Course Change Information

What change is being proposed? (If more than one, what changes are being proposed?)

to increase the course credit hours to 4 and approve this course as a high-impact GE course in the Health and Wellbeing theme

What is the rationale for the proposed change(s)?

this will increase the impact and utility of this course for students across the university

What are the programmatic implications of the proposed change(s)?

(e.g. program requirements to be added or removed, changes to be made in available resources, effect on other programs that use the course)?

none

Is approval of the request contingent upon the approval of other course or curricular program request? No

Is this a request to withdraw the course? No

2281 Kenny Road, Suite 450 | Columbus, Ohio 43210
- **Office/Student hours:** by appointment
- **Preferred means of communication:**
 - My preferred method of communication for questions is **email**.

Course Prerequisites

BIO1113 or equivalent course

Your completion of the prerequisite coursework is evidence that you all have the capability of succeeding in this course with some guidance through potential bottlenecks and we encourage you to reach out to your peers, TAs, and instructors when you experience these bottlenecks. Successful scientific investigation requires the collaboration of diverse perspectives to overcome these obstacles.

Course Description

In this course we will discuss the ongoing quest for a cure for cancer, including recent investigations in how cancer is treated, prevented and detected in collaboration with Pelotonia: a philanthropic organization local to Columbus with the mission to improve health outcomes in cancer patients by mobilizing the community of cancer patients, caregivers, and advocates to fundraise for cancer research here at The Ohio State University. As in many quests, cancer has proven an evasive and adaptable villain and our heroic cancer patients, advocates, researchers, and healthcare providers face additional obstacles in the form of cancer health disparities. You will be introduced to this ongoing saga through twice weekly in-person discussions on what cancer is and why it is so difficult to treat while reading research articles on the cutting-edge cancer therapy technologies and finishing with a series of reflections on cancer wellbeing and resiliency. About half of our effort will also go towards collaborating with Pelotonia to better understand the various cancer “questers” while creating a social media campaign on a cancer wellness innovation. I hope that after the course you will have the knowledge and skills to write your own chapter in this epic tale of the quest for the cancer cure.

Learning Outcomes

By the end of this course, you should successfully be able to:

- Understand the history and key scientific developments in the ongoing quest for a cure for cancer.
- Analyze research articles investigating the latest discoveries and technologies in cancer therapy, detection, prevention, and equity.
- Consider furthering health and wellbeing against cancer as an advocate, researcher, and/or healthcare professional.

How This Course Works

Mode of delivery: There are two required weekly in-person lectures in Parks Hall 111 each week on Mondays and Wednesdays from 4:10-5:05 pm that will revolve around Hypothes.is readings on Carmen. The rest of your time will be working with Pelotonia in interviewing cancer “questers” and developing your research project that can be completed around your own schedule during the week.

Pace of online activities: This course is divided into modules containing weekly assignments that are released one week ahead of time. You are expected to keep pace with pre-work for in-person lectures but you may schedule your efforts freely within that time frame.

Credit hours and work expectations: This is a 4 credit-hour course. According to [Ohio State bylaws on instruction](http://go.osu.edu/credithours) (go.osu.edu/credithours), students should expect around 4 hours per week of time spent on direct instruction (instructor content and Pelotonia service activities, for example) in addition to 8 hours of homework (reading and assignment preparation, for example) to receive a grade of C average.

Attendance and participation requirements: Research shows regular participation is one of the highest predictors of success. With that in mind, I have the following expectations for everyone’s participation:

- **Participating in online activities for attendance: at least once per week**
You are expected to log in to the course in Carmen every week to determine weekly assignments. During most weeks you will probably log in many times to access Hypothes.is pre-work.
- **In-person lectures: twice per week**
You are required to attend the scheduled Mo/We 4:10-5:05 pm lectures every week. Full credit for each lecture requires participation in the TopHat questions and speaking when prompted during discussion. Unwillingness to participate in lectures will result in a written follow-up from the instructor before non-attendance based participation points are deducted. If you have a medical, family, or work situation that might cause you to miss a lecture, discuss it with Dr. Denton *as soon as possible*.
- **Participating in Hypothes.is: twice per week**
As part of your participation, each week you can expect to post at least twice on videos and articles on Hypothes.is in preparation for our in-person lectures. Full credit for each Hypothes.is reading requires answering one of the highlighted questions that was not already answered by the designated number of students, making your own annotation, and replying to a peer’s annotation.
- **Service learning at Pelotonia headquarters: ~once per week**
The service-learning component of this course will be through spending approximately half your time (~2 hours/week) at the Pelotonia headquarters at 2281 Kenny Rd Suite 450, Columbus, OH 43210 working on your cancer “quester” interviews or your social media campaign on a cancer wellness innovation.

