D	Е
100 -	92.9 –	89.9 –	86.9 –	82.9 –	79.9 –	76.9 –	72.9 –	69.9 –	66.9 –	59.9 –
93.0%	90.0%	87.0%	83.0%	80.0%	77.0%	73.0%	70.0%	67.0%	60.0%	0%

Posting of Grades:

All grades will be posted on Carmen. After grades are posted you have <u>10 working days</u> to challenge any grade or inquire regarding an unposted or missing grade. **After that time, grades are final.** To challenge or inquire about a missing grade, contact your laboratory instructor.

IMPORTANT

Make sure that all of your grades are properly posted on Carmen as you receive them. Challenges about grades, particularly after the end of the semester, will not be entertained after the 10-day grace period.

Late Assignments:

All assignments are due on the date and time prescribed in the course schedule. Late work will not be accepted except in rare (and documentable) circumstances.

Absences (COVID-19):

If you are too ill to take an exam or must miss for another legitimate unscheduled reason, you must contact the Course Coordinator within 24 hours of the exam. Make up exams will be given only to students who produce, at the make up or before, documentation of a legitimate reason (at the time of the absence) for missing the exam. Valid excuses are limited to problems that are beyond the student's control, such as military duty, intercollegiate athletic or academic activities, funerals, etc. Medical excuses will be considered only if you have been treated by a medical professional on the day of the exam (excuses from the student health center website will not be accepted). Lack of transportation, loss of electricity, travel plans, etc. are not considered valid excuses. If you anticipate having to miss an exam due to attendance at a university sanctioned event or other qualifying conflict, you must contact the Course Coordinator at least one week in advance of the exam.

If you have no documentation to support your absence, or your absence from the exam is not for an excused reason, you will still be offered the opportunity for a makeup exam, with a 25% overall deduction on your exam score if arrangements are made within 24 hours of the original exam.

The format of makeup exams is at the discretion of the instructors. <u>All makeup exams must be made up within one week of when the original exam was given.</u>

Note: Check the date and time of the final examination now and make sure that this time does not conflict with your future plans. No early final exams will be given. The only makeup exam will be held on Wednesday, December xx at 9:00 a.m. and is available only in emergency situations and with prior approval of the Course Coordinator.

Make-Up Workshops and Lecture Activities: Both the lecture and workshop are integral parts of this course. If you miss a class, you must contact your instructor (lecture or workshop, as appropriate) within 48 hours of their missed class in order to be eligible to complete a make-up assignment. All make-up work requires a valid written excuse from a doctor, therapist, athletic coach, or other person involved with the absence (preferably before the event occurs, if it's a planned absence). We will consider one absence for every student to be excused without documentation, however students must contact their instructor within 48 hours of their missed workshop to receive the make-up exercise. Therefore, it is essential that you contact your instructor immediately if you miss a workshop, or if you know in advance that you cannot attend class on a specific date. Make-up work must be completed and received within one week of the original assignment date (unless very unusual circumstances apply), or else you forfeit all points for that workshop.

Excused absences include, but are not limited to:

- 1. Illness and injury
- 2. Mental health
- 3. Disability-related concerns
- 4. Military service
- 5. Death in the immediate family
- 6. Religious observance
- 7. Academic field trips
- 8. Participation in university sanctioned concert or athletic event
- 9. Participation in university disciplinary hearings

If you have a reason to miss class that is not listed above, please reach out to the instructor to discuss your options. It is the intention of the Center for Life Sciences Education to remain supportive of the needs of each of our students. Students who do not contact their instructor within <u>48 hours</u> of the missed class will not be eligible for make-up work.

If you are isolating while waiting for a COVID-19 test result, please let me know immediately. Those testing positive for COVID-19 should refer to the Safe and Healthy Buckeyes site for resources. Beyond five days of the required COVID-19 isolation period, I may rely on Student Life Disability Services to establish further reasonable accommodations. You can connect with them at slds@osu.edu; 614-292-3307; or slds.osu.edu.

Accommodation of Special Needs:

The university strives to maintain a healthy and accessible environment to support student learning in and out of the classroom. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let us know immediately so that we can privately discuss options. To establish reasonable accommodations, we may request that you register with Student Life Disability Services. After registration, make arrangements with the Course Coordinator as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. Only the course coordinator is authorized to complete SLDS accommodations. This will help us ensure that your individual needs will be met

appropriately and fairly. SLDS contact information: slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

Religious Accommodations:

Ohio State has had a longstanding practice of making reasonable academic accommodations for students' religious beliefs and practices in accordance with applicable law. In 2023, Ohio State updated its practice to align with new state legislation. Under this new provision, students must be in early communication with their instructors regarding any known accommodation requests for religious beliefs and practices, providing notice of specific dates for which they request alternative accommodations within 14 days after the first instructional day of the course. Instructors in turn shall not question the sincerity of a student's religious or spiritual belief system in reviewing such requests and shall keep requests for accommodations confidential.

With sufficient notice, instructors will provide students with reasonable alternative accommodations with regard to examinations and other academic requirements with respect to students' sincerely held religious beliefs and practices by allowing up to three absences each semester for the student to attend or participate in religious activities. Examples of religious accommodations can include, but are not limited to, rescheduling an exam, altering the time of a student's presentation, allowing make-up assignments to substitute for missed class work, or flexibility in due dates or research responsibilities. If concerns arise about a requested accommodation, instructors are to consult their tenure initiating unit head for assistance.

A student's request for time off shall be provided if the student's sincerely held religious belief or practice severely affects the student's ability to take an exam or meet an academic requirement and the student has notified their instructor, in writing during the first 14 days after the course begins, of the date of each absence. Although students are required to provide notice within the first 14 days after a course begins, instructors are strongly encouraged to work with the student to provide a reasonable accommodation if a request is made outside the notice period. A student may not be penalized for an absence approved under this policy.

If students have questions or disputes related to academic accommodations, they should contact their course instructor, and then their department or college office. For questions or to report discrimination or harassment based on religion, individuals should contact the Office of Institutional Equity.

Policy: Religious Holidays, Holy Days and Observances

Weather or Other Short-Term Closing:

Should in-person classes be canceled, students will be notified as to which alternative methods of teaching will be offered to ensure continuity of instruction for this class. Communication will be via Carmen announcements and course-wide email.

Section Changes:

All section changes and adds are completed by the course coordinator. Due to the need to keep up-to-minute availability of seats in each workshop, the lecturer and workshop instructors are unable to sign any permission forms.

Instructor Feedback and Response Expectations

- **Email response**: The CLSE's expectation of instructors is that emails will be responded to within one business day. If your email is sent during the evening or over the weekend, you may not receive a response until the next business day.
- Class announcements: I will send important class-wide messages through the Announcements tool in Carmen. Please check <u>your notification preferences</u> (go.osu.edu/canvas-notifications) to ensure you receive these messages.

• **Graded assignments:** Assignments will be graded and returned to you within one week after they were due. All scores are posted on Carmen no later than the day the graded assignment is returned.

Course Technology

For help with your password, university e-mail, Carmen, or any other technology issues, questions, or requests, contact the OSU IT Service Desk. Standard support hours are available at https://ocio.osu.edu/help/hours, and support for urgent issues is available 24x7.

• Self-Service and Chat support: http://ocio.osu.edu/selfservice

Phone: 614-688-HELP (4357)
 Email: 8help@osu.edu
 TDD: 614-688-8743

Carmen

- Carmen, Ohio State's Learning Management System, will be used to host materials and activities throughout this course. To access Carmen, visit Carmen.osu.edu. Log in to Carmen using your name.# and password, visit my.osu.edu.
- Help guides on the use of Carmen can be found at https://resourcecenter.odee.osu.edu/carmen
- This online course requires use of Carmen (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.
- <u>Carmen accessibility</u>

CarmenZoom

- Office hours will be held through Ohio State's conferencing platform, CarmenZoom. A separate guide to accessing CarmenZoom and our office hours is posted on the course Carmen page under Files.
- Students may use the audio and video functions if a webcam and microphone are available. If not, there is still a chat function within CarmenZoom for the student to live chat with the professor or TA in the virtual office hours room.
- Carmen Zoom help guide

Turnitin

- Students at The Ohio State University are accountable for the integrity of the work they submit. Therefore, you should be familiar with the guidelines provided by the <u>Committee on Academic Misconduct (COAM)</u> and <u>Section A of OSU's Code of Student Conduct</u> in order to meet the academic expectations concerning appropriate documentation of sources. In addition, OSU has made TurnItIn, a learning tool and plagiarism prevention system, available to instructors. For this class, you will submit your papers to TurnItIn from Carmen. When grading your work, I will interpret the originality report, following <u>Section A of OSU's Code of Student Conduct</u> as appropriate. For more information about TurnItIn, please see <u>the vendor's guide for students</u>. Note that submitted final papers become part of the OSU database.
- Please know that I view TurnItIn first and foremost as a teaching tool to make you a better writer. You will see in your individual originality reports exactly what the instructors see. We WANT you to look at this report as soon as you submit your assignments. If you see an issue, please correct it right away, before we start grading the assignment. You can resubmit without penalty as many times as you want prior to the established due date for any assignment. After the due date, the late policy is in effect.

TopHat

- TopHat is a web-based response system that allows students to use their own devices provide responses in the classroom. This course uses Top Hat to promote active engagement, allow for synchronous feedback, and monitor attendance.
- TopHat help guide

Discussion and Communication Guidelines

The following are expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- Tone and civility: Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online and is not always appreciated in-person. The instructional team work very hard to provide a positive learning experience. Please keep this in mind and remain civilized and respectful in your class communications.
- Citing your sources: When we have academic discussions, please cite your sources to back up what you
 say.

Issue Resolution:

The CLSE believes that student concerns are usually most effectively addressed by the staff closest to the situation. Therefore, students are ordinarily expected to address issues or concerns first with their instructors. If the issue cannot be resolved by your instructor, or for some reason you feel that you absolutely cannot address your concern with your instructor, please feel free to contact the Course Coordinator or Assistant Director Adam Andrews (andrews.171@osu.edu).

Building Emergency Action Plan:

Each building on campus has a Building Emergency Action Plan (BEAP) outlining that specific building's specific procedures to be followed in the event of a range of emergency situations, including fire, weather, terrorism, chemical spills, etc. It is the role of every Buckeye to help keep each other safe and to be aware of these procedures. You can find all of the campus BEAPs at https://dps.osu.edu/beap.

Lyft Ride Smart:

Lyft Ride Smart at Ohio State offers eligible students discounted rides, inside the university-designated <u>service</u> <u>area</u>, from 7 p.m. to 7 a.m. Prices may be impacted by distance, traffic, time of day, special events and prime time surcharges. To qualify for program discounts, users must select "shared ride" when booking in the Lyft app. For more information, visit: https://ttm.osu.edu/ride-smart.

Mental Health:

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Life's Counseling and Consultation Service (CCS) by visiting ccs.osu.edu or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at 614-292-5766 and 24 hour emergency help is also available 24/7 by dialing 988 to reach the Suicide and Crisis Lifeline.

Title IX:

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at http://titleix.osu.edu or by contacting the Ohio State Title IX Coordinator at titleix@osu.edu.

Diversity:

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

Academic Misconduct:

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed, illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct http://studentlife.osu.edu/csc/. We will adhere to this policy.

- Unless otherwise specified for a particular assignment, all submitted work should be a student's own
 unique effort. Collaborative efforts are not permitted unless expressly sanctioned for a particular
 assignment.
- Unless otherwise specified for a particular assignment, use of Al-generated materials for course submissions is not permitted.
- Reusing past work: In general, you are prohibited in university courses from turning in work from a past
 class to your current class, even if you modify it. If you want to build on past research or revisit a topic
 you've explored in previous courses, please discuss the situation with me.
- Using others' verbatim words without the use of quotation marks <u>and</u> citation is plagiarism. Paraphrased work requires citation to denote the use of others' ideas. Copying other's words without quotation while using citations is still considered plagiarism.
- Use of any technology during a quiz or exam (including but not limited to cell phones, smart watches, headphones, electronic dictionaries, etc.) is strictly prohibited.

Copyrighted Class Materials:

© The Instructor's lectures and all course materials, including power point presentations, tests, outlines, assignments, and similar materials, are protected by copyright. You may take notes and make copies of course materials for your own use. You may not and may not allow others to reproduce or distribute lecture notes and course materials publicly whether or not a fee is charged without the express written consent of the course instructor or course coordinator.

