Dr. Andrew Martin, Associate Dean for Undergraduate Education
The College of Arts & Sciences
The Ohio State University
186 University Hall
230 North Oval Mall
Columbus, OH 43210

Dear Dr. Martin,

The Office of Undergraduate Education is pleased to support the proposed policy change for the Computer and Information Science (CIS) majors in the College of Arts and Sciences. Given the strong similarities these two majors (BA and BS) share with the Computer Science Engineering major in the College of Engineering, a significant number of students switch among these three majors. The proposed change will align probation and dismissal policies for all three computer science majors at Ohio State, which will create a more coherent and fair set of standards for all students in these majors.

Please do not hesitate to reach out if you have any questions or concerns.

Respectfully,

Norman W. Jones, Ph.D.
Vice Provost and Dean for Undergraduate Education