Course Technologies

Required Equipment

- **Computer:** current Mac (MacOS) or PC (Windows 10) with high-speed internet connection
- **Other:** a mobile device (smartphone or tablet) to use for BuckeyePass authentication

If you do not have access to the technology you need to succeed in this class, review options for technology and internet access at go.osu.edu/student-tech-access.

Required Software

Microsoft Office 365: All Ohio State students are now eligible for free Microsoft Office 365. Visit the [installing Office 365](https://go.osu.edu/office365help) (go.osu.edu/office365help) help article for full instructions.

CarmenCanvas Access

You will need to use [BuckeyePass](https://buckeyepass.osu.edu) (buckeyepass.osu.edu) multi-factor authentication to access your courses in Carmen. To ensure that you are able to connect to Carmen at all times, it is recommended that you do each of the following:

- Register multiple devices in case something happens to your primary device. Visit the [BuckeyePass - Adding a Device](https://go.osu.edu/add-device) (go.osu.edu/add-device) help article for step-by-step instructions.
- Request passcodes to keep as a backup authentication option. When you see the Duo login screen on your computer, click **Enter a Passcode** and then click the **Text me new codes** button that appears. This will text you ten passcodes good for 365 days that can each be used once.
- [Install the Duo Mobile application](https://go.osu.edu/install-duo) (go.osu.edu/install-duo) on all of your registered devices for the ability to generate one-time codes in the event that you lose cell, data, or Wi-Fi service.

If none of these options will meet the needs of your situation, you can contact the IT Service Desk at [614-688-4357 \(HELP\)](tel:614-688-4357) and IT support staff will work out a solution with you.

Technology Skills Needed for This Course

- Basic computer and web-browsing skills
- [Navigating CarmenCanvas](https://go.osu.edu/canvasstudent) (go.osu.edu/canvasstudent)

Technology Support

For help with your password, university email, CarmenCanvas, or any other technology issues, questions or requests, contact the IT Service Desk, which offers 24-hour support, seven days a week.

- **Self Service and Chat:** go.osu.edu/it
- **Phone:** [614-688-4357 \(HELP\)](tel:614-688-4357)
- **Email:** servicedesk@osu.edu

Grading and Faculty Response

How Your Grade is Calculated

Assignment Category	Points
In-Person Lecture TopHat/Discussions	270 pts (38.6%)
Hypothesis Pre-Work	230 pts (32.9%)
Interview a Cancer Quester	50 pts (7.1%)
Research Presentation	150 pts in total (21.4%)

See [Course Schedule](#) for due dates.

Descriptions of Major Course Assignments

In-Person Lecture TopHat/Discussions

Description: Primary assessment of your understanding of the course concepts will be through in-person discussions between your instructors and peers. TopHat questions and short lectures will prompt student discussions on cancer health and wellbeing; be sure to bring a phone or computer to complete TopHat questions on during lecture. TopHat poll questions will be for instructors to anonymously gauge any particular topics that should be addressed to improve student comprehension. Full credit for each in-person lecture requires participation in any TopHat questions or small group discussions prompted in any given lecture.

Carmen Hypothes.is Pre-Work

Description: In preparation for our in-person lectures, you will be assigned short readings and videos introducing cancer treatment, prevention, detection, and equity concepts. We will complete social readings via Hypothes.is, which can be accessed through the assignment page for each reading on Carmen Canvas. The majority of these readings will involve breaking down research papers' background and methodology one evening then results and conclusions by the next evening. Full credit for each Hypothes.is reading requires answering one of the highlighted assessments that was not already answered by the maximum number of respondents, making your own annotation, and replying to a peer's annotation.

Interview a Cancer Quester

Description: To get an understanding of the many facets of cancer wellness you will collaborate with Pelotonia to interview a cancer quester on how they contribute to the quest for the cure. You can request an interview from a cancer healthcare professional (oncologist, pharmacist, nurse, radiologist, etc.), a cancer researcher, or a cancer advocate (fundraising staff, politician, community leader, etc.) sponsored by Pelotonia. This will also involve obtaining interview skill training from Pelotonia staff prior to your quester interview and a checkpoint to validate your interview impact report with your interviewee before submitting a ~2 page reflection on the interview through the Interview a Cancer Quester assignment page.

Social Media Campaign

Description: To demonstrate your understanding of the ongoing quest for the cure, you will also collaborate with Pelotonia staff in creating a social media campaign presentation on one of the cancer wellness innovations sponsored by Pelotonia. There will be a first checkpoint partway through the semester to choose a research article that will be the main focus of your presentation, a second checkpoint to annotate your paper of interest and review a peer's annotated paper, a third to outline your social media campaign with training from Pelotonia staff, and lastly submit the recorded social media presentation on the Social Media Campaign discussion board. The final discussions of the course will consist of a Gallery Walk to provide Question & Answers with peers and Pelotonia stakeholders.