Course Schedule: Autumn 2025 Schedule and assignments subject to change with as much advance notice as possible

Week	Lecture Topic	Workshop	Assignments Due
	Introduction/	Welcome to Workshops and	
1	Defining the topic:	Avoiding Plagiarism Activity	
	Biotechnology		
	Identifying Scientific	Activity: Science vs.	
2	Information: Fact from Fiction,	Pseudoscience	
	From Databases to Google		
	Scholar		
	Form and Function:	The Norms of scientific writing	Research Paper Annotated
3	Understanding Primary		Bibliography
	Literature		
4	[Biotechnology and genetic	Writing Peer Review Activity	
4	tests for health and ancestry]		

5	Primary Literature: A case study in [Genetic counseling versus Direct to Consumer genetic tests]	Activity: Genetic counseling problem set	Exam 1		
6	[DNA Forensics: population genetics and molecular biology]	Activity: DNA forensics problem set	Research Paper Introduction		
7	Statistics in Scientific Endeavors	Autumn Break – No Workshops			
8	Statistical ethics and selective data	Statistics practice activity	Research Paper Rough Draft		
9	Statistical ethics and selective data (cont'd)	Presentation Development	Exam 2		
10	Employing Statistics: A case study	Oral Presentations and Peer Review	Oral Presentation Due during assigned Week		
11	[Biotechnology and Vaccines: adaptive immunity, vaccine technology, vaccine hesitancy]	Oral Presentations and Peer Review	Peer Reviews due at the end of respective Workshops (x3)		
12	[Biotechnology and Agriculture: Quantitative Genetics to GMOs]	Oral Presentations and Peer Review			
13	Technological adaptations and ethics	Activity: Selective breeding in maize	Research Paper Final Draft		
14	Technological adaptations and ethics (cont'd)	Thanksgiving Break – No Workshops	Poster Due		
15	Poster Presentations Exam Review		SALG Due		
Finals	Final Exam				

Appendix E: Biology 3501.05 Syllabus

Biology 3501.05 Integrative Skills in Biology Rise of Resistance Autumn 2025 – 3 Credit Hours

<u>Lecturer</u>: <u>Course Coordinator</u>:

Email: Center for Life Sciences Education

Office: Email: Student Hours: Office:

other times scheduled by appointment **Phone:**

Class Meeting Schedule:

Lecture: Twice Weekly for 55 minutes

Workshop: Once weekly for 80 minutes; consult your BuckeyeLink schedule for specific time and day

Prerequisites:

Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

Required Course Materials:

- Selected readings will be provided on Carmen:
 - o Bacteria: A very short introduction by Sebastian G.B. Aymes, 2013, ISBN: 978-0199578764
 - Antibiotic-Resistant Bacteria (Deadly Diseases & Epidemics) by Patrick Guilfoile, 2006, ISBN: 978-0791091883
- Writing Science in Plain English by Anne E. Greene, 2013, ISBN: 978-0-226-02637-4.

Credit Hours and Work Expectation:

This is a 3-credit-hour course. According to Ohio State policy, students should expect around 3 hours per week of time spent on direct instruction in addition to 6 hours of homework to receive a grade of C average. <u>ASC Honors</u> provides an excellent guide to scheduling and study expectations.

Course Description:

An evolutionary resistance themed integrative approach to fundamental skills enhancement in the life sciences.

Course Learning Outcomes:

Biology 3501 – Integrative Skills in Biology			
Goals	Expected Learning Outcomes		
	(highlights align to embedded literacies)		
Goal 1: Students will identify and evaluate	Successful students are able to		
appropriate primary literature in the life sciences and will compare that information	1.1 research a topic using a variety of databases and sources of credible and		

with examples in the secondary literature	relevant information, including primary			
and popular press.	literature.			
	1.2 analyze the validity of the methods and			
	results of a scientific study.			
	1.3 evaluate alternative viewpoints and			
	assumptions to a scientific study.			
	1.4 compare and contrast information in			
	primary literature with corresponding			
	information in the secondary literature and			
	popular press.			
	2.1 apply scientific writing styles in the			
	creation of a written paper.			
	2.2 apply scientific writing styles and norms			
	in the creation of a scientific poster.			
	2.3 demonstrate effective communication of			
Goal 2: Students will understand and	scientific principles in an oral presentation.			
demonstrate scientific communication	2.4 reflectively use scientific communication			
norms in various modalities.	for a specific purpose, context, and audience			
	using an appropriate genre and modality.			
	2.5 reflect on how to adapt persuasive			
	communication and research strategies to			
	new contexts and evaluate the social and			
	ethical implications of those strategies.			
	3.1 explain basic concepts of statistics and			
	probability.			
	3.2 recognize the importance of statistical			
Goal 3: Students will understand the role of	ideas.			
quantitative analysis, statistics, and	3.3 apply methods needed to analyze and			
probability in scientific research.	critically evaluate statistical arguments.			
	3.4 evaluate the social and ethical			
	implications of data collection and analysis,			
	especially in relation to human subjects.			
	4.1 analyze the relationship of theoretical			
	and applied sciences.			
	4.2 recognize how technologies emerge and			
Goal 4: Students will develop a critical	change.			
appreciation of the relationship between	4.3 critically describe the relationships			
science and technology and their effect on	between technology and society in historical			
society.	and cultural contexts.			
	4.4 evaluate the social and ethical			
	implications of technological developments.			
	4.5 demonstrate critical thinking and			
	scientific logic in the analysis of natural			

	phenomena and the ethics behind the human involvement in these phenomena.		
Goal 5: Students will understand the integration among the biological science subdisciplines and the role of science in their lives and across society.	 5.1 analyze the interconnectedness of the biological sciences through the lens of a single broad topic. 5.2 reflect on the role of Biology in society, business, industry, and health fields. 5.3 become self-directed learners by which they can independently study biological content and procedures. 5.4 develop an awareness of the careers and professions that rely on knowledge of biological sciences. 		

Through these course outcomes, students will demonstrate mastery of the three University literacies expected learning outcomes in addition to the goals specifically aligned to the Biology Major Program.

Data Analysis Literacy					
Goal	Expected Learning Outcomes				
Successful students will meet the goals for either a	Successful students are able to				
Quantitative Data Analysis (A) or Qualitative Data					
Analysis (B) course.	1.1A explain basic concepts of statistics and				
	probability.				
	1.2A apply methods needed to analyze and critically				
	evaluate statistical arguments.				
Quantitative Data Analysis (A) Goal: Successful students develop skills in	1.3A recognize the importance of statistical ideas.				
drawing conclusions and critically evaluating results based on data.	1.4A evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.				
	1.1B explain the utility of different approaches to qualitative data analysis.				
Qualitative Data Analysis (B) Goal: Successful students develop skills in	1.2B apply key methods and tools in qualitative data analysis.				
drawing conclusions and critically evaluating results based on data.	1.3B interpret the results of qualitative data analysis to answer research question(s).				
	1.4B evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.				

Technology Literacy					
Goal	Expected Learning Outcomes				
Goal: Successful students develop a critical appreciation of the relations between technologies and their contexts (social, cultural, and historical), and of the range of effects and consequences (legal,	Successful students are able to 1.1 Critically describe the relationships between technology and society in historical and cultural contexts.				

ethical, political) produced or enabled by particular	1.2 Recognize how technologies emerge and change.		
technologies.	1.3 Evaluate the social and ethical implications of		
	technology.		

Advanced Writing					
Goal	Expected Learning Outcomes				
Goal 1: Successful students develop advanced skills in inquiry, critical thinking, composing, and communicating	Successful students are able to				
for a specific purpose, context, and audience using an appropriate genre and modality.	1.1 Investigate and integrate knowledge of the subject, context, and audience with knowledge of genres, conventions and rhetorical choices to advance a particular writing objective.				
	1.2 Use credible and relevant sources of information, evaluate assumptions, and consider alternative viewpoints or hypotheses to express ideas and develop arguments.				
Goal 2: Successful students apply knowledge of writing and research to specific contexts.	2.1 Reflect on how they adapt rhetorical and research strategies they have learned to new contexts.				
	2.2 Develop scholarly, creative, or professional products that are meaningful to them and their audience.				
	2.3 Evaluate social and ethical implications of writing and information literacy practices.				

Grading and Evaluation:

Graded assignments may come in three forms, and students should note the expectations for each in the descriptions of our class assignments below:

- Independent Work (†): Strictly non-collaborative, original-individual work. You may discuss this assignment only with your instructor. Discussions with other individuals, either in person or electronically, are strictly prohibited and constitute academic misconduct.
- Required Collaboration (m): An explicit expectation for collaboration among students either in-class or outside (i.e., group work).
- **Optional Collaboration (** Students are permitted, but not required, to discuss the assignment or ideas with each other. However, all submitted work must be one's original and individual creation.

Assignment	Points	Assignment Type
3 Exams (100 points each)	300	†
Research Paper	100	†
Oral Presentation	50	†
Oral Presentation Peer Review	20	•
Scientific Poster	50	†
Poster Peer Review	15	•
Workshop Activities (8 x 20 points)	160	•
Lecture Activities	50	🚅 titti
Career Series Reflection	20	Ť
SALG	5	Ť
Total Points Possible	770	

Exams (100 points each):

The exams will largely focus on the evolutionary resistance content of the course. While the exams may include some multiple choice or similar question styles, the exams will largely be a short answer in format.

Research Paper (100 points total):

The research paper will focus on current literature in evolutionary resistance research and be submitted individually in four parts and will address skills in researching literature, evaluating sources, and writing scientifically. Students will receive feedback on each portion and be expected to incorporate that feedback into a final paper.

- Annotated Bibliography (15 points)
- Introduction (15 points)
- Rough Draft (40 points)
- Final Draft (30 points)

Oral Presentation and Peer Review (70 points):

Oral presentations are a hallmark of life in the scientific community. Students will present a small portion (\sim 5-7 minutes) of the research comprising their ongoing research paper to their Workshop group (40 points) and provide feedback in the form of peer review to other students (30 points total – 3x10 points).

Scientific Poster and Peer Review (65 points):

Students will present a summary of their research paper in the form of a Scientific Poster, which will be presented to the class during the last lectures in a traditional scientific poster session style event (50 points). Students will be expected to visit multiple posters and provide written feedback in the form of a peer review (15 points).

Workshop Activities (160 points):

During eight of the weekly workshops, students will work both individually and as groups (as designated) to complete active learning activities related to the course content.

Lecture Activities (50 points):

Periodically during select lectures, students will be asked to complete case studies, worksheets, or other engagement both individually and in collaboration with other students. These activities are meant to reinforce lecture content.

Career Series Reflection (20 points):

Students will be expected to minimally attend one meeting of the *CLSE Career Series* outside of class time and provide a reflection on the speaker's presentation. The *Series* focuses on the range of skills and careers appropriate for life science majors.

SALG (5 points):

At the end of the course, 5 points will be assigned based on participation in a survey, the Student Assessment of Learning Gains (SALG). Grades on the SALG will be based solely on completion.

Your Final Grade:

Your final grade will be based on the percentage of the 770 points that you earn during the course of the semester as described above. Please note that we do not grade the course on a curve and Carmen does not round averages up to the next nearest percentage point, so 92.11% and 92.97% both earn the grade of A-. Final letter grades will be determined by the university-approved grade scale below:

Grade Scale:

Α	A-	B+	В	B-	C+	С	C-	D+	D	E
100 -	92.9 –	89.9 –	86.9 –	82.9 –	79.9 –	76.9 –	72.9 –	69.9 –	66.9 –	59.9 –
93.0%	90.0%	87.0%	83.0%	80.0%	77.0%	73.0%	70.0%	67.0%	60.0%	0%

Posting of Grades:

All grades will be posted on Carmen. After grades are posted you have <u>10 working days</u> to challenge any grade or inquire regarding an unposted or missing grade. **After that time, grades are final.** To challenge or inquire about a missing grade, contact your laboratory instructor.

IMPORTANT

Make sure that all of your grades are properly posted on Carmen as you receive them. Challenges about grades, particularly after the end of the semester, will not be entertained after the 10-day grace period.

Late Assignments:

All assignments are due on the date and time prescribed in the course schedule. Late work will not be accepted except in rare (and documentable) circumstances.

Absences (COVID-19):

If you are too ill to take an exam or must miss for another legitimate unscheduled reason, you must contact the Course Coordinator within 24 hours of the exam. Make up exams will be given only to students who produce, at the make up or before, documentation of a legitimate reason (at the time of the absence) for missing the exam. Valid excuses are limited to problems that are beyond the student's control, such as military duty, intercollegiate athletic or academic activities, funerals, etc. Medical excuses will be considered only if you have been treated by a medical professional on the day of the exam (excuses from the student health center website will not be accepted). Lack of transportation, loss of electricity, travel plans, etc. are not considered valid excuses. If you anticipate having to miss an exam due to attendance at a university sanctioned event or other qualifying conflict, you must contact the Course Coordinator at least one week in advance of the exam.

