Good morning, Natacha & John,

After the CLSE Curriculum Committee approved Biology 3730 (then titled *Darwinian Medicine*), I sent the course to Anthropology for concurrence. They denied the request on the grounds that the course was too similar to their own Anthro 5600. I've been working with the instructors of that course to revise 3730 in a way that keeps the theme while approaching the topic differently than they do. I believe we've found that path that I and they are comfortable with. However, before I send the course back to the CLSE CC for review, I want to make sure it doesn't run afoul of concurrence with either EEOB or Microbiology.

You'll find the revised syllabus attached. I would appreciate your review and consideration for concurrence.

Thank you!
Adam