Academic integrity and collaboration: You will be expected to provide your own comments for the Hypothes.is Pre-Work; you will not receive credit for copy/pasting comments that your peers have posted. Likewise, you may not use a proxy or have someone else answer TopHat questions, write the interview assignment, or produce the social media presentation on your behalf. If you have any doubts on whether an action is potentially academic misconduct, then conduct Dr. Denton for verification.

Late Assignments

Hypothes.is Pre-Work will be due 11:59 pm the night before its corresponding in-person lecture; refer to Carmen and the class schedule for details on due dates. Due to the collaborative nature of the in-person lectures, we will not be able to accept late Hypothes.is assessments or arrange make-up TopHat questions after lecture. Cancer quester interview and social media campaign checkpoints submitted late will be penalized 10% of the maximum score plus an additional 10% for every 24 hours passed the due date a checkpoint is submitted (i.e. a checkpoint worth 20 points submitted 30 hours late will be penalized 20% or 4 points from the final grade). Excused absences/extensions for medical, family, or work emergencies will be coordinated on a case-by-case basis and must be communicated to Dr. Denton via email as soon as possible.

Instructor Feedback and Response Time

We are providing the following list to give you an idea of my intended availability throughout the course. Remember that you can call [614-688-4357 \(HELP\)](tel:614-688-4357) at any time if you have a

technical problem.

- **Preferred contact method:** If you have a question, please contact Dr. Denton first through email. He will reply to emails within **24 hours on days when class is in session at the university**.
- **Class announcements:** We will send all important class-wide messages through the Announcements tool in CarmenCanvas. Please check [your notification preferences](https://go.osu.edu/canvas-notifications) (go.osu.edu/canvas-notifications) to ensure you receive these messages.
- **Grading and feedback:** For participation grades, we will try to provide feedback and grades within **seven days** of the lecture.

Grading Scale

93–100: A
90–92.9: A-
87–89.9: B+
83–86.9: B
80–82.9: B-
77–79.9: C+
73–76.9: C
70–72.9: C-
67–69.9: D+
60–66.9: D
Below 60: E

Other Course Policies

Communication Guidelines

The following are my expectations for how we should communicate as a class. Above all, please remember to be respectful and thoughtful.

- **Writing style:** Remember to write using good grammar, spelling, and punctuation. A more conversational tone is fine for non-academic topics.
- **Tone and civility:** Let's maintain a supportive learning community where everyone feels safe and where people can disagree amicably. Remember that sarcasm doesn't always come across online. I will provide specific guidance for discussions on controversial or personal topics.
- **Citing your sources:** When you reference a research article or outside resource in your assignments, please cite your sources to verify your claims. For online sources, also include a link.
- **Technical Issues:** If you encounter a technical issue with Carmen, contact the IT Service Desk at go.osu.edu/it or 614-688-4357 (HELP). Problems with TopHat can be addressed via the TopHat student support page: <https://support.tophat.com/s/>. Problems with Hypothes.is can be addressed via the Hypothes.is help center: <https://web.hypothes.is/help/>. If issues continue, contact me after the lecture to discuss how to restore participation in the course. I may not be able to address more complex technical issues during a lecture.
- **Preparation:** Come to the lectures having completed any Hypothes.is Pre-Work and be ready to have open, civil, and supportive discussions in lecture.
- **Participation:** During lecture you are free to interrupt me with questions pertaining to the lecture material. If you are unsure if your question pertains to the lecture then please follow up with me afterwards to make sure your questions are answered. Plan to be attentive during the entire lecture, as there will be TopHat questions and discussions throughout the lecture.

If you have any concerns about participating in class or working at the Pelotonia headquarters, please let me know. My goal is to create a safe environment where we can benefit from seeing each other and connecting, but I want to prioritize your safety and well-being.

Academic Integrity Policy

See [Descriptions of Major Course Assignments](#) for specific guidelines about collaboration and academic integrity in the context of this online class.

Ohio State's Academic Integrity Policy

Academic integrity is essential to maintaining an environment that fosters excellence in teaching, research, and other educational and scholarly activities. Thus, The Ohio State

University and the Committee on Academic Misconduct (COAM) expect that all students have read and understand the university's [Code of Student Conduct](http://studentconduct.osu.edu) (studentconduct.osu.edu), and that all students will complete all academic and scholarly assignments with fairness and honesty. Students must recognize that failure to follow the rules and guidelines established in the university's *Code of Student Conduct* and this syllabus may constitute "Academic Misconduct."

The Ohio State University's *Code of Student Conduct* (Section 3335-23-04) defines academic misconduct as: "Any activity that tends to compromise the academic integrity of the university or subvert the educational process." Examples of academic misconduct include (but are not limited to) plagiarism, collusion (unauthorized collaboration), copying the work of another student, and possession of unauthorized materials during an examination. Ignorance of the university's *Code of Student Conduct* is never considered an excuse for academic misconduct, so I recommend that you review the *Code of Student Conduct* and, specifically, the sections dealing with academic misconduct.