If you have no documentation to support your absence, or your absence from the exam is not for an excused reason, you will still be offered the opportunity for a makeup exam, with a 25% overall deduction on your exam score if arrangements are made within 24 hours of the original exam.

The format of makeup exams is at the discretion of the instructors. <u>All makeup exams must be made up within one week of when the original exam was given.</u>

Note: Check the date and time of the final examination now and make sure that this time does not conflict with your future plans. No early final exams will be given. The only makeup exam will be held on Wednesday, December xx at 9:00 a.m. and is available only in emergency situations and with prior approval of the Course Coordinator.

Make-Up Workshops and Lecture Activities: Both the lecture and workshop are integral parts of this course. If you miss a class, you must contact your instructor (lecture or workshop, as appropriate) within 48 hours of their missed class in order to be eligible to complete a make-up assignment. All make-up work requires a valid written excuse from a doctor, therapist, athletic coach, or other person involved with the absence (preferably before the event occurs, if it's a planned absence). We will consider one absence for every student to be excused without documentation, however students must contact their instructor within 48 hours of their missed workshop to receive the make-up exercise. Therefore, it is essential that you contact your instructor immediately if you miss a workshop, or if you know in advance that you cannot attend class on a specific date. Make-up work must be completed and received within one week of the original assignment date (unless very unusual circumstances apply), or else you forfeit all points for that workshop.

Excused absences include, but are not limited to:

- 1. Illness and injury
- 2. Mental health
- 3. Disability-related concerns
- 4. Military service
- 5. Death in the immediate family
- 6. Religious observance
- 7. Academic field trips
- 8. Participation in university sanctioned concert or athletic event
- 9. Participation in university disciplinary hearings

If you have a reason to miss class that is not listed above, please reach out to the instructor to discuss your options. It is the intention of the Center for Life Sciences Education to remain supportive of the needs of each of our students. Students who do not contact their instructor within 48 <u>hours</u> of the missed class will not be eligible for make-up work.

If you are isolating while waiting for a COVID-19 test result, please let me know immediately. Those testing positive for COVID-19 should refer to the Safe and Healthy Buckeyes site for resources. Beyond five days of the required COVID-19 isolation period, I may rely on Student Life Disability Services to establish further reasonable accommodations. You can connect with them at slds@osu.edu; 614-292-3307; or slds.osu.edu.

Accommodation of Special Needs:

The university strives to maintain a healthy and accessible environment to support student learning in and out of the classroom. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let us know immediately so that we can privately discuss options. To establish reasonable accommodations, we may request that you register with Student Life Disability Services. After registration, make arrangements with the Course Coordinator as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. Only the course coordinator is authorized to complete SLDS accommodations. This will help us ensure that your individual needs will be met

appropriately and fairly. SLDS contact information: slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

Religious Accommodations:

Ohio State has had a longstanding practice of making reasonable academic accommodations for students' religious beliefs and practices in accordance with applicable law. In 2023, Ohio State updated its practice to align with new state legislation. Under this new provision, students must be in early communication with their instructors regarding any known accommodation requests for religious beliefs and practices, providing notice of specific dates for which they request alternative accommodations within 14 days after the first instructional day of the course. Instructors in turn shall not question the sincerity of a student's religious or spiritual belief system in reviewing such requests and shall keep requests for accommodations confidential.

With sufficient notice, instructors will provide students with reasonable alternative accommodations with regard to examinations and other academic requirements with respect to students' sincerely held religious beliefs and practices by allowing up to three absences each semester for the student to attend or participate in religious activities. Examples of religious accommodations can include, but are not limited to, rescheduling an exam, altering the time of a student's presentation, allowing make-up assignments to substitute for missed class work, or flexibility in due dates or research responsibilities. If concerns arise about a requested accommodation, instructors are to consult their tenure initiating unit head for assistance.

A student's request for time off shall be provided if the student's sincerely held religious belief or practice severely affects the student's ability to take an exam or meet an academic requirement and the student has notified their instructor, in writing during the first 14 days after the course begins, of the date of each absence. Although students are required to provide notice within the first 14 days after a course begins, instructors are strongly encouraged to work with the student to provide a reasonable accommodation if a request is made outside the notice period. A student may not be penalized for an absence approved under this policy.

If students have questions or disputes related to academic accommodations, they should contact their course instructor, and then their department or college office. For questions or to report discrimination or harassment based on religion, individuals should contact the Office of Institutional Equity.

Policy: Religious Holidays, Holy Days and Observances

Weather or Other Short-Term Closing:

Should in-person classes be canceled, students will be notified as to which alternative methods of teaching will be offered to ensure continuity of instruction for this class. Communication will be via Carmen announcements and course-wide email.

Section Changes:

All section changes and adds are completed by the course coordinator. Due to the need to keep up-to-minute availability of seats in each workshop, the lecturer and workshop instructors are unable to sign any permission forms.

Instructor Feedback and Response Expectations

- **Email response**: The CLSE's expectation of instructors is that emails will be responded to within one business day. If your email is sent during the evening or over the weekend, you may not receive a response until the next business day.
- Class announcements: I will send important class-wide messages through the Announcements tool in Carmen. Please check <u>your notification preferences</u> (go.osu.edu/canvas-notifications) to ensure you receive these messages.

• **Graded assignments:** Assignments will be graded and returned to you within one week after they were due. All scores are posted on Carmen no later than the day the graded assignment is returned.

Course Technology

For help with your password, university e-mail, Carmen, or any other technology issues, questions, or requests, contact the OSU IT Service Desk. Standard support hours are available at https://ocio.osu.edu/help/hours, and support for urgent issues is available 24x7.

• Self-Service and Chat support: http://ocio.osu.edu/selfservice

Phone: 614-688-HELP (4357)
 Email: 8help@osu.edu
 TDD: 614-688-8743

Carmen

- Carmen, Ohio State's Learning Management System, will be used to host materials and activities
 throughout this course. To access Carmen, visit <u>Carmen.osu.edu</u>. Log in to Carmen using your name.# and
 password. If you have not setup a name.# and password, visit <u>my.osu.edu</u>.
- Help guides on the use of Carmen can be found at https://resourcecenter.odee.osu.edu/carmen
- This online course requires use of Carmen (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.
- <u>Carmen accessibility</u>

CarmenZoom

- Office hours will be held through Ohio State's conferencing platform, CarmenZoom. A separate guide to accessing CarmenZoom and our office hours is posted on the course Carmen page under Files.
- Students may use the audio and video functions if a webcam and microphone are available. If not, there is still a chat function within CarmenZoom for the student to live chat with the professor or TA in the virtual office hours room.
- Carmen Zoom help guide

Turnitin

- Students at The Ohio State University are accountable for the integrity of the work they submit. Therefore, you should be familiar with the guidelines provided by the <u>Committee on Academic Misconduct (COAM)</u> and <u>Section A of OSU's Code of Student Conduct</u> in order to meet the academic expectations concerning appropriate documentation of sources. In addition, OSU has made TurnItIn, a learning tool and plagiarism prevention system, available to instructors. For this class, you will submit your papers to TurnItIn from Carmen. When grading your work, I will interpret the originality report, following <u>Section A of OSU's Code of Student Conduct</u> as appropriate. For more information about TurnItIn, please see <u>the vendor's guide for students</u>. Note that submitted final papers become part of the OSU database.
- Please know that I view TurnItIn first and foremost as a teaching tool to make you a better writer. You will see in your individual originality reports exactly what the instructors see. We WANT you to look at this report as soon as you submit your assignments. If you see an issue, please correct it right away, before we start grading the assignment. You can resubmit without penalty as many times as you want prior to the established due date for any assignment. After the due date, the late policy is in effect.

TopHat

- TopHat is a web-based response system that allows students to use their own devices provide responses in the classroom. This course uses Top Hat to promote active engagement, allow for synchronous feedback, and monitor attendance.
- TopHat help guide

Discussion and Communication Guidelines

The following are expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- Tone and civility: Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online and is not always appreciated in-person. The instructional team work very hard to provide a positive learning experience. Please keep this in mind and remain civilized and respectful in your class communications.
- Citing your sources: When we have academic discussions, please cite your sources to back up what you
 say.

Issue Resolution:

The CLSE believes that student concerns are usually most effectively addressed by the staff closest to the situation. Therefore, students are ordinarily expected to address issues or concerns first with their instructors. If the issue cannot be resolved by your instructor, or for some reason you feel that you absolutely cannot address your concern with your instructor, please feel free to contact the Course Coordinator or Assistant Director Adam Andrews (andrews.171@osu.edu).

Building Emergency Action Plan:

Each building on campus has a Building Emergency Action Plan (BEAP) outlining that specific building's specific procedures to be followed in the event of a range of emergency situations, including fire, weather, terrorism, chemical spills, etc. It is the role of every Buckeye to help keep each other safe and to be aware of these procedures. You can find all of the campus BEAPs at https://dps.osu.edu/beap.

Lyft Ride Smart:

Lyft Ride Smart at Ohio State offers eligible students discounted rides, inside the university-designated <u>service</u> <u>area</u>, from 7 p.m. to 7 a.m. Prices may be impacted by distance, traffic, time of day, special events and prime time surcharges. To qualify for program discounts, users must select "shared ride" when booking in the Lyft app. For more information, visit: https://ttm.osu.edu/ride-smart.

Mental Health:

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Life's Counseling and Consultation Service (CCS) by visiting ccs.osu.edu or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at 614-292-5766 and 24 hour emergency help is also available 24/7 by dialing 988 to reach the Suicide and Crisis Lifeline.

Title IX:

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at http://titleix.osu.edu or by contacting the Ohio State Title IX Coordinator at titleix@osu.edu.

Diversity:

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students

to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

Academic Misconduct:

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed, illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct http://studentlife.osu.edu/csc/. We will adhere to this policy.

- Unless otherwise specified for a particular assignment, all submitted work should be a student's own unique effort. Collaborative efforts are not permitted unless expressly sanctioned for a particular assignment.
- Unless otherwise specified for a particular assignment, use of AI-generated materials for course submissions is not permitted.
- Reusing past work: In general, you are prohibited in university courses from turning in work from a past class to your current class, even if you modify it. If you want to build on past research or revisit a topic you've explored in previous courses, please discuss the situation with me.
- Using others' verbatim words without the use of quotation marks <u>and</u> citation is plagiarism. Paraphrased work requires citation to denote the use of others' ideas. Copying other's words without quotation while using citations is still considered plagiarism.
- Use of any technology during a quiz or exam (including but not limited to cell phones, smart watches, headphones, electronic dictionaries, etc.) is strictly prohibited.

Copyrighted Class Materials:

© The Instructor's lectures and all course materials, including power point presentations, tests, outlines, assignments, and similar materials, are protected by copyright. You may take notes and make copies of course materials for your own use. You may not and may not allow others to reproduce or distribute lecture notes and course materials publicly whether or not a fee is charged without the express written consent of the course instructor or course coordinator.

Course Schedule: Autumn 2025

Schedule and assignments subject to change with as much advance notice as possible

Week	Lecture Topic	Workshop	Assignments Due
	Introduction/	Welcome to Workshops and	
1	Defining the topic: Biological	Avoiding Plagiarism Activity	
	Resistance		
	Identifying Scientific	Activity: Science vs.	
2	Information: Fact from Fiction,	Pseudoscience	
	From Databases to Google		
	Scholar		
	Form and Function:	The Norms of scientific writing	Research Paper Annotated
3	Understanding Primary		Bibliography
	Literature		
4	Pathogenesis and Antibiotics	Writing Peer Review Activity	
	Primary Literature: A case	Journal Article Discussion	Exam 1
5	study in mechanisms of		
	antibiotic resistance		

6	Major diseases and factors impacting antibiotic resistance	Activity: Biocides	Research Paper Introduction
7	Statistics in Scientific Endeavors	Autumn Break – No Workshops	
8	Statistical ethics and selective data	Statistics practice activity	Research Paper Rough Draft
9	Statistical ethics and selective data (cont'd)	Presentation Development	Exam 2
10	Employing Statistics: A case study	Oral Presentations and Peer Review	Oral Presentation Due during assigned Week
11	Generating and comparing genomic data	Oral Presentations and Peer Review	Peer Reviews due at the end
12	Resistance today: where we are and where we are headed	Oral Presentations and Peer Review	of respective Workshops (x3)
13	Technological adaptations and ethics	Activity: Approaches to manipulating gene expression in emerging model organisms	Research Paper Final Draft
14	Technological adaptations and ethics (cont'd)	Thanksgiving Break – No Workshops	Poster Due

Finals		Final Exam	

Biology 3501.06 Integrative Skills in Biology Biology of Aging Autumn 2025 – 3 Credit Hours

<u>Lecturer</u>: <u>Course Coordinator</u>:

Email: Center for Life Sciences Education

Office: Email:
Student Hours: Office:

other times scheduled by appointment Phone:

Class Meeting Schedule:

Lecture: Twice Weekly for 55 minutes

Workshop: Once weekly for 80 minutes; consult your BuckeyeLink schedule for specific time and day

Prerequisites:

Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

Required Course Materials:

- Biology of Longevity and Aging: Pathways and Prospects (4th edition) by Robert Arking, 2019, ISBN: 978-0199387960
- Writing Science in Plain English by Anne E. Greene, 2013, ISBN: 978-0-226-02637-4.

