Hi Jennifer,

We appreciate the opportunity to clarify our response about the instructional time abroad. This course is taught by two faculty members (resident directors) both at the Columbus campus and abroad in The Bahamas. As Jill indicated, we are with the students the entire time. For labs, this includes instruction in the field before, during and after the field exercises. And in the classroom, this includes seminars, demonstrations, and facilitated discussions by the faculty instructors.

Please let us know if you require additional information.

Sincerely,
Liz