If I suspect that a student has committed academic misconduct in this course, I am obligated by university rules to report my suspicions to the Committee on Academic Misconduct. If COAM determines that you have violated the university's Code of Student Conduct (i.e., committed academic misconduct), the sanctions for the misconduct could include a failing grade in this course and suspension or dismissal from the university. If you have any questions about the above policy or what constitutes academic misconduct in this course, please contact me.

Other sources of information on academic misconduct (integrity) to which you can refer include:

- [Committee on Academic Misconduct](http://go.osu.edu/coam) (go.osu.edu/coam)
- [Ten Suggestions for Preserving Academic Integrity](http://go.osu.edu/ten-suggestions) (go.osu.edu/ten-suggestions)
- [Eight Cardinal Rules of Academic Integrity](http://go.osu.edu/cardinal-rules) (go.osu.edu/cardinal-rules)

Copyright for Instructional Materials

The materials used in connection with this course may be subject to copyright protection and are only for the use of students officially enrolled in the course for the educational purposes associated with the course. Copyright law must be considered before copying, retaining, or disseminating materials outside of the course.

Creating an Environment Free from Harassment, Discrimination, and Sexual Misconduct

The Ohio State University is committed to building and maintaining a community to reflect diversity and to improve opportunities for all. All Buckeyes have the right to be free from harassment, discrimination, and sexual misconduct. Ohio State does not discriminate on the

basis of age, ancestry, color, disability, ethnicity, gender, gender identity or expression, genetic information, HIV/AIDS status, military status, national origin, pregnancy (childbirth, false pregnancy, termination of pregnancy, or recovery therefrom), race, religion, sex, sexual orientation, or protected veteran status, or any other bases under the law, in its activities, academic programs, admission, and employment. Members of the university community also have the right to be free from all forms of sexual misconduct: sexual harassment, sexual assault, relationship violence, stalking, and sexual exploitation.

To report harassment, discrimination, sexual misconduct, or retaliation and/or seek confidential and non-confidential resources and supportive measures, contact the Office of Institutional Equity:

1. Online reporting form at equity.osu.edu,
2. Call 614-247-5838 or TTY 614-688-8605,
3. Or email equity@osu.edu

The university is committed to stopping sexual misconduct, preventing its recurrence, eliminating any hostile environment, and remedying its discriminatory effects. All university employees have reporting responsibilities to the Office of Institutional Equity to ensure the university can take appropriate action:

- All university employees, except those exempted by legal privilege of confidentiality or expressly identified as a confidential reporter, have an obligation to report incidents of sexual assault immediately.
- The following employees have an obligation to report all other forms of sexual misconduct as soon as practicable but at most within five workdays of becoming aware of such information: 1. Any human resource professional (HRP); 2. Anyone who supervises faculty, staff, students, or volunteers; 3. Chair/director; and 4. Faculty member.

Your Mental Health

As a student you may experience a range of issues that can cause barriers to learning, such as strained relationships, increased anxiety, alcohol/drug problems, feeling down, difficulty concentrating and/or lack of motivation. These mental health concerns or stressful events may lead to diminished academic performance or reduce a student's ability to participate in daily activities. No matter where you are engaged in distance learning, The Ohio State University's Student Life Counseling and Consultation Service (CCS) is here to support you. If you find yourself feeling isolated, anxious or overwhelmed, [on-demand mental health resources](https://go.osu.edu/ccsondemand) (go.osu.edu/ccsondemand) are available. You can reach an on-call counselor when CCS is closed at [614- 292-5766](tel:6142925766). **24-hour emergency help** is available through the [National Suicide Prevention Lifeline website](https://www.suicidepreventionlifeline.org) (suicidepreventionlifeline.org) or by calling [1-800-273-8255\(TALK\)](tel:18002738255). [The Ohio State Wellness app](https://go.osu.edu/wellnessapp) (go.osu.edu/wellnessapp) is also a great resource.

Accessibility Accommodations for Students with Disabilities

Requesting Accommodations

The university strives to make all learning experiences as accessible as possible. If you anticipate or experience academic barriers based on your disability including mental health, chronic or temporary medical conditions, please let me know immediately so that we can privately discuss options. To establish reasonable accommodations, I may request that you register with [Student Life Disability Services \(SLDS\)](#). After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. In light of the current pandemic, students seeking to request COVID-related accommodations may do so through the university's request process, managed by Student Life Disability Services.

Disability Services Contact Information

- Phone: [614-292-3307](tel:614-292-3307)
- Website: slds.osu.edu
- Email: slds@osu.edu
- In person: [Baker Hall 098, 113 W. 12th Avenue](#)

Accessibility of Course Technology

This online course requires use of CarmenCanvas (Ohio State's learning management system) and other online communication and multimedia tools. If you need additional services to use these technologies, please request accommodations as early as possible.