Credit Hours and Work Expectation:

This is a 3-credit-hour course. According to Ohio State policy, students should expect around 3 hours per week of time spent on direct instruction in addition to 6 hours of homework to receive a grade of C average. <u>ASC Honors</u> provides an excellent guide to scheduling and study expectations.

Course Description:

A Biology of Aging themed integrative approach to fundamental skills enhancement in the life sciences.

Course Learning Outcomes:

Biology 3501 – Integrative Skills in Biology				
Goals	Expected Learning Outcomes			
	(highlights align to embedded literacies)			
Goal 1: Students will identify and evaluate appropriate primary literature in the life sciences and will compare that information with examples in the secondary literature and popular press.	Successful students are able to 1.1 research a topic using a variety of databases and sources of credible and relevant information, including primary literature.			

	the creation of a scientific poster.
	2.2 apply scientific writing styles and norms in
	2.3 demonstrate effective communication of
Goal 2: Students will understand and	scientific principles in an oral presentation.
demonstrate scientific communication	2.4 reflectively use scientific communication
norms in various modalities.	for a specific purpose, context, and audience
	using an appropriate genre and modality.
	2.5 reflect on how to adapt persuasive
	communication and research strategies to
	new contexts and evaluate the social and
	ethical implications of those strategies.
	3.1 explain basic concepts of statistics and
	arabability.
	probability.
	3.2 recognize the importance of statistical
Goal 3: Students will understand the role of	3.2 recognize the importance of statistical ideas.
quantitative analysis, statistics, and	3.2 recognize the importance of statistical ideas.3.3 apply methods needed to analyze and
	 3.2 recognize the importance of statistical ideas. 3.3 apply methods needed to analyze and critically evaluate statistical arguments.
quantitative analysis, statistics, and	 3.2 recognize the importance of statistical ideas. 3.3 apply methods needed to analyze and critically evaluate statistical arguments. 3.4 evaluate the social and ethical
quantitative analysis, statistics, and	 3.2 recognize the importance of statistical ideas. 3.3 apply methods needed to analyze and critically evaluate statistical arguments. 3.4 evaluate the social and ethical implications of data collection and analysis,
quantitative analysis, statistics, and	 3.2 recognize the importance of statistical ideas. 3.3 apply methods needed to analyze and critically evaluate statistical arguments. 3.4 evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.
quantitative analysis, statistics, and	 3.2 recognize the importance of statistical ideas. 3.3 apply methods needed to analyze and critically evaluate statistical arguments. 3.4 evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects. 4.1 analyze the relationship of theoretical and
quantitative analysis, statistics, and	 3.2 recognize the importance of statistical ideas. 3.3 apply methods needed to analyze and critically evaluate statistical arguments. 3.4 evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects. 4.1 analyze the relationship of theoretical and applied sciences.
quantitative analysis, statistics, and	 3.2 recognize the importance of statistical ideas. 3.3 apply methods needed to analyze and critically evaluate statistical arguments. 3.4 evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects. 4.1 analyze the relationship of theoretical and applied sciences. 4.2 recognize how technologies emerge and

biological sciences.		professions that rely on knowledge of	

Through these course outcomes, students will demonstrate mastery of the three University literacies expected learning outcomes in addition to the goals specifically aligned to the Biology Major Program.

Data Analysis Literacy					
Goal	Expected Learning Outcomes				
Successful students will meet the goals for either a Quantitative Data Analysis (A) or Qualitative Data	Successful students are able to				
Analysis (B) course.	1.1A explain basic concepts of statistics and probability.				
	1.2A apply methods needed to analyze and critically evaluate statistical arguments.				
Quantitative Data Analysis (A) Goal: Successful students develop skills in	1.3A recognize the importance of statistical ideas.				
drawing conclusions and critically evaluating results based on data.	1.4A evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.				
	1.1B explain the utility of different approaches to qualitative data analysis.				
Qualitative Data Analysis (B) Goal: Successful students develop skills in	1.2B apply key methods and tools in qualitative data analysis.				
drawing conclusions and critically evaluating results based on data.	1.3B interpret the results of qualitative data analysis to answer research question(s).				
	1.4B evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.				

Technology Literacy				
Goal	Expected Learning Outcomes			
Goal: Successful students develop a critical appreciation of the relations between technologies	Successful students are able to			
and their contexts (social, cultural, and historical), and of the range of effects and consequences (legal, ethical, political) produced or enabled by particular	1.1 Critically describe the relationships between technology and society in historical and cultural contexts.			
technologies.	1.2 Recognize how technologies emerge and change.			

1.3 Evaluate the social and ethical implications of
technology.

Advanced Writing				
Goal	Expected Learning Outcomes			
Goal 1: Successful students develop advanced skills in inquiry, critical thinking, composing, and communicating for a specific purpose, context, and audience using an appropriate genre and modality.	Successful students are able to 1.1 Investigate and integrate knowledge of the subject, context, and audience with knowledge of genres, conventions and rhetorical choices to advance a particular writing objective.			
	1.2 Use credible and relevant sources of information, evaluate assumptions, and consider alternative viewpoints or hypotheses to express ideas and develop arguments.			
Goal 2: Successful students apply knowledge of writing and research to specific contexts.	2.1 Reflect on how they adapt rhetorical and research strategies they have learned to new contexts.			
	2.2 Develop scholarly, creative, or professional products that are meaningful to them and their audience.			
	2.3 Evaluate social and ethical implications of writing and information literacy practices.			

Grading and Evaluation:

Graded assignments may come in three forms, and students should note the expectations for each in the descriptions of our class assignments below:

- Independent Work (†): Strictly non-collaborative, original-individual work. You may discuss this assignment only with your instructor. Discussions with other individuals, either in person or electronically, are strictly prohibited and constitute academic misconduct.
- Required Collaboration (#h): An explicit expectation for collaboration among students either in-class or outside (i.e., group work).
- **Optional Collaboration (**>): Students are permitted, but not required, to discuss the assignment or ideas with each other. However, all submitted work must be one's original and individual creation.

Assignment	Points	Assignment Type
3 Exams (100 points each)	300	†
Research Paper	100	†
Oral Presentation	50	†
Oral Presentation Peer Review	20	•
Scientific Poster	50	†
Poster Peer Review	15	•
Workshop Activities (8 x 20 points)	160	•
Lecture Activities	50	🚅 tîti
Career Series Reflection	20	†
SALG	5	†
Total Points Possible	770	

Exams (100 points each):

The exams will largely focus on the Biology of Aging content of the course. While the exams may include some multiple choice or similar question styles, the exams will largely be a short answer in format.

Research Paper (100 points total):

The research paper will focus on current literature in Biology of Aging research and be submitted individually in four parts and will address skills in researching literature, evaluating sources, and writing scientifically. Students will receive feedback on each portion and be expected to incorporate that feedback into a final paper.

- Annotated Bibliography (15 points)
- Introduction (15 points)
- Rough Draft (40 points)
- Final Draft (30 points)

Oral Presentation and Peer Review (70 points):

Oral presentations are a hallmark of life in the scientific community. Students will present a small portion (\sim 5-7 minutes) of the research comprising their ongoing research paper to their Workshop group (40 points) and provide feedback in the form of peer review to other students (30 points total – 3x10 points).

Scientific Poster and Peer Review (65 points):

Students will present a summary of their research paper in the form of a Scientific Poster, which will be presented to the class during the last lectures in a traditional scientific poster session style event (50 points). Students will be expected to visit multiple posters and provide written feedback in the form of a peer review (15 points).

Workshop Activities (160 points):

During eight of the weekly workshops, students will work both individually and as groups (as designated) to complete active learning activities related to the course content.

Lecture Activities (50 points):

Periodically during select lectures, students will be asked to complete case studies, worksheets, or other engagement both individually and in collaboration with other students. These activities are meant to reinforce lecture content.

Career Series Reflection (20 points):

Students will be expected to minimally attend one meeting of the *CLSE Career Series* outside of class time and provide a reflection on the speaker's presentation. The *Series* focuses on the range of skills and careers appropriate for life science majors.

SALG (5 points):

At the end of the course, 5 points will be assigned based on participation in a survey, the Student Assessment of Learning Gains (SALG). Grades on the SALG will be based solely on completion.

Your Final Grade:

Your final grade will be based on the percentage of the 770 points that you earn during the course of the semester as described above. Please note that we do not grade the course on a curve and Carmen does not round averages up to the next nearest percentage point, so 92.11% and 92.97% both earn the grade of A-. Final letter grades will be determined by the university-approved grade scale below:

Grade Scale:

Α	A-	B+	В	B-	C+	С	C-	D+	D	Е
100 -	92.9 –	89.9 –	86.9 –	82.9 –	79.9 –	76.9 –	72.9 –	69.9 –	66.9 –	59.9 –
93.0%	90.0%	87.0%	83.0%	80.0%	77.0%	73.0%	70.0%	67.0%	60.0%	0%

Posting of Grades:

All grades will be posted on Carmen. After grades are posted you have <u>10 working days</u> to challenge any grade or inquire regarding an unposted or missing grade. **After that time, grades are final.** To challenge or inquire about a missing grade, contact your laboratory instructor.

IMPORTANT

Make sure that all of your grades are properly posted on Carmen as you receive them. Challenges about grades, particularly after the end of the semester, will not be entertained after the 10-day grace period.

Late Assignments:

All assignments are due on the date and time prescribed in the course schedule. Late work will not be accepted except in rare (and documentable) circumstances.

Absences (COVID-19):

If you are too ill to take an exam or must miss for another legitimate unscheduled reason, you must contact the Course Coordinator within 24 hours of the exam. Make up exams will be given only to students who produce, at the make up or before, documentation of a legitimate reason (at the time of the absence) for missing the exam. Valid excuses are limited to problems that are beyond the student's control, such as military duty, intercollegiate athletic or academic activities, funerals, etc. Medical excuses will be considered only if you have been treated by a medical professional on the day of the exam (excuses from the student health center website will not be accepted). Lack of transportation, loss of electricity, travel plans, etc. are not considered valid excuses. If you anticipate having to miss an exam due to attendance at a university sanctioned event or other qualifying conflict, you must contact the Course Coordinator at least one week in advance of the exam.

If you have no documentation to support your absence, or your absence from the exam is not for an excused reason, you will still be offered the opportunity for a makeup exam, with a 25% overall deduction on your exam score if arrangements are made within 24 hours of the original exam.

The format of makeup exams is at the discretion of the instructors. <u>All makeup exams must be made up within one week of when the original exam was given.</u>

Note: Check the date and time of the final examination now and make sure that this time does not conflict with your future plans. No early final exams will be given. The only makeup exam will be held on Wednesday, December xx at 9:00 a.m. and is available only in emergency situations and with prior approval of the Course Coordinator.

Make-Up Workshops and Lecture Activities: Both the lecture and workshop are integral parts of this course. If you miss a class, you must contact your instructor (lecture or workshop, as appropriate) within 48 hours of their missed class in order to be eligible to complete a make-up assignment. All make-up work requires a valid written excuse from a doctor, therapist, athletic coach, or other person involved with the absence (preferably before the event occurs, if it's a planned absence). We will consider one absence for every student to be excused without documentation, however students must contact their instructor within 48 hours of their missed workshop to receive the make-up exercise. Therefore, it is essential that you contact your instructor immediately if you miss a workshop, or if you know in advance that you cannot attend class on a specific date. Make-up work must be completed and received within one week of the original assignment date (unless very unusual circumstances apply), or else you forfeit all points for that workshop.

