Completion of ASC Honors Program requirements: For a full list of requirement, please see the executive summary. Students must complete at least "5 honors math eligible courses" selected in consultation with an honors math advisor.

Total Credits	**121**

**** It is our understanding that 2182H is not offered in the Fall. Also, the written prerequisite is 1181H or 4181H, neither of which this student has completed. It is also a 5 Credit-hour class. We would recommend using Math 2153 in this spot, but we do not want to change anything directly related to the major.

***** We moved the WIL requirement to before this class, since it is strongly recommended to take first.