- [CarmenCanvas accessibility](http://go.osu.edu/canvas-accessibility) (go.osu.edu/canvas-accessibility)
- Streaming audio and video
- [CarmenZoom accessibility](http://go.osu.edu/zoom-accessibility) (go.osu.edu/zoom-accessibility)

GE Theme course submission worksheet: Health & Wellbeing

Overview

Courses in the GE Themes aim to provide students with opportunities to explore big picture ideas and problems within the specific practice and expertise of a discipline or department. Although many Theme courses serve within disciplinary majors or minors, by requesting inclusion in the General Education, programs are committing to the incorporation of the goals of the focal theme and the success and participation of students from outside of their program.

Each category of the GE has specific learning goals and Expected Learning Outcomes (ELOs) that connect to the big picture goals of the program. ELOs describe the knowledge or skills students should have by the end of the course. Courses in the GE Themes must meet the ELOs common for **all** GE Themes and those specific to the Theme, in addition to any ELOs the instructor has developed specific to that course. All courses in the GE must indicate that they are part of the GE and include the Goals and ELOs of their GE category on their syllabus.

The prompts in this form elicit information about how this course meets the expectations of the GE Themes. The form will be reviewed by a group of content experts (the Theme Advisory) and by a group of curriculum experts (the Theme Panel), with the latter having responsibility for the ELOs and Goals common to all themes (those things that make a course appropriate for the GE Themes) and the former having responsibility for the ELOs and Goals specific to the topic of **this** Theme.

Briefly describe how this course connects to or exemplifies the concept of this Theme (Health & Wellbeing)

In a sentence or two, explain how this class “fits” within the focal Theme. This will help reviewers understand the intended frame of reference for the course-specific activities described below.

(enter text here)

Connect this course to the Goals and ELOs shared by *all* Themes

Below are the Goals and ELOs common to all Themes. In the accompanying table, for each ELO, describe the activities (discussions, readings, lectures, assignments) that provide opportunities for students to achieve those outcomes. The answer should be concise and use language accessible to colleagues outside of the submitting department or discipline. The specifics of the activities matter—listing “readings” without a reference to the topic of those readings will not allow the reviewers to understand how the ELO will be met. However, the panel evaluating the fit of the course to the Theme will review this form in conjunction with the syllabus, so if readings, lecture/discussion topics, or other specifics are provided on the syllabus, it is not necessary to reiterate them within this form. The ELOs are expected to vary in their “coverage” in terms of number of activities or emphasis within the course. Examples from successful courses are shared on the next page.

Goal 1: Successful students will analyze an important topic or idea at a more advanced and in-depth level than the foundations. In this context, “advanced” refers to courses that are e.g., synthetic, rely on research or cutting-edge findings, or deeply engage with the subject matter, among other possibilities.

Goal 2: Successful students will integrate approaches to the theme by making connections to out-of-classroom experiences with academic knowledge or across disciplines and/or to work they have done in previous classes and that they anticipate doing in future.

	Course activities and assignments to meet these ELOs
ELO 1.1 Engage in critical and logical thinking.	
ELO 1.2 Engage in an advanced, in-depth, scholarly exploration of the topic or ideas within this theme.	
ELO 2.1 Identify, describe, and synthesize approaches or experiences.	
ELO 2.2 Demonstrate a developing sense of self as a learner through reflection, self-assessment, and creative work, building on prior experiences to respond to new and challenging contexts.	

Example responses for proposals within “Citizenship” (from Sociology 3200, Comm 2850, French 2803):

ELO 1.1 Engage in critical and logical thinking.	<i>This course will build skills needed to engage in critical and logical thinking about immigration and immigration related policy through: Weekly reading response papers which require the students to synthesize and critically evaluate cutting-edge scholarship on immigration; Engagement in class-based discussion and debates on immigration-related topics using evidence-based logical reasoning to evaluate policy positions; Completion of an assignment which build skills in analyzing empirical data on immigration (Assignment #1)</i>
---	---