Excused absences include, but are not limited to:

- 2. Illness and injury
- 3. Mental health
- 4. Disability-related concerns
- 5. Military service
- 6. Death in the immediate family
- 7. Religious observance
- 8. Academic field trips
- 9. Participation in university sanctioned concert or athletic event
- 10. Participation in university disciplinary hearings

If you have a reason to miss class that is not listed above, please reach out to the instructor to discuss your options. It is the intention of the Center for Life Sciences Education to remain supportive of the needs of each of our students. Students who do not contact their instructor within <u>48 hours</u> of the missed class will not be eligible for make-up work.

If you are isolating while waiting for a COVID-19 test result, please let me know immediately. Those testing positive for COVID-19 should refer to the Safe and Healthy Buckeyes site for resources. Beyond five days of the required COVID-19 isolation period, I may rely on Student Life Disability Services to establish further reasonable accommodations. You can connect with them at slds@osu.edu; 614-292-3307; or slds.osu.edu.

Accommodation of Special Needs:

The university strives to maintain a healthy and accessible environment to support student learning in and out of the classroom. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let us know immediately so that we can privately discuss options. To establish reasonable accommodations, we may request that you register with Student Life Disability Services. After registration, make arrangements with the Course Coordinator as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. Only the course coordinator is authorized to complete SLDS accommodations. This will help us ensure that your individual needs will be met

appropriately and fairly. SLDS contact information: slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

Religious Accommodations:

Ohio State has had a longstanding practice of making reasonable academic accommodations for students' religious beliefs and practices in accordance with applicable law. In 2023, Ohio State updated its practice to align with new state legislation. Under this new provision, students must be in early communication with their instructors regarding any known accommodation requests for religious beliefs and practices, providing notice of specific dates for which they request alternative accommodations within 14 days after the first instructional day of the course. Instructors in turn shall not question the sincerity of a student's religious or spiritual belief system in reviewing such requests and shall keep requests for accommodations confidential.

With sufficient notice, instructors will provide students with reasonable alternative accommodations with regard to examinations and other academic requirements with respect to students' sincerely held religious beliefs and practices by allowing up to three absences each semester for the student to attend or participate in religious activities. Examples of religious accommodations can include, but are not limited to, rescheduling an exam, altering the time of a student's presentation, allowing make-up assignments to substitute for missed class work, or flexibility in due dates or research responsibilities. If concerns arise about a requested accommodation, instructors are to consult their tenure initiating unit head for assistance.

A student's request for time off shall be provided if the student's sincerely held religious belief or practice severely affects the student's ability to take an exam or meet an academic requirement and the student has notified their instructor, in writing during the first 14 days after the course begins, of the date of each absence. Although students are required to provide notice within the first 14 days after a course begins, instructors are strongly encouraged to work with the student to provide a reasonable accommodation if a request is made outside the notice period. A student may not be penalized for an absence approved under this policy.

If students have questions or disputes related to academic accommodations, they should contact their course instructor, and then their department or college office. For questions or to report discrimination or harassment based on religion, individuals should contact the Office of Institutional Equity.

Policy: Religious Holidays, Holy Days and Observances

Weather or Other Short-Term Closing:

Should in-person classes be canceled, students will be notified as to which alternative methods of teaching will be offered to ensure continuity of instruction for this class. Communication will be via Carmen announcements and course-wide email.

Section Changes:

All section changes and adds are completed by the course coordinator. Due to the need to keep up-to-minute availability of seats in each workshop, the lecturer and workshop instructors are unable to sign any permission forms.

Instructor Feedback and Response Expectations

- **Email response**: The CLSE's expectation of instructors is that emails will be responded to within one business day. If your email is sent during the evening or over the weekend, you may not receive a response until the next business day.
- Class announcements: I will send important class-wide messages through the Announcements tool in Carmen. Please check <u>your notification preferences</u> (go.osu.edu/canvas-notifications) to ensure you receive these messages.

• **Graded assignments:** Assignments will be graded and returned to you within one week after they were due. All scores are posted on Carmen no later than the day the graded assignment is returned.

Course Technology

For help with your password, university e-mail, Carmen, or any other technology issues, questions, or requests, contact the OSU IT Service Desk. Standard support hours are available at https://ocio.osu.edu/help/hours, and support for urgent issues is available 24x7.

• Self-Service and Chat support: http://ocio.osu.edu/selfservice

Phone: 614-688-HELP (4357)
 Email: 8help@osu.edu
 TDD: 614-688-8743

Carmen

- Carmen, Ohio State's Learning Management System, will be used to host materials and activities throughout this course. To access Carmen, visit Carmen.osu.edu. Log in to Carmen using your name.# and password, visit my.osu.edu.
- Help guides on the use of Carmen can be found at https://resourcecenter.odee.osu.edu/carmen
- This online course requires use of Carmen (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.
- Carmen accessibility

CarmenZoom

- Office hours will be held through Ohio State's conferencing platform, CarmenZoom. A separate guide to accessing CarmenZoom and our office hours is posted on the course Carmen page under Files.
- Students may use the audio and video functions if a webcam and microphone are available. If not, there is still a chat function within CarmenZoom for the student to live chat with the professor or TA in the virtual office hours room.
- Carmen Zoom help guide

Turnitin

- Students at The Ohio State University are accountable for the integrity of the work they submit. Therefore, you should be familiar with the guidelines provided by the <u>Committee on Academic Misconduct (COAM)</u> and <u>Section A of OSU's Code of Student Conduct</u> in order to meet the academic expectations concerning appropriate documentation of sources. In addition, OSU has made TurnItIn, a learning tool and plagiarism prevention system, available to instructors. For this class, you will submit your papers to TurnItIn from Carmen. When grading your work, I will interpret the originality report, following <u>Section A of OSU's Code of Student Conduct</u> as appropriate. For more information about TurnItIn, please see <u>the vendor's guide for students</u>. Note that submitted final papers become part of the OSU database.
- Please know that I view TurnItIn first and foremost as a teaching tool to make you a better writer. You will see in your individual originality reports exactly what the instructors see. We WANT you to look at this report as soon as you submit your assignments. If you see an issue, please correct it right away, before we start grading the assignment. You can resubmit without penalty as many times as you want prior to the established due date for any assignment. After the due date, the late policy is in effect.

TopHat

- TopHat is a web-based response system that allows students to use their own devices provide responses in the classroom. This course uses Top Hat to promote active engagement, allow for synchronous feedback, and monitor attendance.
- TopHat help guide

Discussion and Communication Guidelines

The following are expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- Tone and civility: Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online and is not always appreciated in-person. The instructional team work very hard to provide a positive learning experience. Please keep this in mind and remain civilized and respectful in your class communications.
- Citing your sources: When we have academic discussions, please cite your sources to back up what you
 say.

Issue Resolution:

The CLSE believes that student concerns are usually most effectively addressed by the staff closest to the situation. Therefore, students are ordinarily expected to address issues or concerns first with their instructors. If the issue cannot be resolved by your instructor, or for some reason you feel that you absolutely cannot address your concern with your instructor, please feel free to contact the Course Coordinator or Assistant Director Adam Andrews (andrews.171@osu.edu).

Building Emergency Action Plan:

Each building on campus has a Building Emergency Action Plan (BEAP) outlining that specific building's specific procedures to be followed in the event of a range of emergency situations, including fire, weather, terrorism, chemical spills, etc. It is the role of every Buckeye to help keep each other safe and to be aware of these procedures. You can find all of the campus BEAPs at https://dps.osu.edu/beap.

Lyft Ride Smart:

Lyft Ride Smart at Ohio State offers eligible students discounted rides, inside the university-designated <u>service</u> <u>area</u>, from 7 p.m. to 7 a.m. Prices may be impacted by distance, traffic, time of day, special events and prime time surcharges. To qualify for program discounts, users must select "shared ride" when booking in the Lyft app. For more information, visit: https://ttm.osu.edu/ride-smart.

Mental Health:

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Life's Counseling and Consultation Service (CCS) by visiting ccs.osu.edu or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at 614-292-5766 and 24 hour emergency help is also available 24/7 by dialing 988 to reach the Suicide and Crisis Lifeline.

Title IX:

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at http://titleix.osu.edu or by contacting the Ohio State Title IX Coordinator at titleix@osu.edu.

Diversity:

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students

to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

Academic Misconduct:

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed, illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct http://studentlife.osu.edu/csc/. We will adhere to this policy.

- Unless otherwise specified for a particular assignment, all submitted work should be a student's own unique effort. Collaborative efforts are not permitted unless expressly sanctioned for a particular assignment.
- Unless otherwise specified for a particular assignment, use of AI-generated materials for course submissions is not permitted.
- Reusing past work: In general, you are prohibited in university courses from turning in work from a past class to your current class, even if you modify it. If you want to build on past research or revisit a topic you've explored in previous courses, please discuss the situation with me.
- Using others' verbatim words without the use of quotation marks <u>and</u> citation is plagiarism. Paraphrased work requires citation to denote the use of others' ideas. Copying other's words without quotation while using citations is still considered plagiarism.
- Use of any technology during a quiz or exam (including but not limited to cell phones, smart watches, headphones, electronic dictionaries, etc.) is strictly prohibited.

Copyrighted Class Materials:

© The Instructor's lectures and all course materials, including power point presentations, tests, outlines, assignments, and similar materials, are protected by copyright. You may take notes and make copies of course materials for your own use. You may not and may not allow others to reproduce or distribute lecture notes and course materials publicly whether or not a fee is charged without the express written consent of the course instructor or course coordinator.

Course Schedule: Autumn 2025 Schedule and assignments subject to change with as much advance notice as possible

Week	Lecture Topic	Workshop	Assignments Due
	Introduction/	Welcome to Workshops and	
1	Defining the topic: Aging,	Avoiding Plagiarism Activity	
	Longevity, and Senescence		
	Identifying Scientific	Activity: Science vs.	
2	Information: Fact from Fiction,	Pseudoscience

Integrative Skills in Biology Adaptation and Evolutionary Response at Multiple Scales Autumn 2025 – 3 Credit Hours

<u>Lecturer</u>: <u>Course Coordinator</u>:

Email: Center for Life Sciences Education

Office: Email: Student Hours: Office:

other times scheduled by appointment **Phone:**

Class Meeting Schedule:

Lecture: Twice Weekly for 55 minutes

Workshop: Once weekly for 80 minutes; consult your BuckeyeLink schedule for specific time and day

Prerequisites:

Biology 1113, 1114, and Chem 1220, or permission of instructor. Not open to students with credit for 3401, 3501.xx.

Required Course Materials:

- Adaptation and Natural Selection by George Williams, reprint edition, 1996, Princeton University Press. ISBN: 0691026157
- Writing Science in Plain English by Anne E. Greene, 2013, ISBN: 978-0-226-02637-4.
- Beall, CM. 2007. Two routes to functional adaptation: Tibetan and Andean high-altitude natives. PNAS 104:8655-8660
- Migliano, AB et al. 2013. Evolution of the Pygmy Phenotype: Evidence of Positive Selection from Genome-wide Scans in African, Asian, and Melanesian Pygmies. Human Biology. 85:251-284Wessinger, C. A., Hileman, L. C., Rausher, M. D. 2014. Identification of major quantitative trait loci underlying floral pollination syndrome divergence in Penstemon. Phil. Trans. R. Soc. B. https://doi.org/10.1098/rstb.2013.0349
- Fenster, C. B., Armbruster, S. W., Wilson, P. Dudash, M. R., Thomson, J. D. 2004. Pollination Syndromes and Floral Specialization. Ann. Rev. Ecol and Syst. 35, 2004
- Benton MJ. Exploring macroevolution using modern and fossil data. Proc Biol Sci. 2015 Jul 7;282(1810):20150569. doi: 10.1098/rspb.2015.0569. PMID: 26063844; PMCID: PMC4590474.

Credit Hours and Work Expectation:

This is a 3-credit-hour course. According to Ohio State policy, students should expect around 3 hours per week of time spent on direct instruction in addition to 6 hours of homework to receive a grade of C average. <u>ASC Honors</u> provides an excellent guide to scheduling and study expectations.

Course Description:

An adaptation and evolutionary response themed integrative approach to fundamental skills enhancement in the life sciences.

Course Learning Outcomes:

Biology 3501 – Integrative Skills in Biology			
Goals	Expected Learning Outcomes		
	(highlights align to embedded literacies)		
	Successful students are able to		
	1.1 research a topic using a variety of		
	databases and sources of credible and		
Cool 4 Ct. double 1911 double out on the color	relevant information, including primary		
Goal 1: Students will identify and evaluate	literature.		
appropriate primary literature in the life	1.2 analyze the validity of the methods and		
sciences and will compare that information	results of a scientific study.		
with examples in the secondary literature	1.3 evaluate alternative viewpoints and		
and popular press.	assumptions to a scientific study.		
	1.4 compare and contrast information in		
	primary literature with corresponding		
	information in the secondary literature and		
	popular press.		
	2.1 apply scientific writing styles in the		
	creation of a written paper.		
	2.2 apply scientific writing styles and norms in		
	the creation of a scientific poster.		
	2.3 demonstrate effective communication of		
Goal 2: Students will understand and	scientific principles in an oral presentation.		
demonstrate scientific communication	2.4 reflectively use scientific communication		
norms in various modalities.	for a specific purpose, context, and audience		
	using an appropriate genre and modality.		
	2.5 reflect on how to adapt persuasive		
	communication and research strategies to		
	new contexts and evaluate the social and		
	ethical implications of those strategies.		
	3.1 explain basic concepts of statistics and		
	probability.		
	3.2 recognize the importance of statistical		
Goal 3: Students will understand the role of	ideas.		
quantitative analysis, statistics, and	3.3 apply methods needed to analyze and		
probability in scientific research.	critically evaluate statistical arguments.		
	3.4 evaluate the social and ethical		
	implications of data collection and analysis,		
	especially in relation to human subjects.		
Goal 4: Students will develop a critical	4.1 analyze the relationship of theoretical and		
appreciation of the relationship between	applied sciences.		

science and technology and their effect on society.	4.2 recognize how technologies emerge and change.	
•	4.3 critically describe the relationships	
	between technology and society in historical	
	and cultural contexts.	
	4.4 evaluate the social and ethical	
	implications of technological developments.	
	4.5 demonstrate critical thinking and scientific	
	logic in the analysis of natural phenomena	
	and the ethics behind the human involvement	
	in these phenomena.	
	5.1 analyze the interconnectedness of the	
	biological sciences through the lens of a single	
	broad topic.	
Goal 5: Students will understand the	5.2 reflect on the role of Biology in society,	
integration among the biological science	business, industry, and health fields.	
subdisciplines and the role of science in	5.3 become self-directed learners by which	
their lives and across society.	they can independently study biological	
their lives and across society.	content and procedures.	
	5.4 develop an awareness of the careers and	
	professions that rely on knowledge of	
	biological sciences.	

Through these course outcomes, students will demonstrate mastery of the three University literacies expected learning outcomes in addition to the goals specifically aligned to the Biology Major Program.

Data Analysis Literacy			
Goal	Expected Learning Outcomes		
Successful students will meet the goals for either a	Successful students are able to		
Quantitative Data Analysis (A) or Qualitative Data			
Analysis (B) course.	1.1A explain basic concepts of statistics and		
	probability.		
	1.2A apply methods needed to analyze and critically		
	evaluate statistical arguments.		
Quantitative Data Analysis (A) Goal: Successful students develop skills in	1.3A recognize the importance of statistical ideas.		
drawing conclusions and critically evaluating results based on data.	1.4A evaluate the social and ethical implications of data collection and analysis, especially in relation to human subjects.		
Qualitative Data Analysis (B) Goal:	1.1B explain the utility of different approaches to qualitative data analysis.		
Successful students develop skills in drawing conclusions and critically evaluating	1.2B apply key methods and tools in qualitative data analysis.		
results based on data.	1.3B interpret the results of qualitative data analysis to answer research question(s).		

1.4B evaluate the social and ethical implications of
data collection and analysis, especially in relation to
human subjects.

Technology Literacy			
Goal	Expected Learning Outcomes		
	Successful students are able to		
Goal: Successful students develop a critical appreciation of the relations between technologies and their contexts (social, cultural, and historical), and of the range of effects and consequences (legal, ethical, political) produced or enabled by particular technologies.	 1.1 Critically describe the relationships between technology and society in historical and cultural contexts. 1.2 Recognize how technologies emerge and change. 1.3 Evaluate the social and ethical implications of 		
	technology.		

Advanced Writing				
Goal	Expected Learning Outcomes			
Goal 1: Successful students develop advanced skills in inquiry, critical thinking, composing, and communicating for a specific purpose, context, and audience using an appropriate genre and modality.	Successful students are able to 1.1 Investigate and integrate knowledge of the subject, context, and audience with knowledge of genres, conventions and rhetorical choices to advance a particular writing objective.			
	1.2 Use credible and relevant sources of information, evaluate assumptions, and consider alternative viewpoints or hypotheses to express ideas and develop arguments.			
Goal 2: Successful students apply knowledge of writing and research to specific contexts.	2.1 Reflect on how they adapt rhetorical and research strategies they have learned to new contexts.			
	2.2 Develop scholarly, creative, or professional products that are meaningful to them and their audience.			
	2.3 Evaluate social and ethical implications of writing and information literacy practices.			

Grading and Evaluation:

Graded assignments may come in three forms, and students should note the expectations for each in the descriptions of our class assignments below:

- Independent Work (†): Strictly non-collaborative, original-individual work. You may discuss this assignment only with your instructor. Discussions with other individuals, either in person or electronically, are strictly prohibited and constitute academic misconduct.
- Required Collaboration (**): An explicit expectation for collaboration among students either in-class or outside (i.e., group work).
- **Optional Collaboration (** Students are permitted, but not required, to discuss the assignment or ideas with each other. However, all submitted work must be one's original and individual creation.

Assignment	Points	Assignment Type
3 Exams (100 points each)	300	†
Research Paper	100	†
Oral Presentation	50	†
Oral Presentation Peer Review	20	•
Scientific Poster	50	†
Poster Peer Review	15	•
Workshop Activities (8 x 20 points)	160	•
Lecture Activities	50	🚅 titti
Career Series Reflection	20	Ť
SALG	5	†
Total Points Possible	770	

Exams (100 points each):

The exams will largely focus on adaptation and evolutionary response content of the course. While the exams may include some multiple choice or similar question styles, the exams will largely be a short answer in format.

Research Paper (100 points total):

The research paper will focus on current literature in evolution and adaptation research and be submitted individually in four parts and will address skills in researching literature, evaluating sources, and writing scientifically. Students will receive feedback on each portion and be expected to incorporate that feedback into a final paper.

- Annotated Bibliography (15 points)
- Introduction (15 points)
- Rough Draft (40 points)
- Final Draft (30 points)

Oral Presentation and Peer Review (70 points):

Oral presentations are a hallmark of life in the scientific community. Students will present a small portion (\sim 5-7 minutes) of the research comprising their ongoing research paper to their Workshop group (40 points) and provide feedback in the form of peer review to other students (30 points total – 3x10 points).

Scientific Poster and Peer Review (65 points):

Students will present a summary of their research paper in the form of a Scientific Poster, which will be presented to the class during the last lectures in a traditional scientific poster session style event (50 points). Students will be expected to visit multiple posters and provide written feedback in the form of a peer review (15 points).

Workshop Activities (160 points):

During eight of the weekly workshops, students will work both individually and as groups (as designated) to complete active learning activities related to the course content.

Lecture Activities (50 points):

Periodically during select lectures, students will be asked to complete case studies, worksheets, or other engagement both individually and in collaboration with other students. These activities are meant to reinforce lecture content.

Career Series Reflection (20 points):

Students will be expected to minimally attend one meeting of the *CLSE Career Series* outside of class time and provide a reflection on the speaker's presentation. The *Series* focuses on the range of skills and careers appropriate for life science majors.

SALG (5 points):

At the end of the course, 5 points will be assigned based on participation in a survey, the Student Assessment of Learning Gains (SALG). Grades on the SALG will be based solely on completion.

Your Final Grade:

Your final grade will be based on the percentage of the 770 points that you earn during the course of the semester as described above. Please note that we do not grade the course on a curve and Carmen does not round averages up to the next nearest percentage point, so 92.11% and 92.97% both earn the grade of A-. Final letter grades will be determined by the university-approved grade scale below:

Grade Scale:

Α	A-	B+	В	B-	C+	С	C-	D+	D	Е
100 -	92.9 –	89.9 –	86.9 –	82.9 –	79.9 –	76.9 –	72.9 –	69.9 –	66.9 –	59.9 –
93.0%	90.0%	87.0%	83.0%	80.0%	77.0%	73.0%	70.0%	67.0%	60.0%	0%

Posting of Grades:

All grades will be posted on Carmen. After grades are posted you have <u>10 working days</u> to challenge any grade or inquire regarding an unposted or missing grade. **After that time, grades are final.** To challenge or inquire about a missing grade, contact your laboratory instructor.

IMPORTANT

Make sure that all of your grades are properly posted on Carmen as you receive them. Challenges about grades, particularly after the end of the semester, will not be entertained after the 10-day grace period.

Late Assignments:

All assignments are due on the date and time prescribed in the course schedule. Late work will not be accepted except in rare (and documentable) circumstances.

Absences (COVID-19):

If you are too ill to take an exam or must miss for another legitimate unscheduled reason, you must contact the Course Coordinator within 24 hours of the exam. Make up exams will be given only to students who produce, at the make up or before, documentation of a legitimate reason (at the time of the absence) for missing the exam. Valid excuses are limited to problems that are beyond the student's control, such as military duty, intercollegiate athletic or academic activities, funerals, etc. Medical excuses will be considered only if you have been treated by a medical professional on the day of the exam (excuses from the student health center website will not be accepted). Lack of transportation, loss of electricity, travel plans, etc. are not considered valid excuses. If you anticipate having to miss an exam due to attendance at a university sanctioned event or other qualifying conflict, you must contact the Course Coordinator at least one week in advance of the exam.

If you have no documentation to support your absence, or your absence from the exam is not for an excused reason, you will still be offered the opportunity for a makeup exam, with a 25% overall deduction on your exam score if arrangements are made within 24 hours of the original exam.

The format of makeup exams is at the discretion of the instructors. <u>All makeup exams must be made up within one week of when the original exam was given.</u>

Note: Check the date and time of the final examination now and make sure that this time does not conflict with your future plans. No early final exams will be given. The only makeup exam will be held on Wednesday, December xx at 9:00 a.m. and is available only in emergency situations and with prior approval of the Course Coordinator.

Make-Up Workshops and Lecture Activities: Both the lecture and workshop are integral parts of this course. If you miss a class, you must contact your instructor (lecture or workshop, as appropriate) within 48 hours of their missed class in order to be eligible to complete a make-up assignment. All make-up work requires a valid written excuse from a doctor, therapist, athletic coach, or other person involved with the absence (preferably before the event occurs, if it's a planned absence). We will consider one absence for every student to be excused without documentation, however students must contact their instructor within 48 hours of their missed workshop to receive the make-up exercise. Therefore, it is essential that you contact your instructor immediately if you miss a workshop, or if you know in advance that you cannot attend class on a specific date. Make-up work must be completed and received within one week of the original assignment date (unless very unusual circumstances apply), or else you forfeit all points for that workshop.

Excused absences include, but are not limited to:

- 3. Illness and injury
- 4. Mental health
- 5. Disability-related concerns
- 6. Military service
- 7. Death in the immediate family
- 8. Religious observance
- 9. Academic field trips
- 10. Participation in university sanctioned concert or athletic event
- 11. Participation in university disciplinary hearings

If you have a reason to miss class that is not listed above, please reach out to the instructor to discuss your options. It is the intention of the Center for Life Sciences Education to remain supportive of the needs of each of our students. Students who do not contact their instructor within <u>48 hours</u> of the missed class will not be eligible for make-up work.

If you are isolating while waiting for a COVID-19 test result, please let me know immediately. Those testing positive for COVID-19 should refer to the Safe and Healthy Buckeyes site for resources. Beyond five days of the required COVID-19 isolation period, I may rely on Student Life Disability Services to establish further reasonable accommodations. You can connect with them at slds@osu.edu; 614-292-3307; or slds.osu.edu.

Accommodation of Special Needs:

The university strives to maintain a healthy and accessible environment to support student learning in and out of the classroom. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let us know immediately so that we can privately discuss options. To establish reasonable accommodations, we may request that you register with Student Life Disability Services. After registration, make arrangements with the Course Coordinator as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. Only the course coordinator is authorized to complete SLDS accommodations. This will help us ensure that your individual needs will be met

appropriately and fairly. SLDS contact information: slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

Religious Accommodations:

Ohio State has had a longstanding practice of making reasonable academic accommodations for students' religious beliefs and practices in accordance with applicable law. In 2023, Ohio State updated its practice to align with new state legislation. Under this new provision, students must be in early communication with their instructors regarding any known accommodation requests for religious beliefs and practices, providing notice of specific dates for which they request alternative accommodations within 14 days after the first instructional day of the course. Instructors in turn shall not question the sincerity of a student's religious or spiritual belief system in reviewing such requests and shall keep requests for accommodations confidential.