	<p>Completion 3 assignments which build skills in connecting individual experiences with broader population-based patterns (Assignments #1, #2, #3)</p> <p>Completion of 3 quizzes in which students demonstrate comprehension of the course readings and materials.</p>
<p>ELO 2.1 Identify, describe, and synthesize approaches or experiences.</p>	<p>Students engage in advanced exploration of each module topic through a combination of lectures, readings, and discussions.</p> <p><u>Lecture</u> Course materials come from a variety of sources to help students engage in the relationship between media and citizenship at an advanced level. Each of the 12 modules has 3-4 lectures that contain information from both peer-reviewed and popular sources. Additionally, each module has at least one guest lecture from an expert in that topic to increase students' access to people with expertise in a variety of areas.</p> <p><u>Reading</u> The textbook for this course provides background information on each topic and corresponds to the lectures. Students also take some control over their own learning by choosing at least one peer-reviewed article and at least one newspaper article from outside the class materials to read and include in their weekly discussion posts.</p> <p><u>Discussions</u> Students do weekly discussions and are given flexibility in their topic choices in order to allow them to take some control over their education. They are also asked to provide information from sources they've found outside the lecture materials. In this way, they are able to explore areas of particular interest to them and practice the skills they will need to gather information about current events, analyze this information, and communicate it with others.</p> <p>Activity Example: Civility impacts citizenship behaviors in many ways. Students are asked to choose a TED talk from a provided list (or choose another speech of their interest) and summarize and evaluate what it says about the relationship between civility and citizenship. Examples of Ted Talks on the list include Steven Petrow on the difference between being polite and being civil, Chimamanda Ngozi Adichie's talk on how a single story can perpetuate stereotypes, and Claire Wardle's talk on how diversity can enhance citizenship.</p>
<p>ELO 2.2 Demonstrate a developing sense of self as a learner through reflection, self-assessment, and creative work, building on prior experiences to respond to new and challenging contexts.</p>	<p>Students will conduct research on a specific event or site in Paris not already discussed in depth in class. Students will submit a 300-word abstract of their topic and a bibliography of at least five reputable academic and mainstream sources. At the end of the semester they will submit a 5-page research paper and present their findings in a 10-minute oral and visual presentation in a small-group setting in Zoom.</p> <p>Some examples of events and sites: The Paris Commune, an 1871 socialist uprising violently squelched by conservative forces</p>

	<i>Jazz-Age Montmartre, where a small community of African-Americans—including actress and singer Josephine Baker, who was just inducted into the French Pantheon—settled and worked after World War I.</i> <i>The Vélodrome d’hiver Roundup, 16-17 July 1942, when 13,000 Jews were rounded up by Paris police before being sent to concentration camps</i> <i>The Marais, a vibrant Paris neighborhood inhabited over the centuries by aristocrats, then Jews, then the LGBTQ+ community, among other groups.</i>
--	---

Goals and ELOs unique to Health & Wellbeing

Below are the Goals and ELOs specific to this Theme. As above, in the accompanying Table, for each ELO, describe the activities (discussions, readings, lectures, assignments) that provide opportunities for students to achieve those outcomes. The answer should be concise and use language accessible to colleagues outside of the submitting department or discipline. The ELOs are expected to vary in their “coverage” in terms of number of activities or emphasis within the course. Examples from successful courses are shared on the next page.

GOAL 3: Students will explore and analyze health and wellbeing through attention to at least two dimensions of wellbeing. (Ex: physical, mental, emotional, career, environmental, spiritual, intellectual, creative, financial, etc.).

	Course activities and assignments to meet these ELOs
ELO 3.1 Explore and analyze health and wellbeing from theoretical, socio-economic, scientific, historical, cultural, technological, policy, and/or personal perspectives.	
ELO 3.2 Identify, reflect on, or apply strategies for promoting health and well-being.	

Service-Learning Course Inventory

Overview

The GE allows students to take a single, 4+ credit course to satisfy a particular GE Theme requirement if that course includes key practices that are recognized as integrative and high impact. Courses seeking one of these designations need to provide a completed Integrative Practices Inventory at the time of course submission. This will be evaluated with the rest of the course materials (syllabus, Theme Course submission document, etc). Approved Integrative Practices courses will need to participate in assessment both for their Theme category and for their integrative practice.

Please enter text in the boxes below to describe how your class will meet the expectations of Service-Learning Courses. It may be helpful to consult the Description & Expectations document for this pedagogical practice or to consult the OSU Office of Service Learning as you develop your course and complete this inventory. You may also want to consult the Director of Undergraduate Studies or appropriate support staff person as you complete this Inventory and submit your course.

Please use language that is clear and concise and that colleagues outside of your discipline will be able to follow. You are encouraged to refer specifically to the syllabus submitted for the course, since the reviewers will also have that document. Because this document will be used in the course review and approval process, you should be as specific as possible, listing concrete activities, specific theories, names of scholars, titles of textbooks etc.

Accessibility

If you have a disability and have trouble accessing this document or need to receive it in another format, please reach out to Meg Daly at daly.66@osu.edu or call 614-247-8412.