With sufficient notice, instructors will provide students with reasonable alternative accommodations with regard to examinations and other academic requirements with respect to students' sincerely held religious beliefs and practices by allowing up to three absences each semester for the student to attend or participate in religious activities. Examples of religious accommodations can include, but are not limited to, rescheduling an exam, altering the time of a student's presentation, allowing make-up assignments to substitute for missed class work, or flexibility in due dates or research responsibilities. If concerns arise about a requested accommodation, instructors are to consult their tenure initiating unit head for assistance.

A student's request for time off shall be provided if the student's sincerely held religious belief or practice severely affects the student's ability to take an exam or meet an academic requirement and the student has notified their instructor, in writing during the first 14 days after the course begins, of the date of each absence. Although students are required to provide notice within the first 14 days after a course begins, instructors are strongly encouraged to work with the student to provide a reasonable accommodation if a request is made outside the notice period. A student may not be penalized for an absence approved under this policy.

If students have questions or disputes related to academic accommodations, they should contact their course instructor, and then their department or college office. For questions or to report discrimination or harassment based on religion, individuals should contact the Office of Institutional Equity.

Policy: Religious Holidays, Holy Days and Observances

Weather or Other Short-Term Closing:

Should in-person classes be canceled, students will be notified as to which alternative methods of teaching will be offered to ensure continuity of instruction for this class. Communication will be via Carmen announcements and course-wide email.

Section Changes:

All section changes and adds are completed by the course coordinator. Due to the need to keep up-to-minute availability of seats in each workshop, the lecturer and workshop instructors are unable to sign any permission forms.

Instructor Feedback and Response Expectations

- **Email response**: The CLSE's expectation of instructors is that emails will be responded to within one business day. If your email is sent during the evening or over the weekend, you may not receive a response until the next business day.
- Class announcements: I will send important class-wide messages through the Announcements tool in Carmen. Please check <u>your notification preferences</u> (go.osu.edu/canvas-notifications) to ensure you receive these messages.

• **Graded assignments:** Assignments will be graded and returned to you within one week after they were due. All scores are posted on Carmen no later than the day the graded assignment is returned.

Course Technology

For help with your password, university e-mail, Carmen, or any other technology issues, questions, or requests, contact the OSU IT Service Desk. Standard support hours are available at https://ocio.osu.edu/help/hours, and support for urgent issues is available 24x7.

• Self-Service and Chat support: http://ocio.osu.edu/selfservice

Phone: 614-688-HELP (4357)
 Email: 8help@osu.edu
 TDD: 614-688-8743

Carmen

- Carmen, Ohio State's Learning Management System, will be used to host materials and activities throughout this course. To access Carmen, visit Carmen.osu.edu. Log in to Carmen using your name.# and password, visit my.osu.edu.
- Help guides on the use of Carmen can be found at https://resourcecenter.odee.osu.edu/carmen
- This online course requires use of Carmen (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations with your instructor.
- <u>Carmen accessibility</u>

CarmenZoom

- Office hours will be held through Ohio State's conferencing platform, CarmenZoom. A separate guide to accessing CarmenZoom and our office hours is posted on the course Carmen page under Files.
- Students may use the audio and video functions if a webcam and microphone are available. If not, there is still a chat function within CarmenZoom for the student to live chat with the professor or TA in the virtual office hours room.
- Carmen Zoom help guide

Turnitin

- Students at The Ohio State University are accountable for the integrity of the work they submit. Therefore, you should be familiar with the guidelines provided by the <u>Committee on Academic Misconduct (COAM)</u> and <u>Section A of OSU's Code of Student Conduct</u> in order to meet the academic expectations concerning appropriate documentation of sources. In addition, OSU has made TurnItIn, a learning tool and plagiarism prevention system, available to instructors. For this class, you will submit your papers to TurnItIn from Carmen. When grading your work, I will interpret the originality report, following <u>Section A of OSU's Code of Student Conduct</u> as appropriate. For more information about TurnItIn, please see <u>the vendor's guide for students</u>. Note that submitted final papers become part of the OSU database.
- Please know that I view TurnItIn first and foremost as a teaching tool to make you a better writer. You will see in your individual originality reports exactly what the instructors see. We WANT you to look at this report as soon as you submit your assignments. If you see an issue, please correct it right away, before we start grading the assignment. You can resubmit without penalty as many times as you want prior to the established due date for any assignment. After the due date, the late policy is in effect.

TopHat

- TopHat is a web-based response system that allows students to use their own devices provide responses in the classroom. This course uses Top Hat to promote active engagement, allow for synchronous feedback, and monitor attendance.
- TopHat help guide

Discussion and Communication Guidelines

The following are expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- Tone and civility: Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online and is not always appreciated in-person. The instructional team work very hard to provide a positive learning experience. Please keep this in mind and remain civilized and respectful in your class communications.
- Citing your sources: When we have academic discussions, please cite your sources to back up what you say.

Issue Resolution:

The CLSE believes that student concerns are usually most effectively addressed by the staff closest to the situation. Therefore, students are ordinarily expected to address issues or concerns first with their instructors. If the issue cannot be resolved by your instructor, or for some reason you feel that you absolutely cannot address your concern with your instructor, please feel free to contact the Course Coordinator or Assistant Director Adam Andrews (andrews.171@osu.edu).

Building Emergency Action Plan:

Each building on campus has a Building Emergency Action Plan (BEAP) outlining that specific building's specific procedures to be followed in the event of a range of emergency situations, including fire, weather, terrorism, chemical spills, etc. It is the role of every Buckeye to help keep each other safe and to be aware of these procedures. You can find all of the campus BEAPs at https://dps.osu.edu/beap.

Lyft Ride Smart:

Lyft Ride Smart at Ohio State offers eligible students discounted rides, inside the university-designated <u>service</u> <u>area</u>, from 7 p.m. to 7 a.m. Prices may be impacted by distance, traffic, time of day, special events and prime time surcharges. To qualify for program discounts, users must select "shared ride" when booking in the Lyft app. For more information, visit: https://ttm.osu.edu/ride-smart.

Mental Health:

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Life's Counseling and Consultation Service (CCS) by visiting ccs.osu.edu or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at 614-292-5766 and 24 hour emergency help is also available 24/7 by dialing 988 to reach the Suicide and Crisis Lifeline.

Title IX:

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at http://titleix.osu.edu or by contacting the Ohio State Title IX Coordinator at titleix@osu.edu.

Diversity:

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his

or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

Academic Misconduct:

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed, illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct http://studentlife.osu.edu/csc/. We will adhere to this policy.

- Unless otherwise specified for a particular assignment, all submitted work should be a student's own
 unique effort. Collaborative efforts are not permitted unless expressly sanctioned for a particular
 assignment.
- Unless otherwise specified for a particular assignment, use of AI-generated materials for course submissions is not permitted.
- Reusing past work: In general, you are prohibited in university courses from turning in work from a past class to your current class, even if you modify it. If you want to build on past research or revisit a topic you've explored in previous courses, please discuss the situation with me.
- Using others' verbatim words without the use of quotation marks <u>and</u> citation is plagiarism. Paraphrased work requires citation to denote the use of others' ideas. Copying other's words without quotation while using citations is still considered plagiarism.
- Use of any technology during a quiz or exam (including but not limited to cell phones, smart watches, headphones, electronic dictionaries, etc.) is strictly prohibited.

Copyrighted Class Materials:

© The Instructor's lectures and all course materials, including power point presentations, tests, outlines, assignments, and similar materials, are protected by copyright. You may take notes and make copies of course materials for your own use. You may not and may not allow others to reproduce or distribute lecture notes and course materials publicly whether or not a fee is charged without the express written consent of the course instructor or course coordinator.

Course Schedule: Autumn 2025 Schedule and assignments subject to change with as much advance notice as possible

Week	Lecture Topic	Workshop	Assignments Due
1	Introduction/ Defining the topic: Adaptation, Exaptation, and Mechanisms of evolutionary response	Welcome to Workshops and Avoiding Plagiarism Activity	
2	Identifying Scientific Information: Fact from Fiction, From Databases to Google Scholar	Activity: Science vs. Pseudoscience	
3	Form and Function: Understanding Primary Literature	The Norms of scientific writing	Research Paper Annotated Bibliography
4	Understanding the variety of adaptive response	Writing Peer Review Activity	
5	Primary Literature: A case study in Adaptation of human populations to environment:	Activity: Problem set interpreting data on human populations adaptation to high elevation.	Exam 1

	multiple solutions to the same problem		
6	Pollination syndromes: adaptation of multiple floral traits to different pollinators	Activity: Problem set using genetic evidence to understand how flower traits evolve to attract pollinators	Research Paper Introduction
7	Statistics in Scientific Endeavors	Autumn Break – No Workshops	
8	Statistical ethics and selective data	Statistics practice activity	Research Paper Rough Draft
9	Statistical ethics and selective data (cont'd)	Presentation Development	Exam 2
10	Employing Statistics: A case study	Oral Presentations and Peer Review	Oral Presentation Due during assigned Week
11	Constraints on adaptation: genetic, developmental, ecological	Oral Presentations and Peer Review	Peer Reviews due at the end of respective Workshops (x3)
12	Macroevolutionary patterns and adaptation above the species level	Oral Presentations and Peer Review	
13	Technological adaptations and ethics	Activity: Problem set on macroevolutionary patterns and adaptation using animacules	Research Paper Final Draft
14	Technological adaptations and ethics (cont'd)	Thanksgiving Break – No Workshops	Poster Due
15	Poster Presentations	Exam Review	SALG Due
Finals		Final Exam	

Appendix H: Biology 4901 Syllabus

Biology 4901 Biological Capstone Autumn 2025 – 2 Credit Hours

<u>Lecturer</u>: <u>Course Coordinator</u>:

Email: Center for Life Sciences Education

Office: Email:
Student Hours: Office:

other times scheduled by appointment Phone:

Class Meeting Schedule:

Lecture: Twice Weekly for 55 minutes

Prerequisites:

Biology 3501.xx or permission of instructor, and Rank 3 or 4 standing. Not open to students with credit for 3401.

Required Course Materials:

Our textbook will be the primary literature, both that provided to you on Carmen and that which you seek out to contribute to the class discussions.

Credit Hours and Work Expectation:

This is a 2-credit-hour course. According to Ohio State policy, students should expect around 2 hours per week of time spent on direct instruction in addition to 4 hours of homework to receive a grade of C average. <u>ASC Honors</u> provides an excellent guide to scheduling and study expectations.

Course Description:

From the Course Catalog: A topical case study approach to integrating and synthesizing content across the life sciences.

This offering of Biology 4901 will focus on Biotechnology as a theme to address the overarching principles that integrate the life sciences: biochemistry and macromolecules, cell biology, genetics, molecular biology, evolution, phylogenetics, and ecology. Students will understand how these principles interact in complex systems, how humans can manipulate those systems through development of technology, and the impacts of that technology on society.

Course Learning Outcomes:

Biology 4901 – Biological Capstone			
Goals Expected Learning Outcomes			
Goal 1: Students will integrate concepts related to the following overarching themes to analyze	Successful students are able to		
biological phenomena:	1.1 integrate facts and concepts from each of the themes to analyze biological phenomena.		

 Interaction and complexity of biological systems 	1.2 analyze the fundamental interconnectedness of chemistry, physics, mathematics, and biology.
 Evolution Information flow, exchange, and storage Pathways and transformations of energy and matter Structure and function Scientific inquiry Science/technology and society Fundamental interconnectedness of chemistry, physics, mathematics, and biology 	1.3 evaluate and reflect on the ethical implications of scientific and technological development on society.
Goal 2: Students will identify and evaluate primary literature to synthesize a persuasive scientific argument using an appropriate modality.	 2.1 evaluate the assumptions and methods of a study published in primary literature. 2.2 synthesize a persuasive scientific argument integrating multiple overarching themes from Goal 1 in an appropriate modality.
Goal 3: Students will value biology as an integral part of society and their everyday life.	3.1 reflect on the role of biological sciences in society and how that role may be promoted.

Grading and Evaluation:

Graded assignments may come in three forms, and students should note the expectations for each in the descriptions of our class assignments below:

- Independent Work (↑): Strictly non-collaborative, original-individual work. You may discuss this assignment only with your instructor. Discussions with other individuals, either in person or electronically, are strictly prohibited and constitute academic misconduct.
- Required Collaboration (+++): An explicit expectation for collaboration among students either in-class or outside (i.e., group work).
- **Optional Collaboration (**?): Students are permitted, but not required, to discuss the assignment or ideas with each other. However, all submitted work must be one's original and individual creation.

Assignment	Points	Assignment Type
2 Exams (75 points each)	150	†
Research Paper	75	†
Scientific Poster	50	†
Poster Peer Review	15	%
Article Discussions (3 x 10 points)	30	%
Article Evaluations (3 x 25 points)	75	†
SALG	5	†
Total Points Possible	415	

Exams (75 points each):

The exams will largely focus on the biotechnology content of the course. While the exams may include some multiple choice or similar question styles, the exams will largely be a short answer in format.

Research Paper (75 points total):

The research paper will focus on current literature in biotechnology research and be submitted individually in three parts. The paper will address skills in researching literature, evaluating sources, and

writing scientifically. Students will receive feedback on each portion and be expected to incorporate that feedback into a final paper.

- Introduction (10 points)
- Rough Draft (35 points)
- Final Draft (30 points)

Scientific Poster and Peer Review (65 points):

Students will present a summary of their research paper in the form of a Scientific Poster, which will be presented to the class during the last lectures in a traditional scientific poster session style event (50 points). Students will be expected to visit multiple posters and provide written feedback in the form of a peer review (15 points).

Article Discussions (3 x 10 = 30 points):

In multiple lectures, students will be expected to come prepared to discuss an assigned article and actively and in a meaningful way contribute to the discussion during at least three discussions. Participation will be monitored and assessed for credit.

Article Evaluations $(3 \times 25 = 75 \text{ points})$:

On three occasions noted in the course schedule, students will be asked to seek out a recent journal article, then provide a summary and evaluation of the article for a lay audience.

SALG (5 points):

At the end of the course, 5 points will be assigned based on participation in a survey, the Student Assessment of Learning Gains (SALG). Grades on the SALG will be based solely on completion.

Your Final Grade:

Your final grade will be based on the percentage of the 415 points that you earn during the course of the semester as described above. Please note that we do not grade the course on a curve and Carmen does not round averages up to the next nearest percentage point, so 92.11% and 92.97% both earn the grade of A-. Final letter grades will be determined by the university-approved grade scale below:

Grade Scale:

Α	A-	B+	В	B-	C+	С	C-	D+	D	E
100 -	92.9 –	89.9 –	86.9 –	82.9 –	79.9 –	76.9 –	72.9 –	69.9 –	66.9 –	59.9 –
93.0%	90.0%	87.0%	83.0%	80.0%	77.0%	73.0%	70.0%	67.0%	60.0%	0%

Posting of Grades:

All grades will be posted on Carmen. After grades are posted you have <u>10 working days</u> to challenge any grade or inquire regarding an unposted or missing grade. **After that time, grades are final.** To challenge or inquire about a missing grade, contact your laboratory instructor.

IMPORTANT

Make sure that all of your grades are properly posted on Carmen as you receive them. Challenges about grades, particularly after the end of the semester, will not be entertained after the 10-day grace period.

Late Assignments:

All assignments are due on the date and time prescribed in the course schedule. Late work will not be accepted except in rare (and documentable) circumstances.

Absences:

If you are too ill to take an exam or must miss for another legitimate unscheduled reason, you must contact the Course Coordinator within 24 hours of the exam. Make up exams will be given only to students who produce, at the make up or before, documentation of a legitimate reason (at the time of the absence) for missing the exam.

Valid excuses are limited to problems that are beyond the student's control, such as military duty, intercollegiate athletic or academic activities, funerals, etc. Medical excuses will be considered only if you have been treated by a medical professional on the day of the exam (excuses from the student health center website will not be accepted). Lack of transportation, loss of electricity, travel plans, etc. are not considered valid excuses. If you anticipate having to miss an exam due to attendance at a university sanctioned event or other qualifying conflict, you must contact the Course Coordinator at least one week in advance of the exam.

If you have no documentation to support your absence, or your absence from the exam is not for an excused reason, you will still be offered the opportunity for a makeup exam, with a 25% overall deduction on your exam score if arrangements are made within 24 hours of the original exam.

The format of makeup exams is at the discretion of the instructors. <u>All makeup exams must be made up within</u> one week of when the original exam was given.

Note: Check the date and time of the final examination now and make sure that this time does not conflict with your future plans. No early final exams will be given. The only makeup exam will be held on Wednesday, December xx at 9:00 a.m. and is available only in emergency situations and with prior approval of the Course Coordinator.

Excused absences include, but are not limited to:

- 1. Illness and injury
- 2. Mental health
- 3. Disability-related concerns
- 4. Military service
- 5. Death in the immediate family
- 6. Religious observance
- 7. Academic field trips
- 8. Participation in university sanctioned concert or athletic event
- 9. Participation in university disciplinary hearings

If you have a reason to miss class that is not listed above, please reach out to the instructor to discuss your options. It is the intention of the Center for Life Sciences Education to remain supportive of the needs of each of our students. Students who do not contact their instructor within 48 <u>hours</u> of the missed class will not be eligible for make-up work.

If you are isolating while waiting for a COVID-19 test result, please let me know immediately. Those testing positive for COVID-19 should refer to the Safe and Healthy Buckeyes site for resources. Beyond five days of the required COVID-19 isolation period, I may rely on Student Life Disability Services to establish further reasonable accommodations. You can connect with them at slds@osu.edu; 614-292-3307; or slds.osu.edu.

Accommodation of Special Needs:

The university strives to maintain a healthy and accessible environment to support student learning in and out of the classroom. If you anticipate or experience academic barriers based on your disability (including mental health, chronic, or temporary medical conditions), please let us know immediately so that we can privately discuss options. To establish reasonable accommodations, we may request that you register with Student Life Disability Services. After registration, make arrangements with the Course

Coordinator as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. Only the course coordinator is authorized to complete SLDS accommodations. This will help us ensure that your individual needs will be met appropriately and fairly. SLDS contact information: slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

Religious Accommodations:

Ohio State has had a longstanding practice of making reasonable academic accommodations for students' religious beliefs and practices in accordance with applicable law. In 2023, Ohio State updated its practice to align with new state legislation. Under this new provision, students must be in early communication with their instructors regarding any known accommodation requests for religious beliefs and practices, providing notice of specific dates for which they request alternative accommodations within 14 days after the first instructional day of the course. Instructors in turn shall not question the sincerity of a student's religious or spiritual belief system in reviewing such requests and shall keep requests for accommodations confidential.

With sufficient notice, instructors will provide students with reasonable alternative accommodations with regard to examinations and other academic requirements with respect to students' sincerely held religious beliefs and practices by allowing up to three absences each semester for the student to attend or participate in religious activities. Examples of religious accommodations can include, but are not limited to, rescheduling an exam, altering the time of a student's presentation, allowing make-up assignments to substitute for missed class work, or flexibility in due dates or research responsibilities. If concerns arise about a requested accommodation, instructors are to consult their tenure initiating unit head for assistance.

A student's request for time off shall be provided if the student's sincerely held religious belief or practice severely affects the student's ability to take an exam or meet an academic requirement and the student has notified their instructor, in writing during the first 14 days after the course begins, of the date of each absence. Although students are required to provide notice within the first 14 days after a course begins, instructors are strongly encouraged to work with the student to provide a reasonable accommodation if a request is made outside the notice period. A student may not be penalized for an absence approved under this policy.

If students have questions or disputes related to academic accommodations, they should contact their course instructor, and then their department or college office. For questions or to report discrimination or harassment based on religion, individuals should contact the Office of Institutional Equity.

Policy: Religious Holidays, Holy Days and Observances

Weather or Other Short-Term Closing:

Should in-person classes be canceled, students will be notified as to which alternative methods of teaching will be offered to ensure continuity of instruction for this class. Communication will be via Carmen announcements and course-wide email.

Instructor Feedback and Response Expectations

Email response: The CLSE's expectation of instructors is that emails will be responded to within one business
day. If your email is sent during the evening or over the weekend, you may not receive a response until the
next business day.

- Class announcements: I will send important class-wide messages through the Announcements tool in Carmen. Please check <u>your notification preferences</u> (go.osu.edu/canvas-notifications) to ensure you receive these messages.
- **Graded assignments:** Assignments will be graded and returned to you within one week after they were due. All scores are posted on Carmen no later than the day the graded assignment is returned.

Mental Health:

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. The Ohio State University offers services to assist you with addressing these and other concerns you may be experiencing. If you or someone you know are suffering from any of the aforementioned conditions, you can learn more about the broad range of confidential mental health services available on campus via the Office of Student Life's Counseling and Consultation Service (CCS) by visiting ccs.osu.edu or calling 614-292-5766. CCS is located on the 4th Floor of the Younkin Success Center and 10th Floor of Lincoln Tower. You can reach an on call counselor when CCS is closed at 614-292-5766 and 24 hour emergency help is also available 24/7 by dialing 988 to reach the Suicide and Crisis Lifeline.

Title IX:

Title IX makes it clear that violence and harassment based on sex and gender are Civil Rights offenses subject to the same kinds of accountability and the same kinds of support applied to offenses against other protected categories (e.g., race). If you or someone you know has been sexually harassed or assaulted, you may find the appropriate resources at http://titleix.osu.edu or by contacting the Ohio State Title IX Coordinator at titleix@osu.edu.

Diversity:

The Ohio State University affirms the importance and value of diversity in the student body. Our programs and curricula reflect our multicultural society and global economy and seek to provide opportunities for students

to learn more about persons who are different from them. We are committed to maintaining a community that recognizes and values the inherent worth and dignity of every person; fosters sensitivity, understanding, and mutual respect among each member of our community; and encourages each individual to strive to reach his or her own potential. Discrimination against any individual based upon protected status, which is defined as age, color, disability, gender identity or expression, national origin, race, religion, sex, sexual orientation, or veteran status, is prohibited.

Academic Misconduct:

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term "academic misconduct" includes all forms of student academic misconduct wherever committed, illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct http://studentlife.osu.edu/csc/. We will adhere to this policy.

- Unless otherwise specified for a particular assignment, all submitted work should be a student's own unique effort. Collaborative efforts are not permitted unless expressly sanctioned for a particular assignment.
- Unless otherwise specified for a particular assignment, use of Al-generated materials for course submissions is not permitted.
- Reusing past work: In general, you are prohibited in university courses from turning in work from a past class to your current class, even if you modify it. If you want to build on past research or revisit a topic you've explored in previous courses, please discuss the situation with me.
- Using others' verbatim words without the use of quotation marks <u>and</u> citation is plagiarism. Paraphrased work requires citation to denote the use of others' ideas. Copying other's words without quotation while using citations is still considered plagiarism.
- Use of any technology during a quiz or exam (including but not limited to cell phones, smart watches, headphones, electronic dictionaries, etc.) is strictly prohibited.

Copyrighted Class Materials:

© The Instructor's lectures and all course materials, including power point presentations, tests, outlines, assignments, and similar materials, are protected by copyright. You may take notes and make copies of course materials for your own use. You may not and may not allow others to reproduce or distribute lecture notes and course materials publicly whether or not a fee is charged without the express written consent of the course instructor or course coordinator.

* Full text of program learning goals:

- **1.1** Describe the hierarchical relationship between structure and function at all levels: molecular, cellular, and organismic.
- 1.2 Diagram, explain, and contrast the major cellular processes in Archaea, bacteria, and eukaryotes.
- $\textbf{1.3} \ \ \text{Differentiate types of biological macromolecules and compare their contributions to cellular structure and function.}$
- **1.4** Apply the principles of genetics and describe the flow of genetic information.
- 1.5 Explain changes in organisms through time by applying the principles of evolutionary biology.
- **1.6** Demonstrate how relationships among living things are understood through taxonomy and phylogenetic analysis.
- 1.7 Describe ecological relationships between organisms and their environment.
- 2.1 Apply the scientific process, including designing and conducting experiments and testing hypotheses.

 Use laboratory equipment, employ safe laboratory practices, and adapt tools such as laboratory notebooks and spreadsheets to organize and analyze
- **2.2** data associated with scientific processes.
- 2.3 Retrieve information from the life sciences literature; read, understand, and critically review scientific papers.
- **2.4** Prepare oral and written reports following a recognized scientific format.
- **2.5** Develop an awareness of the careers and professions that rely on knowledge of biological sciences.
- 3.1 Integrate biological knowledge in discussions of society and everyday life