Pedagogical Practices for Service-Learning

Course subject & number

PHR3430

Performance expectations set at appropriately high levels (e.g. Students engage in appropriately linked academic and experiential exploration of the community setting in which they study). Please link this expectation to the course goals, topics and activities and indicate *specific* activities/assignments through which it will be met. (50-500 words)

Students engage in appropriately high level academic and experiential exploration of cancer wellness innovations in the community setting of Pelotonia's headquarters. Student activities at the community site include orientation to philanthropy operations around furthering cancer wellness innovations (ELO1.2.a), interview trainings, in-depth interviews with cancer "questers" (researchers, healthcare professionals, advocates; ELO2.1.a,2.2.b) that include training pathways and the impact of emerging cancer wellness innovations in their roles (ELO2.2.a), training on impact reporting (ELO2.1.a), social media campaign trainings, social media campaign production around a cancer wellness innovation (ELO1.2.a), and "gallery walk" presentations with cancer wellness research stakeholders. Student performance expectations on the impact report and social media campaign deliverables are particularly high considering how the spring offering of the course precedes directly into Pelotonia's peak philanthropy season when their marketing department will immediately share out the students' impact reports and social media campaigns to stakeholders.

Significant investment of time and effort by students over an extended period of time (e.g. develop an increasing appreciation of the issues, resources, assets, and cultures of the community in which they are working). Please link this expectation to the course goals, topics and activities and indicate *specific* activities/assignments through which it will be met. (50-500 words)

Approximately half of students' effort is split between didactic lectures (2 hours direct instruction plus 4 hours outside work on socially annotated research articles each week to earn a "C" grade) and experiential learning at Pelotonia's headquarters in the Carmenton innovation district (2 hours direct community-engagement plus 4 hours outside work on cancer "quester" impact reports and social media campaign). Student engagement with Pelotonia staff, interviewing cancer "questers", and presenting to stakeholders in cancer wellness each week develops students' increasing appreciation for issues in cancer wellness and the resources/assets/culture of the cancer "quester" community (ELO2.2.a,2.2.b). The final reflection on the cancer "quester" training pathways allows students to make connections between the cancer wellness community and their own personal experiences and training goals (ELO2.1.a,2.2.a).

Interactions with faculty, peers, and community partners about substantive matters including regular, meaningful faculty mentoring, peer support, and community partner interaction. Please link this expectation to the course goals, topics and activities and indicate *specific* activities/assignments through which it will be met. (50-500 words)

Students Interact meaningfully with faculty both asynchronously while socially annotating weekly research articles with faculty seeded assessment annotations (ELO1.1.a,1.1.b) along with formative feedback on student murkiest point annotations (ELO1.1.c) and synchronously during in-class discussions led by socially annotated research articles and TopHat-led small group discussions (ELO1.2.a). Faculty mentorship is also provided during formative feedback on all the cancer quester interview and social media campaign checkpoints.

Students interact meaningfully with peers while asynchronous socially annotating weekly research articles and synchronously during in-class discussions (ELO1.1.a,b,c). Peer review of social media campaign checkpoints include the research article review and the gallery walk of social media campaigns (ELO1.2.a).

Students interact meaningfully with community partners while receiving training on Pelotonia operations, interviewing, and social media campaigns (ELO1.2.a). During these interactions students will interview cancer quester healthcare professionals, researchers, and advocates on their role in the quest for the cancer cure, training pathway, and emerging cancer wellness innovations (ELO2.1.b,2.2.b). Collaborating with Pelotonia staff on producing the impact report from cancer questers also allows for student reflection on their own training goals (ELO2.1.a,2.2.a) while the social media campaign allows for student interaction with Pelotonia's stakeholders (ELO1.2.a,2.1.b).

Students will get frequent, timely, and constructive feedback on their work from all appropriate sources, especially on their community awareness and engagement, and their experience with difficult differences. Please link this expectation to the course goals, topics and activities and indicate *specific* activities/assignments through which it will be met. (50-500 words)

Students receive twice weekly feedback on their socially annotated research article readings, immediate feedback on in-class understanding of cancer wellness concepts via TopHat questions (ELO1.1.a,b,c). Student cancer quester interview impact report (ELO2.1.b,2.2.a,2.2.b) and social media campaign projects (ELO1.2.a,2.1.a) are scaffolded into almost weekly checkpoints for students to receive instructor and peer feedback on their project progress. Weekly interactions with Pelotonia staff during trainings and project progression as well as didactic teaching on social determinants of cancer health and survivorship during the last modules of the course will particularly provide students with feedback on their cancer wellness community awareness/engagement and their experience with difficult differences in cancer questers and survivors whose experiences are unlike their own (ELO2.1.b,2.2.a,2.2.b).

Periodic, structured opportunities to reflect and integrate learning (e. g. reflect on the service activity in such a way as to gain further understanding of course content, a broader appreciation of the discipline, and an enhanced sense of personal values and civic responsibility). Please link this expectation to the course goals, topics and activities and indicate *specific* activities/assignments through which it will be met. (50-500 words)

During almost weekly scaffolded checkpoints in student cancer quester interview impact report and cancer wellness innovation social media campaign, students will complete training on Pelotonia operations, interviewing, and social media campaign production where they will be tasked with reflecting on how their training is relevant to their perspective careers and personal goals (ELO2.2.a). Students will also be tasked with submitting a reflection at the end of the semester on how the cancer quester interview and service learning experiences resonated with their own identity formation as a cancer quester in their sense of personal values and civic responsibility (ELO2.1.b,2.2.b).

Opportunities to discover relevance of learning through real-world applications (e.g., intentional connection between academic content and the community work in which they engage). Please link this expectation to the course goals, topics and activities and indicate *specific* activities/assignments through which it will be met. (50-500 words)

Students connect academic content on cancer wellness innovations in therapy, prevent/detection, disparities, and survivorship during twice weekly lectures (ELO1.1.a,b,c) toward community impacts of these same cancer wellness innovations in the cancer community during weekly Pelotonia trainings and progression in their cancer quester interview impact report (ELO2.1.b,2.2.a,2.2.b) and cancer wellness innovation social media campaign production (ELO1.2.a,2.1.a). Pelotonia staff, cancer questers, and stakeholders are often the most impacted by cancer wellness innovations and would strongly reinforce students on the relevance of their cancer wellness innovations learning on the cancer community.

Public Demonstration of competence in academic settings and, if possible, in the community engagement site. Please link this expectation to the course goals, topics and activities and indicate *specific* activities/assignments through which it will be met. (50-500 words)

Students will be tasked to publicly demonstrate both their learning in cancer wellness innovations as well as their competence in community engagement during the cancer quester interviewing (ELO2.1.b,2.2.a,2.2.b) at the Pelotonia headquarters community engagement site in addition to providing Pelotonia with deliverable impact reports on Pelotonia's research grant awardees and social media campaigns that will be presented to not only Pelotonia staff and classmates but also to stakeholders during the start of Pelotonia's peak fundraising season at the end of spring (ELO1.2.a,2.1.a).

Experiences with diversity wherein students demonstrate intercultural competence and empathy with people and worldview frameworks that may differ from their own. Please link this expectation to the course goals, topics and activities and indicate *specific* activities/assignments through which it will be met. (50-500 words)

Students experience diversity of worldview in their interactions with classmates during in-class discussions and Pelotonia trainings that encourage civil discourse around cancer wellness topics and psychological safety in sharing differing opinions (ELO1.1.c). The cancer questers likewise come from a diversity of worldviews in terms of roles in the quest for the cancer cure and personal training pathways where students will demonstrate intercultural competence and empathy during the interview trainings and the interview itself (ELO2.1.b,2.2.a,2.2.b). Didactic teaching on social determinants of cancer health and survivorship during the last modules of the course will particularly task students to demonstrate intercultural competence and empathy with cancer survivors whose challenges in cancer wellness may differ from student's own (ELO1.1.a,1.1.b,2.2.b).

Explicit and intentional efforts to promote inclusivity and a sense of belonging and safety for students, e.g. universal design principles, culturally responsible pedagogy. Please link this expectation to the course goals, topics and activities and indicate *specific* activities/assignments through which it will be met. (50-500 words)

I have previously demonstrated my unique approach to socially annotated research article guided journal clubs provide students with the psychological safety of "warm calling" students into journal club discussions that has resulted in notable enhancements in student sense of belonging through the Persistence in The Sciences (PITs) survey:
<https://pharmacy.osu.edu/news/nick-denton-receives-inaugural-hypothesis-social-learning-innovator-award>

Furthermore, the course syllabus and introductory lecture emphasizes inclusivity and respect both inside the classroom and out at the community engagement site of Pelotonia headquarters. This is reemphasized again at the start of the cancer disparities module to remind students of intersectionality of identity and the dangers of generalizing the experience of individual cancer patients (as well as classmates and community partners) into stereotypes about different communities.

Other examples of culturally responsible pedagogy include explicitly stating class procedures for extending deadlines due to family, health, work, and religious observances and including the professional headshots from each coauthor on the research articles to emphasize the diverse and collaborative research teams involved in the quest for the cancer cure. Universal design for learning principles include making all course materials and assessments digitally accessible, Transparency in Learning and Teaching (TILT) designed assignment pages, and multiple modalities of assessment including verbal/non-verbal and synchronous/asynchronous demonstrations of learning.

Service-Learning Course Inventory

Clear plan to promote this course to get a wider enrollment of typically underserved populations. Please link this expectation to the course goals, topics and activities and indicate *specific* activities/assignments through which it will be met. (50-500 words)

PHR3430 already is within the College of Pharmacy curriculum as a science elective that is communicated out to our perspective students for Bachelors of Science in Pharmaceutical Science majors and Pharmaceutical Science minor. The college's PROPEL program particularly reaches out to high schools and community colleges that enroll high portions of underserved student populations where I plan to advertise PHR3430 as a highly attractive course uniquely suited for students interested in a cancer wellness career that covers both the Health and Wellness themes GE and 4 credit hour high impact practices GE requirements.
